Mr. Speaker, we are all proud of our veterans and today I seek national recognition of Benda-Roehrich Post No. 2867, VFW, Garfield, N.J., not only for their sincerity of purpose and dedication to the noble goals and objectives of their organization of veterans but for their service to our country and all mankind. As members of our armed services they have known the pain and suffering of battle in foreign lands. As members of the VFW they have sought legislative and administrative measures to provide our veterans and their families with the dignity, respect, protection, and security of our country which they so richly deserve.

For their contribution to the quality of life and way of life here in America, we do indeed salute the veterans and ladies auxiliary of Benda-Roehrich Post No. 2867, VFW, Garfield, N.J., upon the celebration of the 50th golden anniversary of their founding.●

EUROPEAN LEADERS SPEAK OUT ON INF

HON. EDWARD J. MARKEY
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. MARKEY. Mr. Speaker, the deployment of 572 Pershing II and ground-launched cruise missiles is scheduled to begin this December. It is a deployment that is creating more problems than solutions.

Public opinion polls show that a majority of Europeans oppose the deployment or favor some type of delay in the deployment. Indeed, it appears that the deployment, which was supposed to demonstrate NATO unity, is in fact tearing NATO apart.

Last week, a number of my colleagues and I held a public forum with a distinguished group of European parliamentarians who are deeply concerned about the planned deployment. Among those testifying at the public forum was Mr. Denis Healey, who was Defense Minister of Great Britian from 1964 to 1970. From 1974 to 1979, Mr. Healey also served as Chancellor of the Exchequer. Presently, he is deputy party leader of the Labour Party and its shadow foreign secretary.

I commend Mr. Healey's enlightening testimony to my colleagues. He makes a number of important points on the political and military impact of the proposed deployment.

The testimony follows:

TESTIMONY BEFORE MEMBERS OF THE U.S. CONGRESS BY HON. DENIS HEALEY MP, DEPUTY LEADER OF THE LABOUR PARTY

The massacre off Sakhalin Island reminds us yet again that the Soviet Union displays a paranoic sensitivity about its security and a ruthless brutality in protecting it.

It has also taught us two other lessons of vital importance in an age of nuclear confrontation: that even the most advanced electronic equipment is not immune from human or mechanical failure, and that even in peacetime neither Russia nor the West can be satisfied with their systems for command, communication and control, still less with their ability to communicate with one another in a crisis.

So reasonable men all over the world have taken comfort in President Reagan's moderate and restrained response to the massacre, and in his determination not to allow it to distract him from the pursuit of agreement with the Soviet Union on the control of nuclear armaments. For, as the Scowcroft Report insists, "arms control can: reduce the risk of war; help limit the spread of nuclear weapons; remove or reduce the risk of misunderstanding of particular events or accidents . . . . and help channel modernization into stabilizing rather than destabilizing paths."

The Scowcroft Report continues: "stability should be the primary objective of both the modernization of our strategic forces and of our control proposals" which it says "should thus be integrated and mutually reinforcing". I believe this is the right approach. It has overwhelming support both in United States and among her European allies. It is the basis of my agrument for a nuclear freeze and the abandonment of plans to deploy Cruise and Pershing II in Europe.

There is rough overall global equivalence in nuclear weapons between the superpowers today. That was the unanimous conclusion of a recent conference organized in Hamburg by Time magazine, and was specifically endorsed there by the three major experts on nuclear defense in the current American administration, Mr. Ikle, Mr. Perle, and Mr. Burt. Nuclear equivalence is of course compatible with substantial differences in the composition of the forces on each side, which reflect differences in geography as well as in technology. For example, America has a big lead in submarine-based missiles and heavy bombers, Russia in land-based missiles. This difference has existed for twenty years, not only world wide but also in the European theatre. I believe that nuclear equivalence has survived in Europe even after the replacement of SS-4 and SS-5 missiles by the SS-20, since the U.S. missile submarines assigned to NATO twenty years ago to offset the Soviet land-based missiles then being introduced have been

greatly improved over the period and will improve still more in the coming years.

At present equivalence is maintained both globally and regionally at levels of destructive power far greater than is justified by any rational military purpose. Both sides have enough weapons to destroy the world ten times over. The usual excuse is that this horrendous superfluity is necessary to permit a flexible response to any level of nuclear attack; but most experts now agree that weakness in command and communication and in targeting policy would make it impossible to control escalation in nuclear war.

The case for reducing the arsenals on both sides to the minimum required for deterrence is overwhelming. This should be our ultimate objective. But by far the most urgent task at present is to freeze the balance at its present level. For unless a freeze can be agreed in the next few months, both sides will embark on new weapons programmes which will rapidly destabilize even the existing balance, and make future arms control more difficult.

The immediate danger lies in two areas. The first is in weapons with high accuracy against hard targets which may appear to be intended for a first strike against an adversary's command and control centres yet are vulnerable to a pre-emptive strike by him. This is the case with the Pershing II. The second is in weapons which cannot be detected with certainty without a degree of on-site inspection which neither side would tolerate. This is the case with the Cruise missile, particularly when deployed on surface ships or submarines. The land-based Cruise in Europe may also be seen as a first-strike weapon since it may often be too vulnerable on-site to survive a first-strike by the other side.

The West is committed to deploy both these weapons over the next twelve months. It is certain that Russia will deploy similar weapons in response, so as to maintain the present equivalence. So the West will gain nothing by its deployment any more than it did by installing MIRV's. However the new balance will be inherently unstable and much less susceptible to arms control. If we take the Scowcroft approach seriously we must stop this deployment now.

Meanwhile the proposal to deploy Cruise and Pershing has engulfed NATO in a growing crisis. It was originally seen by many Europeans, including Chancellor Schmidt, as strengthening the unity of the alliance by making strategic retaliation by the United States more credible. I myself have always taken the opposite view. I believe that their deployment would tend to make the American deterrent less credible; for it is difficult to justify the deployment of these missiles unless you believe that Washington might be more ready to authorize their use than the use of the Poseidon missiles already assigned to SACEUR because there would then be more chance of limiting the nuclear exchange to Europe and maintaining American territory as a nuclear sanctuary.

The idea of a nuclear war limited to European soil has never been appealing to Europeans. The citizens of Southern England and Southwest Germany are no more enthusiastic than the citizens of Utah to provide targets for Soviet attack. So the missile deployment is bound to be resisted and European governments will be compelled to demand a voice in their control and targeting, which Washington cannot concede. A substantial majority of the Germans and British oppose deployment and many conservative MP's may vote against it unless Britain shares physical contact of the missiles. This will impose great and continuing strains on the alliance. Meanwhile there is growing doubt among the experts whether there is any military case for the missiles at all. In Britain, for example, Field-Marshal Lord Carver and Professor Michael Howard believe not. Even Helmut Schmidt is now voicing grave doubts about the wisdom of the original decision. The fact is that the Cruise/Pershing deployment is militarily unnecessary, damaging to the unity of NATO and a major obstacle to arms control.

Indeed the main argument now used for going ahead with the Cruise/Pershing decision is quite different from that orginally used—it is that NATO would give Russia a psychological victory if it now admitted that it made a mistake in December 1979. But NATO has admitted mistakes on similar issues before, and always to its advantage. The most relevant example was the abandonment of the scheme for a Multilateral Nuclear Force in 1964. This was also a proposal for artificial dissemination invented to meet supposed German doubts about the credibility to American deterrence. But at least the MLF could have put those missiles "out to sea, where the real estate is free, and they're miles away from me". I have found no one who now believes NATO suffered by giving up the MLF.

The controversies surrounding the Cruise/Pershing deployment have in any case opened the lid of Pandora's Box. NATO is now being compelled to re-examine many of the issues which it was able to fudge successfully in the days when the wisdom and consistency of American leadership was taken for granted—the credibility of extended deterrence, the role of national nuclear forces in NATO, the control of American nuclear forces on European soil, the validity of forward defense, the need to threaten first use of nuclear weapons. This process of reappraisal will bring some bruising years. The strain it imposes on the alliance will be much more painful if the same years also see growing public protest as the Cruise/Pershing deployment slowly proceeds.

I can recall few times in the last thirty years when NATO has not been described as being in disarray. Yet as the alliance has survived because North America and Western Europe both know it is the indispensable foundation on which the security of North America and Western Europe depends. It will survive its present troubles too—on one condition. Those in charge of its affairs must be more sensitive to public opinion—in other allied countries as well as their own—and to the genuine concern of those with deep personal experiences of its affairs.

The peace movement is no longer simply an emotional revulsion against the obscenity of nuclear war. The protest against the arms race is now articulated by men on both sides of the Atlantic who have held high responsibility for Western defense as political and military leaders.

I do not have a ready answer to all the problems I have mentioned. Nuclear strategy is in a hole which is getting deeper every day. We do not know how to get out of it. Above all, we need time to find solutions. So we should adopt the first law of holes. When you are in one—stop digging. That is the fundamental case for a nuclear freeze. I hope other Parliaments will follow the example of your House of Representatives and endorse it. The first step must be to abandon the deployment of Cruise and Pershing.●

SENATE—*Friday, September 23, 1983*

(Legislative day of Monday, September 19, 1983)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father God, thank Thee for life. Thank Thee for another day. We awoke this morning well and strong. Many did not awaken from sleep and many who did were unable to get out of bed. Some had to be hurried to a hospital.

Thank Thee, dear Lord, for this day with all its promise, challenge, and opportunity. May we not presume upon it as though we have some special right to life. May we remember that life and breath are gifts from Thee, that each of us has a purpose—a ministry for today, and that we are accountable to Thee in its fulfillment. In Jesus name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, at 10 a.m. today, it is the intention of the leadership to ask the Senate to turn to the consideration of the Export-Import Bank bill. I anticipate that we can pass that bill by noon or shortly thereafter.

After that, it is the intention of the leadership on this side to ask the Senate to resume consideration of the Department of State authorizations bill, which is the unfinished business.

The PRESIDENT pro tempore. It is the pending business.

Mr. BAKER. The pending business.

AUTHORITY FOR COMMITTEE ON FOREIGN RELATIONS TO MEET

Mr. BAKER. Mr. President, yesterday, when we went out, I had planned to ask the Senate to come in at 10 a.m. today—that had been worked over in my mind—to allow the Foreign Relations Committee to meet until noon today. They have decided within their own precincts that they wanted to meet from 9 until 12 noon today to consider the markup of the war powers resolution. That would mean, of course, under the rules of the Senate, that the 2 hours after the Senate convened would expire at 12 o'clock.

I have to confess, Mr. President, that when I was requested to start the Export-Import bill at 10 instead of coming in at 10, I neglected to provide that the Senate Foreign Relations Committee could meet for an extra 30 minutes. That would mean from 11:30 they could meet, by reason of the rules, until 12 o'clock, when they would have completed their action. They may very well have completed their action by that time.

I would hope, just to cover that contingency, since it is my fault since I neglected to make that adjustment last evening, that there might not be an objection to the request to extend the time for the committee to meet during the session of the Senate for that brief 30-minute period.

I have discussed this with the minority leader. I do not know whether he has been able to clear it yet or not.

I have also told him that I am obligated to make room for the committee to meet. If there is an objection on either side of the aisle, I feel a leadership obligation to ask the Senate to recess from 11:30 until 12 o'clock so the committee can continue to meet, which they could do under those circumstances.

I would prefer not to waste that 30 minutes because we may need it to complete deliberations on the Export-Import Bank bill. That would be the only way I could honor my responsibility to the Foreign Relations Committee if there was an objection.

Could I inquire of the minority leader at this time if he is in a position to clear that? If he is, I would be grateful and, if he is not, I fully understand.

Mr. BYRD. Mr. President, the majority leader has correctly stated the situation and the alternative which he could take, which would serve the purpose just as well. There is no point in objecting to a committee meeting when he could recess the Senate and accomplish the same purpose. I have no objection.

Mr. BAKER. I thank the Senator.

Mr. President, I make that request.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair, the minority leader, and all Senators.

(Later the following occurred:)

Mr. HEINZ. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, September 23, until 1 p.m. to consider Senate Joint Resolution 166 relating to the War Powers Act and the situation in Lebanon. I would say to my friend from West Virginia I understand this has been cleared with the minority, but I see the minority leader is more than prepared to speak for himself.

Mr. BYRD. Mr. President, reserving the right to object and I shall not object, I should say for the Record, however, that if there were objection, the majority leader would have the alternative of going into a recess, which would accomplish the purpose, even if we were disposed to object. We will not object.

Mr. HEINZ. I thank my friend.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Conclusion of subsequent proceedings.)

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I hope we can complete work, as I said earlier, on the Export-Import Bank bill and on the Department of State authorizations bill, which is the pending business.

Mr. President, I have no further need for my time under the standing order. At this time, I am prepared to yield my remaining time to the minority leader, if he wishes it.

Mr. BYRD. Mr. President, I thank the majority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. DURENBERGER). The minority leader is recognized.

REPORT OF OFFICIAL DELEGATION OF DEMOCRATIC SENATORS TO THE SOVIET UNION

Mr. BYRD. Mr. President, in August of this year I authorized an official delegation of Democratic Senators, under the chairmanship of Senator CLAIBORNE PELL, the ranking member of the Foreign Relations Committee, to visit the Soviet Union. I discussed this matter with the distinguished majority leader before I appointed this delegation just to be sure that he had no problem with it or that he had no objection. He had none. He was very gracious in suggesting that I proceed.

Other members of the delegation included Senators RUSSELL LONG, DALE

BUMPERS, PATRICK LEAHY, HOWARD METZENBAUM, DONALD RIEGLE, PAUL SARBANES, JAMES SASSER, and DENNIS DECONCINI.

During their visit, they met with President Yuri Andropov and numerous other high ranking officials in several cities throughout the Soviet Union. They took the opportunity to express their concerns regarding the lagging peace talks in Geneva, the repeated Soviet violations of human rights, and Soviet involvement in Afghanistan and elsewhere, in addition to a number of other serious issues.

The Soviet response to these concerns and the delegation's impressions and recommendations are thoughtfully and thoroughly compiled in a report the delegation has submitted to me, as Democratic leader.

I believe every Member of the Senate as well as appropriate policy officials in the administration, including the President, would benefit from reading this document. It is a report that reflects the hard work of the delegation not only in executing their charge while in the Soviet Union, but also the long hours of preparation before departing and the many hours of debriefing and reflection upon their return.

I have informed the distinguished majority leader that I intend to ask unanimous consent that the report be printed as a Senate document and he has given his approval thereof. So, Mr. President, I ask unanimous consent that the delegation report be printed as a Senate document.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I yield my remaining time to the majority leader or I yield it back.

Mr. BAKER. Mr. President, I yield back the remaining time under the standing order.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business.

LAND REFORM IN EL SALVADOR

Mr. PACKWOOD. Mr. President, land reform in El Salvador will face a major test next week when the Constituent Assembly considers a series of articles of a draft constitution that deal with the land reform program. I rise today to express my concern about the possible outcome of this vote and the effect the draft constitution could have on the land reform program.

The articles being proposed by the ARENA party could negate or greatly curtail the progress made under agrarian reform in El Salvador. They are expected to be debated in the Constituent Assembly in San Salvador next week.

One of the proposed provisions would constitutionally limit the scope of the land reform program by forcing the termination of the application process under the 1980 land-to-the-tillers law at the end of this year. It is estimated that the land-to-the-tillers program will be only 40 to 50 percent complete by this time, with 50,000 to 60,000 families out of a minimum of 125,000 intended beneficiaries having been reached.

The ARENA proposal also calls into question the continuing validity of phase 1 of the land reform, under which more than 300 large estates have been acquired, to the benefit of some 32,000 families that had been agricultural laborers.

These ARENA proposals are strongly opposed by the Christian Democratic Party and by broadly based democratic unions and campesino organizations which constitute the best hope for creating a viable center in El Salvador. These groups will be offering alternative constitutional language next week which affirms the validity of the land reform.

I am convinced that the land reform program in El Salvador is critical to our interests in that country. Over the years, rigid social structures and the unwillingness of the ruling elite to share political power with the rest of the population have worked against democratic development in Salvador. I believe it is in our interests to change this situation—to try to overcome the economic inequities and social injustices that have led to instability not only in El Salvador, but in all of Central America.

I believe that agrarian reform can act as a catalyst in this process of democratic development. While the transfer of land does not automatically imply the transfer of power, there is little doubt that it is a step in the right direction and can help build a more viable body politic in El Salvador.

The vote in the Constituent Assembly on the constitutional articles dealing with land reform is currently scheduled for Tuesday, and all indications are that the vote will be close. It is my hope, Mr. President, that the centrist forces in the government can put together a coalition, as they have done before at critical times, to defeat the proposed articles. I think it is imperative that they do so, not only for the sake of stability in El Salvador, but also to insure that a consensus on U.S. aid to El Salvador can be maintained in Congress.

Mr. President, the urgent and imminent issue involving land reform is the vote in the Constituent Assembly in El Salvador on Tuesday. In a larger sense, I hope that this Congress would make land reform a major factor in its considerations when determining whether or not we should grant loans or give aid not only to Latin American countries but to any rural Third World country.

In poor rural countries the one critical reform that is likely to give the central government popularity and the support of the agricultural peasant is whether or not the peasants own the land they farm. There is nothing that will make a man or a woman more likely to support the government than if they own land.

All of us in this body are interested in other democratic reforms. All of us wish that every country in this world had our first amendment and Bill of Rights. All of us wish that all countries throughout the world held regular and periodic elections and allowed minority parties to exist and dissidents to flourish.

Mr. President, it is probably beyond the capacity of this country to impose these things on the rest of the world. Our traditions are heavily Anglo-Saxon and democratic. They are not necessarily traditions shared by the rest of the world. And while we can encourage and cajole and, on occasion, threaten other countries, if we are going to hold out a carrot and a stick and insist that they undertake reforms, I would hope that the first reform we insist upon is transferring the ownership of land into the hands of peasants.

There is hardly a more instructive situation in our recent history than the difference in land reform in Korea and in Vietnam. And this country owes a great debt of gratitude to Prof. Roy Prosterman of the University of Washington in Seattle who is without compare one of the world's leading authorities on land reform. He has traveled more, advised more and done more to advance this cause than any other single person in my knowledge. His comments on Korea and Vietnam and their histories are most instructive. If you look at North and South Korea circa 1950 and North and South Vietnam circa 1960 or 1965, it is interesting to note that of the four countries, if you count the two Koreas as two countries and the two Vietnams as two countries, the only one that had any indicia of what we might call democratic trappings was South Vietnam. At least they had some opposition press. They had religious leaders who would express opposition. They had minorities in their parliament that expressed opposition. This was not true in North Vietnam. It certainly was not true in North or South Korea. South Korea after World War II under Syngman Rhee was as much a dictatorship as most other dictatorships that exist in the world today. But Syngman Rhee undertook some extraordinary steps that stood him in

good stead when North Korea invaded South Korea in 1950.

You will recall that Korea had been occupied by Japan for the better part of the first half of this century. At the end of World War II the Japanese were expelled and Korea at last gained independence in its own right. it was divided at the 38th parallel, with the Communists holding control in the North and Syngman Rhee holding control in the South. President Rhee very quickly distributed to the peasants the lands that the Japanese had held. It can be said that that was an easy step because he did not have to take land from Korean owners. However, by 1950 President Rhee had gone even further and had undertaken a very broad land reform program including purchasing land from large and medium Korean landowners and thereupon transferring full ownership of that land to the vast number of families who had up to then been farming it as tenants. So by the time North Korea invaded in 1950 the land reform program in South Korea was in essence complete.

It is interesting to note that although the North initially had an overwhelming military advantage, because of their sudden thrust there was never, never any South Korean peasant support for the North Korean Army. There was no fifth column. There were no saboteurs. There was no "Viet Cong" in black pajamas sapping the strength of the Syngman Rhee government. The peasants, virtually universally, supported Syngman Rhee, not because he gave them democracy—he certainly did not do that—but because he had given them land. And because of their tenacious support for the South Korean Government and our military intervention on its behalf, the Government survived and today prospers as one of our strong allies.

Now move up 10 or 15 years to Vietnam. Again, I will emphasize that there were some trappings of democracy in South Vietnam—clearly not our Bill of Rights but more democracy than exists in any of the Communist countries and most of the fascist countries of this world today, but there was not land reform. When North Vietnam chose to invade—and I use that in the deliberate sense—just as North Vietnam chose to invade, what they found in South Vietnam was fertile ground for garnering grassroots peasant support for their violent revolutionary efforts.

When the United States intervened we promised the South Vietnamese peasant a constitution. The North Vietnamese promised them land. And it is easy to understand why they chose the latter rather than the former. Had the South Vietnamese Government simply had the presence of mind to do in time in South Vietnam what Syngman Rhee had done in South Korea, South Vietnam today would still be an existing nation, probably an ally of ours, probably an economic success. But they waited until it was too late—although even in 1971 to 1974 when land reform was finally carried out, Viet Cong, recruitment dropped from 5,000 to 7,000 men a month down to 1,000; and the Communists have not dared to collectivize those new peasant owners. But by the early 1970's there were masses of North Vietnamese troops present, and massive unhappiness with the war here. They waited too long, and they lost.

That brings us back full cycle to Latin America and El Salvador in particular.

Mr. President, I would opine that in any rural, poor country that does not undertake land reform, an indigenous government will not long be able to survive with or without our support. I think our position with El Salvador and with others ought to be as follows: We will give you support, we will supply you with economic and military aid, and we will protect you against foreign invasion, especially by more powerful and greedy neighbors, but we cannot give your peasants heart to support your country; only you can do that. And you can do it only if you undertake and complete timely and effective land reform. If you will not undertake and complete such land reform, we will withdraw our aid because in the last analysis it will neither do us any good nor will it save your government.

Somehow, some way, Mr. President, we must convince the oligarchies in Latin America that the day of their owning immense plantations farmed by tenant farmers must be over. They must learn that they are going to move to the cities and become bankers or Sony dealers or Coca-Cola franchisees or operators of insurance companies and they must leave to the former tenant farmer and plantation laborer the land, so that this tenant farmer or laborer might own it, farm it, and possess it with the support of the country.

So, Mr. President, I hope very sincerely that when the Constituent Assembly meets on Tuesday, they understand what the will and the wish of this Government is. We wish that country well, but they must undertake the steps for their own salvation. We can suggest; we can attempt to persuade. We cannot impose. Their future is in their hands. If they undertake the proper steps, they can and should expect our support; and if they do not, they should not get our support, because it will not do any good.

Mr. President, I yield the floor.

LAND REFORM MUST PREVAIL IN EL SALVADOR

Mr. PELL. Mr. President, I want to join Senator PACKWOOD and my other colleagues in expressing grave concern over the very real prospect that land reform in El Salvador could come to an abrupt halt next Tuesday if the vote in the Constituent Assembly goes the wrong way. On that day, the assembly will vote on provisions of the draft constitution, authored by the extremist ARENA party, which if passed will not only end, for all intents and purposes, the land reform program, but will place other reforms in jeopardy as the extreme right becomes emboldened by such victories. It will encourage the extreme right in El Salvador to continue its vendetta against union and peasant groups as well as the moderate political opposition to rightist rule. According to on-the-scene observers, the vote is likely to be 30–30, with the president of the Constituent Assembly and ARENA party leader Roberto D'Aubuisson casting the final and deciding vote.

If passed, the provisions will have a devastating effect. It will end the system whereby applications for titles are awarded under phase III, the land-to-the-tiller program. With fewer than 40 percent of the perspective beneficiaries applying thus far, this means that approximately 80,000 families will be excluded from that which was promised by the Salvadoran Government. The ambiguity of the wording of the provisions places into question the validity of phase I of the program, under which 300 large estates were divided to benefit 32,000 families. The provisions also would end the possibility that lands under phase II, which has been in suspension since the government of President Duarte, will be distributed to the thousands of families on these lands.

What is taking place in El Salvador today is more than a complex and difficult parliamentary situation. It is as important a battle as any that will be fought in that country. It is a battle between the extremist forces of the right, determined to strengthen their role in the country, and the forces of moderation, comprised of peasant and labor unions and the moderate political parties, including the Christian Democrats, who are fighting for social and economic justice as well as for their very existence.

The Popular Democratic Union (UPD), the coalition of unions and peasant organizations, and the Christian Democratic Party support an alternative which confirms the concept of land reform which was adopted and strongly supported by the U.S. Government in 1980. The land reform program would continue and beneficiaries would be granted titles to lands they work. A parliamentary victory for those supporting the alternative provisions would not only preserve the land reform program but will strengthen the forces of moderation.

Land reform is one of the principal pillars upon which United States sup-

port of the government of El Salvador is based. It is very important to those of us in the Congress who have very real problems with other aspects of the difficult issue of El Salvador such as the human rights performance of the military and security forces, the inability of the judicial system to punish those guilty of murders of the American citizens and their own people, and the U.S. military assistance question. I hope that the Government of El Salvador understands that if land reform is ended, there is the very real prospect that the now tenuous support for their government in the United States, will erode even more. Social and economic justice must prevail in El Salvador and land reform is an essential ingredient.

Mr. GORTON. Mr. President, I congratulate the Senator from Oregon on that most eloquent and most profound statement, with which I agree.

As the Senator from Oregon said, next Tuesday, the 27th of September, El Salvador's Constitutent Assembly will vote on a draft of a new Constitution. The Constitutent Assembly was elected in March 1982, with more than 80 percent of El Salvador's eligible population turning out to vote. The fact that this beleagured nation has a functioning legislative body capable of developing a new Constitution should be seen throughout the United States as a sign of great progress and promise.

There are, however, elements of the draft Constitution which are of concern to many people. Because of the important decisions which the Senate makes regarding U.S. aid to El Salvador, I believe these issues should be of interest and concern to all of us.

In particular, several elements of the draft Constitution place at risk the land reform program which is vital to the elimination of severe economic inequities and the establishment of greater social and political stability.

Under phase I of El Salvador's three-part land reform program, 300 large estates were transferred to 32,000 beneficiary families which now farm these lands. This process was begun shortly after the 1979 coup and was completed several years ago. The proposed Constitution leaves ambiguous the validity of phase I, possibly opening the door for elements of the extreme right wing to attempt to restore these estates to their previous owners.

Phase II of the land reform program was intended to transfer 1,800 medium-sized farms to an estimated 30,000 to 50,000 families. For a number of reasons, this program has been set aside. In the future, however, it may prove both desirable and feasible to proceed with phase II. The proposed constitutional language, however, would preclude such a future implementation.

The draft Constitution also would end the taking of beneficiaries' applications for title under phase III. Under this part of the program, known as the "land-to-the-tiller" reform, farms belonging to absentee landlords are being deeded to the peasants who farm them. Thus far, only about 50,000 families, less than 40 percent of the intended beneficiaries, have submitted applications.

These proposals have been drafted by the right-wing ARENA party, which is one of the strongest elements in the Constituent Assembly. Mr. President, I could not be stronger in my support for recognition of the authority of freely elected governmental institutions. I am compelled to say, however, that if a Salvadoran Constitution stops the vital process of land reform in its tracks, the result will be increased polarization, demoralization of those seeking moderation and reform, and greatly diminished prospects for true progress toward democracy.

An alternative proposal, supported by the Christian Democrats and the Popular Democratic Union (UPD) is circulating in the Constituent Assembly. This proposal would reaffirm the validity of the basic land reform legislation, preserving the benefits thus far received by 80,000 campesino families. It would protect the rights of the 80,000 additional intended beneficiaries under phase III, and it would permit the Government to consider in the future the possible implementation of phase II.

Mr. President, our debates over El Salvador have been many, they have been long, and they have been intense. In the course of those debates, it has become clear that there is an overwhelming consensus in support of reform in El Salvador, but there is no consensus—and relatively little support—for El Salvador without reform. We have taken the issue of reform seriously enough to require the President to certify every 6 months that the process of reform is continuing. And within the certification language itself, the one program identified by name is land reform. Prudent judgment strongly suggests that the consequences in Congress will be severe if El Salvador's new Constitution dismantles the land reform program.

I understand that the Constituent Assembly is very evenly divided, with a slight edge currently going to the ARENA party on the Constitution. I sincerely hope that body is aware of the potential for a strongly negative reaction in the United States if its decisions result in an end to land reform.

In this Chamber, we have heard the argument that El Salvador is only a minor figure in the larger struggle between East and West. We also have heard it argued that the insurgency is completely indigenous, an inevitable reaction to dictatorial rule. As is often the case with such intense disagreements, the truth seems to me to lie somewhere between the two. I do not think there is any question that the Salvadoran guerrillas are receiving much of their support from Nicaragua, which almost certainly is acting as a surrogate for Cuba and the Soviet Union. I am equally convinced, however, that the insurgency could not and would not exist were it not for decades of oppression and intense economic inequity. We are rightfully concerned about the attempts of outside interests to destabilize El Salvador, to sabotage the economy, and to frustrate the development of free political institutions. We must also recognize, however, that vast internal changes are needed if El Salvador is to find peace and political freedom. With its heavily agrarian economy, a reasonable distribution of the country's greatest resource—arable land—is vital to the establishment of economic and social stability, and to the development of effective democratic government.

Finally, Mr. President, let us recall the significant progress which El Salvador has made, and let us be aware of the great opportunity which exists as a result of the Salvadoran Government's efforts to open the political process to all parties. The ARENA party, which I mentioned a moment ago, represents El Salvador's right wing and frequently has expressed its opposition to basic reform. Yet it is one of the most popular parties in the country, partially because its leaders are extremely charismatic and partially because so many Salvadorans are receptive to ARENA's promise to end the insurgency, despite its willingness to use violence to achieve that goal.

ARENA, through popular election, holds a plurality in the Constituent Assembly and frequently has attempted to set aside the reform process. I cannot help but believe that if the parties representing the Salvadoran left had participated in the last election, especially if they have the popular support they claim, then there would be a force in the Assembly to balance the extreme right, and the hand of the moderates and the true reformers would be strengthened. Direct discussions with the insurgents have begun, offering them a path into the political process. A Presidential election is scheduled for next year. If the guerrillas and their political leaders are truly interested in promoting constructive change, rather than obstructing it, they have the opportunity to do so, and we have an opportunity to gain a valuable insight into their intentions.

(Mr. PACKWOOD assumed the chair.)

Mr. DURENBERGER. Mr. President, ever since coming to the Senate, I have stressed that the development

of democratic institutions in El Salvador is closely tied to the full implementation of wide-ranging economic reforms. When President Jose Napoleon Duarte came into office in 1980, he brought a thorough recognition that the Salvadoran economy needed to be opened up to all people. To accomplish this goal, he undertook sweeping reforms in the areas of agriculture, banking, and export marketing. He was inhibited in these by both leftist and rightist extremists at home, who wanted a solution based on violence, and by members of the U.S. Congress who sought to deny him the funds for land reform.

Three years have passed since those reforms were proposed, and each step of the process has been continually threatened by the far left and the far right. The latest threat to the land reform program now appears in a draft Constitution that will be voted on Tuesday by the Salvadoran Constituent Assembly. The basic intention of article 104 of that draft Constitution is to destroy the land reform program by undoing what has already been accomplished and by ending any prospect of future reform. Not surprisingly, this article was authored by the ARENA Party of Roberto D'Aubuisson, which seeks to turn the clock back to the days when El Salvador's economy was dominated by a tiny, entrenched elite.

More specifically, article 104 sets out to accomplish the following:

First, it puts phase I of the land reform into jeopardy. This phase affects some 32,000 beneficiary families who have received plots that were formerly part of 300 large estates of 1,200 acres or more.

Second, it removes the prospect for any future implementation of phase II, which contemplates transferring a portion of 1,800 medium-size farms to benefit some 30,000 to 50,000 families now working on these farms.

And third, it effectively halts phase III, the land-to-the-tiller portion of the land reform, on December 31, 1983. As a result, up to 80,000 additional families may not get the opportunity to own their own land.

Those in the Salvadoran Constituent Assembly who would vote in favor of article 104 should know that such action will not go unnoticed in the U.S. Senate. They should be forewarned that land reform is seen here as a cornerstone in El Salvador's democratization process. Finally, they should know that such an action would have serious repercussions in terms of our future commitment.

The land reform process must be allowed to continue. If the disenfranchised—as the Presiding Officer, the Senator from Oregon (Mr. PACKWOOD), has said so eloquently—are permitted an opportunity for economic advancement, their support for democratic political institutions will be all the stronger. Those groups aligned with democracy and pluralism in El Salvador will be strengthened, and the region's stability will be enhanced.

BREAKING THE IMPASSE OVER FARM LEGISLATION

Mr. DOLE. Mr. President, as I am sure everyone in this Chamber realizes, Congress and the administration have been locked in an impasse over farm legislation ever since the 98th Congress convened back in January. Despite the pressing concerns of various farm constituencies, not one agricultural bill of any significance has been passed this year.

In the meantime, the controversy over the rising cost of farm programs has grown, and has begun to threaten the passage of even minor, remedial legislation, much less reauthorization of the major commodity programs that comes up in 1985. If those of us in Congress who represent agriculture are not able to show some responsibility in correcting our programs and restraining their expense, others who are less understanding will begin to take a more active role.

DAIRY AND TARGET PRICE FREEZE

Since June, Mr. President, we have been engaged in a seemingly interminable debate over two issues—the dairy package worked out by a bipartisan group from both Houses last spring, and the target price freeze proposed by the administration. In order to gather support to pass the freeze bill, the administration has tied it to the dairy compromise, and both have become increasingly controversial as Congress has refused to act. Because of the long delay, Secretary of Agriculture Block was forced to announce a program for 1984 wheat that includes the higher, scheduled target price and correspondingly low incentives for production control next year. This plan is not popular with wheat producers, and with reason. In addition, in the absence of new dairy legislation, the administration is prepared to begin collection of the second 50-cent assessment in another week or so. While authorized in last year's budget reconciliation bill, this plan is strongly opposed by dairymen.

So, Mr. President, it is clear that our failure to take legislative action has forced the administration to define farm programs this year and next in terms of the outdated or unpopular laws already passed and on the books. And our continued refusal to find some common ground on these issues, while politically appealing, is not in the interests of our farm constituents.

PROPOSED 1984 WHEAT PROGRAM

Mr. President, some of us have been trying for 3 months to work out some compromise on target prices that will provide wheat farmers with enough incentives to reduce production next year but also bring down indefensible Federal outlays due to the high level of target prices scheduled in the farm bill. Prior to recess, we had worked out a plan with the National Association of Wheat Growers that would have achieved both objectives. Due to the unwillingness of a few Senators to acknowledge the need to make adjustments in farm programs, the plan was not even allowed to come up on the floor.

Since we returned from recess, some of us have continued to offer alternatives that will provide a better program for farmers next year. The same few Senators have shown no interest in even entering into a dialog. I suppose that, as long as it is politically popular to be seen defending farm entitlements—regardless of the consequences for farmers—there will be no progress.

Mr. President, I do not believe that we should continue to hold legislation on the dairy and tobacco programs hostage to the impasse over target prices. To do so would only compound the disservice being done to producers of other commodities, including wheat. As a result, I intend to ask the distinguished chairman of the Committee on Agriculture, Nutrition and Forestry whether he is prepared to bring the dairy and tobacco bill to the floor as soon as there is an appropriate opportunity.

I understand that the distinguished Senator, Senator HELMS, is on his way to the floor at this moment from the Foreign Relations Committee where they have been discussing Lebanon and the War Powers Act.

When he arrives, Mr. President, I intend to offer an amendment on wheat and target prices, and hopefully we can have a vote. It seems to me that we have tied up agricultural programs long enough. The dairy farmer has been wanting action. We have worked out a compromise. The dairy farmers do not like the present 50-cent assessment and they do not want another 50 cents collected.

I would hope that, in the next 10 days, those of us from the farm States, whether Democrats or Republicans, will try to resolve our differences and let the bill come up. Let us vote on the dairy section. There is some opposition, although not very much, to the dairy compromise. Let us vote on the tobacco section. Let us offer an amendment to the wheat section to reduce the increase in target prices and the cost of that program. Then the Secretary of Agriculture can make some changes in the wheat program and we can go to conference with the House.

We are still willing to try to work out a compromise. I am prepared to say for the Senator from North Caroli-

na, who will make a statement later, that he is willing to bring it up at any time. I would hope that my friend from Montana, the distinguished senior Senator, Senator MELCHER, will let us proceed with a vote.

I see the distinguished chairman of the Committee on Agriculture entering the Chamber now.

I will indicate to the Senator that I was just saying we would like to bring up the tobacco and dairy legislation. I indicated in the record that the chairman was tied up in the Foreign Relations Committee but that he was prepared to bring up the legislation. It is my hope that we can move along and get the legislation passed.

Mr. PROXMIRE. Will the Senator from Kansas yield briefly?

Mr. DOLE. I yield.

Mr. PROXMIRE. Mr. President, I would like to say in the 26 years I have been in the Senate I have never seen the dairy farmers of Wisconsin more concerned, more exercised, more unhappy and depressed than they are now. The 50-cent deduction that they are taking from each hundredweight of milk that they sell comes at a time when they have not had an increase since October 1, 1980. That is 3 long years.

Those farmers are really desperate. This is a very, very sad situation.

I am delighted to hear the comments of the Senator from Kansas. I am sure that the Senator from North Carolina shares the concern that we want to move as rapidly as we can to provide some dairy legislation. As I say, our farmers are really in very, very serious straits.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. HELMS. Mr. President, the Senator from Kansas is absolutely correct. We have been trying for a week to bring this legislation up in the Senate. I have been disappointed that those efforts have not prevailed.

The Senator knows the circumstances; I think all Senators do.

I agree with the Senator from Wisconsin. The dairy farmers down my way are contemplating getting up a lynching party and coming up this way to see what is wrong in the U.S. Senate that we cannot bring up a piece of legislation that was reported out months ago from the Committee on Agriculture, Nutrition, and Forestry.

In any case, Mr. President, I commend the distinguished Senator from Kansas. He always plays such an active role in all aspects of agriculture, and particularly on behalf of the Nation's wheat farmers. I concur entirely with what he said.

It is vital that we move this legislation forward, and do so as soon as possible. On Tuesday of this week, I announced that a new effort to pursue these legislative changes was underway. I stated that, in an effort to accommodate those Senators who objected to bringing up the target price bill first, I would instead be willing to bring up S. 1529—the dairy and tobacco bill—with the understanding that a target price amendment would then be offered and voted on as part of that bill.

Unfortunately, there has not been favorable response to my offer from those Senators who had objected previously.

However, we are not about to give up. As the Senator suggested, I have consulted with the majority leader about bringing this legislation before the Senate. It is his desire and mine that we could work something out to improve these programs for farmers, and then to move ahead quickly.

Senator DOLE's proposal is much more generous to farmers than the target price measure previously adopted by the Agriculture Committee and the 1984 wheat program announced by the Secretary of Agriculture. Again, however, those Senators who were objecting before the recess apparently have been unwilling to agree to this proposal.

It should not be necessary to consume a great deal of the Senate's time on these measures because each element of S. 1529 is a bipartisan compromise. However, Senators may wish to offer amendments. I would like to hear from the minority leader as to how long his side of the aisle will require for amendments.

As I stated earlier, Mr. President, it is vital to move this legislation quickly. The second 50-cent dairy assessment is now being collected, and that assessment will cost our dairy farmers $60 million per month. We should replace that assessment with the dairy compromise.

In addition, the Nation's wheat farmers need to know the specifics of the 1984 wheat grain program. Winter wheat planting for the 1984 crop is now getting underway in Texas, Oklahoma, and Kansas. Those farmers cannot delay the planting decisions which they are now making, yet legislation which would change and improve the 1984 program is being delayed in Congress.

Earlier this week we passed legislation to require an earlier announcement of farm programs. Yet some of those who were proponents of early announcement in that case are in the peculiarly inconsistent position of blocking the quick consideration of this measure.

There is no reason to delay this legislation. In fact, such a delay will work a hardship on our Nation's grain and dairy farmers.

I urge my colleagues to allow the Senate to work its will on this measure in a timely way. In fact, I am ready and willing to take up this legislation as soon as Monday, and I encourage my colleagues to join us in adopting this important farm legislation.

Mr. DOLE. Mr. President, I thank both distinguished Senators who represent different constituencies. Wisconsin is a leading dairy State, we are a leading wheat State, and Senator HELMS represents a leading tobacco State.

As the chairman pointed out, these bills were reported out of the committee months ago. The chairman of the committee is prepared to act, has been prepared to act, and is willing to act this afternoon if we can get it done. There should not be any great dispute. I think most Senators should just let us vote. I would hope the Senator from Montana will let us bring up this bill, let us pass the dairy section, and let us act on the wheat section. Some Senators may also have drought amendments. But it would seem to me, Mr. President, that time is running out. It is my hope that we can move very quickly.

Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the amendment I intend to offer, if we ever have an opportunity to offer amendments, with reference to target prices and other provisions which I think would be helpful to the wheat producers in the Midwest.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

On page 53, immediately following line 15, insert the following new title:

TITLE III—TARGET PRICES AND WHEAT PROGRAM

SHORT TITLE

SEC. 301. This title may be cited as the "Target Prices and Wheat Program Act of 1983".

TARGET PRICES

SEC. 302. Notwithstanding the provisions of sections 107B(b)(1)(C), 105B(b)(1)(C), 103(g)(3)(B), and 101(i)(2)(C) of the Agricultural Act of 1949, the Secretary of Agriculture may prescribe that the established prices for the 1984 and 1985 crops of wheat, corn, upland cotton, and rice shall be such prices as the Secretary determines to be appropriate, but in no case shall the price be less than $4.35 per bushel for wheat, $2.92 per bushel for corn, $0.78 per pound for upland cotton, and $11.57 per hundredweight for rice.

ACREAGE LIMITATION AND PAYMENT-IN-KIND PROGRAM FOR WHEAT

SEC. 303. Effective for the 1984 crop of wheat, section 107B(e)(1)(B) of the Agricultural Act of 1949 (7 U.S.C. 1445b-1(e)(1)(B)) is amended to read as follows:

"(B) Notwithstanding any previous announcement to the contrary, for the 1984 crop of wheat the Secretary shall provide for a combination of (i) an acreage limitation program as described under paragraph (2) and a cash acreage diversion program as described under paragraph (5) under which the acreage planted to wheat for harvest on the farm would be limited to the acreage based for the farm reduced by not more

than 30 per centum, consisting of a reduction of 20 per centum under the acreage limitation program and a reduction of 10 per centum under the cash acreage diversion program, and (ii) a voluntary payment-in-kind acreage diversion program, to be carried out under such existing authorities as were relied on by the Secretary to implement the payment-in-kind program for the 1983 crop of wheat, under which the acreage planted to wheat for harvest on the farm would be reduced by an amount, in addition to any reduction under the acreage limitation and cash acreage programs provided for under clause (i), of not more than 20 per centum or less than 10 per centum of the acreage base for the farm. Under the payment-in-kind program described in clause (ii), compensation in kind for diverted acres shall be made available to producers by the Secretary under such terms and conditions as the Secretary shall prescribe and in such amounts as the Secretary determines appropriate to encourage adequate participation in such program, except that the rate of such compensation shall not be less than 85 per centum of the farm program yield. Nothing contained in this subparagraph shall be deemed to prohibit the Secretary from soliciting and accepting bids under the payment-in-kind diversion program from any producer wishing to withdraw the entire base acreage of the farm from production.".

PAYMENT LIMITATIONS

SEC. 304. Notwithstanding the provisions of section 1101 of the Agriculture and Food Act of 1981 (7 U.S.C. 1308), the portion of any payments made to any producer under section 107B(b) of the Agricultural Act of 1949 for the 1984 crop of wheat that the Secretary of Agriculture determines results from the adjustment of the level of loans and purchases on the 1984 crop of wheat in accordance with the proviso in section 107B(a) of the Agriculture Act of 1949 shall not be included in the payments subject to limitations under the provisions of section 1101 of the Agriculture and Food Act of 1981.

Mr. EXON. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. I yield.

Mr. EXON. I thank the Senator.

Mr. President I think all Senators from the farm States are interested in moving ahead with legislation to straighten out some of the very difficult problems we have in agriculture today.

I listened to the comments the Senator from Kansas just made with regard to amendments he intends to offer that would, I think, to use his words, "straighten out" the target price situation.

As the Senator from Kansas and the chairman of the Agriculture Committee know full well, the holdup on this whole matter has been the fact that we have been trying to reach some kind of accommodation, agreement, or compromise with the administration to prevent them from being successful in their attempt at reducing the target price on wheat that was set in the 1981 act. May I ask at this time if the Senator from Kansas, while we are waiting for others to come to the floor, could enlighten us on what the amendment he intends to offer has in the way of target prices?

Mr. DOLE. Mr. President, the Senator from Kansas intends to offer an amendment that would set the minimum wheat target price at $4.35 per bushel for the 1984 and 1985 crops, and mandate a wheat production control program for next year including a 20-percent acreage reduction, a 10-percent-paid acreage diversion, and a 10- to 20-percent PIK program with an 85 percent payment rate. My amendment would also set minimum target prices for corn at $2.92 per bushel, upland cotton at 78 cents per pound, and rice at $11.57 per hundredweight for the 1984 and 1985 crops. These levels are in proportion to the specified 5 cent increase for wheat over the current 1983 target price.

In including both a paid diversion and a PIK program for 1984 crop wheat, I would point out the serious, perennial surpluses which have dogged wheat prices since 1977. I would also emphasize the sharp stock reductions and price improvement experienced by feed grains, cotton, and rice as a result of the PIK program this year, whereas wheat supplies and prices are almost unchanged. With over 1.5 billion bushels of wheat expected to be on hand next June 1, there is an urgent need to cut back on anticipated production to prevent a further collapse in farm prices.

If my colleagues from farm States find this proposal too generous or too stingy or unfair, they can certainly vote against it or offer their own alternatives. Some of us have been trying to get a discussion on these issues started for months, and this may be the way to begin.

But if we just sit around and do not make an effort to provide wheat producers with an adequate program for next year's crop, I want them to be able to identify clearly who is responsible. And if we have even greater problems trying to pass a new farm bill 2 years from now because no correction was made when costs began to spiral out of control, farmers will need to understand why.

What the farmers in my State want to do is raise the market price. They do not relish the thought of receiving deficiency payments through the target price program. There may be a better idea floating around. I would plan to introduce this amendment as something to talk about to see if we can work it out.

Mr. EXON. Let me ask this question of the Senator from Kansas. The amendment he would intend to offer would do what to the target price of wheat in next year's wheat crop? Will it reduce it from what it mandated in the 1981 act?

Mr. DOLE. It does reduce it, yes.

Mr. EXON. I think the Senator from Kansas is going to run into some great difficulty in that regard from those of us who have been fighting very hard to keep the target price in the act under the 1981 stipulation.

How much is the Senator proposing to reduce the target price on wheat for the 1984 crop, if the amendment is adopted?

Mr. DOLE. Ten cents a bushel.

Mr. EXON. And he would leave it in the hands and in the authority of the Secretary of Agriculture to set the loan price at whatever he wishes, is that correct?

Mr. DOLE. Yes, Mr. President. I do not affect the loan rate in my amendment. I do liberalize the PIK program to partially offset the effect of the target price reduction.

What we want to do is to reduce wheat production and get the market price up so we do not have a target price problem. I know this Senator, and I think the Senator from Nebraska, would like to see the profit made in the marketplace. Very honestly, we had a fight over target prices in 1981 in which they survived by two votes on the Senate floor and one vote in the committee. One way to make certain that we are never going to have target prices again is by failing to act responsibly now to reduce the levels when we see them getting a little out of hand.

Mr. EXON. When the Senator from Kansas refers to letting the market establish the price, he made some reference also to diverting acres to set-aside. Is he proposing diverting acres to set-aside in his amendment or would he ignore that?

Mr. DOLE. We have a 20-percent acreage reduction, a 10-percent paid acreage diversion, and a 10–20-percent PIK program with an 85-percent payment rate. That is not a bad payment rate.

Mr. EXON. Mr. President, I would like to see the amendment. Although it has not been introduced, I would appreciate it very much if I could see a copy of the Senator's amendment.

Does the amendment that the Senator is offering in regard to wheat PIK differ substantially from that portion that was offered in our negotiations with the Secretary of Agriculture that the Senator from Kansas referred to?

Mr. DOLE. The primary difference is the 10-percent paid diversion and the 85-percent PIK payment rate. I think the Secretary indicated he would go along with an 80-percent payment rate with no paid acreage diversion. So it is a substantial difference.

Mr. EXON. The Senator goes from 80 to 85, is that right?

Mr. DOLE. In the wheat program announced last month, the Secretary set the payment rate at 75 percent with no paid diversion. I go to 85 percent with a 10-percent paid diversion. I would be happy to supply the Senator

from Nebraska with a copy of the amendment.

Mr. EXON. I thank the Senator from Kansas.

Mr. DOLE. Mr. President, I yield the floor.

Mr. MELCHER. Mr. President, I was in my office and was fortunate enough to hear the rather rapid and rash pronouncements on what was holding up the dairy bill by my friend from Kansas. If I had realized that I was going to be the subject of such a tirade, I would have been present from the outset to assist the colloquy in every way. I not only do not want to hold up the dairy bill; I have continuously advocated both to the Department of Agriculture and the Senate leadership on both sides of the aisle that they bring up the dairy bill.

It is not all that good a bill, Mr. President. There are a lot of dairymen, a lot of hard-pressed dairy people throughout this country who realize the inadequacies of that bill. Nevertheless, it is the only bill that this administration has indicated that it would recommend a Presidential signature for. They will not recommend it—forgive me; I go too far—it is more apt to state: that they would not advocate a Presidential veto. So, from that standpoint, unless there is assurance of a two-thirds majority in both the House and the Senate, it is the best dairy bill that can be passed by Congress and signed by the President.

The question is, Why not have it up? The House would like to see us pass a dairy bill. The dairy people throughout the United States realize that the circumstances advocate that we pass this bill. For my part, I continue to say, let us pass it.

The reason that is given that we cannot bring it up on the floor is that, somehow, it will have to be attached to another bill. The Senator from Kansas very honestly told us that if we have the dairy bill considered in the Senate, he would seek to attach an amendment to it to freeze the target prices which are now required to be increased 4 percent for the coming 2 crop years, 1984 and 1985. His amendment would freeze those target prices at the 1983 crop level rather than the 4-percent increases for the next 2 years and attach that amendment to the dairy bill.

The Senate Agriculture Committee very frankly treated the subject matters as two subject matters. It passed out the dairy bill as a separate bill, it passed out the bill to freeze the target price on wheat and feed grains as a separate bill.

The majority leader very conscientiously called up or attempted to call up the bill on the target price freeze for wheat and feed grains. At that time we got only as far as debating that motion to call up the bill. If that motion is renewed, I suspect there are some of us who want to discuss that motion rather thoroughly.

But, Mr. President, in doing so, we are not jeopardizing the dairy bill. I repeat, that dairy bill does not do too much for dairy farmers, but it is a minimum that it appears this Congress can accomplish. I would like to accomplish that much. I would like to accomplish more, but if that is a minimum we can accomplish, then I would like to at least pass that bill.

It is absolutely unjust and unreasonable to divide the scant agricultural contingency and supporters in the Senate or in the House by attempting to take from one group of agricultural producers in order to do a minimal amount for another group in agriculture. There are not enough of us in the Senate and the House that can correctly portray the difficulties that our agriculture producers have.

But when you decimate that by trying to play one group against the other, it is an outrageous procedure. The Senator from Kansas spoke about trying to freeze target prices for wheat and feedgrains on the basis that the costs of the program were very great. I think we ought to review that. This administration just this year says they are spending about $20 billion in a combination of cost for the PIK program, or the obligations for the PIK program, and the other parts of all the agricultural programs; $20 billion is a lot of money, and I am sure that in the case of PIK probably much of that has been unduly spent. Despite the pressure to stampede a PIK bill through the Senate last year, I resisted.

I am not one to oppose putting income into the pockets of farmers around this country, but I do not believe the PIK program was a good way to accomplish that. I believe it moved us in the wrong direction and is a very costly program that has brought very minimal results compared to the amount of money spent. In addition there has been no limitation of payments under PIK. Despite the $50,000 limitation on farm program payments to individual operators this administration has disregarded that for PIK with same payments exceeding $1,000,000 per farm. It is rumored that the target-price-freeze amendment to the dairy bill, if it is offered, gives these PIK payments above $50,000 per farm the cloak of congressional approval respectability, and legality. PIK is a bust and this tactic will not help it.

Nevertheless, the costs of the wheat and feedgrain target prices are the subject matter.

Now, if the target prices for the 1984 and 1985 crops as is in the current law as a result of the 1981 Farm Act, the costs that could be estimated for that program have not been, I repeat, have not been updated by the Department of Agriculture. If those projected costs are updated, at least for the 1984 crop, we seem to see an entirely different picture than the one presented to us by the last set of figures that the committee reviewed based on the prediction for the coming 1984 crop.

If those costs are projected at least for the 1984 crop for the target price as would be called for under the current law without freezing the target price, for the 1984 crop it does not look like there will be any cost for the corn program. That was the biggest projected cost item for any of the crops covered by target prices. I am told by people who follow the cotton market, and who know cotton producers and in whose State cotton is produced, that probably the same will be true for cotton if it holds at its current price level. So then we are talking principally about what would be the cost for the wheat program, and wheat, indeed, is in trouble. The market price is more than $1 below the cost of production.

That kind of says it all. If the program for wheat for this coming year as announced by the Secretary of Agriculture is going to be as he proposes and the market is going to be in the price range that he predicts for wheat which is all based on the Department's best judgment at this time, then, indeed, the wheat producers do need some sort of a safety net. And that is about all that we can describe as the merits of the deficiency payment or so-called target price. So prudence tells us to leave that safety net of target prices at the level set in present law.

Mr. President, it is absolutely essential that we have a clear understanding, not just for the 100 of us who occupy desks in this Chamber but for the public at large and for the people of this country to more fully understand the agriculture situation. The dairy bill should be brought up. I think it could be passed very easily. But in doing so there is no reason to try to mix it up with the wheat and feedgrain program target prices.

So I hope we can hold some degree of cooperation amongst agricultural producers and agribusiness in this country and also among those of us who represent agricultural interests in this Senate.

The PRESIDING OFFICER. Who seeks recognition?

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

EXPORT-IMPORT BANK AMENDMENTS OF 1983

Mr. GARN. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 869, the Eximbank bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 869) to amend the Export-Import Bank Act of 1945.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Banking, Housing and Urban Affairs with an amendment and from the Committee on Foreign Relations with amendments.

From the Committee on Banking, Housing and Urban Affairs, to strike out all after the enacting clause and insert:

That this Act may be cited as the "Export-Import Bank Amendments of 1983".

TITLE I—AMENDMENTS TO THE EXPORT-IMPORT BANK ACT OF 1945

COMPETITIVE MANDATE

SEC. 101. (a) The second sentence of section 2(b)(1)(A) of the Export-Import Bank Act of 1945 is amended—

(1) by inserting "in all its programs" after "objective"; and

(2) by inserting "fully" after "which are".

(b) Section 2(b)(1)(B) of such Act is amended by striking out all through "exports of other countries;" in the first sentence and inserting in lieu thereof the following: "It is further the policy of the United States that loans made by the Bank in all its programs shall bear interest at rates determined by the Board of Directors of the Bank, consistent with the Bank's mandate to support United States exports at rates and on terms and conditions which are fully competitive with exports of other countries. The Bank shall consider the average cost of money as one factor in its determination of interest rates, where such consideration does not impair the Bank's primary function of expanding United States exports through fully competitive financing. It is also the policy of the United States".

ADVISORY COMMITTEE

SEC. 102. Section 3(d) of the Export-Import Bank Act of 1945 is amended to read as follows:

"(d) There is established an Advisory Committee to consist of twelve members who shall be appointed by the Board of Directors on the recommendation of the President of the Bank, and who shall be broadly representative of production, commerce, finance, agriculture, labor, services, and State government. The Advisory Committee shall meet at least once each quarter. The Advisory Committee shall advise the Bank on its programs, and shall submit, with the report referred to in section 2(b)(1)(A) of this Act, its own comments to the Congress on the extent to which the Bank is meeting its mandate to provide competitive financing to expand United States exports, and any suggestions for improvements in this regard. Members of the Advisory Committee, on a rotating basis, shall be permitted to attend meetings of the Board of Directors.".

TERMS OF DIRECTORS

SEC. 103. (a) The third sentence of section 3(c) of the Export-Import Bank Act of 1945 is amended by striking out "Terms of the directors shall be at the pleasure of the President of the United States, and the" and inserting in lieu thereof "The".

(b) Section 3(c) of such Act is amended by adding at the end thereof the following: "The terms of the directors first appointed after the date of enactment of this sentence, including the President and the First Vice President of the Bank, shall be four years, except that—

"(1) of the directors first appointed pursuant to this sentence, three directors (other than the President and First Vice President of the Bank) shall be appointed for terms of two years, as designated by the President of the United States at the time of their appointment;

"(2) the terms of office of directors holding office on the date of enactment of this sentence shall expire on January 20, 1985; and

"(3) any person appointed to fill a vacancy shall serve only for the remainder of the four-year or two-year term to which he or she was appointed or until January 20, 1985, as the case may be.".

REPORT ON AUTHORITY; EXTENSION

SEC. 104. (a) Section 7(b)(2) of the Export-Import Bank Act of 1945 is amended to read as follows:

"(2) Not later than March 31 of each year the Bank shall determine whether the authority available to it for the current fiscal year will be sufficient to meet the Bank's needs, particularly those arising from any unforeseen increases in the level of exports, any increased foreign export credit subsidies, or the lack of progress in negotiations to reduce or eliminate export credit subsidies. Not later than April 15 of each year the Bank shall transmit to the Congress a report on such determination, together with a request for such an increase in its authority as it deems appropriate.".

(b) Section 8 of such Act is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1989".

MATCHING CREDITS

SEC. 105. Section 1912 of the Export-Import Bank Act Amendments of 1978 is amended—

(1) by adding at the end of subsection (a)(1) the following: "The inquiry, and where appropriate, the determination and authorization to the Export-Import Bank referred to in this section shall be completed and made not later than thirty days after the receipt of such information.";

(2) by striking out "determining" in paragraph (b)(1) and inserting in lieu thereof "significant".

(3) by striking out "may" and inserting in lieu thereof "shall" in subsection (c).

REPORT TO CONGRESS

SEC. 106. The first sentence of section 2(b)(3) of the Export-Import Bank Act of 1945 is amended by striking out $100,000,000" and inserting in lieu thereof "$250,000,000".

EXPORTS OF SERVICES

SEC. 107. Section 2 of the Export-Import Bank Act of 1945 is amended—

(1) by inserting "and services" after "exchange of commodities" in the second sentence of subsection (a)(1);

(2) by inserting "of goods and services" after "exports" in the second sentence of subsection (b)(1)(A); and

(3) by inserting after subsection (b)(1)(C) the following:

"(D)(i) It is further the policy of the United States to foster the delivery of United States services in international commerce. In exercising its powers and functions, the Bank shall give full and equal consideration to making loans and providing guarantees for the export of services, independently or in conjunction with the export of manufactured goods, equipment, hardware or other capital goods, consistent with the Bank's policy to neutralize foreign subsidized credit competition and to supplement the private capital market.

"(ii) The Bank shall include in its annual report a summary of its programs regarding services.".

SMALL BUSINESS NEEDS

SEC. 108. (a) Section 2(b)(1) of the Export Import Bank Act of 1945 is amended—

(1) striking out "that the Bank shall give due recognition to the policy stated in section 2(a) of the Small Business Act that 'the Government should aid, counsel, assist, and protect, insofar as is possible, the interests of small business concerns in order to preserve free competitive enterprise' and that in furtherance of this policy the Board of Directors shall designate an officer of the Bank who shall be responsible to the President of the Bank for all matters concerning or affecting small business concerns and who, among other duties, shall be responsible for advising small businessmen of the opportunities for small business concerns in the functions of the Bank and for maintaining liaison with the Small Business Administration and other departments and agencies in matters affecting small business concerns;" in subparagraph (B); and

(2) by adding at the end thereof the following:

"(E)(i) It is further the policy of the United States to encourage the participation of small business in international commerce. In exercising its authority, the Bank shall develop a program which gives fair consideration to making loans and providing guarantees for the export of goods and services by small businesses.

"(ii) It is further the policy of the United States that the Bank shall give due recognition to the policy stated in section 2(a) of the Small Business Act that 'the Govern-

ment should aid, counsel, assist, and protect, insofar as is possible, the interests of small business concerns in order to preserve free competitive enterprise'. In furtherance of this policy, the Board of Directors shall designate an officer of the Bank who shall be responsible to the President of the Bank for all matters concerning or affecting small business concerns and who, among other duties, shall be responsible for advising small business concerns of the opportunities for small business concerns in the functions of the Bank and for maintaining liaison with the Small Business Administration and other departments and agencies in matters affecting small business concerns.

"(iii) The Chairman of the Board of Directors of the Bank shall designate a member of the Board of Directors to assure that the needs of small businesses are adequately met by the Bank. In this capacity, the Director shall ensure that the Bank carries out its responsibilities under subparagraph (ii) and that the Bank's financial and other resources are, to the maximum extent possible, appropriately used for small business needs.".

(b) The first sentence of section 9(b) of such Act is amended by inserting "and of the activities of the member of the Board designated to assure that such policy is carried out" before the period.

PROHIBITION OF IMPORTS SUPPORTED BY EXPORT CREDITS INCONSISTENT WITH THE OECD ARRANGEMENT ON EXPORT CREDITS

SEC. 109. (a) Unless an inquiry has been commenced under section 1912 of the Export-Import Bank Act Amendments of 1978, any interested person may request the Secretary of Commerce (hereinafter referred to as the "Secretary") to review the terms and conditions of foreign official export credits provided directly or indirectly by any foreign government or foreign official export credit agency to support exports of any product or service to the United States.

(b) Upon receipt of a written request referred to in subsection (a), the Secretary shall review the terms and conditions under which the product or service in question has received, or is likely to receive, foreign official export credits and, not later than thirty days after the date on which the request was filed, shall determine whether the export credits are inconsistent with the terms and conditions, including the interest rate provisions, of the Arrangement on Guidelines for Officially Supported Export Credits of the Organization for Economic Cooperation and Development (hereinafter referred to as the "OECD Arrangement").

(c) If the Secretary determines that the foreign official export credits with regard to which a request for review has been made—

(1) are at rates below those that the foreign government or agency concerned has to pay or would have to pay for the funds so employed, or involve the assumption by the government or agency concerned of all or part of the costs incurred by exporters or financial institutions in obtaining credits;

(2) are inconsistent with the terms and conditions of the OECD Arrangement; and

(3) are used to secure a material advantage in the sale of the products concerned;

he shall publish his findings in the Federal Register and shall immediately direct the Commissioner of Customs to prohibit the entry into the United States of the product or service benefiting from, or likely to benefit from, such export credits.

(d) If, after action has been taken pursuant to subsection (c) prohibiting the entry of any product or products into the United States, the Contracting Parties to the General Agreement on Tariffs and Trade disapprove such action, the Secretary may direct the Commissioner of Customs to revoke such action.

TITLE II—MIXED CREDIT EXPORT SUBSIDIES

SHORT TITLE

SEC. 201. This title may be referred to as the "Trade and Development Enhancement Act of 1983".

STATEMENT OF PURPOSE

SEC. 202. The purposes of this title are—

(1) to expand employment and economic growth in the United States by expanding United States exports to the markets of the developing world;

(2) to stimulate the economic development of countries in the developing world by improving their access to credit for the importation of United States products and services for developmental purposes;

(3) to neutralize the predatory financing engaged in by many nations whose exports compete with United States exports, and thereby restore export competition to a market basis; and

(4) to encourage foreign governments to enter into effective and comprehensive agreements with the United States to end the use of government-mixed credits for exports, and to limit and govern the use of export credit subsidies generally.

NEGOTIATING MANDATE

SEC. 203. The President shall pursue vigorously negotiations to limit and set rules for the use of mixed financing for exports. The negotiating objectives of the United States should include reaching agreements—

(1) to define the various forms of mixed financing, particularly mixed credits under the OECD Arrangement;

(2) to phase out the use of government-mixed credits by a date certain;

(3) to set rules governing the use of public-private cofinancing, or other forms of mixed financing, which may have the same result as government-mixed credits of drawing on concessional development assistance to produce subsidized export financing;

(4) to raise the threshold for notification of the use of mixed financing to a 50 per centum level of concessionality;

(5) to improve notification procedures so that advance notification must be given on all uses of mixed financing, including forms not restricted; and

(6) to prohibit the use of mixed financing for production facilities for goods which are in structural oversupply in the world.

ESTABLISHMENT OF A MIXED FINANCING PROGRAM IN THE UNITED STATES EXPORT-IMPORT BANK

SEC. 204. (a) The Chairman of the Export-Import Bank of the United States shall establish, within the Export-Import Bank, a program of mixed financing for United States exports. The program shall be carried out in cooperation with the Agency for International Development and with private financial institutions or entities, as appropriate. The program may include—

(1) the combined use of the credits, loans, or guarantees offered by the Export-Import Bank with concessional financing or grants offered by the Agency for International Development, by methods including, but not limited to, the blending of the financing of, or parallel financing by, the Export-Import Bank and the Agency for International Development; and

(2) the combined use of credits, loans, or guarantees offered by the Export-Import Bank, with financing offered by private financial institutions or entities, by methods including, but not limited to, the blending of the financing of, or parallel financing by, the Export-Import Bank and private institutions or entities.

(b) The purpose of the mixed financing program under this section shall be to offer or arrange for financing for the export of United States goods and services that is substantially as concessional as financing for which there is reasonable proof that a foreign government is offering to, or arranging for, a bona fide foreign competitor for a United States export sale.

(c) United States exports eligible for concessional mixed financing shall be exports offered at what can reasonably be judged to be the lowest evaluated bid, without respect to the terms of export financing.

(d) The Chairman of the Export-Import Bank is authorized to establish a fund, as necessary, for carrying out the mixed financing program described in this section.

ESTABLISHMENT OF A MIXED FINANCING PROGRAM IN THE AGENCY FOR INTERNATIONAL DEVELOPMENT

SEC. 205. (a) The Administrator of the Agency for International Development shall establish within the Agency a program of mixed financing for United States exports. The program shall be carried out in cooperation with the Export-Import Bank and with private financial institutions or entities, as appropriate. The program may include—

(1) the combined use of the credits, loans, or guarantees offered by the Export-Import Bank with concessional financing or grants offered by the Agency for International Development, by methods including, but not limited to, the blending of the financing of, or parallel financing by, the Export-Import Bank and the Agency for International Development; and

(2) the combination of concessional financing or grants offered by the Agency for International Development with financing offered by private financial institutions or entities, by methods including, but not limited to, the blending of the financing of, or parallel financing by, the Agency for International Development and private institutions or entities.

(b) These funds may be combined with Export-Import Bank financing or private commercial financing in order to offer, or arrange for, financing for the exportation of United States goods and services that is substantially as concessional as financing for which there is reasonable proof that a foreign government is offering to, or arranging for, a bona fide foreign competitor for a United States export sale.

(c) United States exports eligible for concessional mixed financing shall be exports offered at what can reasonably be judged to be the lowest evaluated bid, without respect to the terms of export financing.

(d) Funds of the Agency for International Development which are used to carry out a mixed financing program authorized by subsections (a), (b), and (c) shall be offered for financing only United States exports that can reasonably be expected to contribute to the advancement of the development objectives of the importing country or countries.

(e) The Administrator of the Agency for International Development is authorized to draw on Economic Support Funds, as necessary, and to establish a fund, as necessary,

for carrying out a mixed financing program as described in this section.

APPOINTMENT OF A MIXED FINANCING COORDINATOR

SEC. 206. The President shall appoint an individual to coordinate and ensure the implementation of the mixed financing programs authorized by sections 204 and 205. The individual appointed by the President for this purpose shall develop procedures and mechanisms as necessary to assure that any offer of mixed financing for eligible United States exports is timely and permits the United States exporter to respond to the timing demands of the competitive situation.

AUTHORIZATION OF APPROPRIATIONS

SEC. 207. There are authorized to be appropriated such sums as may be necessary to carry out this title for fiscal years 1984 and 1985.

DEFINITIONS

SEC. 208. As used in this title—

(1) the term "mixed financing" means the various combinations of official development assistance, official export credit, and private commercial capital to finance exports;

(2) the term "government-mixed credits" means the combined use of credits, insurance, and guarantees offered by the Export-Import Bank with concessional financing or grants offered by the Agency for International Development to finance exports;

(3) the term "public-private cofinancing" means the combined use of either official development assistance or official export credit with private commercial credit to finance exports;

(4) the term "blending of financings" means the use of various combinations of official development assistance, official export credit, and private commerical credit, integrated into a single package with a single set of financial terms, to finance exports; and

(5) the term "parallel financing" means the related use of various combinations of separate lines of official development assistance, official export credits, and private commercial credit, not combined into a single package with a single set of financial terms, to finance exports.

TITLE III—AMENDMENTS TO THE EXPORT TRADING COMPANY ACT OF 1982

SEC. 301. Section 206 of the Export Trading Company Act of 1982 (Public Law 97-290) is amended—

(1) by striking out "or" after "export accounts receivable" and inserting in lieu thereof a comma; and

(2) by inserting after "exportable goods," the following: "accounts receivable from leases, performance contracts, grant commitments, participation fees, member dues, revenue from publications, and such other collateral as the Board of Directors may deem appropriate,".

From the Committee on Foreign Relations to the substitute amendment as reported by the Committee on Banking, Housing, and Urban Affairs:

Insert at the end of subsection (d) of Section 205:, and shall be consistent with the economic, security and political criteria used to establish country allocations of Economic Support Funds.

Strike subsection (e) of Section 205 and insert:

(e) The Administrator of the Agency for International Development may draw on Economic Support Funds allocated for Commodity Import Programs to finance a mixed financing activity.

Mr. GARN. Mr. President, it is no secret that I am a strong advocate of the Export-Import Bank. My support for the Bank does not come from any belief in the virtue of subsidized export financing but rather because I strongly oppose subsidized export financing and I believe that without an effective Eximbank we will have little chance of eliminating Government-subsidized export credit from international trade.

For much of fiscal year 1982 we endeavored to set a good example for our trading partners and priced ourselves right out of the export credit market. The result was over $1 billion of lost U.S. export sales and nearly $1 billion of Eximbank direct loan funds left unused.

Fortunately, Mr. President, every now and then, at strong congressional prodding, we got a little hard nosed in our negotiating. We matched some of our competitors' predatory credit packages. We won sales and showed them that we could play the game too and win at it, and we began to get some results in the negotiations to control and eventually eliminate Government-subsidized export credits.

In reviewing the Eximbank charter this year the Banking Committee has given top priority to making the changes necessary to the Bank's charter to insure that the Bank become an effective vehicle for protecting our exporters from unfair foreign government-subsidized predatory export credits. At the same time, this would enhance the ability of the Bank to serve as a tool to achieve further progrress in eliminating this practice.

The first step is to make the purpose very clear of the Bank. Frankly, I see little use for the Bank if it is not going to provide competitive financing for our exporters. Unfortunately, there is too often confusion over the interpretation of the Bank's charter. The Banking Committee bill makes it absolutely clear that the Bank's primary objective is to offer our exporters financing that is fully competitive with the Government-sponsored financing of our trade competitors.

Second, we increase the strength of the Bank as an institution by giving its Directors fixed terms of office and provide that those terms overlap with one another, enhancing the continuity of the Bank's policies.

S. 869 also strengthens provisions of current law to prohibit more effectively the penetration of our domestic markets by Government-sponsored cutrate predatory financing.

Very significantly, the bill would establish a Government program to counter the pernicious use of foreign aid funds by our trade competitors to subsidize their export trade and penetrate new markets. This practice, known as mixed credits, has been very resistant to negotiations because we have shown little ability on our part to counter these financing programs. The bill would establish such a capacity.

Mr. President, there are a number of other important provisions of the bill that I will forgo mentioning in the interest of time. This is a significant bill and I am proud to be associated with it. The Banking Committee has worked very hard on this matter, particularly under the able leadership of the senior Senator from Pennsylvania (Mr. HEINZ), who has devoted long hours to this legislation in the Banking Committee Subcommittee on International Finance and Monetary Policy. It takes nearly 800 pages to cover the hearings that have been held in the subcommittee on the Eximbank in the course of less than a year. This bill carries the clear imprint of Senator HEINZ's workmanship. The other members of the committee are to be congratulated as well for their contributions to this legislation.

Mr. President, without a strong Eximbank, we will see our capital industries closed out of the export markets and lose sales and profits needed for future prosperity, or we will see them pack up and move their shops overseas to countries that are willing to offer their exporters effective, competitive export financing. In either event, we will lose American jobs and our share in world trade will continue to dwindle. Worst of all, we will lose all of this not because we have inferior products, higher costs, or less efficient production. We will lose what we would have won in fair trade because we were unwilling to support one of the key Government agencies with which to defend free and open trade.

This is a necessary piece of legislation, and I urge my colleagues to support it.

Mr. President, that concludes my opening statement on the bill.

Because of all of the work that Senator HEINZ has done on this particular piece of legislation—in the normal course of events as chairman of the committee I would be managing it—he has put so many untold hours into the bill and is so familiar with all of its provisions, I designate Senator HEINZ to manage the bill at this time on our side.

Mr. HEINZ. Mr. President, first let me express my gratitude to the chairman of our committee, Senator GARN, for his inestimable help during the course of our consideration of the Export-Import Bank legislation.

That help extends not only to the legislation before us but indeed stretches back many years throughout his tenure on the committee when he was ranking minority member and even before that. He has been a tre-

mendously strong supporter of the Bank. Whatever we have been able to achieve in improving the Bank and improving its mandate through this legislation, indeed I think would never have been possible without Senator GARN's strong support and strong leadership.

I am also, of course, personally grateful to him for his friendship and cooperative understanding in working out many of the difficult issues that have come before this committee, and I very much appreciate his yielding to me what would be otherwise his normal responsibility to manange this bill.

I also believe that the members of our committee have done an extraordinary job in bringing to the floor a bill where I think we will find wide agreement.

I commend Senator PROXMIRE, who really wears two hats. He has been the ranking minority member of my subcommittee as well as the ranking member of the full committee, at various times, I might add, during the course of the last several years. I have always found him to be a very thoughtful colleague. He has never hesitated to give criticism but always constructive criticism.

When the legislation finally cleared our committee, it is my view that it was a better piece of legislation because of his participation in it.

Mr. President, today the Senate is taking up S. 869, a bill to extend the Export-Import Bank Act of 1945. At the same time S. 869 makes certain changes in the Bank's charter to make it more responsive to the needs of American exporters in today's international market conditions.

These changes are essential. A noncompetitive-financing offer most often means loss of the sale and often permanent loss of market. If the Government cannot end other nations' subsidies and will not match them, we force major losses abroad upon our companies here at home. We also force the outright transfer of business and technology abroad as industries move overseas or license their products in order to obtain competitive financing. Those, in the administration and elsewhere, who complain about the movement of important American know-how and technology overseas should realize that our own policies accelerate this problem.

Mr. President, my responsibilities as, first, ranking minority member and then chairman of the Banking Committee's Subcommittee on International Finance and Monetary Policy have amply demonstrated to me the benefits of a strong Eximbank and the dangers of an insufficiently supported Bank. The Export-Import Bank is a powerful instrument of job creation which, by annually supporting over $18 billion in U.S. exports, is providing jobs we would otherwise lose to 550,000 Americans. Moreover, these are jobs that result from not a penny of Federal appropriations. Rather, these jobs reduce the Federal deficit by taking people off the unemployment roles while causing an increase in revenues. When the Bank is not able to provide this support, our industries are forced to relocate their operations overseas or forfeit their share of export markets to their foreign competitors, backed by their official government credit agencies. Included are some of our most vital high-tech industries. When their operations are shifted abroad, our control over that technology is greatly diminished.

A strengthened Export-Import Bank may not be a panacea for our trade problems, but it is a positive step that does not carry with it the unwelcome baggage of other trade measures under consideration. While defending U.S. exporters against unfair competition from abroad, it preserves and indeed creates new jobs—in some of our most vital high technology industries—while at the same time reducing our unprecedented trade deficit. This is done without any increase in Federal spending or any need for new taxes. In fact, a recent study by Wharton Econometrics shows that Eximbank loans generate revenues for State and local governments on a scale of more than 9 to 1. By combating unfair trade practices, Eximbank is a force against protectionism, defending free and open markets based upon price and quality. Finally, its impact upon the credit markets is negligible: from 1978 to 1981 Eximbank borrowings from the credit markets amounted to only one quarter of 1 percent of all credit raised.

S. 869, the bill before us today, would make absolutely clear the Bank's mandate to provide full competitive financing in all of its programs for American exporters faced with officially subsidized credit competition in foreign markets. The bill would also reestablish the Eximbank Advisory Committee, increasing its membership to 12 and including the participation of representatives of service industries and State governments.

There is also a provision similar to the section in my bill last year, S. 2600, that would increase the independence and continuity of the Bank's directors by giving them fixed, 4-year terms, which would overlap in order to prevent a total and simultaneous turnover in the Bank's directorship every 4 years.

In addition to extending the act for 6 years, the bill requires a report midway through each fiscal year on whether the funds allocated will be sufficient in view of any previously unforeseen developments.

The bill would also modify section 1912 of the Bank's charter to provide a better defense against the predatory efforts of foreign producers to penetrate our domestic markets through the use of officially subsidized export credits. Recent experience has shown that there are gaping holes in our current defense in that regard. As a further line of defense, the bill also contains an amendment offered in committee by Senator PROXMIRE that provides a means to simply exclude products from the United States that were benefiting from subsidized financing offers.

Finally, Mr. President, in addition to a provision to modify the requirement for the Bank to notify the Congress of large loan or guarantee programs—raising the current minimum for notification from $100 to $250 million, to discount for inflation—the bill would direct initiation of programs to meet the mixed credit competition our exporters are facing. The practice of mixing foreign aid moneys with official export credits is a growing practice and our exporters have been at a significant disadvantage due to the total lack of such programs available from our Government. While seeking to put an end to such practices, the Agency for International Development and the Eximbank would be directed to develop our own such programs in order to counter their use by others and prevent what would otherwise be American export losses.

Mr. President, these comments, and indeed this legislation, reiterates what I have been saying for 6 years, and what my predecessor as chairman, Senator Stevenson, said as well. We simply have to be more competitive, the world is changing, and the harsh reality is that our products no longer sell simply because they are American, and are no longer automatically considered high quality. We have to fight for markets now, and the Eximbank is a critical weapon in that battle. I have spent 2 years telling the administration that, and I hope that finally these efforts are bearing fruit. The President endorsed a strong Bank and my war chest concept in his state of the Union address. There is also other, less visible, evidence of a change in the administration's attitude about the Bank. I welcome it, as do the Nation's exporters. But I will also finally believe it when the hard evidence in increased lending and increased competitiveness is there.

I would like to elaborate on some of the more significant portions of the bill.

MANDATE

Mr. President, section 101 of the bill clarifies and strengthens the mandate to the Bank. We believe that it is absolutely essential that the Congress clarify its mandate to the Eximbank to

provide U.S. exporters with competitive financing. This is not because such a mandate does not exist but rather because that mandate is disputed by the Bank's own directors. In statement after statement the Bank's President, William Draper, has given his view that the mandate to provide competitive financing is coequal with the need for the Bank to avoid losses by setting loan rates above its cost of money.

In practice, this policy has resulted in the Bank often foresaking its responsibility to provide competitive financing in a mistaken desire to turn a profit in its operations in each and every year. In fiscal year 1982 this Bank policy left the Bank with $1 billion in unused direct loan authority, while the record shows that more than $1 billion of export sale were lost directly due to the lack of adequate Eximbank support.

Mr. President, I would like to cite a very revealing colloquy on this issue for the benefit of my colleagues. It occurred in the Senate Appropriations Subcommittee on Foreign Operations, between Subcommittee Chairman KASTEN and Eximbank Chairman Draper:

Mr. KASTEN. Isn't it true that (the) mandate for the bank to be competitive is in the charter, but the mandate that the Bank be self-sufficient is not in the charter? How do you interpret that mandate?

Mr. DRAPER. I don't know. I read the two and when I was confirmed by the Senate I said that I would manage to try to balance those two, that I would recognize equal weight in both cases. I did not weigh one more than the other.

Mr. President, the Export-Import Bank was created to preserve U.S. export sales that otherwise would be lost without Eximbank support. In recent years this danger of lost sales has come from efforts by America's trade competitors to capture export sales through the use of officially subsidized export credits. Our only defense against this practice has been the Export-Import Bank.

The Bank fails to fulfill its very reason for existence when it provides loans at uncompetitive rates because of fears of temporary losses in its own financial condition. It seeks to become self-sustaining, but self-sustaining for what? It does us no good to even have an Eximbank if, in seeking to be self-sustaining, that Bank fails to fulfill the mission for which it was created.

It is incredible that the Bank's own Directors would wonder what the primary mission of the Bank is, but that is apparently true. The Congress must make its view absolutely clear that the Bank was created to provide competitive financing for U.S. exporters and that this is its primary mandate.

TERMS OF DIRECTORS

Mr. President, the Export-Import Bank lacks sufficient independence to be able to carry out the mandates that it has received from the Congress. Although we set the program goals for the Bank, based upon the needs of America's exporters, all too often that congressional intent is thwarted by the directive of some faceless bureaucrat at the Office of Management and Budget, who little understands the Bank's purpose or its importance to our international commerce. Serving at the pleasure of the President, the Eximbank Board members are completely subject to such directives. The result has been the curious anomaly that we have seen too often; namely the Directors of the Eximbank, contrary to assurances that they gave while their nominations were being considered by the Senate, arguing in favor of the gradual demise of Eximbank programs, and acting contrary to the intent of the congressional mandates given to the Bank. Giving the Directors of the Bank fixed terms of office will enhance the independence necessary for the Bank to be responsive to the directives of the Congress.

Mr. President, if the Congress is going to have a role to play in determining this Nation's export financing activities, we need an independent Eximbank.

My bill would increase the independence of the members of the Board of Directors of the Eximbank by establishing their terms of office at 4 years rather than, as currently is the case, serving at the pleasure of the President. This does not make them completely independent; there still will be a good deal of give and take, as is appropriate. What it does mean is that the members of the Eximbank Board will not have to be constantly looking over their shoulders to see whether their actions meet with the full approval of OMB or some other appointed bureaucrat. It means that the Bank will have the room that it needs to be responsive to the Congress and thus more able to carry out its congressional mandate.

This proposal has other advantages. The terms of the members of the Board will be staggered, the term of office of the President and Vice President of the Bank coinciding with the 4-year term of the Nation's Chief Executive. The remaining three Board members would serve for terms of 4 years, beginning in midterm of any administration. Thus, coordination with the administration is preserved, allowing the President to name the chief officers of the Bank as he would begin his administration; at the same time, the institutional memory of the Bank is preserved through the overlapping terms of the remaining three members of the Board. Currently the Board tends to turn over completely with the inauguration of each new administration.

MIXED CREDITS

Mr. President, although some progress has been made in negotiations without trade competitors in the area of official export credits, one area has been particularly resistant to limitations. It is also the most egregious form of export credit subsidy. I refer to a practice very popular among French exporters but resorted to by many other countries as well. This is the practice of mixing foreign aid money with other official export credit assistance.

This has been a particularly difficult problem to resolve, first because our trade competitors long refused to acknowledge it as a commercial program hiding it under the ruse of foreign aid. A review of the recipients of this foreign aid clearly manifested its commercial character. The recipients, far from being the neediest Third World countries, tended to be almost exclusively the newly industrial countries such as Taiwan, South Korea, Brazil, and Mexico, and the assistance went for the purchase of sophisticated products, such as commercial aircraft, nuclear power plants and the like.

Second, we have largely failed in our efforts to end this practice, at least in part because we have had no program with which to threaten to offset the programs of our competitors. When their competitors have sought to employ this program, our exporters have had either to bow out of competition or make their bids through their off-shore subsidiaries that could use the mixed credit facilities of the host country, thus insuring that the job impact of the deal will be entirely overseas. The foreign aid portions of the credit offers made the interest rates too low for our Eximbank to match.

Mr. President, we have been unable to defend out exporters against such trade practices because, unlike many of our competitors, our foreign aid and our export credit agencies are separated, and I believe that that is for a good reason. Nevertheless, Mr. President, the need for a means to combat these practices is apparent.

One of the provisions of my bill, therefore, would be to direct the Eximbank and the Agency for International Development to work together to develop means to offset these predatory trade practices. Until we do so, we will be the losers. We will lose export sales, and we will be unsuccessful in our efforts to negotiate an end to these practices. We do not propose any additional resources, but the very establishment of a capacity to match the mixed credit financing of our trade competitors will send a clear signal that we are not going to remain passive in this area.

SECTION 1912

Mr. President, Eximbank's primary purpose is to provide competitive financing to encourage U.S. exports. But in 1978 that mandate was amended to include the objective of protecting domestic producers against unfair competition from foreign firms utilizing officially subsidized export credit to gain advantage in the U.S. market.

Under section 1912, the Secretary of the Treasury is called upon to determine whether foreign official export credits are offered which exceed limits agreed to by the United States and other major exporting countries. If the Secretary determines that noncompetitive financing is likely to be a determining factor in the sale, he must issue an authorization for Eximbank to match the financing, which Exim may do.

Unfortunately, in the only major test of section 1912 since its enactment, it was found to be at best, ineffective, and, at worst, counterproductive. The case involved the sale of subway cars to the New York City Transit Authority. The domestic competitor, the Budd Co., lost the competition to a Canadian company, Bombardier, which utilized officially subsidized export credit substantially below the minimum interest rate to which the Canadian Government had agreed within the OECD arrangement on export credit.

Against the more than $100 million price advantage afforded by the officially subsidized export credit, the American firm found itself at an impossbile disadvantage, and the contract was awarded to the Canadian firm. The International Trade Commission and the Commerce Department later made a countervailing duty judgment against Bombardier on the basis of the subsidy. Yet, incredibly the Treasury Department did not find grounds under section 1912 to provide matching financing to the American firm to offset the foreign advantage.

Mr. President, I believe that there were sufficient grounds to justify the use of section 1912 in the New York Transit Authority case. The report from the Treasury Department was severely flawed. It consistently gave the benefit of the doubt to the Canadian bidder with regard to technological superiority quality and reliability of workers, and quality and reliability of management, even though the American firm had built 11,000 railway cars of the stainless steel variety New York City wanted and the Canadian firm had yet to build a single one.

I am concerned that it will now be much more difficult for American negotiators to denounce the evils of predatory export credits when we ourselves are unwilling to defend one of our own industries against such a sale in our own home market, one that was clearly in violation of the export credit arrangement.

Mr. President, I would point out that the U.S. domestic market is the richest and most inviting market in the world. If it is to be left unprotected by our fair trade laws, how long would it take for our other major trade competitors to realize the advantage that they could gain through subsidy, particularly at a time of worldwide recession? How long will it take our trade competitors to jump at the chance to export their unemployment to our shores through the vehicle of susidized export credits and other devices?

Mr. President, in order to insure that another case of the New York City subway car variety does not recur, the bill proposes the following changes in section 1912: First, the Secretary of the Treasury would have to make his decision within 30 days, rather than the current indefinite time period; second, the standard for his decision would be that the foreign official subsidized export credit was a significant factor, rather than the current determining factor; and third, the Eximbank would no longer have the option of rejecting the Secretary of the Treasury's recommendation.

Mr. President, the principal purpose of the Eximbank must be to remain supportive of U.S. exporters. But, the sensible changes S. 869 proposes for section 1912, should go a long way toward protecting our domestic manufacturers against the evils of foreign competitors utilizing officially subsidized export credit. It is my hope that a credible section 1912 alone will act as a sufficient deterrent to make its actual use unnecessary.

If it does not, however, the bill also contains an amendment offered by Senator PROXMIRE which would provide an alternative route for aggrieved U.S. companies to seek redress. The amendment would permit the filing of a complaint with the Secretary of Commerce alleging subsidized financing. In the event the Secretary made such a determination, he would be required to direct the Customs Service to deny entry to the offending goods or services. The amendment also contains a provision specifying revocation of such action if it is subsequently determined to have contravened the GATT.

AUTHORIZATION

The Bank's charter is extended for 6 years, and the Bank is required to submit a report on the status of funds allocated to it midway through each fiscal year. The report would discuss unanticipated developments and would request an additional appropriation, if needed.

Such an increase would be justified if, for example, U.S. export demand had grown much more quickly than anticipated through a robust upturn in international trade. This is an event that we would all welcome. We should also be prepared to meet it, rather than have to take ourselves out of the running because of inadequate Eximbank resources.

Perhaps more importantly, however, Mr. President, we should have the capability to increase Eximbank resources in midyear should our trade competitors continue to balk at reaching an agreement to end the practice of offering officially subsidized export credits once and for all. This will be a familiar argument for those who remember my war chest proposals of 1981 and 1982, which would have created a special fund for matching subsidized competition.

SMALL BUSINESS AND SERVICES

In considering S. 869 in committee, a number of improvements in support of small business and exports of services were also made. With respect to small business, the committee agreed to require the designation of an office of the Bank as well as one of the Bank's Directors to be responsible for assuring that the needs of small businesses are adequately met. Further the Bank is required to develop a program which gives fair consideration to making loans and providing guarantees for the export of goods and services by small businesses.

Since I anticipate an amendment on the Senate floor regarding small business, I will not say any more on that issue at this time.

In markup the committee also adopted policy language to make clear the Bank's commitment to the export of services, both independently and in conjunction with the export of goods.

CONCLUSION

Talks in the Organization for Economic Cooperation and Development to end subsidized financing have over the years brought few results, and what progress that has been achieved has come when our trading competitors recognized that the United States was willing to back up its positions with an increase in its own financing programs. Should international trade remain sluggish, our trade competitors will be under increased pressure to report to predatory trade practices such as highly subsidized export credits. With these additional resources ready if needed our trade competitors will be more reluctant to resort to practices that we will be fully able to counter. Should they, however, resort to these practices, perhaps only to test our determination, we must not leave our exporters defenseless with an Eximbank that has used up all of its direct loan authority.

The bill, Mr. President, does not distort the marketplace. Rather, it takes an important step toward the elimination of distortions. If the marketplace were functioning correctly, goods and

services would be purchased on the basis of quality, price, and reliability of delivery. Unfortunately for American exports, the market is not working as it should, because the predatory financing practices of other countries have made financing the determining factor in many export sales, especially of big ticket items, where differing rates and terms can result in differences of millions of dollars.

Financing should be a neutral factor in the marketplace. If left to itself, financing would be neutral, for terms and interest rates would tend to equalize. But over the last decade, America's trade competitors have persistently and systematically eroded our trade position. They have done so not with superior products or lower prices, but rather with production subsidies and export credit terms substantially below market rates and significantly lower than rates available from the U.S. Export-Import Bank programs.

I emphasize, Mr. President, that what I am referring to is authority to lend, not direct appropriations. Eximbank would have to go to credit markets to borrow only a portion of the money that is made available, turning around payments that it receives into new loans. This is important to understand, for although there is a cost involved in any Government program, the cost of Eximbank programs are far lower than the nominal amount of lending authority approved by the Congress. Moreover, the benefits from increased export sales, jobs preserved, and tax revenues gained in place of unemployment compensation paid out, make Eximbank programs economically beneficial to the whole country.

Mr. President, I just want to say that I hope we can move with "constructive rapidity" on this bill. I do not think this is a program that should be delayed. It is a good bill.

If there are Senators who have amendments, I hope they will come to the floor and offer them. We want to dispose of them on their merits. The committee is not going to delay. We ask that Senators reciprocate, as well.

However, before we ask for amendments, I want to again recognize the fine leadership of my chairman, Senator GARN, and also, of course, Senator PROXMIRE. Since Senator PROXMIRE is managing the bill for the minority side, I yield the floor at this point for any comments he cares to make.

Mr. PROXMIRE. Mr. President, it is always a pleasure to work with Senators like Senator GARN and Senator HEINZ. They are very, very thoughtful and helpful.

Mr. President, I am very concerned about what the Export-Import Bank has done in the last few days. I am going to come to that shortly because we are going to, I suspect, have a considerable discussion of the bailout which the Export-Import Bank has been engaged in with respect to Brazil and Mexico. I think a lot of people did not even notice that because it happended at a time when there were many things going on in Lebanon, the shooting down of the airliner, and so forth. But it was an action that was most notable.

The Export-Import Bank received over a billion dollars more last year than they asked for. They had an embarrassment of riches. And when they ended this year in 1983, they had more than they could spend.

Well, as a result of that, and as a result of the difficulty with the IMF bill, some people in the administration apparently thought that they could take that 1983 money that we appropriated for 1983 and use it to bail out Mexico, and particularly to bail out Brazil, in 1984.

Now, the purpose of the Export-Import Bank is very explicit. The principal purpose that most of us see is to make sure that American exports are competitive from a credit standpoint; certainly not to bail out a country, whether it is Mexico or Brazil.

Now, Mr. President, I think we should be aware of the fact that, among other things, as I am going to discuss a little later, the bailouts that we have been able to provide in the past for New York City and for Chrysler were the result of very, very detailed hearings, a very strong record, considerable debate on the floor of the Senate, and very extensive discussion.

In this case, we are having a bailout that is much bigger than the Chrysler bailout and that is also bigger than the New York City bailout and it is sliding through with almost no notice and a lot of people do not even know it is going on. But it is providing, as I say, $2 billion.

Some people will say this is not a bailout. What this does is provide that the Export-Import Bank would, in effect, allow $1.5 billion for Brazil for a guarantee of exports from the United States to Brazil. Of course, this is perhaps to the interest of some of our industries that do export to Brazil. But, on the other hand, it is a situation in which it could interfere with the kind of austerity which the International Monetary Fund has insisted that Brazil should pursue.

Just this morning, on the front page of the business section of the Washington Post, the headline reads: "Brazil's Congress Rejects Pay Cap in Slap to IMF." And it points out that, by a vote of 252 to 1, Brazil rejects an austerity measure to hold down wage increases, and the current inflation rate is 150 percent in Brazil.

The IMF has been extraordinarily successful over the years in providing funds to these countries because they insist on conditions. But what we are doing here is providing for an opportunity for Brazil perhaps to evade these conditions. This vote indicates that Brazil may not have the political will to adopt the IMF austerity measures needed to bring the country's finances in order. If this is the case, then the proposed $1.5 billion Exim guarantee for Brazil is even more doubtful.

I think it is unfortunate, although I say that the Export-Import Bank is treated as a sacred cow in this body. Democrats rush to support it; the Republicans also support it. It is, of course, the kind of thing that we like to support because we do have, in almost every case, in our States exporters who benefit from it. But I think this administration has been right in saying that we have to be consistent and fair in holding down spending everywhere. And I feel that, in the case of the Export-Import Bank, it has been treated with kid gloves.

Let me speak now directly about the overall bill.

Mr. President, S. 869 renews and amends the mandate of the Export-Import Bank.

The private sector traditionally has provided most of the financing needed by our exporters. There are occasions, however, when private sector credit is not available or is unsuitable because of contract terms, political risks, or interest rate constraints. In many instances the Eximbank fills a void for our exporters. It can also play a vital supplementary financing role by providing guarantees or insurance that serve to stimulate private credit.

The bill that is before us extends the Bank's authority to assist U.S. exporters to September 30, 1989. This lengthy extension, the committee believes, will give a clear indication to our exporters, potential purchasers of U.S. products, and our trade competitors that the Export-Import Bank will be there when necessary to meet the need of promoting U.S. exports.

S. 869 also makes changes to the present charter of the Export-Import Bank that will make it more responsive in meeting the requirements of U.S. exporters. For example, the bill provides that an advisory committee consisting of 12 members be appointed by the Bank's Board of Directors on the recommendation of the President of the Bank. Such a committee is to be broadly representative of production, commerce, finance, agriculture, labor, services, and State government interests and is to meet quarterly in order to offer the Bank advice about its programs.

To make sure the Bank considers the needs of all of our exporters, the bill also amends the charter to make it clear that service exports are to receive the same and equal treatment as the Bank gives the export of goods. I think this particular amendment is most welcome because services represent the fastest growing sector of

American exports and the Bank has been somewhat in doubt about its authority to provide support for service exports.

During the consideration of this bill, I heard complaints that the Bank was not always responsive to the needs of small businesses. Therefore, we have added section 108, which requires the Bank's chairman to designate a member of the Board to insure that the Bank's resources are appropriately used to the maximum extent for small businesses. This provision states that it is U.S. policy to encourage the participation of small business in international commerce and directs the Bank to develop a program to make loans and provide guarantees for the export of goods and services by such businesses.

In recognition of the fact of the increasing importance of export trade to our businesses and workers, section 103 of the bill seeks to reduce the opportunity for politicizing the Export-Import Bank. It seeks to professionalize and increase the independence of the Bank's Board of Directors by giving them fixed 4-year terms, instead of having them serve only at the pleasure of the President. Moreover, this section provides that the terms of the Directors are to be staggered so as to provide greater continuity at the Bank. In the past the complete Board turnover that came with each new administration often resulted in the Bank's temporary paralysis. This change indicates that our country views the necessity of competing effectively in export markets as being above the need for political patronage jobs.

One provision of the bill marks the committee's resolve to stabilize the free trading system to which the members of the GATT and OCED have committed themselves. That provision is section 109. Section 109 provides in part that the Secretary of Commerce will, upon request, review the terms and conditions of foreign official export credits. It will allow him to prohibit the entry of products or services benefiting from subsidized financing in violation of the OECD's arrangement on guidelines for officially supported export credits. This section makes clear our resolve to eliminate subsidies provided to foreign exporters by their governments to increase their share of the U.S. market. It clarifies our desire to have market rate financing for exports be the norm.

The overall thrust of this bill is beneficial to our exporters. But I have reservations about two provisions. One of these is section 101 which provides the Bank with a mandate to support U.S. exports at subsidized interest rates if that is necessary to meet foreign competition, even if such a policy makes it impossible for the Bank to be self-sustaining. I just do not believe that the operation of the Eximbank should become a drain on the U.S. Treasury, particularly in a time of increasing budget deficits. The Bank has had a negative interest rate spread between lending and borrowing since 1966, but has been able to remain self-sustaining because of interest earned on loans financed by its $2.2 billion reserve and its $1 billion in capital. In some recent years Exim's average borrowing costs have exceeded its lending rates by several percentage points. Projected operating losses could impair the Bank's reserves in the coming years.

The new requirement in section 101 that the Bank consider being competitive a priority over self-sustaining is not necessary. Both the Chairman of Exim and the Treasury Department testified against this provision on the ground that Exim is now fully competitive. I fear this provision sends out the wrong signal, that subsidies are encouraged by U.S. policy. I am concerned as well about the possible future drain on the Treasury which it may bring about. Nevertheless, the provision is narrowly drafted and the committee makes it clear that it is there to provide additional leverage for our negotiators to eliminate export subsidies provided by foreign governments. I agree with the policy of eliminating subsidies in exports by all nations and urge that such negotiations be vigorously pursued.

Incidentally, the Export-Import Bank administration has done a good job in the last year or so to provide that interest rates will rise to the market level. They should do that.

I also have reservations with title II of the bill which provides that Exim, in conjuction with the Agency for International Development, should establish a program of mixed credit export subsidies. I am opposed to mixed credit subsidies and am persuaded by the testimony of the administration that these provisions are also unnecessary because our negotiators are already vigorously pursuing efforts to eliminate them internationally. The committee report does make clear that title II is in the bill to strengthen the hands of our negotiators in limiting and eventually eliminating such mixed credit programs.

I dissented to this legislation in committee because I agreed with the objections raised by the administration. I believe there will be an effort on the floor to scale back the subsidy element. If this amendment passes, I will support the legislation.

I think that S. 869 is a bill that will benefit our economy and enable all segments of our export community to compete internationally, particularly small business. The export sector of our economy is vital in terms of jobs and profits. This legislation seeks to reasonably support efforts to maintain a strong export sector.

Mr. President, I will yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I want to express my strong support for the Export-Import Bank Amendments of 1983. The Eximbank has played a major role in promoting exports of U.S. goods since 1945. Many companies, in my State as well as in others, in small business as well as large, have been able to compete in foreign markets because of the Eximbank. The Bank allows these companies to compete on the basis of the quality of their goods and services, because it neutralizes the effects of subsidies provided by foreign governments.

The bill we are considering today reaffirms our Nation's commitment to remaining a leader in international trade. The most important feature of S. 869 is that it requires the Bank to provide financing at rates competitive with those offered by other nations. This provision gives the Bank a mandate to change its past policies, which have been designed more to keep the Bank in operation than to benefit exporters and the thousands of Americans whose jobs depend on international sales.

Last year the Bank failed to use $1 billion of its lending authority. At the same time, U.S. businesses lost an estimated $1 billion in international sales because the Bank failed to offer competitive financing. There is no adequate way to explain this conservative approach to those Americans who were needlessly unemployed.

We must compete agressively in the international marketplace. This bill, which renews and improves the Eximbank's charter, is one important step in that direction. I urge my colleagues to vote for this bill.

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The committee amendments must be acted upon before other amendments may be considered, unless this is an amendment to the first committee amendment. Is this an amendment to the first committee amendment?

Mr. HEINZ. Will the Senator withhold?

Mr. GORTON. I will withhold.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I ask unanimous consent that the committee amendments be considered en bloc

and upon adoption be considered as original text for the purpose of further amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. Without objection, the committee amendments are agreed to en bloc.

Mr. HEINZ. Mr. President, it is my understanding that amendments to the bill will now be in order; is that correct?

The PRESIDING OFFICER. That is correct.

The Senator from Washington.

AMENDMENT NO. 2209

(Purpose: To promote equal and nondiscriminatory opportunities for United States insurance companies to bid for insurance in connection with transactions assisted by the Bank)

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. GORTON) proposes an amendment numbered 2209.

Mr. GORTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, immediately after line 16, add the following new section:

COMPETITIVE INSURANCE

SEC. 108. Section 2 of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(d)(1) In carrying out its responsibilities under this Act, the Bank shall work to ensure that United States companies are afforded an equal and nondiscriminatroy opportunity to bid for insurance in connection with transactions assisted by the Bank.

"(2) In furtherance of that effort, the Chairman of the Bank shall review Bank policies and programs in regard to this issue, and in coordination with the United States Trade Representative and the appropriate agencies of the Department of State, the Department of the Treasury, and the Department of Commerce, undertake actions designed to promote equal and nondiscriminatory opportunities to bid for insurance in connection with all aspects of international trade activities.

"(3) The Bank shall report to the Committee on Banking, Finance, and Urban Affairs of the Senate not later than May 15, 1984, regarding—

"(A) the existing obstacles to equal and nondiscriminatory bidding for insurance related to transactions assisted by the Bank;

"(B) the efforts that the Bank has taken in addressing such problems; and

"(C) any recommendations for additional action by the appropriate agencies of the executive branch or the Congress."

Mr. GORTON. Mr. President, in its report on S. 869, the Senate Banking Committee expressed concern that:

(E)xisting Eximbank guidelines for the procurement of insurance in connection with export transactions assisted by Bank loans or loan guarantees have no mechanism to deal with client countries invoking discriminatory laws or business practices to compel the placement of such insurance with local insurance companies.

Although many Eximbank-financed transactions receive substantial U.S. financial assistance, U.S. insurers are often denied an opportunity to compete for the related insurance business. Some foreign governments have laws requiring that all insurance be placed with locally owned companies; some countries have government-owned insurance monopolies. Lost business opportunities for U.S. insurers as a result of these discriminatory practices have been estimated to exceed $200 million annually.

The purpose of my amendment is to strengthen the Eximbank's hand. It is designed to encourage broader competitive opportunities for U.S. insurers in connection with Bank-assisted projects.

My amendment is identical to language which appears in the House bill. It directs the Bank to, first, work to insure that U.S. companies are afforded an equal and nondiscriminatory opportunity to bid for insurance in connection with transactions assisted by the Bank; second, review its current policies and work with other Federal agencies to promote opportunities to bid for insurance in international trade; and third, report to the House and Senate Banking Committees on obstacles to insurance companies, efforts made by the Bank to alleviate those obstacles, and recommendations for further action.

I would like to point out that my amendment does not require, as a condition of Exim financing, that U.S. insurers have an opportunity to compete for the insurance business. Such a requirement could actually deter sales of U.S. goods and services abroad. My amendment, like the House provision, is designed to provide the Bank with maximum administrative flexibility to improve the competitive opportunities for U.S. insurers.

Mr. HEINZ. Mr. President, I am prepared to support and I am prepared to accept, on behalf of the majority, Senator GORTON'S amendment. This amendment, as he describes it, does relate to procurement problems confronted by U.S. insurers related to Exim-financed projects. That has been a concern of mine for a number of years, since the problems was first brought to the attention of a number of us by U.S. insurance firms.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point correspondence voicing my concern which I had with Exim last year, together with the Bank's response. I note that my original letter was cosigned by Senators GARN, CHAFEE, and INOUYE.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

COMMITTEE ON BANKING,
HOUSING, AND URBAN AFFAIRS,
Washington, D.C., April 6, 1982.

Hon. WILLIAM H. DRAPER III,
Chairman, the Export-Import Bank,
Washington, D.C.

DEAR MR. DRAPER: We would like to indicate our concern to officials at Eximbank over procurement problems confronted by U.S. insurers related to Exim-financed projects and product sales. It appears that guidelines presently at the Bank allow client countries to use restrictive business practices to force the placement of this significant amount of insurance business in their local markets with national insurance companies. In some cases, U.S. insurers never even have the opportunity to compete for this business.

It has been brought to our attention that representatives of a major U.S. insurance company provided in testimony before the House Banking Subcommittee on International Trade an analysis of the problem, examples of market practices and legislation used by client countries of Eximbank to discriminate against U.S. insurers, and suggestions for changing the regulations. Moreover, in an analysis recently provided to our offices from the American Institute of Marine Underwriters, the trade association for marine insurers, they estimate that in 1981, U.S. insurers last as much as $100,000,000 in marine insurance premiums alone on Eximbank-financed projects.

In addition to marine insurance, Eximbank financed during fiscal year 1981 some $4,370,588,938 worth of projects developed in some of the countries that practice the most severe restrictive business practices. Indeed, the $3,203,514,159 worth of loans, the $812,113,864 worth of guarantees, and the $354,960,965 worth of medium term insurance by Eximbank, is further evidence of the magnitude of this problem and of the need for prompt remedial action. Combine these figures with non-marine insurance business lost, and the figures increase to even alarmingly higher levels. Obviously, U.S. firms would not win all the contracts on which they bid, but at the very least Eximbank ought to use its leverage to assure that U.S. insurance companies are accorded equal treatment with their home country competitors.

We are raising this issue because we believe that the export of services offers a great opportunity to improve our trade deficit. Since there is no inherent reason why insurance or reinsurance must be placed overseas, there is no reason to encourage or permit this income to be lost. Therefore, we would urge the Bank to continue its dialogue with the industry, to review its policy, and to resolve this matter in a mutually satisfactory fashion.

We appreciate your attention and assistance on this matter and would be interested in suggestions you may have to improve the competitive situation for U.S. insurers.

With best regards,

JOHN HEINZ.
DANIEL INOUYE.
JAKE GARN.
JOHN CHAFEE.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., April 23, 1982.

The Hon. JOHN HEINZ,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HEINZ. Thank you for your letter of April 6, 1982 expressing your concern and that of Senators Garn, Chafee and Inouye over procurement problems confronted by U.S. insurers in international trade. I am sending my response separately to each of the other Senators.

We at Eximbank recognize that U.S. insurers are seeking the right to compete on equal terms with foreign insurers for insurance business arising in foreign trade, and we share your belief that countries should be discouraged from engaging in restrictive trade practices which exclude U.S. firms from participating in coverage.

Eximbank officials, including Director Margaret Kahliff, have met at various times with representatives of the insurance industry, members of the U.S. Trade Representative's office and the Department of Commerce, and with members of Senator Inouye's staff to assess how and to what degree Eximbank can respond to this issue. Eximbank has always provided a strong incentive to maximize U.S. procurement, including insurance, in export sales by financing only the U.S. portion of such sales and by permitting the inclusion of U.S. purchased insurance in the Eximbank financial package. As a result of our consultations on the insurance issue, we have instructed our direct credit loan officers to raise at the earliest opportunity with borrowers and exporters using Eximbank's services the matter of insurance and to urge them to permit U.S. insurers to compete for the insurance business involved. Beyond providing a strong financing incentive and urging equal access for U.S. insurers, Eximbank's ability to influence negotiations on the scope of U.S. supply is limited due to the highly competitive nature of export business and because Eximbank does not participate in the sales negotiations. Nevertheless, we hope our efforts to help improve the competitive opportunities for U.S. insurers.

Under the direction of Congress and through the leadership of the United States Trade Representative, the United States is raising the issue of free trade in services, including insurance, by initiating efforts to resolve the issue through the OECD, the GATT negotiations, in bilateral trade negotiations and through appropriate enforcement actions under the Trade Act of 1974. I think this is the right approach. Eximbank will continue to cooperate with and work with the USTR, the Commerce Department and others in this effort.

Sincerely yours,

WILLIAM H. DRAPER III.

Mr. PROXMIRE. Mr. President, I enthusiastically support the amendment by the senior Senator from Washington. I think it is an excellent amendment. We do need it. The fact is that our insurers have been excluded unfairly. This would take some effective steps at last to do something about that.

I congratulate the Senator from Washington on a fine amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2209) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I am prepared to go to final passage.

Mr. PROXMIRE. No way. Not yet.

Mr. HEINZ. But perhaps if we sound like we are ready to go to final passage, Mr. President, Senators who have amendments will come to the Chamber and offer them.

AMENDMENT NO. 2210

Mr. HEINZ. Mr. President, while we are waiting for Senators to appear, I have a brief technical amendment that I shall offer. I send to the desk a technical amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an amendment numbered 2210.

Mr. HEINZ. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, strike lines 20 and 21, and insert in lieu thereof the following: "by the President for such an increase in its authority as he deems appropriate.";

On page 29, line 2, strike "and" and insert in lieu thereof, "or";

On page 15, line 9, strike out "7(b)(2)" and insert in lieu thereof, "7(a)(2)";

On page 19, line 10, strike "adequatehy" and insert in lieu thereof, "adequately".

On page 21, between lines 15 and 16, insert the following new section:

"TECHNICAL AMENDMENTS

"Section 111. (a) Section 2(b)(1)(B) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(1)(B)) is amended by striking out "businessmen" and inserting in lieu thereof "business concerns".

"(b) Section 2(b)(4) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(4)) is amended by striking out "he" wherever it appears and inserting in lieu thereof "the Secretary".

"(c) Section 3(e) of the Export-Import Bank Act of 1945 (12 U.S.C. 635a(e)) is amended by inserting after "his", "or her" and by inserting after "he", "or she".

"(d) Section 4 of the Export-Import Bank Act of 1945 (12 U.S.C. 635b) is amended by striking out "he" and inserting in lieu thereof "the President".

"(e) Section 7(b) of the Export-Import Bank Act of 1945 (12 U.S.C. 635e(b)) is amended by striking out "he" wherever it appears and inserting in lieu thereof "the President".

"(f) Section 1912(a)(2) of the Export-Import Bank Act Amendments of 1978 (12 U.S.C. 635a-3(a)(2)) is amended by striking out "he" and inserting in lieu thereof "the Secretary".

"(g) Section 1912(b) of the Export-Import Bank Act Amendments of 1978 (12 U.S.C. 635a-3(b)) is amended by striking out "he" and inserting in lieu thereof "the Secretary".".

Mr. HEINZ. Mr. President, this amendment corrects typographical errors in two instances. One clarifies the expanded definition of acceptable collateral in title III of the bill relating to export trading companies; and one clarifies a technical problem with the midyear report required of the Bank. It has been pointed out that technically it is the President, not the Bank, that would request additional funds if it were deemed necessary, and the amendments modifies the provision accordingly. The last technical amendments make some gender changes in the wording of the charter.

Mr. President, I move that the technical amendment be adopted.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, we have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2210) was agreed to.

AMENDMENT NO. 2211

(Purpose: To strike the import control authority under section 109)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself, Mr. CHAFEE, and Mr. DOLE, proposes an amendment numbered 2211.

On page 19, beginning on line 20, strike out all of section 109 through line 15 on page 21, and redesignate succeeding paragraphs accordingly.

Mr. DANFORTH. Mr. President, this amendment is offered on behalf of myself, Senator CHAFEE, and Senator DOLE, all members of the Senate Finance Committee, Senator DOLE being the chairman of our committee, I being the chairman of the Subcommittee on International Trade. The amendment would strike out section 109 of the bill on the grounds that section 109 is a violation of the General Agreement on Tariffs and Trade, and particularly a violation of the Subsidies Code.

Under an arrangement entered into by the OECD, the members of the OECD have agreed to a floor on interest rates which can be used for subsidizing the financing of exports. There is, under present law, an established legal procedure for policing and enforcing this arrangement of OECD. Under present law, if interest rates are used to subsidize the financing of ex-

ports in violation of the agreement, the Secretary of the Treasury makes a determination that the subsidized loan is a determining factor in obtaining the sale.

Mr. HEINZ. Will the Senator yield for just a minute to provide the manager of the bill a copy of this amendment?

Mr. DANFORTH. Surely, Mr. President.

Under present law, the Secretary makes a finding that the subsidization of interest rates and the subsidization of the loan is a determining factor in obtaining the sale. He then can counter the subsidized feature of the loan, thereby creating a level playing field, creating the same sort of subsidy for the U.S. manufacturer that exists for the foreign manufacturer. That is the present situation.

Under the bill that is now before us, there is an alternative route which is provided for the Secretary of commerce. This bill authorizes the Secretary of Commerce to bar imports of the goods benefiting from the subsidized financing. In other words, instead of merely authorizing the Secretary of the Treasury to counter the subsidy, this bill would go further and would authorize the Secretary of Commerce to bar the imports of the goods altogether. The bill, therefore, provides not just a countersubsidy, but an import restriction and—and this is why there is a violation of the General Agreement on Tariffs and Trade—it provides an import restriction without a finding of injury as required under the Subsidies Code.

It authorizes the Secretary of Commerce to act within a period of 30 days and it authorizes him to do so without any consultation or input from the International Trade Commission.

The International Trade Commission, in enforcing the subsidy laws, is that part of the Government of the United States which is in business to determine whether the subsidy of a foreign import creates injury. There is no role for the International Trade Commission in this bill. Therefore, Mr. President, this amendment is an amendment to strike that provision in the bill which is violative of the General Agreement on Tariffs and Trade and it would, therefore, retain the present situation in the law for enforcing the OECD arrangement.

Mr. President, I have here a letter from the U.S. Trade Representative, the Honorable William E. Brock, stating the administration's position, which I shall now read into the RECORD. It is dated September 23, 1983. The Ambassador says as follows:

DEAR JOHN: I am writing to express my opposition and that of the Administration to Section 109 of S. 869, a bill to renew the Eximbank Charter.

We are opposed to the amendment for several reasons. First the embargo of foreign goods flatly violates GATT Article XI and Article 19.1 of the Subsidies Code. Article XI strictly prohibits quantitative restrictions (including embargoes) on imports; Article 19.1 further prohibits taking action against particular subsidies other than by GATT-consistent action. Shortcutting dispute settlement is not only illegal, but is inconsistent with the trade policy of this Administration. Unilateral action on our part will invite the same by our trading partners, undermining those efforts we are making to liberalize the world trading system.

Further, we have laws at our disposal to address the problem of foreign subsidized financing on sales into the U.S. market. A petitioner or the U.S. Government can initiate a countervailing duty investigation or an investigation under Section 301 of the Trade Act of 1974. The competing U.S. firm can use Section 1912 of the Export-Import Bank Act of 1945, as amended, to match the foreign financing offer if it is determined that the financing is a determining factor in the purchase decision. Finally, we can initiate Subsidies Code dispute settlement proceedings against the offending party as Arrangement-inconsistent financing is a clear violation of the Code. All these ways can be pursued at the same time by an injured U.S. industry or union.

I would note that U.S. law was adequate in responding to the Canadian offer of Arrangement-inconsistent financing on the sale of 625 subway cars to the New York MTA. From the date Budd filed the petition, the MTA sale was affected by the possibility of countervailing duties. The Commerce Department, in its countervailing duty investigation, made a final determination that the subsidies on the sale amounted to approximately $200 million. The importer of the subway cars would have been liable for the countervailing duties. While the Budd Company withdrew the case before the final assessment of duties, the Administration sent a clear signal to foreign exporters that it would countervail foreign subsidized financing and to U.S. importers that they would be liable for the countervailing duties should they accept subsidized financing.

I would appreciate your support in opposing this amendment.

Very truly yours,

WILLIAM E. BROCK.

Mr. President, I have a letter also to Senator DOLE from W. Dennis Thomas, Assistant Secretary of the Treasury, also supporting this amendment. I ask unanimous consent to have it printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE TREASURY,
Washington, D.C., September 23, 1983.

Hon. ROBERT J. DOLE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DOLE: You have asked for Treasury's comments on Section 109 of S. 869, the "Export-Import Bank Act Amendments of 1983". Section 109 would ban imports of all goods benefiting from official export credit subsidies in derogation from international arrangements, understandings, and standstills on export credits, provided that no inquiry has been commenced under Section 1912 of the Export-Import Bank Act Amendments of 1978.

The Department of the Treasury strongly opposes such an embargo because it is contrary to our international obligations and inconsistent with Administration trade policy. Any counteraction against subsidized imports, under the U.S. countervailing duty law, can only offset the foreign bounty or grant, as determined by the Commerce Department. For duty-free imports or for countries which are (a) signatories to the Subsidies Code; or (b) have a bilateral agreement with the United States which grants them the injury test, an injury determination is also required.

Existing U.S. law is adequate to protect our trade interests should a country export goods to the United States with export credit subsidies in derogation of international arrangements, understandings, and standstills. Section 301 of the Trade Act of 1974 contains provisions which authorize the President to enforce U.S. rights under trade agreements and to counter measures or practices which the President finds to be "unjustifiable, unreasonable, or discriminatory" which burden U.S. commerce.

The Department believes that the current provisions of the countervailing duty law and of Section 301 are adequate to deal with the problem of official export credit subsidies which are inconsistent with international arrangements, understandings, and standstills.

Sincerely,

W. DENNIS THOMAS,
Assistant Secretary
(Legislative Affairs).

Mr. PROXMIRE. Mr. President, this amendment is one of those rare and happy amendments that is supported by both labor and industry.

I have a letter from the Labor-Industry Coalition for International Trade. It is a short letter and I will read it into the RECORD.

DEAR SENATOR PROXMIRE: I am writing on behalf of the members of the Labor-Industry Coalition for International Trade (LICIT) to reiterate our support of section 109, "Prohibition of Imports Supported by Export Credits Inconsistent with the OECD Arrangement on Export Credits," of S. 869, a bill to amend the Export-Import Bank Act.

Large sales of capital equipment subsidized by official export credits can cause great harm to American industries, and there is no effective remedy in law at this time. These sales are made with credits granted in clear violation of the international obligations of the governments of major industrial nations both in the OECD and in the GATT. If current international agreements are to have meaning, and more effective rules are to be negotiated in the future, blatant violations of these accords must be prevented. In our own market, we have the ability, which this legislation would implement, to prevent these transactions from occurring.

Now, let me indicate who the Labor-Industry Coalition on International Trade includes. It includes the AFL-CIO, Bethlehem Steel, Amalgamated Clothing and Textile Workers Union, the Communication Workers of America, Combustion Engineering Corp., the Corning Glass Co., the International Union of Radio Electric and Machinery Workers, the International Brotherhood of Electrical Workers, the American Flint Glass Workers Union, B. F. Goodrich Co., Ingersoll-

Rand Co., International Ladies Garment Workers Union, International Association of Machinists and Aerospace Workers, United Paperworkers International Union, United Rubberworkers of America, St. Joe Minerals Corp., United Steelworkers of America, W. R. Grace and Co., and Westinghouse Electric Co.

So the first point I want to make clear is that the Labor Industry Coalition for International Trade does favor this section.

In the second place, Mr. President, the provision is designed to prohibit imports where there is a subsidy which is a material element in the sale, and that, of course, would be determined by the Secretary of Commerce.

In the third place such subsidies violate the GATT code and the OECD arrangement on export credits.

In the fourth place, the provision, that would be stricken by the Danforth amendment, carries out the GATT agreement. Let us be crystal clear on that point. Let us not fog up the issue. GATT outlaws subsidies. Section 109 seeks to enforce GATT in a meaningful manner.

As my fifth point I think we should all agree that subsidies should be outlawed. Subsidies are a waste of money and they distort free markets in international trade.

Finally I believe that the simplest way to end subsides is to prohibit the import of subsidized goods when there are adverse consequences.

Now, some will say that instead of prohibiting imports GATT requires us to file a lawsuit with the GATT and litigate the issue. I must say, Mr. President, that is a very impractical course to follow. What in the world would that do? The sale would be made and we would be left with a lawsuit. That puts the cart before the horse. We need injunctive relief against subsidies. So let the subsidizers go to the GATT and say that we violated procedures by not allowing subsidized goods to be sold. GATT would throw the case out since the subsidizers would not have clean hands. Let us put the burden on the subsidized as section 109 does.

I question the argument that the injunction in section 109 violates the spirit of GATT.

In the first place, GATT outlaws subsidies. I repeat, GATT outlaws subsidies.

Second, GATT does not reach all imports. Most particularly it does not reach purchases by State and local governments, and that is where the problem has been. Remember, for example, the purchase of subway cars by New York City. Also, section 301 of the Trade Act, now law, gives discretionary authority to the President of the United States to prohibit imports where there has been a subsidy. Section 109 does much the same. Therefore, section 109 is not GATT inconsistent. I would argue that section 109 seeks to prohibit subsidies.

Mr. CHAFEE. I wonder if the Senator would yield for a question.

Mr. PROXMIRE. I would be delighted to yield to my good friend from Rhode Island.

Mr. CHAFEE. Does not the GATT provide as follows in article 19 of the Subsidies Code:

> No specific action against a subsidy of another signatory can be taken expect in accordance with the provision of GATT as interpreted by the Subsidies Code.

Now, is that not crystal clear that what the Senator is proposing is completely contrary to GATT? If you object to the subsidies, yes, but there is a procedure and GATT has a procedure and says any other action against another signatory cannot be taken except in accordance with the provisions of GATT.

Mr. PROXMIRE. Mr. President, in the first place, the subsidy itself violates GATT. Furthermore, it would not be inconsistent with our GATT obligations in the case of purchases by State or local governments. Such purchases are not covered by GATT. As the Senator knows, we have a crystal clear example in the sale of subway cars to New York City. That was a big ticket item and it was subsidized. This section is designed to get precisely at that.

Mr. CHAFEE. As the Senator knows—perhaps he did not have a chance to hear the letter from Ambassador Brock—that case was resolved under the existing procedures of the countervailing duties. As you know, the Bud Co. dropped its actions.

Mr. PROXMIRE. Well, it is the kind of resolution where you can understand why it makes management and workers unhappy in this country, because it involved a huge subsidy. It was a sale, competing with American-made cars, and the foreign firm won because it had a subsidy. That was a major determining factor.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. CHAFEE. I yield.

Mr. HEINZ. Mr. President, I think this is a case where both sides have a very good point. Senator PROXMIRE was a very active participant in our hearings on section 1912 of this legislation. That section did, indeed, grow out of some very unsatisfactory experiences we have had with foreign subsidized credit supporting imports into the United States where the established mechanisms simply were not adequate to deal with what everybody could agree on in substance was not only a subsidized export into the United States but also was clearly below the international arrangement that everybody had agreed upon.

Therefore, the amendment of Senator PROXMIRE in this bill, and it is his amendment, is aimed at a very valid objective.

I think at the same time Senator DANFORTH and Senator CHAFEE have an equally valid concern about the injury test. We do not have a regular injury test in this section—indeed, I raised that question with Mr. Samuels who advocated this proposal before the committee, and the hearing record on pages 8 and 9 goes into that in more length. It seems to me, therefore, that because an injury test is customary where subsidies by GATT members are concerned—non-GATT members do not have the benefit of an injury test. I would say to my good friend from Missouri unless they are both GATT members and signatories to the Subsidies Code—it would seem to me reasonable that we seek an amendment to section 109 that provides for some kind of expedited injury test using the ITC, which is our established mechanism for determining injury.

I suggest this to my colleagues because I do not want to see one or the other prevail, both sides to the exclusion of the other. I think both sides have a point, and this is a difference that should be reconcilable.

Mr. CHAFEE. Mr. President, I think this proposal deserves examination.

I take it that the Senator is making that on behalf of the committee.

Mr. HEINZ. The Senator has not yet proposed specific language. What I would propose to do is to suggest the absence of a quorum, so that we might discuss precise language.

Mr. CHAFEE. That is fine.

Mr. HEINZ. Mr. President, I ask unanimous consent that the Danforth amendment be temporarily set aside, for the sole purpose of taking up the amendment of the Senator from Georgia (Mr. MATTINGLY).

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Georgia.

Mr. MATTINGLY. Mr. President, although I have pledged my full support for the renewal and reauthorization of Eximbank, I want to make it clear that I do not support in total an amendment to S. 869 which authorizes Eximbank to extend a loan guarantee and insurance package to Mexico for the purchase of U.S. goods and services.

On August 16, 1983, the Export-Import Bank (Eximbank) announced plans to guarantee as much as $2 billion in new export credit to Brazil and Mexico in the next fiscal year. While Brazil could receive as much as $1.5 billion, a program has been designed to guarantee $500 million in commercial bank loans and export insurance

contracts covering U.S. export of goods and services to Mexico.

Yet, on September 5, 1983, Mexico, one of the world's most indebted nations, announced that it will lend Cuba's Communist Government $55 million in credit at preferential terms to purchase Mexican goods.

While I realize that Eximbank assistance is tied to the Mexican purchase of U.S. exports, the question I pose to my colleagues is this: How can we be 100-percent certain that by making it easier for Mexico to borrow, we are in no way facilitating Mexico's ability to lend to Cuba—and that we are in no way aiding and abetting communism?

The answer is that we cannot and do not have that guarantee. Making it easier for Mexico to finance its imports may permit it to use the capital otherwise needed for that purpose for others—like aiding Cuba's ability to import, thereby easing its financial position. In essence, we are indirectly supporting the Communist regime in Cuba.

I find this activity unacceptable, the practice intolerable, and something that must cease. Last week, during Senate debate over the appropriate response to the Soviet downing of the Korean airliner, I made the statement that the House joint resolution, which subsequently was adopted by the Senate, should be viewed only as a first step in the procession of responses taken to display our outrage and condemnation of the incident. Furthermore, I stated that the Congress should plan to continue its efforts to sanction and condemn the Soviet Union and its client states in any appropriate commercial, economic, or political fashion.

My dialog in opposition to lending assistance to Mexico in this fashion and at this time is intended to be another signal sent to our adversaries to make it clear that we will not return to business as usual with the Soviets and their satellite countries. So all I am doing here today is encouraging my colleagues to support the idea of telling Mexico that they must stop this practice. Our united opposition in the Senate and in Congress would be an adequate and moderate gesture symbolizing our commitment to preserve freedom and to protect democracy.

Before I close, Mr. President, I should like to ask the distinguished managers of S. 869 to assure me that the appropriate committees of Members of the Senate receive certifications, as best that can be obtained, from the Eximbank every 90 days of the kinds of U.S. goods that Mexico purchases with the assistance of this program. With the escalation and intensification of our relations with the Soviet Union, it is essential that we closely monitor our steps to insure that we are not supporting in any way the subversive behavior of the Soviet Union or that of its satellite countries. I do not think anyone can argue with the need—and the benefits—of being made aware of this kind of information.

I say to the distinguished manager of the bill that I have an amendment to withdraw $55 million from the loan guarantees and insurance. But if the Senator will give me this assurance and include this in the bill, I will not offer the amendment.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. MATTINGLY. I yield.

Mr. HEINZ. I say to the Senator that I thoroughly support what he has asked for Eximbank.

I will do everything in my power—and anticipate being successful—in obtaining the periodic 90-day certification he requests. He has raised very valid questions regarding the report of a $55 million loan from Mexico to Cuba. I was troubled by that report as well.

I say to my good friend, the Senator from Georgia, that I do share his concerns. Not only do we want to assure that none of the $500 million in insurance and guarantees to support American exports is somehow used to support Cuba, but also, we want to do everything in our power to make sure there is not even an appearance or that we can be accused that anything we are doing in this bill is in any way supportive of either Cuba or Mexican support or loan, or whatever it is in which they have involved themselves, of financing Mexican-Cuban trade.

Consequently, as a first step—and I assure the Senator that this is only a first step—I have asked for and received assurances from the Chairman of the Eximbank that this insurance and guarantee facility we have been discussing will be used solely to finance goods and services of U.S. origin or manufacture and that the Bank will take special care to assure proper documentation from the U.S. exporter complying with this requirement.

Second, I can see ablsolutely no reason why the Bank will not agree to our request. We will develop the necessary dialog with the Bank to insure that there is the assurance that the Senator wants while this facility is in existence.

Mr. President, at this point I ask unanimous consent to have printed in the RECORD the letter from Chairman Draper.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., September 22, 1983.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Regarding Eximbank's proposed insurance and guarantee facilities for Mexico and Brazil, I wish to assure you that the insurance and guarantees will be used solely to finance goods and services of U.S. origin or manufacture. These transactions will be administered as carefully as all of the Bank's programs to ensure that the proper documentation is submitted by the U.S. exporter to comply with this requirement.

Please let me know if any further questions arise on this matter.

Sincerely,

WILLIAM H. DRAPER III.

Mr. HEINZ. Mr. President, once again I commend the Senator from Georgia for being extremely vigilant in bringing this matter to my attention and the attention of the committee, which will insure that none of the money in the facility in this amendment serves purposes other than the ones clearly intended.

I thank the Senator for his contribution. It is a significant one.

Mr. MATTINGLY. Mr. President, I thank the distinguished Senator, the manager of the bill, and the ranking minority member of the bill for his accepting this amendment.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

Mr. HEINZ. Mr. President, what is the pending business?

The PRESIDING OFFICER. The amendment of the Senator from Missouri is the pending business.

Mr. HEINZ. Mr. President, I ask unanimous consent that the Danforth amendment be temporarily laid aside for the sole purpose of considering an amendment to be offered by the Senator from Wisconsin (Mr. KASTEN).

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2212

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an amendment numbered 2212.

Mr. KASTEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, between lines 21 and 22 insert the following:

"(B) If the Bank finds that the amount of direct loan authority or guarantee authority available to it for any fiscal year exceeds the amount which will be necessary to carry out its functions during such year, it shall promptly transmit to the Congress a request for legislation to eliminate the amount of such excess direct loan or loan guarantee authority. Upon the expiration of a period of 45 days after the date on which the Bank makes such request, the Bank shall make the amount of such excess authority available for commitment unless the Congress has completed action on legislation eliminating or reducing the excess amount. For the purpose of computing the 45-day period under the preceding sentence, there shall be excluded any days on which either House of Congress is not in session because of an adjournment of more than 3 days.".

Mr. KASTEN. Mr. President, the amendment I am offering seeks to correct a situation not provided for in the Budget Act of 1973.

As my colleagues know, the Budget Act of 1973 provides mechanisms whereby the executive branch must submit to Congress either deferrals or rescissions when it finds that funds appropriated by Congress will not be utilized as Congress intended. The motive behind this particular aspect of the Budget Act were actions carried out by a number of administrations who simply impounded funds despite congressional action.

Unfortunately, in the case of direct loan authority and loan guarantee authority of the Export-Import Bank, such impoundment is still possible. Indeed, despite the fact that Congress provided $4.4 billion in direct loans for the current fiscal year, the administration in its budget submission last February said that it would only allocate $3,830,000,000, which had been their original budget request. Unbelievable as it may seem, the Export-Import Bank tried to tell us that they had made a new evaluation and it was just coincidental that their new assessment came to the same figure as their original budget request. In my mind that shows at least a disregard of congressional concerns, if not outright contempt for Congress and the legislative branch. The amendment I am offering today would require the Bank to secure specific legislation from Congress reducing congressionally provided authority if they find the amount we have provided is in excess of their needs.

Mr. President, I believe this amendment is good government, an extension of what Congress has been trying to do over the last several years through the overall budget process, and furthermore, especially with respect to the Export-Import Bank where Congress and the administration have had so many differences, I think we need this extra oversight mechanism.

I hope the distinguished managers of the bill will see fit to accept the amendment.

Mr. President, I ask unanimous consent to add Senator LEVIN as a cosponsor of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I ask unanimous consent to be added as a cosponsor as well.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, I hope the committee will act favorably upon this amendment.

Mr. HEINZ. Mr. President, speaking on behalf of the majority, I am prepared to accept this amendment. Indeed, I strongly endorse it.

What we are really talking about is treating Eximbank with respect to any excess direct loan or loan guarantee authority just the way we treat any other branch or agency of the Federal Government.

At the present time it is treated differently. It is not subject to the rescission authority that all other agencies must operate under.

That has often operated, in my judgment, to the detriment of the United States and our export competitiveness.

I salute the Senator from Wisconsin for offering this amendment. It is a very useful amendment, and I urge my colleagues to support it.

Mr. PROXMIRE. This amendment is offered by my distinguished colleague from Wisconsin?

Mr. KASTEN. It is.

Mr. PROXMIRE. I hesitate to oppose anything my friend from Wisconsin offers. We work together in behalf of my State. We have always been in complete harmony.

But I understand this amendment is opposed by the administration, opposed by the Office of Management and Budget.

It would require the agency to go ahead and expend the money even though they do not have to and do not need it.

It seems to me to be a bad course to follow for any agency, and we all know that the Export-Import Bank is revered, worshiped, and adored regularly, not just on Sundays, but 7 days a week. But it seems to me this is really overdoing it.

So, I must say I have considerable problems with this amendment, especially since I say it is opposed by the Export-Import Bank and opposed by the Office of Management and Budget, which I suppose does speak for the administration. At a time when we have colossal deficits for us to insist that an agency go ahead and expend their guarantee or expend their funds seems to me is wrong.

Mr. KASTEN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. KASTEN. Mr. President, I wish to make one point. We are not insisting that they spend the money or they do not spend the money. What we are doing is establishing for the Eximbank the exact same mechanism which is now in place for most other agencies. If they choose not to spend the money, they come back to us to get our approval. All we are trying to do is continue to have the congressional process work so that they cannot unilaterally, if you will, make a decision on spending. If they choose to not spend the money, they come back to us and there is the same kind of process that is in existence for most other agencies. I just want to put the Eximbank under that same process of continuing to work with the legislative branch, not being able to unilaterally make a rescission or an impoundment.

Mr. PROXMIRE. Is it not true that if Congress does not act within 45 days, they then have to go ahead and spend the funds?

Mr. KASTEN. That is the system we have in place for all Government agencies. It is the same system. It is the Budget Act of 1973. And the system is in place for everything. It is not in place for the Eximbank. I just want to bring the Eximbank into the same system.

Mr. PROXMIRE. What happens if there are not qualified applicants available?

Mr. KASTEN. That is fine. They would come to us and say, "We do not find qualified applicants, we want to spend less money."

Mr. PROXMIRE. Suppose Congress does not act in the 45 days.

Mr. KASTEN. There is an expedited procedure for Congress. It is the same as if the Department of the Interior or any other Government agency. They are all under this now and there are decisions that are made in which they do not spend the money and we, in fact, can work with that.

The Budget Act does not right now include the Eximbank. I am trying to bring them into a similar process so they are treated exactly like all other agencies.

Mr. PROXMIRE. This is to apply to loan guarantees, and the Budget Act does not apply to loan guarantees.

Mr. KASTEN. I do not know why the Budget Act did not include the Eximbank in the beginning. Maybe it was because of loan guarantees, maybe it was not. I am simply saying that the same process which is in place for all other agencies should include the Eximbank. There is no reason that they should make decisions on their own, whereas in all the other agencies, in all the other spending decisions, they cannot.

Mr. PROXMIRE. May I ask my friend and colleague why this should not be a decision for the Budget Committee rather than a matter to be taken up on the floor?

We have not had a chance to hold a hearing on this to consider it. As I say, it is opposed by the agency and opposed by OMB, and we are changing the impoundment procedures, weakening the President's opportunity to hold down spending, at a time when we certainly want to go the other way.

Mr. KASTEN. We are not in any way affecting the ability to hold down spending, and to my knowledge this amendment is not being opposed by the Budget Committee. As a matter of fact, I assume that most members of the Budget Committee would support it.

Mr. PROXMIRE. That would be fine. That is why I think it should go through the Budget Committee because it seems to me it is a kind of determination that they should have an opportunity to hold a hearing on and make their own decision on, if or if not hold a hearing, at least have an opportunity for the committee to meet, discuss, debate, and decide, rather than to have us decide it in a few minutes discussion by accepting it on the floor.

Mr. KASTEN. The reason it is here and not there is this is not an amendment to the 1973 Budget Act. We are not amending the Budget Act. Therefore, it would not be appropriate for the Budget Committee. We are amending the Eximbank bill because we want the Eximbank to fall under the same kinds of review procedures that all other agencies have fallen under. They somehow got out and we are going to try to put them back in.

Mr. PROXMIRE. As I say, I have great respect, admiration, and affection for my good friend. I oppose the amendment. There is nothing else I can do but oppose it.

I would suggest that the Senator might improve his amendment if he would insert on line 8, to make it read:

If the Bank finds that the amount of direct loan authority or guarantee authority available to it for any fiscal year exceeds the amount which will be necessary to carry out its functions.

And then insert the following:

Consistent with the availability of qualified applications and limitations imposed by law.

Mr. KASTEN. I would say to the Senator that that is what we mean and I would accept that modification to my amendment. That further clarifies what we mean.

Mr. PROXMIRE. I send the modification to the desk which the author has agreed to.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

In the amendment on line 8, after the word "functions" insert the following: "consistent with the availability of qualified applications and limitations imposed by law."

The PRESIDING OFFICER. The sponsor has a right to modify the amendment.

Mr. KASTEN. I agree with the modification.

The PRESIDING OFFICER. The amendment is so modified.

The amendment (No. 2212), as modified, is as follows:

On page 15, between lines 21 and 22 insert the following:

"(B) If the Bank finds that the amount of direct loan authority or guarantee authority available to it for any fiscal year exceeds the amount which will be necessary to carry out its functions consistent with the availability of qualified applications and limitations imposed by law during such year, it shall promptly transmit to the Congress a request for legislation to eliminate the amount of such excess direct loan or loan guarantee authority. Upon the expiration of a period of 45 days after the date on which the Bank makes such request, the Bank shall make the amount of such excess authority available for commitment unless the Congress has completed action on legislation eliminating or reducing the excess amount. For the purpose of computing the 45-day period under the preceding sentence, there shall be excluded any days on which either House of Congress is not in session because of an adjournment of more than 3 days.".

Mr. DANFORTH. Mr. President, I believe an amendment that I offered with Senator DOLE and Senator CHAFEE is pending. I am going to be unavoidably off the floor for the next few minutes. I think that we are very close to working out a compromise agreement on that amendment.

Therefore, I ask unanimous consent that it might be in order for Senator HEINZ, Senator PROXMIRE, or Senator CHAFEE to offer the modification of my amendment on my behalf.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KASTEN. Mr. President, parliamentary inquiry. Is the question now on the Kasten amendment, as modified?

The PRESIDING OFFICER. The Senator is correct.

Is there further debate? If not, the question is on agreeing to the amendment, as modified, of the Senator from Wisconsin (Mr. KASTEN).

Without objection, the amendment (No. 2212), as modified, is agreed to.

Mr. PROXMIRE. Mr. President, I just want to have it on the record that I oppose the amendment, although I will not ask for a rollcall. The Chair announced, "Without objection, it is agreed to." It is not agreed to without objection. I oppose the amendment.

The PRESIDING OFFICER. The amendment is agreed to.

The amendment (No. 2212), as modified, was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. LEVIN. Mr. President, I rise in support of the amendment offered by the Senator from Wisconsin, and urge Senate approval. This amendment will prevent the administration from unilaterally reducing the level of direct loan, loan guarantee, and insurance program authority provided to the Eximbank below the levels established by Congress. And if the administration believes the levels established should be reduced, it will be with the full knowledge and approval of Congress.

This amendment is important because it addresses a fundmental institutional issue involving the Congress and the executive branch. That issue is executive branch execution of the laws enacted by Congress. For this administration or any other to not make available the full amount of direct loan, loan guarantee and insurance program authority provided to the Eximbank is to render meaningless the actions which the Banking and Appropriation Committees, and this Congress, have jointly taken to establish those levels. And this has occurred in the past.

I want to commend Senator KASTEN for offering this amendment. It responds to this institutional issue and is consistent with an amendment I offered that was ultimately included in the Third Continuing Resolution for fiscal year 1982. That amendment required the head of any department or agency to enter into commitments to guarantee loans to qualified applicants in the full amounts provided by law, subject only to the availability of qualified applicants and limitations contained in appropriation acts.

My amendment was offered in response to a Reagan administration announcement unilaterally reducing the level of congressionally enacted loan guarantee authority by $20.3 billion for fiscal year 1982. These reductions affected 14 programs administered by 9 departments and agencies, including a $1.2 billion reduction in guarantees for the Eximbank.

As a further response to the administration's reductions, I introduced a number of bills earlier this year similar to the provision contained in the Third Continuing Resolution. The bills would amend the basic statutes establishing the various loan guarantee programs to provide permanent protection from unilateral administrative reductions once Congress establishes the level of guarantee authority for these programs. One of the bills would have protected guarantee and insurance programs of the Eximbank.

These bills also formed the basis of amendments I proposed to offer to S. 1338, the Housing and Community Development Act of 1983, and H.R. 2733, the Critical Agricultural Materials Act of 1983, when these bills were scheduled for consideration this summer. I will be offering similar amendments to other authorization bills in the future.

Again, Mr. President, I urge Senate passage of this amendment.●

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Missouri (Mr. DANFORTH).

Mr. HEINZ. Mr. President, it is my understanding that the Senator from Minnesota, Senator BOSCHWITZ, has an amendment. Is that correct?

Mr. BOSCHWITZ. That is correct.

Mr. HEINZ. Mr. President, in order to allow the Senator from Minnesota to offer his amendment, and because there is still discussion taking place among Senators attempting to resolve the issue on the Danforth amendment, I ask unanimous consent that we temporarily lay aside the Danforth amendment for the sole purpose of taking up the Boschwitz amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2213

(Purpose: To assure that the Bank meets the needs of small business concerns)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. BOSCHWITZ) proposes an amendment numbered 2213.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, between lines 14 and 15, insert the following:

(c) Section 2(b)(1)(B) of such Act is amended by inserting "export trading companies," after "indepndent export firms," in the third sentence, as amended by subsection (b).

On page 13, line 23, after the period, insert the following: "Not less than three members appointed to the Advisory Committee shall be representatives of the small business community.".

On page 15, between lines 7 and 8, insert the following:

(c)(1) Section 3(c) of such Act is amended by adding at the end thereof the following: "Of the five members of the Board appointed by the President, not less than one such member shall be selected from the small business community and shall represent the interests of small business.".

(2) In order to carry out the amendment made by paragraph (1), the first member appointed by the President of the United States to the Board of Directors of the Export-Import Bank of the United States after the date of the enactment of this section shall be selected from among the small business community and shall represent the interests of small business.

On page 19, strike out lines 8 through 11, and insert in lieu thereof the following:

"(iii) The Director appointed to represent the interests of small business under section 3(c) shall ensure that

On page 19, line 15, strike out the close quotation marks and the final period.

On page 19, between lines 15 and 16, insert the following:

"(iv) To assure that the purposes of subparagraphs (i) and (ii) are carried out, the Bank shall make available, from the aggregate loan, guarantee, and insurance authority available to it, an amount to finance exports by small business concerns (as defined under section 3 of the Small Business Act) which shall be not less than 6 per centum of such authority for fiscal year 1984, 7 per centum of such authority for fiscal year 1985, 8 per centum of such authority for fiscal year 1986, 9 per centum of such authority for fiscal year 1987, 10 per centum of such authority for fiscal year 1988 and thereafter. The Bank shall utilize the amount set aside pursuant to the preceding sentence to offer financing for small business exports on terms which are fully competitive with regard to interest rates and with regard to the portion of financing which may be provided, guaranteed, or insured. Financing under this subparagraph shall be available without regard to whether financing for the particular transaction was disapproved by any other Federal agency.

"(v) The Bank shall utilize a part of the amount set aside pursuant to subparagraph (iv) to provide lines of credit or guarantees to consortia of small or medium size banks, export trading companies, State export finance agencies, export financing cooperatives, small business investment companies as defined in section 103 of the Small Business Investment Act of 1958, or other financing institutions or entities in order to finance small business exports. Financing under this subparagraph shall be made available only where the consortia or the participating institutions agree to undertake processing, servicing, and credit evaluation functions in connection with such financing. To the maximum extent practicable the Bank shall delegate to the consortia the authority to approve financing under this subparagraph. In the administration of the program under this subparagraph, the Bank shall provide appropriate technical assistance to participating consortia and may require such consortia periodically to furnish information to the Bank regarding the number and amount of loans made and the credit worthiness of the borrowers.

"(vi) In order to assure that the policy stated in subparagraph (i) is carried out, the Bank shall promote small business exports and its small business export financing programs in cooperation with the Secretary of Commerce, the Office of International Trade of the Small Business Administration, and the private sector, particularly small business organizations, State agencies, chambers of commerce, banking organizations, export management companies, export trading companies, and private industry.".

On page 19, lines 18 and 19, strike out "designated to assure that such policy is carried out" and insert in lieu thereof "appointed to represent the interests of small business".

On page 19, between lines 19 and 20, insert the following:

(c) Section 9 of such Act is amended by adding at the end thereof the following:

"(c) The Bank shall include in its annual report to the Congress a report on the allocation of the sum set aside for small business exports pursuant to section 2(b)(1)(E). Such report shall specify the total number and dollar volume of loans made from the sums set aside, the number and dollar volume of loans made through the consortia program under subparagraph (v) of such section, the amount of guarantees and insurance provided for small business exports, the number of recipients of financing from the sums set aside who have not previously participated in the Bank's programs, the number of commitments entered into in amounts less than $500,000, and any recommendations for increasing the participation of banks and other institutions in the programs authorized under section 2(b)(1)(E). For the purpose of this subsection, the Bank's report shall also be referred to the Committees on Small Business.".

On page 17, line 16, strike out the quotation marks and the period.

On page 17, between lines 16 and 17, insert the following:

"(E) The Bank shall urge the Foreign Credit Insurance Association to provide coverage against 100 per centum of any loss with respect to exports having a value of $100,000 or less.".

(The names of Mr. DOMENICI, Mr. TOWER, Mr. PERCY, Mr. HEINZ, Mr. LEVIN, Mr. HUDDLESTON, Mr. BUMPERS, Mr. BENTSEN, and Mr. PROXMIRE were added as cosponsors of amendment No. 2213.)

Mr. BOSCHWITZ. Mr. President, I am offering an amendment this morning that would create a set-aside of Eximbank's export financing authority so that small business will receive a certain specified amount of the loans that are made.

In the past, Mr. President, as you well know, Eximbank has mainly dealt with large corporations. As we also know, small businesses provide a great deal of the driving power of our economy and could, indeed, export if they were given some assurances, not only with respect to financing, but also with respect to collection.

Without question, many small businesses in this country tend to decide that they probably cannot export or that they should not export because they do not have a clear sense of how they will ever collect for the goods they sell. And, they do not have a clear sense either of what programs Eximbank has available or how to use them.

So, this amendment specified that, in fiscal year 1984, 6 percent of Eximbank's available financing must be directed at small businesses. Eximbank can meet the set-aside requirement through its direct loan, guaranteed loan, or insurance programs, or any combination of these programs.

In 1985, the percentage rises to 7 percent; 1986 to 8 percent; the year after to 9 percent; and then, in 1988 and 1989, it would level off at 10 per-

cent, which would be the duration of this legislation.

It is an effort, Mr. President, to see that small business has an opportunity to expand its exports. We all are very aware of the deficit that we have in our trade accounts. This amendment will be a meaningful step to reduce those deficits.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the following list of Senators be added as cosponsors to the amendment and be printed in the RECORD at this point: Senators MATTINGLY, SASSER, D'AMATO, PRESSLER, GLENN, HATCH, GRASSLEY, TSONGAS, EAST, COHEN, HUDDLESTON, HELMS, HEFLIN, KASTEN, LUGAR, DURENBERGER, RANDOLPH, PELL, DECONCINI, DOMENICI, TOWER, PERCY, HEINZ, LEVIN, BUMPERS, BENTSEN, and PROXMIRE.

The PRESIDING OFFICER. Without objection, the Senators will be added.

Mr. BOSCHWITZ. Mr. President, the amendment I am offering today will give small businesses better access to the export financing programs of the Export-Import Bank. My amendment has broad support and is truly a bipartisan effort. I commend Senators MATTINGLY, SASSER, D'AMATO, and GLENN for their leadership on this issue. In addition, I would like to specifically commend Senators GARN and HEINZ for working with us to draft an amendment that was agreeable and that will provide a major boost to small business exporters, while addressing the legitimate concerns of the exporting community as a whole.

We are all aware of the contributions small business makes to the economy in terms of jobs and innovative technology. Small business can also be the leading contributor in U.S. exports if competitive export financing is available. Indeed, the Commerce Department estimates that at least 20,000 businesses in our country could export, but do not. In fact, only 1 percent of American manufacturers account for over 80 percent of our exports. As we face record trade deficits, it is imperative that small businesses become more active exporters.

Our balance of merchandise trade deficit was $42.7 billion in 1982—making a cumulative trade deficit of over $200 billion from 1978 through 1982. And, it is not getting any better. The Secretary of Commerce estimates that this year's merchandise trade deficit could be as high as $60 billion. When exports of services are included, the picture is somewhat better, but the imbalance in merchandise trade is still a cause for concern.

During the same time period, total U.S. exports increased substantially—from $220 billion in 1978 to $375 billion in 1981. This is a 70-percent increase over those 4 years. But, in 1982, total U.S. exports declined by 8 percent to $342 billion. The worldwide recession and strength of our dollar certainly contributed to this decline, but the lack of adequate financing was also a big factor.

Not surprisingly, jobs generated by exports decreased between 1981 and 1982. The decrease was a dramatic 20 percent—from 6.2 million export-related jobs in 1981 to 4.9 million in 1982. Without question, increasing our exports—especially by small businesses that create the most jobs—will improve both our balance of trade picture and our unemployment situation.

Last fall I held a hearing in Washington that focused on obstacles faced by small business exporters. One of the major obstacles we identified was the lack of adequate financing. As a follow-up, I chaired another hearing in April that examined the small business export financing programs of the Export-Import Bank. Exim has been termed a "big business" bank by many—and with good reason. To put it bluntly, Exim's track record is dismal—in 1982 only 2.8 percent of Exim's total available financing went to small businesses. And, during the past 5 years, small businesses received only 3.4 percent of Exim's total available financing. Furthermore, Exim does business with only about 300 banks, out of a total of some 15,000 banks in the country.

To remedy this situation, I introduced an amendment last May that will require Exim to do more business with small businesses. That amendment would have required a small business setaside of 10 percent increasing to 15 percent by the end of 6 years. Since May, however, negotiations have occurred with opponents of the amendment. Senators GARN and HEINZ have been most helpful in mediating these negotiations and achieving an agreement on a modified amendment.

The major issue in these negotiations involved in the possibility that small business would not be able to use all of the funds available from the setaside. Opponents of my amendment suggested a trigger mechanism that would make any unused small business funds available to Exim's big business customers. While a trigger mechanism sounds good in concept, we could not agree on one that would not give Exim a loophole that it could use to avoid financing small business exports. Instead, I agreed to reduce the percentages of the small business set-side in return for not including a trigger mechanism. As a result, it should be abundantly clear to Exim that the funds must be used only to finance small business exports.

Since the original amendment was introduced in May, I also chaired a hearing in Minnesota on Exim's lack of small business financing. At that hearing Minnesota witnesses made valuable suggestions on how to improve my amendment. These suggestions have been included in the modified amendment, which I will review at this time.

These are the main provisions of my modified amendment.

First, Exim must establish a small business set-aside for fiscal year 1984 equal to 6 percent of the total direct loan, guaranteed loan and insurance levels provided in appropriations acts. The set-aside will increase 1 percent for each fiscal year for the next 5 years until it equals 10 percent. This will increase small business export financing by nearly $4 billion over the next 6 years without increasing Exim's budget. Instead of giving Exim more money to spend, my amendment requires Exim to allocate to small businesses these percentages of the spending authorized by Congress each year.

Second, the amendment directs Exim to establish a program that provides lines of credit or guarantees to consortia of local banks, export trading companies, small business investment companies, State financing companies and/or export financing cooperatives. The consortia would use the lines of credit or guarantees to finance small business exports, which would count against the set-aside. As a result of the Minnesota hearing, I have included language directing Exim to delegate to the consortia the authority to make credit evaluations and approve financing commitments to the maximum extent possible.

Third, Exim would be required to promote small business exports and its export financing programs in cooperation with the Department of Commerce, the Small Business Administration, and especially the private sector. This is an integral part of the amendment because small business must be aware of the financing to take advantage of it.

Fourth, at least three members of the Advisory Committee established in the bill must be chosen from the small business community. Similarly, at least one of the five members of the Board of Directors must be appointed from the small business community to represent small business.

Fifth, Exim is directed to urge the Foreign Credit Insurance Association (FCIA) to provide insurance against 100 percent of the loss of export sales up to $100,000. Currently, FCIA will insure 100 percent of the political risk, but only 85 to 95 percent of the commercial risk. Commercial banks will normally make export loans for the amount of FCIA insurance, which requires small businesses to regularly finance, or provide reserves for, the uninsured 10 to 15 percent. For exporters with a number of small sales, these cumulative reserves can cause a substantial drain on cash flow and stifle further exports. Because FCIA is a con-

sortium of private insurers, it is not appropriate to require 100-percent coverage of commercial risks. But, this provision recognizes the importance of full insurance coverage and directs Exim to do something about it. The need for this type of program was stressed repeatedly at the Minnesota hearing.

Finally, Exim must report annually to Congress on the effectiveness of the set-aside, the small business financing programs and Exim's efforts in promoting small business exports. In response to suggestions at the Minnesota hearing, the amendment requires Exim to report specifically the number of small business commitments under $500,000 and the number of small businesses that use Exim's programs for the first time. This provision will give Congress the ability to monitor Exim's efforts, and the progress in improving its track record with small business.

Mr. President, my amendment will make more financing available to small business exporters. But, Exim must aggressively and effectively implement this legislative mandate to help small businesses achieve their full exporting potential. In addition to the formal requirements of my amendment, Exim should be aggressive and creative. It should reach out to the small business community to develop working groups for advice on ways to implement the consortia program. It should aggressively offer preliminary commitments so small businesses can quote financing terms early in their deals. It should also consider developing a short-term guaranteed loan program, separately or through the consortia program, to meet this crucial small business financing need. In short, Exim must develop an attitude of wanting to assist small businesses.

Mr. President, as the owner of a small business myself, I am well aware of the importance of competitive financing. For exporters, competitive financing is vital. As a member of the Small Business Committee, I recognize the need to be an advocate for small business in legislation considered by the Senate. My amendment is needed now because the underlying legislation extends Exim's charter for 6 years. So, if we do not act now, we may not have another opportunity before 1989.

My amendment has bipartisan support in the Senate—with over 20 cosponsors. It has also been endorsed by Commissioner Nichols, the Chamber of Commerce, the National Federation of Independent Business, Small Business United, the National Small Business Association, and the National Governors' Association. I urge my colleagues to adopt my amendment and make more export financing available to small businesses.

I thank the Chair.

Mr. PROXMIRE. Mr. President, will the Senator yield for a question?

Mr. BOSCHWITZ. Yes.

Mr. PROXMIRE. Will the Senator tell us how he would define small business in his amendment? I understand it is a set-aside of 10 percent, is that correct, for small business?

Mr. BOSCHWITZ. Mr. President, it would set aside up to 10 percent.

Small business is defined in the way it is defined in the Small Business Act, as it is defined for all the small business programs of the Small Business Administration.

Mr. PROXMIRE. Mr. President, let me tell the Senator that I think it is about time we did something like that. This has been known, in some cases, as the "Boeing Finance Co.," you know, the Export-Import Bank. Boeing gets about 30 percent, or has often gotten 30 percent, of all the credit. Seven corporations have gotten the overwhelming share of the credit offered by the Export-Import Bank. We have been very lax in getting small business into the export business. When they have gotten in, they have done very well, in some cases.

So I think the initiative by the distinguished Senator from Minnesota is most useful and I am delighted to hear it and I am happy to support the amendment.

Mr. BOSCHWITZ. The Senator from Wisconsin was very kind to me yesterday on the floor, and I thank him again today.

I would be happy to add him as a cosponsor of the amendment.

Mr. PROXMIRE. Fine.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that Senator PROXMIRE be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. The amendment we are discussing will require Exim to finance more small business exports than it has in the past. Given Exim's minimal efforts in the past, I believe it is imperative that Exim fulfill its obligations under this amendment in at least two ways. First, Exim should concentrate on making loans in amounts that are small enough to provide the greatest benefit to small business, especially in the direct loan program. Would the Senator agree that smaller loan commitments are necessary and appropriate?

I yield to the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I thank the Senator from Minnesota for yielding.

Mr. President, I want the Senator to know I wholeheartedly agree with his amendment.

As the Senator from Minnesota knows, often direct loans are only made in relatively large amounts of $5 million or more. Many small businesses do not need or cannot use loans of that size. To make the Bank's direct loan program more accessible to small business, the Bank should make loan commitments of under $1 million available to small businesses to the maximum extent possible.

There really also needs to be a better effort at a marketing program. It is very much needed for the Bank's small business program. This amendment clearly states that the Bank must work in cooperation with the Department of Commerce, the Small Business Administration, small business organizations, State agencies, chambers of commerce, banking organizations, export management companies, export trading companies, and other segments of private industry.

For example, the Bank should be expected to work with organizations like the Minnesota Association of Commerce and Industry, the Independent Business Association of Minnesota, the Small Manufacturers Council of Pittsburgh, and other organizations.

Frankly, at a minimum, I anticipate that the Bank should and would develop a single understandable brochure describing its programs, who to contact at the Bank, and how to submit applications for the Bank's programs. This information would be distributed to the organizations described in the amendment. In addition, the Bank should brief the Department of Commerce and the Small Business Administration on its small business programs. The Bank personnel responsible for assisting small business must provide actual assistance, not just general information and encouragement. They must be willing and able to assist with credit information and actually filling out the application. To the maximum extent possible, the application process should be simplified for small business. I believe that the Bank can and should develop its plan for marketing the small business programs by January 1, 1984 at the latest and share that plan with myself and the Senator from Minnesota by that date.

Mr. BOSCHWITZ. I thank the Senator and would like to make just one more point. The Senate bill renews Exim's charter for 6 years, while the House bill renews it for only 2 years. Would the Senator indicate his intentions concerning the amendment's small business participation percentages if the conference committee renews the charter for 4 years? Would the Senator hold firm in achieving 10 percent small business participation by the expiration of the renewed charter?

Mr. HEINZ. The Senator can be assured that I will do my best to achieve a 10 percent participation by the expiration of the renewed charter. For example, if the Bank's charter is renewed for only 4 years, I would be agreeable to 6 percent in fiscal year

1984, 7 percent in fiscal year 1985, 8 percent in fiscal year 1986 and 10 percent in fiscal year 1987.

Mr. President, I compliment my friend from Minnesota on this carefully crafted amendment. I was pleased to have a chance to work with him and his staff, as well as with Senator GARN. This is the first time we have really had, I think, a meaningful small business amendment to the Export-Import Bank Act. It is long overdue.

I, too, have received comments that small business gets the back of the hand from the Eximbank. We all know that a lot of small businesses do benefit indirectly from the Bank by virtue of being subcontractors on major jobs. But this amendment will allow small businesses who have the right products to go directly to the Bank. It will encourage the Bank to help identify them, by affirmatively seeking them out through a marketing program. It is an excellent amendment and I urge my colleagues to accept it.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator from Georgia.

Mr. MATTINGLY. Mr. President, I would first like to commend the original cosponsor of Senate bill 869 for their efforts in drafting legislation which forces the U.S. Export-Import (Eximbank) to be responsive to the needs of American exporters, no matter how large or small. While extending the Bank's charter, S. 869 makes a significant contribution to U.S. exporters by making the terms and conditions of Eximbank's financing competitive with Government-supported financing offered to exporters from other countries.

The Eximbank is too frequently viewed as a Bank and not as an instrument of U.S. trade policy or job creation. It has been estimated that Eximbank supports over $18 billion in U.S. exports annually, with each billion dollars providing 24,000 to 30,000 jobs. If U.S. exporters are unable to obtain competitive financing, they frequently face the loss of the sale and perhaps a permanent loss of market.

The challenge to develop international and domestic solutions to global economic problems and trends will face not only this administration but many to come. To make the Bank's programs fully competitive, as S. 869 provides, will assist in its use of resources in ways to help meet that broader objective.

Mr. President, I would also like to commend the efforts of the other Senators who joined Senator BOSCHWITZ and myself in formulating an amendment which will permit small business exporters to benefit more from Eximbank resources.

I believe our efforts will result in the growth of the export base of our country through the increased participation of small business exporters. The additional employment impact resulting from an increase in small business exports will be substantial. Small businesses have the potential to create more jobs than the traditional large manufacturing concerns. You have already heard the figures: The Commerce Department estimates that at least 20,000 businesses in the United States could export but do not. The fact is clear: The rewards of increasing the participation of small business exporters are great.

Eximbank officials have conceded that there is a need to make the Bank work for small business. Although the Bank has developed a few ad hoc programs directed at smaller exports over the past 2 years, Bank officials admit that, and I quote, "Their use has not been as great as we had hoped."

Therefore, I am pleased to have this opportunity to offer legislation which will require Eximbank to be more attentive and responsive to the needs of small business. This legislation will require the Bank to consistently focus on the needs of small business. Previous efforts in this regard have been implemented by the Bank on a come-and-go basis.

American small business exporters want to export, they want to compete, and are able to compete on the basic of those things at which they excel—quality, service, and price. However, they cannot compete against the officially subsidized export financing offered to their foreign competitors. This amendment to S. 869 insures small business better access to Eximbank's resources at competitive terms by: First, establishing a small business set-aside in an amount of 6 percent for fiscal year 1984 and increasing to 10 percent by fiscal year 1989; second, requiring Eximbank to provide lines of credit or guarantees to consortia of local banks, export trading companies, State export finance agencies, export financing cooperative and small business investment companies; third, requiring Eximbank to promote this small business program in cooperation with the Commerce Department, Small Business Administration, and the private sector; fourth, designating leaders from the small business community to the advisory committee at the Eximbank and to its Board of Directors; fifth, directing Exim to urge the Foreign Credit Insurance Association (FCIA) to provide insurance against 100 percent of the loss of export sales up to $100,000; and finally, sixth, requiring Eximbank to report to Congress annually on the status and effectiveness of the small business set-aside.

I urge my colleagues to adopt an amendment that is designed with the best interest of the entire U.S. export community in mind.

Mr. President, in conclusion, I think this small business amendment jointly works with an amendment I offered in the Banking Committee which was previously adopted. It requires the Eximbank to designate one of their directors to strictly try to help implement loans for small businesses.

I think Senator BOSCHWITZ deserves a great deal of credit for helping the small businesses of our country.

● Mr. SASSER. Mr. President, I rise today in support of S. 869, a 6-year reauthorization of the Export-Import Bank, and in support of an important amendment being offered. The Export-Import Bank is a valuable tool for many firms in world trade and I am particularly pleased that we have taken steps in this measure to expand the useage of the Bank's resources.

I am referring to the amendment I am cosponsoring with several of my colleagues calling for greater participation in Exim's lending activities by small businesses. This amendment addressed a major concern to the small business community: The need to expand the market for American goods. And I believe we have set a course for small business participation in Exim's lending activities that is acceptable to all concerned with the Bank's operations.

Our amendment calls for a percentage of Exim's funds to be set aside for small business loans, loan guarantees, and insurance. In fiscal 1984, 6 percent will be set aside, increasing by 1 percent per year until a 10-percent set-aside is reached in fiscal 1988. In addition, the amendment stipulates that the Bank take specific steps to guarantee that the intent behind this amendment is carried out. Thus, we will be seeing greater interaction between representatives of the small business community and leaders in world trade. Finally, the reporting requirements contained in our small business amendment will provide Members of Congress with a record of the progress being made in the efforts to expand the role of small business in export activities.

Mr. President, this amendment complements the existing loan structure of Exim quite well. Indeed, many of the companies currently using Exim financing have taken steps to insure small business participation in the course of completing their contractual obligations. Members of the Banking Committee were provided with documentation pointing to the excellent record that several corporations have established in reaching out and involving small firms as subcontractors.

Additionally, the Eximbank Board announced earlier this year a series of improvements in the medium-term credit program and the small manufacturers' discount loan progam that will be of particular benefit to small business. These improvements include a policy whereby interest rates in com-

mercial bank export loans backed by these two programs will be reduced by 1 percent, and banks participating in the programs will charge the lowest rates permitted under the international guidelines adopted by the member nations of the Organization for Economic Cooperation and Development. Moreover, the cover provided under the medium-term credit program was increased to 85 percent of the export contract.

With these improvements, which will enhance small business access to and affordable use of Exim programs, the Bank should have no difficulty at all in using the entire set-aside. Indeed, in view of the untapped reservoirs of export potential in American small business, I would not be at all surprised to see small business participation increase substantially beyond the set-aside by means of the medium-term credit and small manufacturers' discount loan programs.

This laudatory action existed before this amendment and I am sure we will see more such actions in the future.

I would note at this point, Mr. President, that is my hope and belief that Exim will continue to improve its utilization of the funds made available to it for the development of export financing for large exporters.

The Export-Import Bank has a vital role to play in promoting fair and equitable competition in world markets. The intent of Congress has been clearly expressed in this regard: American exporters are not going to be abandoned by a Federal policy that fails to take into account the real world of foreign export credit subsidies. We have seen dramatic improvement in the OECD negotiations, resulting in significant reductions in foreign subsidies—largely as a result of our demonstrated determination to meet the competition. This commitment must be maintained and strengthened in the years ahead.

The increased competition resulting from the small business amendment will benefit all firms which are strong believers and active participants in our economic system. Such competition will also lead to increased employment in all sectors of our economy. And as we all know, small businesses play a leading role in technological innovations and I am hopeful that our amendment will spur activity in this regard as well.

In sum, the amendment we are offering today represents the type of cooperation between large and small firms we will need to further economic growth in our country. Many persons from small firms and large corporations have assisted us in working toward this common goal. All parties involved in ironing out this amendment can take pride in the fact that by passing this amendment we are paving the way for a greater representation of American firms in the world economy. That is an end which benefits us all, Mr. President.●

● Mr. GLENN. Mr. President, I rise in support of this amendment to the Export-Import (Exim) Bank Act of 1945. This amendment is designed to promote and develop exports by small and medium-size U.S. businesses.

American small- and medium-size businesses have the potential to lead an export drive which would create U.S. jobs and help restore the competitiveness of U.S. industry in world markets.

The untapped potential of small business becomes apparent when one considers that only 1 percent of American manufacturers sell over 80 percent of our exports, and that 92 percent of American manufacturers market their products only within the United States. America's smaller businesses are innovators that now account for over 38 percent of our GNP and all of the increases in U.S. jobs since 1969. It is estimated by the Small Business Administration that between 20,000 and 30,000 U.S. manufacturers have exportable products but are not exporting. Lack of marketing expertise and inadequate financing are the major reasons these companies are not exporting their products.

Mr. President, the Eximbank has lost many opportunities to promote U.S. exports as a result of the dogmatic, hands-off attitude of the Reagan administration. American businesses, particularly smaller businesses, face competitiveness disadvantages in international markets where foreign governments play much more aggressive roles in financing exports. Failure of the Eximbank to take a more active role, and to support smaller U.S. exporters, has cost the United States billions of dollars in lost export sales. This, in turn, has cost us thousands of U.S. jobs and has materially increased U.S. trade deficits. Our failure to match subsidized foreign export financing terms has undermined our efforts to negotiate an end to senseless export credit wars.

This amendment addresses these problems. It would redirect some of the resources and attention of the Eximbank through small- and medium-size businesses by:

Insuring that a portion of Eximbank resources were used for small business export financing.

Requiring small business representation on Eximbank's Board and Advisory Committee.

Requiring Eximbank to develop a comprehensive plan to actively assist in the development of small business exports and to make annual reports of plans and results to the Congress.

Mr. President, by helping American small- and medium-size businesses to compete in world markets this amendment can make the Eximbank bill one of the most effective jobs measures that the Congress could pass. It will not only serve to help reduce domestic unemployment but will also help reduce the counterproductive pressures for trade restrictions. It is for these reasons that I have introduced this amendment and urge my colleagues to support it.●

● Mr. HUDDLESTON. Mr. President, I am pleased to be a cosponsor of the pending amendment that would give small businesses greater access to exporting programs of the Eximbank. The need for this amendment was clearly established in a hearing held by the Senate Small Business Committee's Subcommittee on Export Promotion of which I am the ranking Democrat. This hearing clearly demonstrated that the Bank can, and should, do more to assist small business.

Exporting is extremely important to the recovery of our economy and to its continued vitality. Increased exporting means jobs for many of our 10 million unemployed and for the millions who will enter our labor market in the coming years.

Although exporting is not a panacea for our economic ills, it is a crucial element of our national economic policy. Because it is such a vital ingredient, we can no longer be content with a situation whereby only 12 percent of the Nation's approximately 250,000 manufacturers are exporters.

More must be done to encourage greater participation, and I am convinced that a significant contribution can be made by small businesses. A recent GAO study found that an estimated 11,000 nonexporting manufacturers "were both capable of exporting and could probably be induced to try exporting if they were properly approached and assisted." The value of these new exports would add up to well over $4 billion annually.

If this potential exists as the GAO and other studies indicate, then we would be derelict in our duties if we did not pursue every possible means of bringing these 11,000 businesses, many of which are small, into the exporting mainstream of our economy.

Since a key position in the U.S. official export structure is filled by the Export-Import Bank, it is only appropriate that the Bank take an active role in making small business exports more competitive.

The Eximbank is being imaginative in devising programs which are aimed at small businesses, and I commend it for its efforts. Last year Eximbank set aside $100 million for a small manufacturers discount loan program that will enable commercial banks to extend fixed-rate, medium-term export loans.

The small business export credit insurance program gives protection against losses associated with export-

ing. And, there is a program that will assist small business through export trading companies.

However, even though the Eximbank appears to be trying to be responsive to small business, it is not succeeding as much as we should expect. According to the Bank's own figures, only 13 percent of the total business on the Bank's books as of June 30, 1982, could be designated as small business support.

Although statistics such as this may be a little misleading, they nonetheless give some credibility to the accusation that the Bank is primarily interested in the big deals produced by big business.

This failure on the part of the Bank to promote small business exports is well documented by the experiences of small businesses in Kentucky.

According to the U.S. Department of Commerce, Kentucky is among the top 20 exporting States in the United States. The dollar value of our exports exceeds $2.5 billion annually and generates jobs for over 70,000 people. Kentucky has the highest percentage of small- and medium-sized firms engaged in exporting of any Southern State. Of the over 600 exporting businesses, approximately 45 percent employ less than 100 people. However, even with this impressive record on exporting, the Eximbank has supplied a relatively small amount of assistance to Kentucky exporters. For example, in fiscal year 1982 the Bank supplied assistance to 2,261 businesses, but only 9 of these were in Kentucky. These nine businesses were supplied services amounting to $4.4 million while the Bank had a total commitment of over $8 billion.

As far as I can determine, the Bank had two basic problems in Kentucky. First, many businesses that export, or want to export, know little or nothing at all about the services offered by the Eximbank. Second, many of those that know about the Eximbank have found it to be inflexible or excessively slow in responding to their needs.

If the Export-Import Bank is going to be truly responsive to the needs of small businesses, Bank officials must shed some of the big business mentality that has developed over the years.

They are going to have to realize that small businesses cannot afford to hire the high-priced trade experts who know how to bring the deals to the Bank's doorstep, and that the Bank must be more aggressive in taking its program to the small business person.

In other words, Bank officials are going to have to take off their pinstripe suits and put on their working clothes in order to reach the thousands of potential small business exporters in Kentucky and other parts of the country.

I believe that the Bank can make this transition, and that the pending amendment will help it do so.

I urge adoption of the amendment.●

● Mr. WEICKER. Mr. President, I support this amendment, which would direct more funding to small businesses interested in exporting. Before I speak specifically about this amendment though, I would like to take a few minutes to commend Senator BOSCHWITZ, my good friend and colleague on the Senate Small Business Committee, for the outstanding job he has done generally in assisting small business exporters. At his suggestion as chairman of the Small Business Export Promotion and Market Development Subcommittee, the Small Business Committee conducted a survey of 6,500 practicing and potential small exporters. The purpose of the survey was to ascertain the obstacles to exporting as perceived by small firms, with a view toward attempting to remedy the problems identified. One of the principle stumbling blocks cited by those surveyed was the dearth and inadequacy of export financing.

Following the compilation of the survey findings, Senator BOSCHWITZ held a hearing regarding the Export-Import Bank's assistance to small firms. At that hearing the Chairman of Eximbank, William H. Draper, acknowledged that only 3 percent of Exim's available financing went to small businesses. This is somewhat appalling to me, especially in light of the Department of Commerce's estimates that while small firms account for only 10 percent of total annual exports, at least 20,000 of them have the potential to export competitively.

Following this hearing, Senator BOSCHWITZ introduced an amendment to the Eximbank reauthorization bill which gives small businesses a fairer share of Exim's available financing. I strongly support this amendment. I believe it realistically and reasonably addresses the very serious problem which my colleague from Minnesota has identified.

Again, I commend Senator BOSCHWITZ for his persistence in pursuing the problems faced by small businesses and in arriving at a solution which would make a real and tangible difference to small exporters, as well as to the economy in general.●

● Mr. DURENBERGER. Mr. President, I am pleased to join Senator BOSCHWITZ and others in offering an amendment to S. 869, the Export-Import Bank Amendments of 1983, seeking to insure greater awareness and assistance by the Exim to small business concerns.

As we all know, this Nation's small business sector plays a vital role in the creation of jobs, the stimulation of technological advances, and the overall health of the economy.

Though our economy has become increasingly dependent upon participation in international markets, small businesses have been discouraged from tapping the proven profit potential existing in these markets. The myriad of Federal Government export assistance programs and the often inadequate support they provide exporters, have actually confused and hindered American businesses instead of helping them overcome international trade barriers.

As a result, only an estimated 1 percent of all American manfacturers produce over 80 percent of our Nation's exports. Clearly action is needed.

Congress recognized this when we authorized export trading companies last year. I believe that focusing Export-Import Bank assistance toward American small business exporters is the next step in what I hope will be our continuing effort to enable American businesses to participate competitively in the international marketplace.●

● Mr. BUMPERS. Mr. President, I support the amendment offered by Senators BOSCHWITZ, SASSER, MATTINGLY, GLENN, myself and others, to insure that the Export-Import Bank has the necessary congressional guidance, and statutory authority, to help meet the needs of the small business community. The amendment will significantly aid the small business community in financing exports, and will increase the attention and visibility of the bank in dealing with small business. The amendment is a good amendment, and deserves the full support of the Senate.

Every Member of this body is aware of, and concerned about, our Nation's growing and huge trade deficit. From roughly 1870 to 1970, the United States had little foreign competition, and had a huge domestic market and an abundance of natural resources. During that period, we exported much more than we imported. But now, our trade deficit is over $60 billion, or about 18 times the figure in 1973. By some estimates, our trade deficit is aleady costing 1.5 million jobs, and I have seen at least one projection that the trade deficit could hit $174 billion by 1990. Many of us wonder whether the trade deficit will be a major factor in causing the economic upturn to lose steam in the next few months.

One problem we face is that the Export-Import Bank, which I strongly support, is able to support only about 5 percent of U.S. exports of U.S. manufacturers, compared with around 40 percent for Japan and France. An interest rate advantage of half a percentage point is equivalent to a 5-percent advantage in price, and if Japanese and European Community companies are provided financing packages 2 percent below U.S. rivals, they

are gaining 20 percent advantage in price.

It has been estimated that over two-thirds of the world's purchasing power is outside the United States. We as a government have made it a matter of national priority to increase our exports. We in the Congress have taken some steps to minimize barriers that stand in the way of increasing small business participation in exporting. Among those approved recently are the Export Trading Company legislation and the Small Business Export Expansion Act. While these efforts are important in improving the environment for small business, and in assisting in the critical area of export financing, more needs to be done.

Mr. President, last year, under the leadership of the Senator from Minnesota (Mr. BOSCHWITZ) and the Senator from Kentucky (Mr. HUDDLESTON), the Senate Small Business Committee conducted an extensive survey of "obstacles to exporting" faced by small business. The committee also held several days of hearings on the exporting problems faced by small business, and reviewed some of the options available to Congress legislatively, and to the administration through regulation, that would enhance small business' ability to increase their exporting.

The committee found that, in the United States, roughly 80 percent of the total export market is controlled by only 200 firms. The Department of Commerce has estimated that no more than 10 percent of the total annual U.S. exports are made by small business, yet there are over 20,000 small business firms that have the capability to export successfully. Frequently, those small businesses that have exported, or have tried to export, cited the need for a more sympathetic response from U.S. Embassies abroad, from the Foreign Commercial Service—which incorporates the commercial attachés at our Embassies—and for access to the lending programs at the Export-Import Bank.

The amendment offered today, like the amendment which the House has already included in its version of this legislation, would require the Export-Import Bank actively and aggressively to seek out small business exporters, and provide them with their fair share of the funds available to the Bank for financing.

The amendment would require that, on a sliding scale, the Bank provide small business concerns with a fixed percentage of the total funds made available to the Bank. In addition, the amendment recognizes that a wide variety of financial sources assist the small business exporter, including trading companies, export management companies, and small business investment companies (SBICS). These financial institutions would also be eligible to participate in the program.

In my view, the statutory mandate to the Eximbank to target their resources to qualified small business firms in need of financing will dramatically increase the likelihood that these businesses will expand their exporting, will benefit the domestic economy as these firms increase production and continue as leaders in job creation, and will benefit the Nation by reducing our balance of payments.

An additional major provision in the amendment adds a member from the small business community to the Board of Directors, and requires that not less than three members of the advisory committee represent the small business community. These provisions will insure that small business has an advocate on the Board, and on the advisory committee.

Mr. President, this is a good amendment for the Export-Import Bank, and its future activities in stimulating exporting. The amendment is a good amendment for small business because it opens up a critical source of financing for them and provides an institutional advocate for them within the Bank's structure. This amendment is a good amendment for our Nation's economy and balance of payments.

I am pleased to be a cosponsor of this amendment, and urge its adoption.●

● Mr. LEVIN. Mr. President, I am pleased to cosponsor this amendment. I urge the Senate to accept it.

As a member of the Small Business Committee, I am aware of the significant contribution that small business could make toward expanding U.S. exports—the central purpose of the Export-Import Bank Act Amendments of 1983. By requiring the Exim Bank to direct more of its resources to small business, this amendment is an important step toward that end.

Simply put, exports mean jobs. It is estimated that every $1 billion in exports represents approximately 31,000 jobs. In 1980, 1 in every 7 industrial jobs was related to exporting.

These figures indicate the importance of exporting to the economic well-being of many of our people. However, we have not realized our full export potential. Presently, only 1 percent of U.S. manufacturers account for over 80 percent of our exports. Moreover, many small businesses are potential exporters of goods and services. The Department of Commerce estimates there are at least 20,000 small businesses in the United States that could competitively and profitably market their goods and services overseas that are not doing so.

The potential of small business to expand exports by exploiting international markets is real if competitive and adequate export financing is made available. And yet the Exim Bank has not done so. In fact, testimony before the Senate Small Business Committee revealed that only 3 percent of the commitments under Exim's programs go to small business.

The amendment offered here today will elevate the standing of small business within the Exim Bank and provide small business with increased access to Exim's export financing programs. Of particular importance, the amendment establishes a small business set-aside during fiscal year 1984 equal to 6 percent of the direct loan, loan guarantee, and insurance program levels provided by Congress. The set-aside will increase 1 percent each fiscal year for the next 4 years until it equals 10 percent in fiscal year 1988, where it will remain.

The amendment also requires the Exim Bank to establish a program to provide credit and guarantees to intermediaries, such as consortia of local banks, export trading companies, and others, that finance small business exports; directs Exim to promote its small business export financing program in cooperation with the Department of Commerce and the Small Business Administration, and; provides for small business representation on the Board of Directors of the Bank.

These are important features that should assist small business expand exports. I urge Senate passage.●

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2213) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2214

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Missouri will be temporarily laid aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an amendment numbered 2214.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

The amendment is as follows:

On page 21, between lines 15 and 16, insert the following new section:

"SPECIAL FACILITIES IN SUPPORT OF UNITED STATES EXPORTS TO BRAZIL AND MEXICO

"SEC. 110. (a) The Export-Import Bank of the United States is authorized to establish facilities not to exceed 18-months duration

consisting of guarantees and insurance in support of export transactions to Brazil and Mexico in the aggregate amount of $1.5 billion and $500 million respectively.

"(b) Section 2(b)(3) of the Export-Import Bank Act of 1945 is amended by inserting after "no loan or financial guarantee" in the first sentence "or general guarantee or insurance facility".

"(c) Section 2(b)(3)(A) of the Export-Import Bank Act of 1945 is amended to read as follows:

"(A) in the case of a loan or financial guarantee a brief description of the purposes of the transaction, the identity of the party or parties requesting the loan or financial guarantee, the nature of the goods or services to be exported, and the use for which the goods or services are to be exported, and in the case of a general guarantee or insurance facility, a description of the nature and purpose of the facility, the total amount of guarantees or insurance, the reasons for the facility, and its methods of operation; and".".

Mr. HEINZ. Mr. President, the amendment that I have sent to the desk would add a provision authorizing the guarantee and insurance facilities which the Eximbank is currently prepared to approve in favor of Brazil and Mexico. I happen to believe that the Eximbank already possesses the authority to approve these facilities without our action. Since the amendment is not necessary, therefore, as a matter of law, it need not create a precedent for future transactions. However, it is my view that considering the magnitude of these facilities, I believe it is appropriate for Congress to express its view on this subject.

We have had hearings before the Committee on Banking of the Senate and similarly in the House. I am certain that a majority of the Congress supports these facilities which will provide significant assistance for U.S. exporters.

The second purpose of the amendment is to require the Bank to give notice to Congress pursuant to section 2(b)(3) of the Eximbank Act of 1945, as amended, in the future of any general guarantee or insurance facilities like the ones proposed for Brazil and Mexico. These facilities include general lines of credit established by various lending institutions to the respective governments covering a wide range of products for various end users.

I urge my colleagues to support the amendment.

Mr. PROXMIRE. Mr. President, I support the amendment introduced by Senator HEINZ to require that Congress specifically authorize and strengthen its oversight of the type of loan grarantee facilities announced by the Export-Import Bank (Eximbank) on August 17, 1983. As my colleagues know, one of the functions of the Eximbank is to guarantee loans that help American companies finance their sales abroad. Traditionally the Bank has exercised its loan guarantee authority with respect to loans taken out by a foreign importer to finance specific—and I underline "specific"—exports by a U.S. company to a purchaser in a foreign country.

All that was changed on August 17, 1983, however, when the Bank infomed the Congress in writing that it was launching a new type of loan guarantee program. It was, it announced, going to extend $500 million in loan guarantees to the Government of Mexico, and $1.5 billion to the Government of Brazil as part of an effort by the international financial community to strengthen the economic recovery of those two countries. Although these huge loan guarantees would be used to back the purchase from U.S. firms of goods for shipment to the two countries, the newly styled "loan facility program" raised legal questions and appeared to mark a sharp departure by the Eximbank from its traditional role. The guarantees were aimed at fostering confidence in the ability of Mexico and Brazil to pay for their imports and to attract additional credit from other governments and the private banking community, both here and abroad, and were not tied to the financing of specific and indentifiable exports from our country.

In my view, it was a bailout, really, of Brazil and perhaps of Mexico, too.

I immediately wrote to the Chairman of Exim raising legal questions about this proposed shift in the Bank's international role and urged Bank officials to submit specific legislation to the Congress seeking authority for the "new loan facility programs" designed to aid specific countries rather than individual U.S. exporters. My concern was that if the international situation required that the Bank's traditional role be changed, that change should be made by Congress, and not by unelected officials in the executive branch. I also wrote to the Comptroller General asking for a legal opinion about the Bank's authority to approve loan guarantees to the Governments of Brazil and Mexico in the amounts contemplated by the Bank.

As I say, the Comptroller General will give us a legal opinion as to whether or not the Bank had a right to do this.

I then conferred with Senator HEINZ, the chairman of the International Finance Subcommittee of our Banking Committee, and suggested the need for a hearing to examine this newly announced Exim program before the renewal of the Bank's existing mandate, which expires on September 30. He agreed, and in our September 14 hearing we examined at length many of the concerns I raised about the new program in my August 23 letters to the Bank and the Comptroller General. During that hearing, I noted that Exim was going to authorize $2 billion of loan guarantee authority remaining in its fiscal year 1983 budget—of course, the fiscal year 1983 budget will expire in about a week—for the new loan facilities to Brazil and Mexico, and pointed out that the individual export transactions making use of that loan authority would not be approved until fiscal year 1984. Exim witnesses admitted that was the case, but said the Bank, as a consistent practice, charged a guarantee as of the date of authorization and not when the specific guarantee agreement was executed.

The Bank subsequently submitted material and a legal memorandum to us in support of its authority to make the loan guarantees in the manner I just described. The Comptroller General has not yet completed his own legal analysis of these Exim bookkeeping practices.

I must confess that I am not happy with the last-minute-rush manner in which this new loan facility program was announced and initiated. It was done just as we were to go to the Senate floor with S. 869, a bill to renew and amend the Bank's authority to operate over the next 6 years. Administration officials, frankly, were very forthcoming in our September 14 hearing, but I still have questions about how this new program changes the Bank's traditional role, and about how the program will be administered. On the one hand, the program will make possible exports from the United States to Brazil and Mexico that would not otherwise have taken place. This is a plus in many ways, including the creation of jobs for our workers. But my concerns remain about how much influence our Government will retain over the program. If, for example, the Exim makes its loan guarantees to foreign governments rather than individual firms, will not those foreign governments be able to decide which U.S. exporters will be able to benefit from a U.S. taxpayer-funded loan guarantee program? Will U.S. exporters now have to lobby foreign governments to benefit from U.S. Government programs?

I also have concerns whether this program, in conjunction with other related efforts to fund further import financing for Brazil and Mexico, will be consistent with the International Monetary Fund's conditionality program. Under that IMF program, Brazil and Mexico are being required to bring their foreign exchange accounts into balance. We understand that, as one part of the austerity measures being imposed on the economies of these two countries, only imports essential for economic recovery will be allowed.

During our hearings, Exim officials have admitted they will not be approving, but will only be monitoring the individual transactions under the overall loan guarantee program. Frankly, Mr. President, that appears to be an abdi-

cation of responsibility on their part. We will thus need to watch closely that these loan facility programs are administered in a manner consistent with austerity measures, and are not used to finance consumer good imports that are not essential for the economic and financial recovery of these two important countries.

Mr. President, I earlier referred to the story in today's Washington Post. There is the story and there is the headline. The headline reads: "Brazil's Congress Rejects Pay Cap in Slap to IMF."

In other words, the IMF told them that, as a condition for receiving IMF loans, they would have to limit their payments, including their salaries, government salaries, including salaries to their military. By a 252-to-1 vote, that austerity requirement was rejected. It seems to me there is a considerable question as to whether this program by the Export-Import Bank may be undermining what the International Monetary Fund is doing. Of course, we are the prinicipal or at least the one biggest contributor to the International Monetary Fund.

Mr. President, I support Senator HEINZ' amendment. I urge the Senate to support it. It limits the duration during which the newly announced program will be available and requires that the Congress be informed if the Bank undertakes any new large loan guarantee programs in the future.

Most importantly, the Heinz amendment, by providing an affirmative congressional authorization for the two facilities, resolves any legal doubts about the authority of the Eximbank to undertake such a venture on its own authority.

It says it can only undertake it on the authority of the Congress. That is what the Heinz amendment accomplishes.

Mr. President, in my opinion, the Bank does not presently have the authority to create a general guarantee facility in amounts above $100 million without specific congressional authorization. The Heinz amendment will place these two facilities on a sound legal footing and avoid setting any precedents that the Bank could later use for exceeding its authority in future cases. When Congress approves a general level of guarantee authority for the Bank, it does so with the understanding that the assistance will be provided directly to U.S. exporters. If the Bank wants to change the nature of the program by providing aid directly to countries, it should first get the specific and affirmative approval of the Congress.

I am not unsympathetic to the need to keep our exports flowing to Brazil and Mexico in terms of the benefit derived by these countries and by our own workers and industries involved in export trade. As explained earlier, however, I have reservations about how this program was announced and presented as a fait accompli to Congress. The amendment offered by Senator HEINZ should insure that this does not happen again and it will increase our ability to monitor implementation of this new Exim role. I urge my colleagues to support it.

Mr. HEINZ. Will the Senator yield?

Mr. PROXMIRE. I am happy to yield to my friend.

Mr. HEINZ. Mr. President, I really should say this amendment would not have been developed without the inspiration of the Senator from Wisconsin, who, I want the record to reflect, is always thoughtful, notwithstanding any previously taken-out-of-context remarks that I may have made earlier today.

Indeed, it is due to this desire to investigate, the impact of what the Bank was proposing with these facilities, the unusual nature of their first informing us, then saying they did not have to inform us, and his suggestion that we hold hearings, which were attended not only by the Bank but by the Department of the Treasury, the Department of Commerce, and the considerable discussions that he and I had over the most appropriate way to provide not only for the best way to handle this particular notification but future events of this kind, that I am indeed able to offer an amendment which I think meets his concerns. In my view he is really the coauthor of this amendment even if he does not want to admit its mixed parentage.

Mr. PROXMIRE. Mr. President, I want to thank my good friend.

Mr. HEINZ. Would the Senator like to be a cosponsor of the amendment?

Mr. PROXMIRE. I am afraid that I would have to disavow parentage.

Mr. HEINZ. I am not trying in any way to embarrass the Senator, but I do want to make clear that I do not want to be accused of stealing——

Mr. PROXMIRE. No, No.

Mr. HEINZ [continuing]. Anything in which he has been such a major participant. I am not trying to make him a cosponsor if he does not want to be.

Mr. PROXMIRE. The Senator is very generous. I appreciate that.

Mr. President, I support the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment (No. 2214) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2215

(Purpose: To define the "competitive mandate")

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. ARMSTRONG. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Missouri will continue to be laid aside and the clerk will report.

The bill clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG) proposes an amendment numbered 2215.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, line 9, after the period, insert the following: "For the purpose of the preceding sentence, rates and terms and conditions need not be equivalent to those offered by foreign countries, but should be established so that the effect of such rates, terms, and conditions for all the Bank's programs, including those for small businesses and for medium term financing, will be to neutralize the effect of such foreign credit on international sales competition.".

Mr. ARMSTRONG. Mr. President, this amendment is very simple in its purpose and I think not controversial. It puts into the bill a section which emphasizes that the rates and terms and conditions of loans under this legislation need not be equivalent to those offered by foreign countries but should be established so that the effect of the interest rates is to neutralize the effect of lower cost foreign credit. As the bill presently stands, loans made by the Bank in all its programs shall bear interest at the rate determined by the Board of Directors of the Bank consistent with the Bank's mandate to support the U.S. exports at rates and on terms and conditions which are fully competitive with exports of other countries.

"Competitive" as used in this paragraph should not be construed as necessarily equal, and so that is the purpose of this amendment merely to make it plain that we are not necessarily saying that Exim financing be offered at terms and conditions which are identical to or equal to those offered by foreign countries but merely that they be a factor which equalizes the competitive environment.

With that word of explanation, Mr. President, I urge the adoption of the amendment which I believe has been cleared on both sides of the aisle.

Mr. HEINZ. Mr. President, if the Senator will yield, I think his amendment is a very useful addition to the bill, It was never the intent, and I

think we, to the best of our ability, made it clear in the report language that we would not necessarily want mirror image or exactly equal responses to efforts by the other side, especially when those efforts in our view undercut the free trading system that we would all like to see observed by our trading partners. So I am not only prepared to accept the amendment of the Senator from Colorado (Mr. ARMSTRONG), I congratulate him on an amendment that is thoroughly consistent with what is in our report.

Mr. PROXMIRE. Mr. President, will the distinguished Senator yield?

Mr. ARMSTRONG. Of course. I would be very pleased to yield.

Mr. PROXMIRE. I congratulate the Senator from Colorado. As he knows, I have great admiration and respect for him. He is a man of extraordinary intellect, and I think this amendment is an example of that. I think in many ways it is the best amendment we will have all day. It does exactly what we should do. Let me point out why.

It says:

For the purposes of the preceding sentence, rates and terms and conditions need not be equivalent to those offered by foreign countries, but should be established so that the effect of such rates . . . will be to neutralize the effect of foreign credits on international sales competition.

What this does say is use your commonsence. You do not have to go all the way to match every single term and condition of a foreign subsidy. If they did that it would be a real drain on the American taxpayer.

The Senator I think is taking action here that will make this Export-Import Bank much more efficient than it has been at some times in the past, and I think it is an excellent amendment.

Mr. ARMSTRONG. Mr. President, I am very grateful to the managers, my friend from Pennsylvania and my friend from Wisconsin, not only for accepting the amendment but the generosity of their observations. I thank them both. As far as I know, we are ready for a vote.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Colorado.

The amendment (No. 2215) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2216

Mr. HEINZ. I send three technical amendments to the desk on behalf of the Senator from Illinois (Mr. PERCY). I ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Missouri will be continued to be laid aside and the amendments will be considered en bloc. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) on behalf of Mr. PERCY, proposes an amendment numbered 2216.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the bottom of page 24, add the following:

(e) Concessional financing or grants offered by the Agency for International Development for the purposes of the mixed financing program established under this section shall be made available in accordance with the provisions of subsections (c), (d), and (e) of section 205 of this Act.

On page 26, line 17, after "Funds.", insert the following new sentence:

"The Administrator of the Agency for International Development is authorized to establish a fund, as necessary, for carrying out a mixed credit financing program as described in this section.

On page 27, line 4, by striking out "shall" and inserting in its place "is authorized to."

Mr. HEINZ. Mr. President, the first of these amendments is a correction to the committee amendment that was adopted earlier. It inserts language that was accidently stricken in the drafting of the Foreign Relations Committee amendment.

The other two amendments I am offering on behalf of Senator PERCY affect title 2 of S. 869.

The first of these amendments modifies section 206 which authorizes the appointment of a mixed financing coordinator to work with AID and the Export-Import Bank in implementing these programs. The present section 206 language would require the President to appoint such a coordinator, since AID and Eximbank, the two agencies to be coordinated, have very different mandates involving two different sets of countries and objectives. This amendment would still authorize the position but leave the appointment of a coordinator optional and not subject to any time table. Thus, it permits the President the flexibility to determine whether the two agencies can work together effectively in implementing this section, but subsequently to appoint a coordinator if this proved necessary to get the job done.

The second revision I offer is a clarifying amendment to section 204 to make it clear that any use of funds under AID mixed financing programs must be consistent with AID's development responsibilities, as defined in section 205 of the act.

Mr. President, it is my underestanding that these amendments have been cleared.

Mr. PROXMIRE. They have indeed. I support the amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendment (No. 2216) was agreed to.

AMENDMENT NO. 2217

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Missouri is set aside.

The amendment of the Senator from Pennsylvania will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an amendment numbered 2217.

Mr. HEINZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, strike lines 1 through 3, and on line 4 strike "(3)" and insert in lieu thereof "(2)".

Mr. HEINZ. Mr. President, the Justice Department has pointed out a technical problem that needs to be adjusted in the provision of the bill establishing terms of directors. This amendment, which has been checked with the legal counsel of the Eximbank, is based on their conversations with the Justice Department.

I ask that this technical change be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2217) was agreed to.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

Mrs. KASSEBAUM. Mr. President, I strongly support maintaining an effective Export-Import Bank. In an ideal world, governments should get out of the export finance business. But this is not yet an ideal world, and we must assure that when Americans make a product which is competitive in quality and price, they are not disadvantaged in the world market because of the export finance practices of other governments. I have been gratified at the progress the administration has

made in gaining some agreement among our industrial trading partners to limit the competition among official financing agencies. I hope we will see more progress in the future. In the meantime, however, it seems to me that we must match the practices of others if we are to protect American industry and jobs.

There is one area I would like to discuss briefly with my colleague from Pennsylvania with respect to this bill. Currently the Eximbank's charter prohibits the Bank from financing defense articles and services. The Bank has interpreted this prohibition as meaning that if an item is to be used primarily by a defense entity, it cannot finance the export. On the other hand, if the same item is to be used for civilian related purposes, even if the purchaser and operator are part of the defense establishment, it will finance the item. This is particularly important in Third World countries, where the military often is responsible for activities such as civilian air traffic control, rural construction and health programs, and protection of natural resources—activities which in industrial countries are more likely conducted by civilian agencies or the private sector. This general approach by the Bank seems to me quite sensible.

There are two areas of potential ambiguity, however, which I would like to briefly discuss with you. First, the United States is a major producer of a wide variety of equipment related to lifesaving, health, and medical purposes. These can range from hospital equipment to ambulance or rescue aircraft, from fire engines to medical laboratory equipment. In the case of such equipment, which is clearly designed to carry out humanitarian missions, it seems to me that the Eximbank should not have to go through an elaborate exercise in deciding whether civilians will be the chief beneficiary of any intended sale. My assumption is that the Congress had in mind keeping the Bank out of the weapons business, and that humanitarian equipment never was intended to be off limits, regardless of the user.

Second, we in the Congress have been increasingly concerned with problems which result from the inability or unwillingness of countries to adequately patrol their own borders to accomplish such objectives as reducing the smuggling of drugs and illegal aliens, preventing ocean or airborne pollution, safeguarding natural resources, and providing lifesaving services to international shipping. The United States has increasingly provided foreign assistance and other concessional funding to help countries undertake such objectivess. I would hope that, in the case of small scale aircraft and marine vessels, when our Embassy can give reasonable assurances that such equipment will be helpful in allowing a country to improve its performance with respect to activities encouraged by the United States, the Eximbank would determine that such equipment could be financed.

Mr. President, I had thought about offering specific amendments to deal with both of these issues. However, it is my impression that at the time Congress passed the restrictions on defense equipment, it purposely avoided any tight definitions so as to allow Eximbank flexibility in determining what would and would not fall under the definition. Assuming that there is agreement that the current definition would allow Eximbank to finance goods designed for humanitarian purposes and equipment useful in assisting a country conduct maritime surveillance and lifesaving activities supportive of U.S. objectives, I will not offer such amendments at this time.

Mr. HEINZ. Mr. President, the clarifications offered by the Senator from Kansas are correct. The language of the Export-Import Bank charter was adopted some time ago in response to concerns in Congress about the use of Eximbank lending to support the sale of military equipment to less developed countries. I believe that the congressional intent with respect to the term defense articles and services was to prohibit the use of Eximbank financing for items to be used primarily for military purposes and for combat equipment and services of a specifically military nature, such as the maintenance of combat equipment and training.

The United States has always treated humanitarian supplies in a special category. Even during military conflict, the United States has licensed the export of humanitarian equipment and supplies, which we did not consider defense articles and services. The challenge of stemming the flood of illegal drugs into our country has led us to encourage, more accurately to pressure, many countries to take strong steps to halt the production and export of drugs in their country. It would seem to me that the effectiveness of such pressure would be greatly enhanced if we were willing to help finance the equipment to carry out such activities. Our mariners depend upon the Coast Guard services of other nations for their safety of life at sea, and equipment for search and rescue services should not be considered defense articles and service, even though they would be sold to military entities and operated primarily for routine patrol activities.

Mr. TOWER. Mr. President, I strongly support the amendment of my distinguished colleague from Minnesota, Senator BOSCHWITZ, that will increase the participation of small businesses in the export financing and promotion programs of the Export-Import Bank. In addition, I believe that the Banking Committee bill, S. 869, shows awareness of the need for small business to take greater advantage of these programs. The committee has taken several steps in the bill to address this need. However, I would like to discuss with the distinguished floor manager of the bill a problem that is not addressed by either the bill or by the Boschwitz amendment.

I am aware of a situation involving banks in States from Rhode Island to Arizona, including the Senator's State and mine, where Eximbank has taken policy positions invalidating the underlying security for the export loans involved—Eximbank insurance. These actions have the effect of discouraging the small and medium exports from the United States that the Senator from Pennsylvania, I, and others advocate.

In denying certain small- and medium-sized export insurance claims, Eximbank takes the position that banks are required to verify the genuineness of any documents required for drawdown, prior to the financing of goods. In addition, banks must bear the burden of proof that goods have in fact been exported from the United States. I submit that this position discourages small and medium company exports, because the underlying security of Exim insurance is rendered null and void.

Most Senators know that lending institutions which finance exports deal in documents, not goods. The letter of credit transaction typifies this situation. In export related transactions, if a bank must check the genuineness of the bill of lading, invoice and other instruments to validate its security, it will move to more profitable and less time consuming business. In addition, if a lending institution must verify that an actual export occurs, it would actually have to have a representative on the border to protect the validity of its security—the Eximbank insurance. Banks simply will not undertake the effort and risk involved in situations where relatively small dollar amounts of financing are at issue. The final result is that only larger exporters will be able to obtain financing.

The current proposal before us does not address these problems, and if we are to encourage small- and medium-size exports, I would strongly urge that Eximbank be mandated to expand their insurance program to cover these risks for banks that finance small- and medium-size exports. The cost of this insurance would be borne by exporters who utilize the Exim insurance program.

Mr. HEINZ. Mr. President, I agree with my colleague from Texas that there certainly does seem to be a problem here, and I would be very interested in having it addressed by the Eximbank. I do not think that there is any

intention on the part of the bank through its insurance programs to provide difficulties for small business exporters, but the remarks of the Senator from Texas would indicate that that has been the result nonetheless. I would hope that the Eximbank would consider this problem and make those changes in its procedures that would be appropriate to redress this apparent inequity, and I am sure that the Banking Committee will continue to be interested in this problem as it continues its oversight responsibilities with regard to the Eximbank and its programs.

I thank Senator TOWER for bringing this issue to the attention of the Senate. Problems of this nature clearly deserve attention and the Senator has done a service by raising this question.

Mr. DOMENICI. Mr. President, as the Senator from Pennsylvania knows, this Senator has been extremely concerned about the effect that the Export-Import Bank's lending practices have had on certain industrial sectors of the United States. While the Export-Import Bank provides assistance to allow a U.S. producer to bid on a foreign project, the development of that project could adversely affect another U.S. sector. For example, in 1982 the Eximbank provided assistance to the Cananea copper project in Mexico in order to allow a U.S. firm to participate. The Bank provided a $76 million loan for purchase of U.S.-made equipment for the project which, when completed, will triple capacity at the copper facility. The tripling of capacity will come at the expense of our domestic copper industry, which has been suffering from one of it worst recessions ever.

Mr. HEINZ. The Senator from New Mexico has expressed concerns that are very much shared by this Senator. The same situation exists with steel. The Export-Import Bank has made loans in Argentina of $18,785,000 for equipment and services for a steel plant; a loan in Taiwan of $19,500,000 for a steel expansion project; and in Mexico a loan of $151,393,000 for the expansion of a steel plant. These are just a few isolated examples, there are many others.

Mr. DOMENICI. I travel a lot in my State, and constituents ask me why we have entities like the Eximbank and the World Bank that make loans to increase world capacity for commodities that are already in surplus. They see it simply as the Government using their tax dollars to put them out of work.

Early in this Congress, I introduced S. 852, a bill that would prohibit the Eximbank from financing building or expanding the capacity in a foreign country to produce surplus commodities. Also prohibited are loans for commodities likely to be in surplus if the resulting productive capacity will cause substantial injury to U.S. producers of the same, similar or competing commodities. Before I would advocate such a stance I would want full hearings which, to date, have not been held.

Notwithstanding that fact, I think that it is inexcusable that Congress allows the Eximbank to make loans without requiring an economic impact study. The essential usefulness of an economic impact study is not new. Back home in New Mexico when a banker considers a loan application he looks at the industry and asks if there is a need for the proposed project. If there is no need, the banker, as a citizen can better serve the community by making the loan to another applicant. Market demand is also a predictor of success and the related prospect of repayment. As a businessman, the banker better serves his stockholders by avoiding loans for surplus commodity production.

The Eximbank already has procedures to evaluate any adverse domestic impact of its activities. The bank's guidelines take into account the intent behind the stimulus of the project to determine whether it is consistent with U.S. macroeconomic and philosophic objectives. The guidelines also require that the bank look at the net economic impact and quantify both in dollars and jobs the impact of the transaction on the domestic economy and the degree to which U.S. industry will be affected.

This procedure sounds good on paper. However, the problem over at the Eximbank is that they do not always do the economic impact studies. They did not do such a study on the Cananea project.

I thought about offering an amendment that would require the bank to do a full economic impact study pursuant to its guidelines on every project. Officials from the Eximbank say that they do not have the time or resources to do a full study for each project that they finance.

Another alternative would be to require an economic impact study for projects that have, or are likely to have, surplus capacity at the time the project becomes operational.

The problem is a very real one that has spread from various commodities and manufactured products to the point where it probably affects every State's economy. I think that a workable method of dealing with this situation must be found. Because of the unanswered questions I am not going to offer any of the possible amendments I have discussed today. My purpose in laying them out is to suggest possible alternatives that could be looked at when the Banking Committee has hearings, which I hope the chairman will agree to hold.

Instead of offering an amendment, I would like Congress to reaffirm a reporting requirement that Congress created in 1978 when we amended the Export-Import Bank Act, we required the International Trade Commission to prepare a report assessing the impact of the Bank's activities on industries and employment in the United States. That report has never been issued. It appears to this Senator that congressional oversight of this problem is an essential starting point to determine to what extent economic impact studies should be required. I would suggest that the ITC complete the report mandated in the 1978 amendments. In addition, it is my hope that the Banking Committee would hold hearings this year on this very question.

Mr. HEINZ. I agree that oversight is necessary and commit to the Senator from New Mexico that such hearings will be held this fall. We might also explore the possibility of hearings before the International Trade Subcommittee of the Finance Committee, a subcommittee on which I serve, although, as the Senator knows, that would be up to Senator DANFORTH, the chairman of the subcommittee. In addition, I am prepared to work with the Senator from New Mexico to insure that the ITC completes the study you mentioned and that it include in that study an analysis of commodities in surplus on world markets or those that have excess manufacturing capacity, and the possible adverse affect on U.S. products of Eximbank financing of projects that contribute to such surplus or excess capacity.

I appreciate the Senator's interest in this problem and that he has raised it as an issue as we consider this legislation.

Mr. President, it is my understanding that discussions have been going on with respect to the Danforth amendment, and I am prepared to yield the floor.

It is my understanding that Senator CHAFEE is prepared to make a proposal.

AMENDMENT NO. 2211, AS MODIFIED

Mr. CHAFEE. Mr. President, I send an amendment to the desk as a substitute for the Danforth amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. PROXMIRE. Mr. President, if the Senator will yield, I am very sympathetic. I do not think I oppose the amendment. I wish to hear it read. I have not had a chance to read it.

The PRESIDING OFFICER. If the Chair may have the attention of all Senators, the Chair must inform the Senator from Rhode Island that the amendment which he has sent is not in order in its present form as a substitute to the amendment provided by the Senator from Missouri. However,

the Senator has the right to modify his amendment if he wishes to do so.

Does the Senator desire to do so?

Mr. CHAFEE. Yes.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, am I in order if I request that the amendment that I sent to the desk or the document that I sent to the desk be a modification of the Danforth amendment?

The PRESIDING OFFICER. The Senator has that right.

Mr. CHAFEE. So I make that request, Mr. President.

The PRESIDING OFFICER. The Danforth amendment is so modified.

Mr. CHAFEE. Mr. President, as I understand it, the procedure would be to have a vote on the Danforth amendment as amended, that is the pending business, is that correct, following an explanation?

The PRESIDING OFFICER. The pending amendment before the Senate is the Danforth amendment as modified.

Does the Senator from Wisconsin wish to have the amendment read?

Mr. PROXMIRE. No.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the reading of the modification be dispensed with.

The PRESIDING OFFICER. Without objection, the reading of the amendment will be dispensed with.

The amendment is as follows:

On page 20, line 7, after "shall" add the following: "simultaneously refer the request to the International Trade Commission for a determination of material injury and "shall."

On page 21, lilne 5, after "and" add the following: ", following an affirmative preliminary determination of material injury by the International Trade Commission by the forty-fifth day after referral of the request and in subsection (b) of this section,".

On page 21, line 9 add the following: "By the nineteenth day following the preliminary determination by the International Trade Commission, the ITC Commissioner, shall make a final determination of material injury. If the determination is affirmative, the Commissioner shall assess a duty on the goods equal to the amount of the subsidy determined by the Secretary under subsection (c)(1) of this section. If the determination is negative, the Secretary shall direct the Commissioner to remove the prohibition on the entry of goods or services into the United States.

On page 21, line 2, strike "and" and strike lines 3 and 4.

On page 20, line 25, add the word "and" after the simicolon.

On page 19, line 28, after the word "interested" strike the word "person" and substitute the words "party as defined in section 771 of the Tariff Act as amended."

On page 20, line 10, delete the words "thirty" and substitute therefore "forty".

Mr. CHAFEE. Mr. President, the parties here have been present while we have had the modifications, and I am not trying to rush anything through.

I think the distinguished Senator from Wisconsin is presently reading it, so let me just make a couple of comments on it.

Under this modification, when a protest is received, the Secretary of Commerce investigates to see whether, indeed, there has been a subsidy. At the same time, the ITC investigates to see if there has been injury, damage.

Now, they have up to 45 days to do this. At the conclusion of that, if they report that there has been a subsidy and there has been an injury, damage, then an embargo for 90 days goes on the import of the product.

Following that there is further consolidation and investigation by both the ITC and the Secretary of Commerce, and if results are as previous; namely, there has been injury and there has been a subsidy, then a countervailing duty goes into effect.

Mr. President, that is the gist of the modification here.

I must say, like everything, you try and reach an agreement. I personally have grave concerns about the 90-day embargo and perhaps the Special Trade Representative, Ambassador Brock, will find this agreement unsatisfactory.

If so, I would certainly hope that he would make his views known so those views could be represented in the conference.

The House measure does not have anything similar to this. So there is still a chance for the STR to have his views known. I have grave reservations because it does seem to me that this 90-day embargo is contrary to the GATT.

On the other hand, I would mention that at the end of the 90-day embargo period with a final determination the embargo is lifted, so the embargo lasts 90 days.

There are some who say perhaps it is contrary to GATT, but it is minutia, it is not a major consequence, since practically the goods are not waiting on the dock when the bids are open and when this procedure is gone through. By the very nature of the transactions that are conducted it takes more than 90 days for the goods to arrive or a good deal longer than the period that is provided here.

So I set forth my own personal reservations, but this has been accepted by all the parties, and if the ranking minority member of the Banking Committee finds it satisfactory, I think we can proceed and certainly we would like to hear from the manager of the bill.

Thank you, Mr. President.

Mr. PROXMIRE. Mr. President, of course, I prefer the original language that the committee adopted, just a flat embargo. It seems to me that the case was very strong and, as I say, there was overwhelming support among management, labor, and so forth, for that flat embargo.

But I understand the concerns of the distinguished Senator from Rhode Island, the Senator from Missouri, and other members of the Finance Committee. I think what we have here is something that, if it works out the way I think all of us intend, it will be satisfactory. But I will watch carefully how it is administered and make sure that we do not continue to have a situation in which foreign countries take advantage of us by providing subsidies that enable their companies to come in and unfairly undersell in our market and take jobs away from American workers.

Mr. HEINZ. Mr. President, I am prepared to accept the amendment.

Mr. CHAFEE. I thank the Senator.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I am supporting this compromise amendment of section 109 of the Eximbank Act authorizing bill, and I hope that the remaining problems with this amendment can be resolved in conference. We have laws already which deal with the problems addressed in the amendment. We have negotiated a subsidies code with our trading partners which requires certain procedures before we assess countervailing duties. This amendment meets these requirements in part, but there remain serious problems with the findings and the procedures. I urge the administration to assist in an appropriate resolution of this in conference.

Mr. President, I commend Senators CHAFEE, PROXMIRE, DANFORTH, and HEINZ for working out what I consider to be a good compromise. Obviously it is going to be reviewed by different officials of Treasury, USTR, and others. But if there are still some problems that cannot be surmounted, I assume they can be softened some in conference.

But I can understand the frustration of the Senator from Wisconsin. With all of the GATT problems we have had and all of the subsidy problems, I think there is great frustration. I

think perhaps he is at least sending a message to the bureaucrats, who hopefully will respond to some of the concerns that many of us have in the Congress on both sides of the aisle.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. HEINZ. Mr. President, it is my understanding the pending business is the Danforth amendment as modified by Senator CHAFEE; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HEINZ. Mr. President, I understand we will proceed to the adoption of that measure.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri, as modified.

The amendment (No. 2211), as modified, was agreed to.

Mr. HEINZ. I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2218

(Purpose: To restrict IMF lending to Communist countries)

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. HELMS. I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an amendment No. 2218:

On page 29, after line 4, add the following:

TITLE IV—IMF LENDING POLICY

SEC. 401. The President shall instruct the United States Executive Director of the International Monetary Fund to oppose actively any credit drawings on the Fund or any of its facilities by any country which practices Communist dictatorship.

Mr. HELMS. Mr. President, the question may very well occur, why is the Senator from North Carolina offering this amendment?

There are several reasons. Legislatively speaking, I would mention that the House of Representatives has passed H.R. 2957 which combines IMF, Exim and the Multinational Development Bank. All three are incorporated in one bill. And I want this amendment in conference. As I say, the House of Representatives last month took this very prudent step with regard to increasing the U.S. contribution to the International Monetary Fund by a vote of 242 to 185 that adopted a proposal by Congressman PHIL GRAMM that will help put a lid on the amount of money the IMF provides to Communist dictatorships. So the pending amendment, Mr. President, is identical to the Gramm amendment. Simply stated, it directs the President of the United States to instruct the U.S. Executive Director of the International Monetary Fund to actively oppose any and all loans to countries under Communist rule.

Now, my opposition to sending more of the American taxpayers' dollars to the IMF is certainly no secret around this place. I will not rehash the arguments that I tried to raise earlier this year against increasing the U.S. contribution to the IMF by $8 billion.

I will simply say that the International Monetary Fund is a bad deal for the American taxpayers, in my judgment, and it is especially bad when tax dollars are used by the International Monetary Fund to prop up Communist dictatorships.

Mr. President, it is my understanding that the House passed authorizations for the IMF and the Eximbank and the multilateral development banks that were rolled into one bill. So by agreeing to the amendment I have offered, the Senate can go to conference with the House on these items without disagreement on whether the IMF should bankroll Communist regimes.

Needless to say, I hope that my colleagues will agree with me.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HEINZ. Mr. President, I think the Senator from North Carolina has accurately described his amendment. I rise in opposition to it.

Obviously, we are operating here without a time agreement. That means that we cannot invoke the germaneness rule. But it would be my view that if we did have a time agreement in the usual form, this amendment would be clearly nongermane to the Export-Import Bank bill before the Senate. I believe that this is not the time or the place to consider this amendment, and I would oppose it on that ground, in any event.

However, I also am constrained to oppose the amendment on substantive grounds. I think the amendment has much appeal on the surface. Why should we want to allow the U.S. Executive Director of the IMF to vote funds for a credit drawing on the IMF to a Communist dictatorship?

I suppose, Mr. President, that one might say that if this amendment were not to be adopted, it might be in order for the IMF to lend money to the Soviet Union. But that would not be possible. It is not possible because the Soviet Union is not a member, has not applied for membership, does not intend to apply for membership in the International Monetary Fund.

One might say, would not this allow the Albanians to go to the IMF and get money, if this amendment is not agreed to? Might the U.S. Executive Director inadvertently or deliberately allow that to take place? Albania is not a member of the International Monetary Fund.

To this Senator's knowledge, there are three countries—at least three—that have nonmarket economies and are members of the Fund. They are Hungary, Romania, and Yugoslavia.

It is my understanding that if this amendment were to be adopted, the President would be obligated to tell the Executive Director of the United States to the IMF that he would have to oppose any credit drawings by Yugoslavia.

I ask the Senator from North Carolina if that is correct.

Mr. HELMS. That is correct.

Mr. HEINZ. Mr. President, we have been very successful over the years at shattering the once monolithic Iron Curtain group of countries that we used to call the Soviet bloc into a number of countries, each developing its own foreign policy, each, to a certain extent, trying—sometimes successfully, sometimes unsuccessfully—to be independent of the Soviet Union. We clearly want those countries to have every possible incentive to continue the fragmentation of what we have called for many years the Soviet bloc.

One country—at least, at this time—that has fragmented itself from the Soviet bloc is the People's Republic of China. It is my understanding that the People's Republic of China would be caught in this amendment. If the Senator from North Carolina knows otherwise, I hope he will so inform me.

It seems to me, Mr. President, that when we consider a country like Yugoslavia—or, for that matter, the People's Republic of China—which has taken what I would call anti-Soviet lines, especially in its foreign policy, which has demonstrated not only the ability but also the will to stand up and actively and successfully oppose the Soviet Union, at times allying themselves with us, this is an amendment, no matter how superficial its attractiveness may be, that is truly cutting off our nose to spite our face.

Let me also, on a more technical level, discuss what it is we do not like

about Communist countries. We do not like, among other things, their foreign policy. We do not like, among other things, some of the personalities involved.

We may not like the books written by Karl Marx or Engels. I do not. They are interesting reading. I think people who want to read them should be allowed to do so. But I do not like the theories in them.

However, what we fundamentally have a disagreement over with respect to Communist countries is their extension of the power of the state to every aspect of their society. We use the word "totalitarian" to describe that. It is particularly evident—and indeed, it is one of the reasons for the economic failure of Communist regimes—that they extend the power of the state into every economic decision. There is no—at least, in theory—private property under communism.

The heavy hand of a totalitarian government extends to every aspect of the marketplace. Wages are set by the dictatorship of the proletariat, we are told. For that, in small print, read a few people running the Communist Party in the Soviet Union—the Presidium or the Politburo, to be even more precise.

None of us likes that, and all of us have a vested interest in seeing a totalitarian social and economic system break apart of its own weight and failure.

What the International Monetary Fund does is this: When a country that is a member of the International Monetary Fund suffers a liquidity crisis, it will assist them, if certain conditions are met, for up to a 3-year period in the extension of credit, which must be repaid, for the purpose of working out and overcoming the balance-of-payments difficulties that have brought about the liquidity crisis. This, of course, is what the International Monetary Fund is doing with many Western Hemisphere countries—Mexico, Brazil, and others.

Let me mention also that in order to be a member of the International Monetary Fund, you must meet a variety of terms and conditions; and for any country to meet them almost requires that that country adopt what we would call—they, of course, try not to call—free market principles.

Once that membership has been granted—it has not been granted, for example, as yet to Poland because Poland has not qualified on those criteria—that country must undertake, consistent with the IMF articles, a series of adjustments that includes such things as balancing your budget, getting the government out of subsidizing enterprises, using market-related mechanisms, not quotas, not tariffs, to bring the balance of payments into balance.

Mr. President, frankly there are times when I wish the United States would go and be subject to some of the conditionality agreements that the IMF is subjecting other countries to because they might force us to balance our budget and do some things to get our international trade balances in order.

If the amendment of the Senator from North Carolina were adopted it would stop the kind of progress we are making in breaking down the economic system of what we used to call Soviet bloc countries so they are more like capitalist free enterprise economies, and if we believe that the political leadership of those countries is inflexible, well, so be it, but what we can do while the political leadership is inflexible is undermine the system that that leadership thinks is going to support it.

What we are doing in this amendment is to destroy an engine, in effect an economic seige engine, that if we allow it to operate I believe will continue the successful undermining of the totalitarian economic practices of those nonmarket economies that this is aimed at.

Mr. President, I hope that this amendment will be rejected. I hope that my colleagues, as they did on a previous occasion, will join in rejecting it again.

Mr. PROXMIRE. Mr. President, I join my friend and colleague, the manager of the bill, in opposition to this amendment.

Frankly, I want to be sure that I am understood in saying this because I have great respect and admiration for the Senator from North Carolina, but if Andropov were a Member of this Senate, he would vote for this amendment. The Russian Communists would love this amendment. Why not? They are not a member of the IMF. They are not affected by it but it would drive countries that are Communist dictatorships, so to speak, Yugoslavia, Romania, Hungary, into further dependence on Russia. The IMF has been one agency that has been successful in tending to woo these countries away from the absolute domination by the Soviet Union.

Of course, they have a long way to go. The fact is that Yugoslavia has the free movement of labor and they permit tourists to visit. Romania has been moving in that direction. Hungary is beginning to have a market economy.

This is exactly the kind of thing we should encourage, and the IMF does that. These nations contribute to the IMF and draw on the IMF and, of course, the kinds of terms of the IMF makes are that the country comply with market discipline, that they hold down their imports when they have an adverse balance of trade, and they increase their exports. Of course that is the kind of discipline that we are familiar with in the Western World.

So I think that the adoption of this amendment would be a serious mistake. On its surface, it looks like the great thing to do. But when you look into it, it is not something we should adopt.

Incidentally, this amendment was offered in very similar form by the distinguished Senator from New Hampshire, Senator HUMPHREY, when the IMF was before us. And it was defeated by better than two to one, with a majority of both Republicans and Democrats voting against it.

Now, I understand that the administration is very much opposed to this amendment, flatly, vehemently opposed to it. They do not want it enacted and for many of the reasons I have already indicated. They recognize that this would not hurt the Soviet Union, which is after all our principal adversary. It would help them.

Mr. President, I congratulate my friend, the Senator from Pennsylvania, in his opposition, and I am delighted to support him.

Mr. HEINZ. Mr. President, I shall be very brief, and then I will, without wanting to foreclose any debate, at the appropriate time make a tabling motion on this amendment.

Mr. President, I shall review for the benefit of Senators who may not have heard all of the debate. I know that we are a little sparsely attended at this moment. I hope that Senators who are not here are listening in their office. I will repeat the point so ably made by the Senator from Wisconsin that Andropov, to repeat what he said, if he were here in this Chamber would vote for this amendment because it would relieve him of a great worry, the continual peeling away of countries from the totalitarian economic Soviet-dominated bloc of countries that he so much wants to continue to be subject to Soviet imperialism.

Second, the administration does ardently and actively oppose this amendment, for those and other reasons.

Third, when this amendment in substantially similar form was proposed, as the Senator from Wisconsin mentioned, by the Senator from New Hampshire, the vote was 60 against it, 32 for it, on a tabling motion offered by the Senator from Pennsylvania.

It is my hope that my colleagues will maintain the consistency and the good wisdom they showed on the previous occasion. I urge my colleagues once again to join in defeating this amendment which beyond all the other things I have said about it is clearly not germane to the subject matter before us although it is not subject to a point of order because of the parliamentary situation.

Mr. HELMS. Mr. President, the Senator from North Carolina regrets that

he lacks the capability to read the mind of Andropov. I will say that I am delighted that he is not a member of the U.S. Senate.

Now, I am curious about all of these countries we are leading away from communism. I do not perceive that. I think the red hand of communism is moving stealthily and steadily around this world.

Vietnam, for example, participates in the International Monetary Fund. I do not know that we have seen any signs of freedom loving in Vietnam.

Nicaragua participates in the International Monetary Fund.

Laos, Granada, and you can go right down the list, participate in the IMF.

I would not be surprised if the Pepsi Cola diplomacy would not one of these days extend IMF into the Soviet Union. The mysterious hands of the world financiers, who sometimes give the perception that they are more interested in bucks in their own pocket than preserving freedom in the world, may very well come to this Senate and say,

We are leading the Soviet Union away from tyranny. So, therefore, we have to let them participate in the IMF.

But, in any case, I believe that if the American people understood the International Monetary Fund—which I oppose, just as a matter of principle—I believe the American people, given a referendum on the question, would speak clearly and loudly to this U.S. Senate and say, "No more. No more." Instead, the Senate is going the other way.

Earlier this year, the Senate voted to increase the contribution, taken out of the taxpayers' pockets, by $8.4 billion. I am just a country boy, but I think that money ought to be kept at home to build productivity here. And certainly I think we ought to join the House of Representatives in saying none of this money shall be used to prop up any Communist dictatorship. That is all the amendment says.

As far as not being germane, that is a matter of opinion. The House bill passed, H.R. 2957, includes the IMF and the Exim and the Multilateral Development Bank. And the House passed this amendment on that bill by a margin of 242 to 185.

So I say to Senators, if you want to vote against a proposition that the taxpayers' money, the American taxpayers' money, should not be used to prop up a Communisty dictatorship, be my guest. But I am simply saying that I am giving an opportunity to stop this foolishness. Because we can rationalize among ourselves, we can talk about Mr. Andropov being happy about this or that, but the fact remains that we are helping to prop up tyrants around the world by the utilization of the International Monetary Fund.

I have no more to say and the Senator can proceed to his motion to table, in which case I will ask for the yeas and nays.

Mr. HEINZ. Mr. President, I do not see any other Members of the Senate seeking recognition. I think we have debated this.

I would only bring to my colleagues' attention an interesting discrepancy. It appears that when Senator PROXMIRE and I announced slightly different totals on the Heinz motion to table the Humphrey amendment that we were both right.

One piece of paper provided to me by the Senator from Wisconsin, entitled "Senate Voting Record No. 121," on the tabling motion, records 63 yeas, 30 nays, and 7 not voting. The CONGRESSIONAL RECORD for June 8, on the same motion, records 60 yeas, 32 nays and 8 not voting.

We probably have another exercise in creative accounting here that could be explained by perfectly normal processes, but it mystifies me.

I did not want our colleagues, Mr President, to think that neither Senator PROXMIRE or I had the facts wrong. I am reminded that we are maybe entitled to our opinions but we are not entitled to a different set of facts. It appears in this case that we are.

Mr. President, I move to table——

Mr. HELMS. In any case, I am giving Senators a chance for redemption.

Mr. HEINZ. If this be redemption, my concerns would be deepened.

Mr. HELMS. As the teenagers say, "You got it."

Mr. PROXMIRE. Would the Senator from Pennsylvania yield before he moves to table.

Mr. HEINZ. I am pleased to yield.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I wonder if my friends—and they are my friends—the Senator from Pennsylvania and the Senator from Wisconsin, since they are so confident about the vote, would they be willing to let there be an up-or-down vote? If their cause is so righteous, let Senators confront it head-on instead of behind a motion to table. Apparently, the Senators are confident that they are going to defeat the amendment, so why not let us have an up-or-down vote and go to it?

Mr. HEINZ. May I respond to the Senator from North Carolina?

Mr. HELMS. Certainly. I will be listening with bated breath.

Mr. HEINZ. I would say to my good friend from North Carolina that I have carefully considered his request, but, believing as the Senator from Pennsylvania does that, among other things, this amendment is really not truly germane to the subject matter of this bill, I would be constrained to ask, as I did on the Humphrey amendment, for the motion to table.

Mr. HELMS. I have no problem with that. I just wanted to point out that I would prefer Senators to confront the issue rather than the parliamentary tabling motion. But either way it comes out, it is the same thing. I think people will read it correctly one way or another.

Has the Senator moved to table?

Mr. HEINZ. Not as yet.

Mr. HELMS. Could he give me some indication?

Mr. HEINZ. We are waiting for the majority leader to respond to a request from Senator BYRD, the minority leader.

Mr. HELMS. Very well. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that the distinguished Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

USE OF COMPULSORY UNION DUES FOR POLITICAL PURPOSES

Mr. HELMS. Mr. President, as in morning business, I send a bill to the desk and ask for its immediate consideration—for its first reading.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Reserving the right to object, I want to make sure, for the record, does the Senator want the immediate consideration or does he want first reading?

Mr. HELMS. I want first reading.

Mr. BAKER. Will the Senator yield to me?

Mr. HELMS. Yes.

Mr. BAKER. Mr. President, I understand the Senator wants to pursue the provisions of rule XIV which would ultimately take this bill to the calendar. I advised the minority leader of that. We are both concerned. I understood the Senator to make the request for its immediate consideration.

Mr. HELMS. I quickly corrected myself and said first reading.

Mr. BAKER. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. He has the right to have it read the first time.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 1881) to amend the Federal Election Campaign Act of 1971 to prohibit the use of compulsory union dues for political purposes.

Mr. HELMS. Now, Mr. President, I ask for second reading.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, pursuant to a request from another Senator, I object to further consideration of the bill at this time.

The PRESIDING OFFICER. Objection is heard.

Mr. BYRD. Mr. President, I think I owe the Chair and Parliamentarian an explanation. An objection can be made to the introduction of any bill.

Mr. BAKER. The Senator is correct.

Mr. BYRD. If objection was made, he could not have introduced his bill until the next legislative day.

Mr. HELMS. Yes.

Mr. BAKER. Mr. President, I now suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPORT-IMPORT BANK AMENDMENTS OF 1983

The Senate continued with the consideration of the bill.

AMENDMENT NO. 2218

Mr. HEINZ. Mr. President, I am about to yield to the majority leader. I understand that he will, at the appropriate moment, make a motion to table the amendment before us. It had been my intention to do so.

I yield to the majority leader.

Mr. BAKER. Mr. President, may I say to the distinguished managers of the bill on both sides that an inquiry was put to me as to the administration's position on the Helms amendment. I have discussed the matter with a representative of the White House just now by telephone and I have been authorized to say that the administration does oppose the amendment. Based on that, unless there is further debate, I will at this moment, if the managers are ready, propose to make a motion to table.

Mr. PROXMIRE. Will the Senator yield?

Mr. BAKER. Yes.

Mr. PROXMIRE. Would it be possible for the President to send us a letter on this?

Mr. BAKER. Yes. I have requested such a letter and I am sure it will be forthcoming.

Mr. PROXMIRE. I thank the majority leader.

Mr. BAKER. Mr. President, I now move to table the Helms amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN), the Senator from Maine (Mr. COHEN), the Senator from Missouri (Mr. DANFORTH), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), the Senator from Florida (Mrs. HAWKINS), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Wyoming (Mr. SIMPSON), the Senator from Vermont (Mr. STAFFORD), and the Senator from Texas (Mr. TOWER), are necessarily absent.

I further announce that, if present and voting, the Senator from Florida (Mrs. HAWKINS), would vote "nay."

Mr. CRANSTON. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from New Mexico (Mr. BINGAMAN), the Senator from Oklahoma (Mr. BOREN), the Senator from Arizona (Mr. DECONCINI), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from New York (Mr. MOYNIHAN), the Senator from Tennessee (Mr. SASSER), the Senator from Mississippi (Mr. STENNIS), and the Senator from Massachusetts (Mr. TSONGAS), are necessarily absent.

The PRESIDING OFFICER (Mr. JEPSEN). Is there any other Senator in the Chamber who desires to vote?

The result was announced—yeas 45, nays 30, as follows:

[Rollcall Vote No. 268 Leg.]

YEAS—45

Andrews	Evans	Mitchell
Baker	Exon	Nunn
Bentsen	Garn	Packwood
Biden	Gorton	Pell
Boschwitz	Heinz	Percy
Bradley	Huddleston	Pressler
Bumpers	Inouye	Proxmire
Burdick	Kassebaum	Quayle
Chafee	Lautenberg	Roth
Chiles	Leahy	Sarbanes
Cranston	Levin	Specter
Dixon	Lugar	Stevens
Dodd	Mathias	Wallop
Domenici	Melcher	Weicker
Eagleton	Metzenbaum	Zorinsky

NAYS—30

Abdnor	Hecht	Nickles
Armstrong	Heflin	Pryor
Byrd	Helms	Randolph
D'Amato	Humphrey	Riegle
Denton	Jepsen	Rudman
Dole	Johnston	Symms
East	Kasten	Thurmond
Ford	Laxalt	Trible
Grassley	Mattingly	Warner
Hatch	McClure	Wilson

NOT VOTING—25

Baucus	Goldwater	Murkowski
Bingaman	Hart	Sasser
Boren	Hatfield	Simpson
Cochran	Hawkins	Stafford
Cohen	Hollings	Stennis
Danforth	Kennedy	Tower
DeConcini	Long	Tsongas
Durenberger	Matsunaga	
Glenn	Moynihan	

So the motion to lay on the table amendment No. 2218 was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PERCY. Mr. President, I am a cosponsor of S. 869 which amends the Export-Import Act of 1945 by strengthening our U.S. export financing capability. I commend my distinguished colleagues, Senators HEINZ and GARN, for bringing this legislation to the floor, now, ahead of the September 30 date when the Bank's charter expires. These legislative changes in the Bank's charter are necessary if we are to continue to support U.S. exporters in fierce international competition.

The Export-Import Bank is of great importance to my home State of Illinois. As the No. 1 U.S. exporter of agricultural goods and the third largest exporting State overall, Illinois makes considerable use of the Bank's facilities. Illinois ranks fourth in the total contract value of funds received by the Export-Import Bank, funds which support over 15,000 jobs in my State. Not only would a strengthened Export-Import Bank make those jobs secure, but would also help defend U.S. exporters from foreign subsidization, even create new job opportunities.

Let me make a few short remarks on several important parts of this legislation. Section 108 established a specific policy for Eximbank to encourage

small businesses to develop overseas commerce through Eximbank programs, and allows for greater assistance to the small business sector. In establishing more credit for small businesses, the Bank would now have the ability to support one of the most vital areas of our economy. I am pleased to be a consponsor of Senator BOSCHWITZ's amendment that would require the Bank to set aside 10 percent of funding specifically for small businesses and am pleased that the Senate has accepted our amendment.

Similarly, the establishment of mixed credit export subsidies would allow us to remain competitive with foreign exporters who already offer mixed credits, or export financing mixed with foreign aid funds. The Export-Import Bank conducted a study of sales lost in 1982 due to foreign official export credit competition which showed a U.S. loss of $900 million in sales. Nearly half of those losses were due to foreign competitors offering mixed credits. Therefore, our bill comes to grip with this problem.

The recent growth in the service industry and the fact that services now represent the fastest growing sector of our economy is also reflected in the provisions provided in S. 869 which would give equal treatment to service exports as the Bank gives to other export sectors. Chicago is one of the most important international centers of finance, insurance, and other service industries. I know this new dimension of Export-Import assistance will be important to continued growth in these industries.

Mr. President, if we are truly to remain competitive in exports without resorting to protectionism or outright subsidization, we must make the changes detailed in S. 869 in the charter of the Export-Import Bank to allow the Bank to become more independent and responsive to our exporters' needs. I urge my colleagues' support in passing this most important piece of legislation.

Mr. RIEGLE. Mr. President, I rise in strong support of the Export-Import Bank Amendments of 1983.

At a time when the U.S. deficit in foreign trade is increasing dramatically, I think that it is imperative that we do everything in our power to encourage, facilitate, and accelerate American exports.

In 1982 the U.S. foreign trade deficit was $43 billion and for 1984, Martin Feldstein, Chairman of the President's Council of Economic Advisers, predicts that this deficit could reach $100 billion.

Since approximately one out of every six American jobs is dependent on foreign exports, the more we export, the more Americans we will be putting back to work; and the less we export, the more we allow other nations to capture our domestic markets and the weaker we will become as a nation.

I believe that our current trade imbalance is an extremely serious problem which threatens the economic welfare of our country and which cannot be underestimated.

I worry that slowly but surely foreign countries are capturing our own markets. Serious on-going efforts must be made to address this problem.

Mr. President, passage of the Export-Import Bank Amendments of 1983 is an important first step.

This legislation declares as its purpose, among other things:

To expand U.S. employment and economic growth by increasing U.S. exports to markets in the developing world;

To stimulate the economic development of countries in the developing world by improving their access to credit for imports from the United States;

And, to neutralize foreign predatory financing of exports in competition with U.S. exports.

The Export-Import Bank Amendments of 1983 recognize the vital need for a strong and aggressive Export-Import Bank and the importance of neutralizing subsidized foreign export financing.

Some of the sections of this legislation provide as follows:

Section 101 of S. 869 reflects our desire to make it absolutely clear that the first priority of the Export-Import Bank, its chief mandate, is to be competitive with foreign officially subsidized export credits.

Section 102 reestablishes the Eximbank Advisory Panel to make the Bank more fully responsive to the needs of American exporters.

Section 103 reduces the opportunity for politicizing the Eximbank by giving members of the Board of Directors fixed 4 year terms.

Section 105 is designed to discourage the use of subsidized financing by foreign governments to support sales in the U.S. market.

And section 109, in effect, allows the Secretary of Commerce to forbid importation into the United States of a product whose sale was made possible through foreign officially subsidized export financing at a rate below that stipulated in the "Arrangement on Guidelines for Officially Supported Export Credits" of the Organization for Economic Cooperation and Development.

Other provisions of the Export-Import Bank Amendments of 1983 are designed to assist the export of services and housing and to assist small business.

Services represent the fastest growing sector of American exports. This legislation amends the Eximbank charter to make it clear that service exports are to receive the same and equal treatment as the Bank gives to other export sectors.

Similarly, this legislation clarifies our intention that where appropriate the Bank should provide competitive financing for the financing of housing built by U.S. companies for export.

And, with respect to small business, we insure that the Bank is responsive to small business needs by providing in section 108 language stressing the need for the Bank to provide assistance to small business exporters. To that end, we specifically direct the Chairman of the Eximbank Board to designate one of the Directors of the Bank to insure that the Bank carries out its responsibilities toward small business.

It is also my intention to support enthusiastically an amendment which directs the Bank to insure that U.S. companies are afforded an equal and nondiscriminatory opportunity to bid for insurance in connection with transactions assisted by the Bank.

Mr. President, in hearings last year the Banking Committee learned that well over $1 billion of U.S. export sales were lost in fiscal year 1982 due to inadequate Eximbank support. During the same period, the Bank failed to use approximately $1 billion of its direct loan authority.

This underutilization of funds to stimulate U.S. exports is totally unacceptable. In our committee report we recognize the need for greater adherence on the part of the Bank to meet its responsibilities to provide American exporters with competitive financing in the face of foreign government subsidized export credit competition.

For those who doubt the need for a stronger U.S. international trade and export policy, I commend an article which appeared in the Washington Post, August 2, 1983, on "World Trade: What U.S. Firms Are Up Against," by Lee Iacocca, to your attention.

I request that this article be printed in the RECORD.

The article follows:

WORLD TRADE: WHAT U.S. FIRMS ARE UP AGAINST

(By Lee Iacocca)

The playing field in world trade is not level; it is blatantly tilted against the United States.

And unless that field can be made level, we will rapidly slip from the major leagues to the minors—with small chance of a comeback. In 1982, the U.S. deficit in foreign trade was $43 billion; for 1984, Martin Feldstein, chairman of the President's Council of Economic Advisers, predicts that this deficit could reach $100 billion. This widening gap between imports and exports significantly contributes to lost jobs and the erosion of the capital base of many essential industries, including machine tools, steel, electronics and automobiles.

A strong economic recovery—contrary to popular economic folklore—could worsen this deteriorating situation. Since several major competitor nations are expected to

lag behind the United States in their rate of recovery, price competition from them could play havoc with our recovery and our trade deficit.

With good reason, government and business leaders are concerned. Unfortunately, this concern has become polarized into an either/or position: protectionism or free trade.

For example, in The Post, Wolfgang Hager's defense of protectionism [Outlook, May 15], was followed by Bill Brock's response in defense of free trade [op-ed, June 13]. These essays—a microcosm of what's being played out daily in Washington, in academia and on the 6 o'clock news—are attempts to come to terms with the issue of international competition. But, like most extremes solutions, both are wrong.

For one thing—and this is probably the most important thing—these either/or approaches fail to take into account some very basic realities of the business world in 1983.

It's true that protectionism would provide immediate, temporary help to certain industries—including the auto industry. About 28 percent of the cars sold in America are imported—21 percent are from one nation, Japan. And in June of this year, the Labor Department ruled that an estimated 5,200 workers laid off from Chrysler Corporation plants in Newark, Del., and Detroit can apply for special aid because imports cost them their jobs.

But rushing in with an across-the-board protectionist quick fix could backfire on American business. America simply can't afford to alienate and lose world markets through protectionism and its backlash. The fastest-growing markets in the world are overseas; Brazil and Mexico combined will probably represent a larger auto market than the United States at the turn of the century. And economies in the Far East are on impressive growth curves.

Like the ill-fated Smoot-Hawley Tariff Act of 1930, protectionist measures carry the potential for lost markets, trade wars and depression. The price of such "relief" is one that American business can't afford.

If protectionism isn't the answer to our trade problems, free trade extremism isn't either. Free trade ignores the historical fact that current trade agreements were formulated at a time when America was the top dog in production and sales in world markets—and especially in domestic markets. It ignores the new reality that, both in terms of production facilities and marketplaces, competition is now global.

There is nothing wrong with new game; it's really the major leagues. Global competition—the playout of economic Darwinism—has been a potent spur to American business to improve its productivity and quality. What is wrong is that while American companies are playing in a new international trade game, the U.S. government is still expecting them to play by the old rules.

We are up against aggressive, potent competitors, backed by their governments—while experts inside and outside government intone Adam Smith's theories and pretend it's still 1950 in terms of U.S. worldwide economic dominance. Most other governments have realized that the game and its rules have changed—and now assist the "Invisible Hand" through all-too-visible programs and policies that give their industries a better-than-even break in the world.

Because the U.S. government still tries to play by the old free trade rules, America lacks a trade policy that's responsive to the new realities of international competition. For American businessmen and workers—sent out into the global marketplace to complete without help from government—the playing field is not level; it's tilted against them.

To make that playing field level—to allow American business and American labor to be on the same footing with their global competitors—we have to address two major areas immediately.

The first area concerns purchasing power parity. Right now—because of currency exchange rates and the system of value-added taxes—some of our competitors have a substantial pricing advantage; over $1,500 per car for Japan. This advantage obviously tilts the playing field for the competition.

EXCHANGE RATES

With the current strength of the dollar and the intentionally low values of certain other currencies, such as the yen, some of our trading partners have a big edge over American businesses when they compete in the U.S. market. In the auto industry—a prime example—it is estimated that the Japanese have a cost advantage of $600 to $800 per car because of an estimated 20 percent undervaluation of the yen.

VALUE-ADDED TAXES

Most of American's major competitors use value-added taxes, which they rebate to their manufacturers when goods are exported. For Japan, this tax rebate equals another $600 to $800 per car. U.S. import duties come nowhere near equaling the rebated taxes, so the imported goods have a substantial price advantage over American-produced goods. And the American goods have to shoulder the full effect of U.S. federal, state, local, Social Security, and other taxes.

The second major area concerns the lack of a coherent, pragmatic industrial policy to help American businesses to become and/or remain competitive—especially for:

RIDING OUT DOWNTURNS

Many of America's competitors have developed programs to help their industries remain solvent during cyclical downturns. America has no such program, and with each economic downturn—even predictable ones in cyclical industries like chemicals and autos—American industries lose ground to foreign competition. Once they lose too much goods and get on to a precarious financial footing, they usually cannot be resurrected. Their jobs disappear overseas forever, by the hundreds of thousands.

CARVING OUT AND PRESERVING MARKET SHARE

Some of America's competitors, such as the Japanese, have learned that they can establish market share through a low price/low profit game plan applied over the long term. They can only do this with solid financial backing from their governments and their closely integrated national banking systems, something American industry doesn't have. As a result, American businesses frequently cannot afford to pay the long-term "entry fee" to gain and hold position in desirable markets.

That these two areas—purchasing power parity and industrial policy—demand action is obvious to many Americans, but not to enough of our elected representatives. According to recent polls conducted by Louis Harris Associates and the Los Angeles Times, the percentage of Americans who favor government policies to preserve or expand our industrial base is double the percentage of congressional leaders who are similarly inclined.

What must government and business do, starting today, to deal with the new trade realities and to level out the playing field?

1. Government must negotiate more acceptable exchange rates, rates that reflect the real purchasing power of different currencies and that are indexed over time to changes in relative inflation rates.

2. Government must find ways to compensate for the pricing edge created by VAT rebates. DISCs (Domestic International Sales Corporations) have never been an effective tool for this; and import duties, because they are too low, have been equally ineffective. Our taxation policy should get in step with the rest of the world.

3. Government and business together must find ways to help fundamentally viable American companies absorb the impact of recessions—and to allow American business to compete with foreign industries whose governments and infrastructures support low price/low profit marketing strategies.

This kind of aid could be in the form of loans or of loan guarantees similar to those provided to Chrysler. A new structure to accomplish this program could incorporate the concept of a "domestic IMF"; it could arrange emergency financing to support those businesses that have clear, workable plans to improve productivity and increase operating efficiency. There's no question that the capital for these loans is available; I've often wondered why the American public and business community have allowed American banks and public institutions to lend $500 billion to Third World countries and businesses while we have such pressing needs here at home.

In the international trade game, time is not on our side. The next several seasons will determine, irreversibly, whether America stays in the world trade major leagues. We need solid policies now, if we're going to have a chance to play on a level field.

As far as autos are concerned, until we get these policies in place, we must negotiate or legislate an extension on quotas on Japanese imports. Without these quotas as an interim measure, the American auto industry as we know it won't survive long enough to have a chance to play on that level field.

A level field means a fair game—a game in which all players go by equivalent rules. A level playing field in international trade is necessary to put the biggest game in the world back on the level.

● Mr. LAUTENBERG. Mr. President, I rise in support of the pending bill, S. 869, the Export-Import Bank Amendments of 1983. The legislation renews the Bank's charter for 6 years and strengthens its capacity to assist U.S. exporters in meeting foreign competition supported by official financing subsidies. It addresses one of the factors that has contributed to the disastrous deterioration of the U.S. trade position in recent years.

The last time this country had a favorable merchandise trade balance was 1975. Our surplus that year was just over $9 billion. Then came the oil shocks of the late seventies. The U.S. trade deficit shot up to an unprecedented $33.8 billion. As the impact began to be absorbed, the deficit declined to slightly more than $25 billion. Since then the situation has dra-

matically worsened. A colossal trade gap of more than $60 billion is projected for this year.

Now, Mr. President, no one supposes that this decline in our trade position is solely owing to the failure to meet export credit competition. But there is little doubt that it plays a role. When officially supported concessional financing is more readily available for foreign products, American businesses are at a disadvantage and the jobs of American workers are at additional and unfair risk.

The bill before us, Mr. President, contains a number of provisions designed to assure that the Export-Import Bank will or can be an effective instrument to counter financing competition. Two are especially important. The first makes it clear that the first priority of the Bank should be to provide competitive export financing. The administration has given procedence to the Bank's own financial interest. Indeed, the administration has generally opposed, on budgetary as well as policy grounds, the effective use of the Bank's resources for the purposes Congress has approved time and again. Perhaps this provision will get the message across. We want an aggressive trade policy which insists on fair and reciprocal treatment for U.S. companies that want to do business in the world market. And we are prepared to support the measures that will be necessary to achieve this objective.

The second provision would create a program of mixed credits-combinations of foreign assistance and export financing—in both the Agency for International Development and the Export-Import Bank. This will help to neutralize the advantage many of our competitors now enjoy in Third World markets. Tie-ins between aid and trade have been very effective instruments for export promotion and market penetration. It is high time we made them available.

Mr. President, the development of an explicit, coherent, and tough-minded trade policy is long overdue. Uncle Sam can no longer afford to play the role of Uncle Sap in world trade. This bill can be an important step in that direction and I urge its adoption.●

● Mr. EVANS. Mr. President, I rise today to address an issue of great importance to the country and particularly to the Northwest.

This Nation's economy and the jobs of thousands of Americans are deeply affected by the ability of our producers to be competitive in international markets. In my own State more than 450 businesses benefit from the Eximbank's operations. It must not only be continued, but encouraged to aggressively pursue support for our international marketing efforts.

Currently international practice finds many foreign nations subsidizing the products of their own exporters. The Bank's purpose is to neutralize the market effects of those subsidies.

U.S. producers receive none of the Bank's funds, nor should they. Eximbank money provides competitive financing arrangements to the potential buyers of U.S. products. U.S. firms can then compete more fairly with foreign producers. And that is all that is necessary—fair competition.●

Mr. BAKER. Mr. President, I inquire of the managers of this bill how many more amendments we have. Perhaps we can have third reading at this point.

Mr. HEINZ. Mr. President, to this Senator's knowledge, there are no more amendments, and this Senator is prepared to go to third reading.

Mr. PROXMIRE. We have no more amendments on our side.

Mr. BAKER. Mr. President, I know of no other amendments, and I ask for third reading of the bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (S. 869) was passed, as follows:

S. 869

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Export-Import Bank Amendments of 1983".

TITLE I—AMENDMENTS TO THE EXPORT-IMPORT BANK ACT OF 1945

COMPETITIVE MANDATE

SEC. 101. (a) The second sentence of section 2(b)(1)(A) of the Export-Import Bank Act of 1945 is amended—

(1) by inserting "in all its programs" after "objective"; and

(2) by inserting "fully" after "which are".

(b) Section 2(b)(1)(B) of such Act is amended by striking out all through "exports of other countries;" in the first sentence and inserting in lieu thereof the following: "It is further the policy of the United States that loans made by the Bank in all its programs shall bear interest at rates determined by the Board of Directors of the Bank, consistent with the Bank's mandate to support United States exports at rates and on terms and conditions which are fully competitive with exports of other countries. For the purpose of the preceding sentence, rates and terms and conditions need not be equivalent to those offered by foreign countries, but should be established so that the effect of such rates, terms, and conditions for all the Bank's programs, including those for small businesses and for medium term financing, will be to neutralize the effect of such foreign credit on international sales competition. The Bank shall consider the average cost of money as one factor in its determination of interest rates, where such consideration does not impair the Bank's primary function of expanding United States exports through fully competitive financing. It is also the policy of the United States".

(c) Section 2(b)(1)(B) of such Act is amended by inserting "export trading companies," after "independent export firms," in the third sentence, as amended by subsection (b).

ADVISORY COMMITTEE

SEC. 102. Section 3(d) of the Export-Import Bank Act of 1945 is amended to read as follows:

"(d) There is established an Advisory Committee to consist of twelve members who shall be appointed by the Board of Directors on the recommendation of the President of the Bank, and who shall be broadly representative of production, commerce, finance, agriculture, labor, services, and State government. Not less than three members appointed to the Advisory Committee shall be representative of the small business community. The Advisory Committee shall meet at least once each quarter. The Advisory Committee shall advise the Bank on its programs, and shall submit, with the report referred to in section 2(b)(1)(A) of this Act, its own comments to the Congress on the extent to which the Bank is meeting its mandate to provide competitive financing to expand United States exports, and any suggestions for improvements in this regard. Members of the Advisory Committee, on a rotating basis, shall be permitted to attend meetings of the Board of Directors.".

TERMS OF DIRECTORS

SEC. 103. (a) The third sentence of section 3(c) of the Export-Import Bank Act of 1945 is amended by striking out "Terms of the directors shall be at the pleasure of the President of the United States, and the" and inserting in lieu thereof "The".

(b) Section 3(c) of such Act is amended by adding at the end thereof the following: "The terms of the directors first appointed after the date of enactment of this sentence, including the President and the First Vice President of the Bank, shall be four years, except that—

"(1) of the directors first appointed pursuant to this sentence, three directors (other than the President and First Vice President of the Bank) shall be appointed for terms of two years, as designated by the President of the United States at the time of their appointment;

"(2) any person appointed to fill a vacancy shall serve only for the remainder of the four-year or two-year term to which he or she was appointed or until January 20, 1985, as the case may be.".

(c)(1) Section 3(c) of such Act is amended by adding at the end thereof the following: "Of the five members of the Board appointed by the President, not less than one such member shall be selected from the small business community and shall represent the interests of small business.".

(2) In order to carry out the amendment made by paragraph (1), the first member appointed by the President of the United States to the Board of Directors of the Export-Import Bank of the United States after the date of the enactment of this section shall be selected from among the small business community and shall represent the interests of small business.

REPORT ON AUTHORITY; EXTENSION

SEC. 104. (a) Section 7(a)(2) of the Export-Import Bank Act of 1945 is amended to read as follows:

"(2)(A) Not later than March 31 of each year the Bank shall determine whether the authority available to it for the current fiscal year will be sufficient to meet the Bank's needs, particularly those arising from any unforeseen increases in the level of exports, any increased foreign export credit subsidies, or the lack of progress in negotiations to reduce or eliminate export credit subsidies. Not later than April 15 of each year the Bank shall transmit to the Congress a report on such determination, together with a request by the President for such an increase in its authority as he deems appropriate.

"(B) If the Bank finds that the amount of direct loan authority or guarantee authority available to it for any fiscal year exceeds the amount which will be necessary to carry out its functions consistent with the availability of qualified applications and limitations imposed by law during such year, it shall promptly transmit to the Congress a request for legislation to eliminate the amount of such excess direct loan or loan guarantee authority. Upon the expiration of a period of forty-five days after the date on which the Bank makes such request, the Bank shall make the amount of such excess authority available for commitment unless the Congress has completed action on legislation eliminating or reducing the excess amount. For the purpose of computing the forty-five-day period under the preceding sentence, there shall be excluded any days on which either House of Congress is not in session because of an adjournment of more than three days.".

(b) Section 8 of such Act is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1989".

MATCHING CREDITS

SEC. 105. Section 1912 of the Export-Import Bank Act Amendments of 1978 is amended—

(1) by adding at the end of subsection (a)(1) the following: "The inquiry, and where appropriate, the determination and authorization to the Export-Import Bank referred to in this section shall be completed and made not later than thirty days after the receipt of such information.";

(2) by striking out "determining" in paragraph (b)(1) and inserting in lieu thereof "significant".

(3) by striking out "may" and inserting in lieu thereof "shall" in subsection (c).

REPORT TO CONGRESS

SEC. 106. The first sentence of section 2(b)(3) of the Export-Import Bank Act of 1945 is amended by striking out "$100,000,000" and inserting in lieu thereof "$250,000,000".

EXPORTS OF SERVICES

SEC. 107. Section 2 of the Export-Import Bank Act of 1945 is amended—

(1) by inserting "and services" after "exchange of commodities" in the second sentence of subsection (a)(1);

(2) by inserting "of goods and services" after "exports" in the second sentence of subsection (b)(1)(A); and

(3) by inserting after subsection (b)(1)(C) the following:

"(D)(i) It is further the policy of the United States to foster the delivery of United States services in international commerce. In exercising its powers and functions, the Bank shall give full and equal consideration to making loans and providing guarantees for the export of services, independently or in conjunction with the export of manufactured goods, equipment, hardware or other capital goods, consistent with the Bank's policy to neutralize foreign subsidized credit competition and to supplement the private capital market.

"(ii) The Bank shall include in its annual report a summary of its programs regarding services.

"(E) The Bank shall urge the Foreign Credit Insurance Association to provide coverage against 100 per centum of any loss with respect to exports having a value of $100,000 or less.".

COMPETITIVE INSURANCE

SEC. 108. Section 2 of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(d)(1) In carrying out its responsibilities under this Act, the Bank shall work to ensure that United States companies are afforded an equal and nondiscriminatory opportunity to bid for insurance in connection with transactions assisted by the Bank.

"(2) In furtherance of that effort, the Chairman of the Bank shall review Bank policies and programs in regard to this issue, and in coordination with the United States Trade Representative and the appropriate agencies of the Department of State, the Department of the Treasury, and the Department of Commerce, undertake actions designed to promote equal and nondiscriminatory opportunities to bid for insurance in connect in with all aspects of international trade activities.

"(3) The Bank shall report to the Committee on Banking, Finance and Urban Affairs of the Senate not later than May 15, 1984, regarding—

"(A) the existing obstacles to equal and non-discriminatory bidding for insurance related to transactions assisted by the Bank;

"(B) the efforts that the Bank has taken in addressing such problems; and

"(C) any recommendations for additional action by the appropriate agencies of the executive branch or the Congress."

SMALL BUSINESS NEEDS

SEC. 109. (a) Section 2(b)(1) of the Export Import Bank Act of 1945 is amended—

(1) by striking out "that the Bank shall give due recognition to the policy stated in section 2(a) of the Small business Act that 'the Government should aid, counsel, assist, and protect, insofar as is possible, the interests of small business concerns in order to preserve free competitive enterprise' and that in furtherance of this policy the Board of Directors shall designate an officer of the Bank who shall be responsible to the President of the Bank for all matters concerning or affecting small business concerns and who, among other duties, shall be responsible for advising small businessment of the opportunities for small business concerns in the functions of the Bank and for maintaining liaison with the Small Business Administration and other departments and agencies in matters affecting small business concerns;" in subparagraph (B); and

(2) by adding at the end thereof the following:

"(E)(i) It is further the policy of the United States to encourage the participation of small business in international commerce. In exercising its authority, the Bank shall develop a program which gives fair consideration to making loans and providing guarantees for the export of goods and services by small businesses.

"(ii) It is further the policy of the United States that the Bank shall give due recognition to the policy stated in section 2(a) of the Small Business Act that 'the Government should aid, counsel, assist, and protect, insofar as is possible, the interests of small business concerns in order to preserve free competitive enterprise'. In furtherance of this policy, the Board of Directors shall designate an officer of the Bank who shall be responsible to the President of the Bank for all matters concerning or affecting small business concerns and who, among other duties, shall be responsible for advising small business concerns of the opportunities for small business concerns in the functions of the Bank and for maintaining liaison with the Small Business Administration and other departments and agencies in matters affecting small business concerns.

"(iii) The Director appointed to represent the interests of small business under section 3(c) shall ensure that the Bank carries out its responsibilities under subparagraph (ii) and that the Bank's financial and other resources are, to the maximum extent possible, appropriately used for small business needs.

"(iv) To assure that the purposes of subparagraphs (i) and (ii) are carried out, the Bank shall make available, from the aggregate loan, guarantee, and insurance authority available to it, an amount to finance exports by small business concerns (as defined under section 3 of the Small Business Act) which shall be not less than 6 per centum of such authority for fiscal year 1984, 7 per centum of such authority for fiscal year 1985, 8 per centum of such authority for fiscal year 1986, 9 per centum of such authority for fiscal year 1987, and 10 per centum of such authority for fiscal year 1988 and thereafter. The Bank shall utilize the amount set aside pursuant to the preceding sentence to offer financing for small business exports on terms which are fully competitive with regard to interest rates and with regard to the portion of financing which may be provided, guaranteed, or insured. Financing under this subparagraph shall be available without regard to whether financing for the particular transaction was disapproved by any other Federal agency.

"(v) The Bank shall utilize a part of the amount set aside pursuant to subparagraph (iv) to provide lines of credit or guarantees to consortia of small or medium size banks, export trading companies, State export finance agencies, export financing cooperatives, small business investment companies as defined in section 103 of the Small Busniess Investment act of 1958, or other financing institutions or entities in order to finance small business exports. Financing under this subparagraph shall be made available only where the consortia or the participating institutions agree to undertake processing, servicing, and credit evaluation functions in connection with such financing. To the maximum extent practicable the Bank shall delegate to the consortia the authority to approve financing under this subparagraph. In the administration of the program under this subparagraph, the Bank shall provide appropriate technical assistance to participating consortia and may require such consortia periodically to furnish information to the Bank regarding the number and amount of loans made and the credit worthiness of the borrowers.

"(vi) In order to assure that the policy stated in subparagraph (i) is carried out, the Bank shall promote small business exports and its small business export financing pro-

grams in cooperation with the Secretary of Commerce, the Office of International Trade of the Small Business Administratioin, and the private sector, particularly small business organizations, State agencies, chambers of commerce, banking organizations, export management companies, export trading companies, and private industry.".

(b) The first sentence of section 9(b) of such Act is amended by inserting "and of the activities of the member of the Board appointed to represent the interests of small business" before the period.

(c) Section 9 of such Act is amended by adding at the end thereof the following:

"(c) The Bank shall include in its annual report to the Congress a report on the allocation of the sums set aside for small business exports pursuant to section 2(b)(1)(E). Such report shall specify the total number and dollar volume of loans made from the sums set aside, the number and dollar volume of loans made through the consortia program under subparagraph (v) of such section, the amount of guarantees and insurance provided for small business exports, the number of recipients of financing from the sums set aside who have not previously participated in the Bank's programs, the number of commitments entered into in amounts less than $500,000, and any recommendations for increasing the participation of banks and other institutions in the programs authorized under section 2(b)(1)(E). For the purpose of this subsection, the Bank's report shall also be referred to the Committees on Small Business.".

PROHIBITION OF IMPORTS SUPPORTED BY EXPORT CREDITS INCONSISTENT WITH THE OECD ARRANGEMENT ON EXPORT CREDITS

SEC. 110. (a) Unless an inquiry has been commenced under section 1912 of the Export-Import Bank Act Amendments of 1978, any interested party as defined in section 771 of the Tariff Act, as amended, may request the Secretary of Commerce (hereinafter referred to as the "Secretary") to review the terms and conditions of foreign official export credits provided directly or indirectly by any foreign government or foreign official export credit agency to support exports of any product or service to the United States.

(b) Upon receipt of a written request referred to in subsection (a), the Secretary shall simultaneously refer the request to the International Trade Commission for a determination of material injury and shall review the terms and conditions under which the product or service in question has received, or is likely to receive, foreign official export credits and, not later than forty days after the date on which the request was filed, shall determine whether the export credits are inconsistent with the terms and conditions, including the interest rate provisions, of the Arrangement on Guidelines for Officially Supported Export Credits of the Organization for Economic Cooperation and Development (hereinafter referred to as the "OECD Arrangement").

(c) If the Secretary determines that the foreign official export credits with regard to which a request for review has been made—

(1) are at rates below those that the foreign government or agency concerned has to pay or would have to pay for the funds so employed, or involve the assumption by the government or agency concerned of all or part of the costs incurred by exporters or financial institutions in obtaining credits; and

(2) are inconsistent with the terms and conditions of the OECD Arrangement;

he shall publish his findings in the Federal Register and, following an affirmative preliminary determination of material injury by the International Trade Commission by the forty-fifth day after referral of the request under subsection (b) of this section, shall immediately direct the Commissioner of Customs to prohibit the entry into the United States of the product or service benefiting from, or likely to benefit from, such export credits. By the ninetieth day following the preliminary determination by the International Trade Commission, the Commission shall make a final determination of material injury. If the determination is affirmative, the Commissioner shall assess a duty on the goods equal to the amount of the subsidy determined by the Secretary under subsection (c)(1) of this section. If the determination is negative, the Secretary shall direct the Commissioner to remove the prohibition on the entry of goods or services into the United States.

(d) If, after action has been taken pursuant to subsection (c) prohibiting the entry of any product or products into the United States, the Contracting Parties to the General Agreement on Tariffs and Trade disapprove such action, the Secretary may direct the Commissioner of Customs to revoke such action.

SPECIAL FACILITIES IN SUPPORT OF UNITED STATES EXPORTS TO BRAZIL AND MEXICO

SEC. 111. (a) The Export-Import Bank of the United States is authorized to establish facilities not to exceed eighteen months duration consisting of guarantees and insurance in support of export transactions to Brazil and Mexico in the aggregate amount of $1,500,000,000 and $500,000,000 respectively.

(b) Section 2(b)(3) of the Export-Import Bank Act of 1945 is amended by inserting after "no loan or financial guarantee" in the first sentence "or general guarantee or insurance facility".

(c) Section 2(b)(3)(A) of the Export-Import Bank Act of 1945 is amended to read as follows:

"(A) in the case of a loan or financial guarantee a brief description of the purposes of the transaction, the identity of the party or parties requesting the loan or financial guarantee, the nature of the goods or services to oe exported, and the use for which the goods or services are to be exported, and in the case of a general guarantee or insurance facility, a description of the nature and purpose of the facility, the total amount of guarantees or insurance, the reasons for the facility, and its methods of operation; and".

TECHNICAL AMENDMENTS

SEC. 112. (a) Section 2(b)(1)(B) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(1)(B)) is amended by striking out "businessmen" and inserting in lieu thereof "business concerns".

(b) Section 2(b)(4) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(4)) is amended by striking out "he" wherever it appears and inserting in lieu thereof "the Secretary".

(c) Section 3(e) of the Export-Import Bank Act of 1945 (12 U.S.C. 635a(e)) is amended by inserting after "his", "or her" and by inserting after "he", "or she".

(d) Section 4 of the Export-Import Bank Act of 1945 (12 U.S.C. 635b) is amended by striking out "he" and inserting in lieu thereof "the President".

(e) Section 7(b) of the Export-Import Bank Act of 1945 (12 U.S.C. 635e(b)) is amended by striking out "he" wherever it appears and inserting in lieu thereof "the President".

(f) Section 1912(a)(2) of the Export-Import Bank Act Amendments of 1978 (12 U.S.C. 635a-3(a)(2)) is amended by striking out "he" and inserting in lieu thereof "the Secretary".

(g) Section 1912(b) of the Export-Import Bank Act Amendments of 1978 (12 U.S.C. 635a-3(b)) is amended by striking out "he" and inserting in lieu thereof "the Secretary".

TITLE II—MIXED CREDIT EXPORT SUBSIDIES

SHORT TITLE

SEC. 201. This title may be referred to as the "Trade and Development Enhancement Act of 1983".

STATEMENT OF PURPOSE

SEC. 202. The purposes of this title are—

(1) to expand employment and economic growth in the United States by expanding United States exports to the markets of the developing world;

(2) to stimulate the economic development of countries in the developing world by improving their access to credit for the importation of United States products and services for developmental purposes;

(3) to neutralize the predatory financing engaged in by many nations whose exports compete with United States exports, and thereby restore export competition to a market basis; and

(4) to encourage foreign governments to enter into effective and comprehensive agreements with the United States to end the use of government-mixed credits for exports, and to limit and govern the use of export credit subsidies generally.

NEGOTIATING MANDATE

SEC. 203. The President shall pursue vigorously negotiations to limit and set rules for the mixed financing for exports. The negotiating objectives ot the United States should include reaching agreements—

(1) to define the various forms of mixed financing, particularly mixed credits under the OECD Arrangement;

(2) to phase out the use of government-mixed credits by a date certain;

(3) to set rules governing the use of public-private cofinancing, or other forms of mixed financing, which may have the same result as government-mixed credits of drawing on concessional development assistance to produce subsidized export financing;

(4) to raise the threshold for notification of the use of mixed financing to a 50 per centum level of concessionality;

(5) to improve notification procedures so that advance notification must be given on all uses of mixed financing, including forms not restricted; and

(6) to prohibit the use of mixed financing for production facilities for goods which are in structural oversupply in the world.

ESTABLISHMENT OF A MIXED FINANCING PROGRAM IN THE UNITED STATES EXPORT-IMPORT BANK

SEC. 204. (a) The Chairman of the Export-Import Bank of the United States shall establish, within the Export-Import Bank, a program of mixed financing for United States exports. The program shall be carried out in cooperation with the Agency for International Development and with private financial institutions or entities, as appropriate. The program may include—

(1) the combined use of the credits, loans, or guarantees offered by the Export-import Bank with concessional financing or grants offered by the Agency for International Development, by methods including, but not limited to, the blending of the financing of, or parrallel financing by, the Export-Import Bank and the Agency for International Development; and

(2) the combined use of credits, loans, or guarantees offered by the Export-Import Bank, with financing offered by private financial institutions or entities, by methods including, but not limited to, the blending of the financing of, or parallel financing by, the Export-Import Bank and private institutions or entities.

(b) The purpose of the mixed financing program under this section shall be to offer or arrange for financing for the export of United States goods and services that is substantially as concessional as financing for which there is reasonable proof that a foreign government is offering to, or arranging for, a bona fide foreign competitor for a United States export sale.

(c) United States exports eligible for concessional mixed financing shall be exports offered at what can reasonably be judged to be the lowest evaluated bid, without respect to the terms of export financing.

(d) The Chairman of the Export-Import Bank is authorized to establish a fund, as necessary, for carrying out the mixed financing program described in this section.

(e) Concessional financing or grants offered by the Agency for International development for the purposes of the mixed financing program established under the section shall be made available in accordance with the provisions of subsections (c), (d), and (e) of section 205 of this Act.

ESTABLISHMENT OF A MIXED FINANCING PROGRAM IN THE AGENCY FOR INTERNATIONAL DEVELOPMENT

SEC. 205. (a) The Administrator of the Agency for International Development shall establish within the Agency a program of mixed financing for United States exports. The program shall be carried out in cooperation with the Export-Import Bank and with private financial institutions or entities, as appropriate. The program may include—

(1) the combined use of the credits, loans, or guarantees offered by the Export-Import Bank with concessional financing or grants offered by the Agency for International Development, by methods including, but not limited to, the blending of the financing of, or parallel financing by, the Export-Import Bank and the Agency for International Development; and

(2) the combination of concessional financing or grants offered by the Agency for International Development with financing offered by private financial institutions or entities, by methods including, but not limited to, the blending of the financing of, or parallel financing by, the Agency for International Development and private institutions or entities.

(b) These funds may be combined with Export-Import Bank financing or private commercial financing in order to offer, or arrange for, financing for the exportation of United States goods and services that is substantially as concessional as financing for which there is reasonable proof that a foreign government is offering to, or arranging for, a bona fide foreign competitor for a United States export sale.

(c) United States exports eligible for concessional mixed financing shall be exports offered at what can reasonably be judged to be the lowest evaluated bid, without respect to the terms of export financing.

(d) Funds of the Agency for International Development which are used to carry out a mixed financing program authorized by subsections (a), (b), and (c) shall be offered for financing only United States exports that can reasonably be expected to contributed to the advancement of the development objectives of the importing country or countries, and shall be consistent with the economic, security and political criteria used to establish country allocations of Economic Support Funds. The Administrator of the Agency for International Development is authorized to establish a fund, as necessary, for carrying out a mixed credit financing program as described in this section.

(e) The Administator of the Agency for International Development may draw on Economic Support Funds allocated for Commodity Import Programs to finance a mixed financing activity.

APPOINTMENT OF A MIXED FINANCING COORDINATOR

SEC. 206. The President is authorized to appoint an individual to coordinate and ensure the implementation of the mixed financing programs authorized by sections 204 and 205. The individual appointed by the President for this purpose shall develop procedures and mechanisms as necessary to assure that any offer of mixed financing for eligible United States exports is timely and permits the United States exporter to respond to the timing demands of the competitive situation.

AUTHORIZATION OF APPROPRIATIONS

SEC. 207. There are authorized to be appropriated such sums as may be necessary to carry out this title for fiscal years 1984 and 1985.

DEFINITIONS

SEC. 208. As used in this title—

(1) the term "mixed financing" means the various combinations of official development assistance, official export credit, an private commercial capital to finance erports;

(2) the term "government-mixed credits" means the combined use of credits, insurance, and guarantees offered by the Export-Import Bank with concessional financing or grants offered by the Agency for International Development to finance exports;

(3) the term "public-private cofinancing" means the combined use of either official development assistance or official export credit with private commercial credit to finance exports;

(4) the term "blending of financings" means the use of various combinations of official development assistance, official export credit, and private commercial credit, integrated into a single package with a single set of financial terms, to finance exports; and

(5) the term "parallel financing" means the related use of various combinations of separate lines of official development assistance, official export credits, and private commercial credit, not combined into a single package with a single set of financial terms, to finance exports.

TITLE III—AMENDMENTS TO THE EXPORT TRADING COMPANY ACT OF 1982

SEC. 301. Section 206 of the Export Trading Company Act of 1982 (Public Law 97-290) is amended—

(1) by striking out "or" after "export accounts receivable" and inserting in lieu thereof a comma; and

(2) by inserting after "exportable goods," the following: "accounts receivable from leases, performance contracts, grant commitments, participation fees, member dues, revenue from publications, or such other collateral as the Board of Directors may deem appropriate,".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank Senators on both sides for an excellent job of managing a difficult bill.

DEPARTMENT OF STATE AUTHORIZATIONS

Mr. BAKER. Mr. President, what is the business now before the Senate?

The PRESIDING OFFICER. The question occurs on S. 1342, which will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1342) to authorize appropriations for the fiscal years 1984 and 1985 for the Department of State, the United States Information Agency, and the Board for International Broadcasting, and for other purposes.

The Senate proceeded to continue with consideration of the bill.

Mr. BAKER. Mr. President, I hope we can finish this bill promptly. While I try to gather up the managers on this side, I am about to suggest the absence of a quorum, which will not last for more than a minute or so; and then I will try to have a further announcement about how long we will be in today and the schedule for Monday.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

WAR POWERS RESOLUTION

Mr. INOUYE. Mr. President, I speak this day because I am deeply distressed by the errant course being followed in the discussions and deliberations on the War Powers Act.

Last night, late in the evening, as I sat reading the newspapers of yesterday, I thought, "My God, what are we talking about? This is not an issue of sidestepping a constitutional confrontation. This is not a popular, political drama designed to entertain and enthrall the audiences of correspondents and commentators. This is war—not total, not absolute, not final, but it is war."

And how do we speak of it? We treat the profound as trivial. We debase our institutions and our political heritage

and say that this is no more than a test of constitutional resolve—merely another skirmish in the continuing struggle between the legislative and executive branches of Government. But, in truth, it is not a scholar's question to be answered by delving into texts of political science or constitutional law. It is a question to be resolved only when we—when all of us—muster the courage to acknowledge and act upon the fundamental postulate of our Government—that this is a nation under the rule of law. Ours is a nation which sends its young into battle, not on the capricious acts of individuals, but with collective judgment of the people—expressed through their Representatives—that the goals of engagement are worthy of the sacrifice we ask of our young.

It is no easy thing to send men into combat, and it should not be easily arrived at. That is the essence of the War Powers Act.

Mr. President, On September 25, 1982, when, by agreement with Lebanon, U.S. marines joined the multinational force, they were peacekeepers. Today, those who were peacekeepers are, by presidential directive, actively engaged in hostilities in support of the Gemayel government. Our ships and our artillery fire not only in self defense but also in support of combat maneuvers of the Lebanese Army. The peace has been broken—our young have again fallen in foreign fields.

Must we accept a level of sophistry which corrupts public discourse in this country to the extent that it becomes permissible to say—at the very moment our men are under hostile fire—that U.S. Armed Forces have not been introduced into hostilities? I refuse, I will not accept that profanity. Our men are engaged in hostilities, their lives are at stake; we should not dishonor our country and being shame on ourselves by denying their courage and their sacrifice.

And what do we make of this so-called compromise, Mr. President? Must we accept as a compromise a proposal which betrays a self-serving cynicism? Have the President's advisers looked to the election calendar and determined that 18 months from now is well past the elections of November 1984? Have they determined that the American people are not to speak on the issue of war?

I do not know the answers to these questions, but I do know that 18 months is a long time. Let those who think the 18-month time limit is inconsequential contemplate the fact that only 11 months passed from the Normandy invasions on June 6, 1944, to the unconditional surrender of the Third Reich on May 7, 1945, an 11-month period during which, in the European theater alone, 135,576 Americans were killed in action and 451,052 were wounded.

World War I should also be remembered. From the time Congress declared war on April 6, 1917, to the capitulation of the German high command on November 11, 1918, 19 months passed, and 116,516 Americans lost their lives in combat.

Unfair illustrations of my point? Perhaps. These were, after all, world wars. But what about the Spanish-American War? It cost 2,446 American lives. It was called by Secretary of State John Hay, "a splendid little war."

Eighteen months is too long.

In 18 months, with the freedom to take any measure he alone deems necessary, and with no prospect of congressional restraint, the President could involve America in a tragic conflict in the Middle East. And so, I believe the war powers resolution rightly has as its purpose "to fulfill the intent of the framers of the Constitution of the United States and insure that the collective judgment of both the Congress and the President will apply to the introduction of U.S. Armed Forces into hostilities, or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, and to the continued use of such forces in hostilities or in such situations."

Those who would dismiss the War Powers Act as a mere constitutional confrontation—who declare that our forces are not involved in hostilities—mock those wise and honorable men who authored our Nation's Constitution. The war powers resolution confirms the intent of the authors of the Constitution. The Congress has a constitutional role both in the introduction of American Armed Forces into hostilities and in the determination to continue the use of such forces.

Mr. President, this so-called compromise is wrong. I will have no part of it. The law stands. The President has as his first responsibility to "take care that the laws be faithfully executed." It is time that he did so and time that he obeyed the law which is the War Powers Act.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. INOUYE. I yield.

Mr. BYRD. Mr. President, I compliment the Senator. He is one of the Senators here who when he speaks other Senators listen.

Mr. INOUYE. I thank the minority leader very much and I appreciate the kind words of my colleague.

Mr. SYMMS. Mr. President, I ask unanimous consent to proceed as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SECRETARY WATT: AMERICA CANNOT AFFORD TO FORGET HIS GOOD STEWARDSHIP NOR LOSE THOSE POLICIES

Mr. SYMMS. Mr. President, one of the generally accepted burdens of public office is being held accountable for each and every word spoken. The higher the office, the greater the public scrutiny. In the hundreds of public speeches and tens of thousands of words spoken, we sometimes make mistakes. When we "mispeak" here on the Senate floor, we are allowed to amend our remarks—to correct the record so that it reads the way that we meant to say it.

Earlier this week, Interior Secretary James Watt made a mistake in a speech here in Washington. He knew instantly that he had used a reference that has become unacceptable, and is unacceptable, that a brief utterance would cause pain to some people and would embarrass the administration. The Secretary immediately apologized to the people—those of the Coal Commission—who might have been offended. He issued a statement to the press apologizing and he sent a letter to the President apologizing.

Despite the public perception of Jim Watt as a man with a tough hide, I know him personally and know that this is an extremely sensitive gentleman who cares deeply about people—all people—and I know that he has suffered greatly these last few days not because of the criticism in the media but because of the knowledge in his own mind that his insensitive statement did in fact cause some unnecessary distress to some people and to those of us who have supported him because of his outstanding leadership in the stewardship of America's natural resources.

Let us not forget that Jim Watt is a man who understands the West and who has implemented policies and programs that are good for the West.

During these past 23 months the Secretary has restored confidence in the Department of the Interior in the management of the Federal lands in the West, and indeed, across the entire Nation. He has instituted programs to restore our parks and refuges; he has implemented programs to develop our energy resources to protect America now and in the future; he has followed a good neighbor policy of working with States and local groups so that resources are managed wisely rather than as someone along the banks of the Potomac believes they should be managed.

In short, his stewardship has been good for the environment, good for the creation of jobs and for the economy in general, good for our national security and good for future generations of Americans.

Because he does care so deeply about the West, about our natural resources, and about people, he has spoken out on behalf of these programs. He is not one of the political types who seeks to be all things to all people. Because he does speak out, he has become highly visible and a favorite target of those who would like to reinstitute some of those failed policies of the past.

Mr. President, at the time the Secretary made his unfortunate comment, he was deeply disturbed by actions taken in Congress which would undermine America's future. In trying to express his concern about the actions, he had a momentary lapse.

The Secretary is deeply and genuinely sorry about this incident. He should be. He has apologized to those who might be offended, to the President, and to all of us.

We cannot and should not ignore this. It is a reminder to all of us that we must be sensitive so that we do not inadvertently make remarks that can be harmful or easily misunderstood.

Much of the criticism leveled at Interior Secretary Watt's remarks is warranted. The remarks were ill-advised, indefensible, and though intended to be humorous, were of the kind of humor that is so often misinterpreted, and ruffles sensitivities of those who pay the price of discrimination, and want merely to be identified for their capabilities, not their physical or religious traits.

All of us in the public eye must learn one way or another, of those justified sensitivities. Most of us—no, all of us—in this body have learned the hard way that what we say publicly, and even privately, however intended, is collectively reviewed, and construed by the public through that collective eye. What was meant by the unassuming comment is often smothered by what was thought we meant.

However ill-advised, the remarks of Secretary Watt must be placed in their context. When the Soviet Union shot down an unarmed civilian jetliner filled with innocent and completely defenseless human beings, the world demanded a full apology and reparations which I am convinced it will never receive. One cannot compare this distardly transgression with the remarks of one cabinet official, although you would not know it from the clamor of the Washington media, but I want to share with this body Secretary Watt's reflections and deep apology that he offered to President Reagan.

Mr. President, I will just read the letter because I think it is important, as we reflect and try to put this in perspective.

THE SECRETARY OF THE INTERIOR,
Washington, September 22, 1983.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Upon reflection, I realize that I owe a personal apology to you for my unfortunate remarks yesterday about the coal leasing commission.

Those remarks were well intentioned and were not meant to insult or cast a slur upon any groups or individuals within our society. Indeed, they were part of a speech in which I was extolling the very high qualifications of those citizens who had agreed to serve on the commission.

But I realize now how easily my statement could be interpreted as morally offensive. I deeply regret that not only because it expresses a sentiment that is entirely wrong in this nation but is also extraordinarily unfair to you, Mr. President. I deeply believe that you are providing moral leadership to this nation and that your policies are designed to lift the scourge of discrimination from our midst. I share your aspirations and goals, and as you know, have tried very hard to put them into practice in the position in which I am privileged to serve.

I have made a mistake, Mr. President, and I ask the forgiveness of those on the commission as well as you.

With best regards,

JAMES G. WATT.

Mr. President, I think that now is the time for us to put this into perspective. I hope that at least if Secretary Watt, the personality, does not remain in his present post that at least we Americans do not forget his good stewardship or lose sight of those policies which I think are important not only for the stewardship of our lands but are important for the stewardship of our national security in terms of energy development and mineral development and the preservation of our beautiful parks, of which he has done such a good job to preserve and take care of.

Mr. BYRD. Will the Senator yield?

Mr. SYMMS. I yield.

Mr. BYRD. Mr. President, I would say that if Mr. Watt continues as Secretary and he keeps on making his speeches, we can be assured that the Senate will be under Democratic control after next year's election.

Mr. BAKER. Mr. President, I came back just in the nick of time. I was told that the minority leader, who wishes to change his status, had a screwdriver and was trying to remove my desk from the floor. [Laughter.]

I can assure him there will be no such thing beginning in 1985.

But, be that as it may, I observe now that the managers of this bill are here and, after I hear a rejoinder, perhaps even a retort, from the minority leader, I would urge them to get on with the business of trying to pass the State authorization bill.

Mr. BYRD. Mr. President, the words I have already spoken will be in the RECORD for a long time to come, and there is no need for me to embellish upon them.

DEPARTMENT OF STATE AUTHORIZATIONS

The Senate resumed consideration of the bill.

Mr. BAKER. Mr. President, I hope we re prepared to go forward with the State authorizations bill. I see that the managers are here.

Let me say, Mr. President, that there are a list of some eight or nine amendments to be offered to this bill. Senators should not be under the impression that we can wait until Monday, because there is not going to be a Monday. We are going to be on the war powers resolution on Monday, Tuesday, and maybe Wednesday.

I want to try to finish this bill today if possible. I am perfectly willing for the Senate to do so by voice vote on the several amendments, if that is possible, but I urge Senators who have amendments to come to the floor and offer them.

Mr. President, I have no request on this side for a rollcall vote on final passage, so if we can get that far maybe we can do that by voice vote, also.

The PRESIDING OFFICER. Who desires recognition?

Mr. MATHIAS. Does the manager have an opening statement?

Mrs. KASSEBAUM. I do not. Certainly, if the Senator from Maryland is ready to go with an amendment—the Senator from Rhode Island also has an amendment—he may do so.

AMENDMENT NO. 2219

(Purpose: To increase funding for U.S. participation in the North Atlantic Assembly)

Mr. MATHIAS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Maryland (Mr. MATHIAS) proposes an amendment numbered 2219.

Mr. MATHIAS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, after line 19, insert the following new section:

SEC. 122. Section 5 of the joint resolution entitled "Joint Resolution to authorize participation by the United States in parliamentary conferences of the North Atlantic Treaty Organization," approved July 11, 1956 (22 U.S.C. 1928e), is amended by inserting immediately after the first sentence the following: "In addition to the amounts authorized by section 2, there is authorized to be appropriated $450,000 for fiscal year 1984 to meet the expenses incurred by the United States group in hosting the thirty-first annual meeting of the North Atlantic Assembly."

Mr. MATHIAS. Mr. President, this amendment is a simple addition to the authorization. It contemplates the fact that the United States will be the site of the North Atlantic Assembly meeting in the autumn of 1985.

The North Atlantic Assembly, as all Senators know, is the body within the NATO treaty organization in which members of the national parliaments have a chance to come together and discuss problems of the treaty, problems of the NATO area, for their respective legislative branches of Government.

The United States delegations have been hosted, have been entertained, at spring and fall meetings in Canada and Europe every year since it was founded; 1985 will be the first time in a number of years that the United States will have an opportunity to receive our colleagues from the NATO nations' parliaments.

The contemplated expense would not exceed $450,000, which would be authorized by this amendment. I would hope that the managers of the bill would be agreeable to adopting the amendment.

Mrs. KASSEBAUM. Yes, Mr. President. This has been cleared on both sides. I move that it be adopted.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 2219) was agreed to.

Mr. MATHIAS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mrs. KASSEBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, at this point the Senator from Rhode Island (Mr. PELL) has amendments to offer.

The PRESIDING OFFICER. The Senator from Rhode Island.

AMENDMENT NO. 2220

(Purpose: To assist other countries in the protection of endangered species and to enhance international understanding and knowledge of environmental issues)

Mr. PELL. Mr. President, I have three noncontroversial amendments which have been agreed by both sides.

Mr. President, I send my first amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Rhode Island (Mr. PELL), for himself, Mr. PERCY, Mr. CHAFEE, and the Mr. GLENN, proposes an amendment numbered 2220.

Mr. PELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new title:

"TITLE VII—INTERNATIONAL ENVIRONMENTAL PROTECTION"

SEC. 701. This title may be cited as the "International Environment Protection Act of 1983".

ENDANGERED SPECIES

SEC. 702. The Foreign Assistance Act of 1961, as amended, is amended further by adding the following new section:

"SEC. 119. ENDANGERED SPECIES.—(a) The Congress finds the survival of many animal and plant species is endangered by overhunting, by the presence of toxi chemicals in water, air and soil, and by the destruction of habitats. The Congress further finds that the extinction of animal and plant species is an irreparable loss with potentially serious environmental and economic consequences for developing and developed countries alike. Accordingly, the preservation of animal and plant species through the regulation of the hunting and trade in endangered species, through limitations on the pollution of natural ecosystems, and through the protection of wildlife habitats should be an important objective of the United States development assistance.

"(b) In order to preserve biological diversity, the President is authorized to furnish assistance under this part to assist countries in protecting and maintaining wildlife habitats and in developing sound wildlife management and plant conservation programs. Special efforts should be made to establish and maintain wildlife sanctuaries, reserves, and parks; to enact and enforce anti poaching measures; and to identify, study, and catalog animal and plant species, especially in tropical environments.

"(c) The Administrator of the Agency for International Development, in conjunction with the Secretary of State, the Secretary of the Interior, the Administrator of the Environmental Protection Agency, the Chairman of the Council on Environmental Quality, and the heads of other appropriate Government agencies, shall develop a United States strategy, including specific policies and programs, to protect and conserve biological diversity in developing countries.

"(d) Each annual report required by section 634(a) of this Act shall include, in a separate volume, a report on the implementation of this subsection. Not later than one year after the date of enactment of this section, the President shall submit a comprehensive report to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate on the United States strategy to protect and conserve biological diversity in developing countries.".

ENVIRONMENTAL EXCHANGES

SEC. 703. Section 102 of the Mutual Educational and Cultural Exchange Act of 1961, as amended, is further amended by striking the final ".", inserting in lieu thereof a ";" and adding the following:

"(11) interchanges and visits between the United States and other countries of scientists, scholars, leaders, and other experts in the fields of environmental science and environmental management."

SEC. 704. Of the amount by which expenditures for the Fullbright Academic Exchange Programs, for the Humphrey Fellowship Program, and the International Visitor Program for fiscal year 1984 and for fiscal year 1985 exceeds the expenditures for these programs in fiscal year 1982, five per centum shall be used to finance programs carried out pursuant to section 3 of this Act.

Mr. PELL. Mr. President, the amendment I am offering would add a new title, title VII: The International Environment Protection Act, to this bill. The provisions are virtually identical to those of S. 1067, cosponsored by Senator PERCY, Senator CHAFEE, Senator GLENN, and myself.

The bill has two provisions. The first provides an authority to the Agency for International Development to set up programs to assist countries in the protection of endangered species. The second provision creates an authority, within the Fulbright-Hays Act, for exchange programs in the international environmental area. The latter provision is already part of this bill.

Both provisions of this proposed new title have been adopted by the Senate Foreign Relations Committee. In addition the House Foreign Affairs Committee has approved language almost identical to section 702 on endangered species.

The provisions of this title are supported by the administration and a range of environmental and wildlife groups.

Approval of this amendment will expedite passage of the substance of S. 1067.

Mr. President, I believe this amendment is noncontroversial and will be agreed to by the manager.

Mrs. KASSEBAUM. Yes, it is agreeable.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2220) was agreed to.

AMENDMENT NO. 2221

(Purpose: To amend section 103, Public Law 97-241, to allow the Department of State to open U.S. consulates)

Mr. PELL. Mr. President, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Rhode Island (Mr. PELL) proposes an amendment numbered 2221.

Mr. PELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, after line 19, insert the following new section:

U.S. CONSULATES

SEC. 122. Section 103 of the Department of State Authorization Act, Fiscal Years 1982 and 1983 (Public Law 97-241) is amended by

adding the following language at the end of subsection (b):

", to the extent authorized to do so by each foreign government involved. A report shall be made to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives concerning the extent to which such foreign government authorization has been received, and the progress achieved with respect to the reopening of consulates in those respective countries."

Mr. PELL. Mr. President, this amendment will correct a technical deficiency in the provisions of Public Law 97-241 relating to the reopening of certain consulates. The language of the act precluded the opening of any new consulates until the administration reopened seven consulates which had been closed by the Carter administration.

The administration has reopened or in the process of reopening six of the consulates. In the case of the seventh, Mandalay, the Burmese Government has denied permission for the reopening. My amendment would allow new consulates to be opened in spite of the failure to reopen Mandalay. Should the Burmese Government grant premission to reopen Mandalay, then the provisions of Public Law 97-241 would apply and Mandalay would have to be reopened.

This amendment is at the request of the administration. I understand it is acceptable to the majority.

Mrs. KASSEBAUM. Yes, it is.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 2221) was agreed to.

AMENDMENT NO. 2222

(Purpose: To clarify the Secretary of State's authority with respect to danger pay)

Mr. PELL. Mr. President, I send an unprinted amendment to the desk and ask for its immediate considereation.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Rhode Island (Mr. PELL) proposes an amendment numbered 2222.

Mr. PELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following new section:

"SEC. . Section 5928 of title 5, United States Code, is amended by adding at the end thereof the following: "The presence of nonessential personnel or dependents shall not preclude payment of an allowance under this section. In each instance where an allowance under this section is initiated or terminated, the Secretary of State shall inform the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate of the action taken and the circumstances justifying it.".

Mr. PELL. The Foreign Service Act of 1980 authorizes the Secretary of State to grant a danger pay allowance to employees in foreign areas "on the basis of civil insurrection, civil war, terrorism, or wartime conditions which threaten physical harm or imminent danger" to their health or well-being.

Since enactment of this law, a question has arisen as to whether danger pay can be granted absent the formal evacuation of dependents and/or nonessential personnel from a post.

Although the act is silent on this issue, recent events such as the tragic bombing of the American Embassy in Beirut last April suggest that there are circumstances which warrant the payment of danger pay even when dependents and nonessential personnel are at a post.

Beirut and San Salvador, for example, are posts which are functioning in the midst of civil war. Clearly, conditions at these posts justify the granting of danger pay.

Because the level of violence at these posts fluctuates and sometimes suddenly, families and nonessential personnel are likely to be at the post when the danger factor is or becomes high. Under these circumstances, when the threat to life and limb is obvious, it is unfair not to grant danger pay simply because families and/or nonessential personnel are present.

Undoubtedly some would argue that families ought to be evacuated from the post when the danger factor is high. In my view, we must recognize that evacuation may not be desirable at posts such as Beirut and San Salvador.

The presence of families and nonessential personnel boosts morale and increases the efficiency of the posts. Moreover, the Secretary of State may choose not to evacuate posts such as these for foreign policy reasons.

Individuals who enter the Foreign Service recognize that they are undertaking not only a job but also a way of life which will require them to serve at times in dangerous areas. Danger pay is a way of rewarding them for their willingness to undertake these kind of assignments. When the danger exists, the allowance should be granted regardless of the presence of families or nonessential personnel at the post.

The amendment that I am offering clarifies the authority of the Secretary of State to grant a danger pay allowance when dependents and/or nonessential personnel are at a post. In order to insure that the allowance is being paid in circumstances which are consistent with congressional intentions, the amendment also requires the Secretary to report to Congress on the use of the danger pay authority.

This amendment is supported by the Foreign Service and its representative, the American Foreign Service Association. I urge its adoption.

● Mr. ZORINSKY. Mr. President, for some time I have been concerned with the statutory allowance authorities provided to the Foreign Service and with the relationship of the various allowances to each other. I am concerned that there may be double payments involved for the same circumstances and that there may be some inconsistencies in the way the Department of State is applying those authorities.

The other body in its version of this legislation has adopted an amendment which would allow the new allowances for dangerous circumstances to be paid more broadly than is now the case. As I noted during hearings on this bill, I believe this idea may be an effort to have it both ways. That amendment would allow danger pay to be paid even when dependents and other nonessential personnel remain at post. I wonder whether it is not inconsistent for it to be asserted on one hand that it is so dangerous that danger pay is warranted and at the same time to say that it is not dangerous enough to require dependents to be evacuated.

My initial inclination was to offer statutory language at this time which would deal with this inconsistency and with the question of whether danger pay should be allowed only when the executive branch has certified under paragraph 21(c) of the Foreign Military Sales Act that a state of hostilities exists. However, I agree that this is a complicated issue and not one which could be dealt with easily at this time. Therefore, if I can receive the assurances of the chairman of the Foreign Relations Committee that a thorough review will be conducted of the Foreign Service allowances structure at an appropriate time, I would be willing to defer proposing an amendment on this point.

Mr. PERCY. Mr. President, I thank my able colleague from Nebraska for raising a useful point about the desirability of reviewing Foreign Service allowances, but I agree with him that it would be better to conduct such a review within the Foreign Relations Committee prior to recommending legislative action to the Senate.

I have been in contact with the Department of State and I am assured by them that they are fully prepared to cooperate with the committee in conducting this review. I have recently introduced by request of the administration S. 1136, which contains a number of amendments to the Foreign Service Act. It seems to me that consideration of this proposed legislation, most probably during the next session of Congress, would provide an appropriate vehicle. I thank the Senator for rais-

ing this point and I appreciate his willingness to defer dealing with this complicated issue until a more appropriate time.●

Mrs. KASSEBAUM. Mr. President, this amendment is acceptable. I would say that I have shared some of the same reservations that the Senator from Nebraska, Senator ZORINSKY, has expressed regarding this. I am pleased that it is agreeable and that there will be a thorough study made of the issue. That is my understanding.

Mr. PELL. Mr. President, my understanding is that the amendment calls for danger pay to be accorded but the colloquy between Senators PERCY and ZORINSKY indicates that a study will be made.

I hope the amendment would be accepted.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2222) was agreed to.

Mr. PELL. Mr. President, I ask that the vote by which the three preceding amendments were agreed to be reconsidered en bloc.

Mrs. KASSEBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2223

(Purpose: To augment funding for U.S. participation in Tsukuba, Japan Exposition 1985)

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an amendment numbered 2223.

On page 25, line 4, strike "$636,000,000 for fiscal year 1984" and insert in lieu thereof "$644,000,000 for fiscal year 1984".

On page 32, line 8, insert:

"SEC. 210. In addition to the amount already authorized for Tsukuba, Japan Exposition 1985, $8,000,000 shall be available for the United States Information Agency for the fiscal year 1984 for use in connection with Exposition. These funds shall remain available until appropriations are made, and when the funds are appropriated they are authorized to remain available until expended.".

Mr. STEVENS. Mr. President, if the United States is to participate in a meaningful way at the Tsukuba Exposition in Japan in 1985, it is essential that we provide adequate funding for our presense to be productive and effective. Presently, the funding authorized to the U.S. Information Agency is inadequate to realize this goal. In order to correct this unfortunate situation, I offer this amendment to increase the funding for the U.S. participation in the exposition by $8,000,000.

Mr. President, this exposition is quite important for those of us who live around the Pacific rim and our participation is desirable. I do hope the amendment will be accepted.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, the amendment of the Senator from Alaska is acceptable to the committee.

Mr. PELL. Mr. President, I should like to delay for 1 minute, because we want to check this point out. It is acceptable to me personally, but I have to look after the rights of another Senator.

Mr. STEVENS. Mr. President, I am agreeable with that. I understand another Senator did have an amendment to reduce the overall funding to the agency. I have not been advised of any specific opposition to this amendment. I ask unanimous consent that my amendment be temporarily set aside in order that the Senator from Idaho may proceed and that we bring it back after that.

The PRESIDING OFFICER. Without objection, the amendment of the Senator is set aside.

(Later the following occurred:)

Mr. STEVENS. Mr President, I am informed that there is no objection now to my amendment. I would pursue my amendment and seek comment from my good friend from Rhode Island in view of the message we have just received.

Mr. PELL. There is no objection on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 2223) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I thank the Senator from Rhode Island. I think he acted very properly in making certain that there was no objection. I admire his tenacity in dealing with this matter. I am glad it has now been resolved.

AMENDMENT NO. 2224

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. MCCLURE) proposes an amendment numbered 2224.

At the end of the bill add the following new sections:

1. (a) The Congress finds that since the SALT II Treaty was signed in 1979 the U.S. is deactivating 292 ICBM's, SLBM's and B-52 bombers all of which are counted in the SALT II Data Exchange; the U.S. has cancelled deployment of stockpiled Minuteman III MIRV'd ICBM's; the U.S. has modified B-52 bombers equipped to carry ALCM's with "strakelets", as "observable differences"; and the U.S. has reduced the potential number of warheads and throw-weight of the MX ICBM.

(b) The Congress finds that the Defense Department guidance issued in March 1980 not to take programmatic actions which would violate the unratified SALT II Treaty is still in effect.

(c) The Congress finds that the Senate Armed Services Committee has determined that the SALT II Treaty is "unequal", unbalanced, destabilizing, and "not in the national security interest of the United States."

(d) The Congress finds that there has been constructive notice of the intention of the United States government not to ratify the SALT II Treaty by the initiation of strategic arms reduction talks, and the prolonged inaction on the Treaty by the U.S. Senate.

2. It is therefore the sense of the Congress that no national defense program involving the national security of the U.S. shall be terminated, impeded, delayed, or affected in any way in order to comply with the terms of the SALT II Treaty, unless and until the Senate has given its advice and consent for the President to ratify the Treaty under the Treatymaking provision of the Constitution.

Mr. McCLURE. Mr. President, I have been in the forefront of the opposition to the 1979 SALT II Treaty, which is unequal and therefore inconsistent with U.S. law. In accordance with another law, I also led a successful Senate effort in September 1977 to prevent President Carter's extended or prolonged compliance with the expired SALT I interim offensive agreement from hindering U.S. strategic modernization programs. There remain significant constitutional, legal, national security, and political problems with prolonged U.S. unilateral compliance with the SALT II Treaty, which has not received the advice and consent of the Senate for Presidential ratification. I do not believe that the United States should go on blindly adhering to all the provisions of SALT II.

Since June 18, 1979, when SALT II was signed, both the United States and the U.S.S.R. have been obligated under traditional international law to do nothing which would "defeat the object and purpose" of the SALT II Treaty still unratified on both sides. U.S. policy under both President Carter and President Reagan has been that the the United States would do nothing to "undercut" SALT II, as long as the Soviets show "equal restraint." The United States is complying precisely with all the provisions of the unratified SALT II Treaty, according to the Secretary of State's testimony and to recently declassified Defense Department directives. Therefore, the whole world should recognize that the United States is complying with SALT II. I would question, how-

ever, how long the United States should go on blindly complying with an unratified treaty.

The Senate also has a right and an obligation to determine whether the Soviets are meeting the stated U.S. criteria for that policy, that is, that the Soviets show "equal restraint" and do nothing to "defeat the object and purposes" or to "undercut" SALT II. Under any interpretation of Soviet obligations under SALT II, a Soviet violation of a fundamental provision of SALT II constraining new type ICBM's would both "undercut" and "defeat the object and purpose" of SALT II, and cannot be regarded as restraint.

Mr. President, the SALT II Treaty is unequal, unbalanced, and destabilizing. It is, to use a phrase commonly used today, "fatally flawed." the Senate Armed Services Committee has determined that the SALT II Treaty is "not in the national security interest of the United States." There are at least eight fatal flaws of the SALT II Treaty, which include these four as the most important fatal flaws of SALT II:

First, (1) the Soviet monopoly on very heavy ICBM's, giving them 326 SS-18 very heavy ICBM's to zero allowed for the United States, making SALT II fundamentally unequal in the most significant strategic capability—very heavy ICBM's, deployment of which are legally denied to the United States.

Second, (2) allowing the Soviet Backfire bomber, which has intercontinental range and refueling capability, to be uncounted in SALT II, when Soviet Bison bombers with shorter range than the Backfire and scrapped U.S. B-52 bombers are counted in SALT II. This is another fundamental inequality of SALT II contrary to the Jackson amendment legal requirement that there be equality in SALT II.

Third, the fact that the Soviet ICBM counterforce capability would legally be allowed to grow massively under SALT II, through Soviet deployment of new ICBM's carrying increased numbers of warheads.

Fourth, the fact that from 1,000 to 2,000 stockpiled ICBM's capable of rapid reload and refire, covert soft launch, and mobile launch are completely unconstrained by the SALT II Treaty, thereby circumventing or violating all of the SALT II delivery vehicle ceilings: 2,400, 2,250, 1,320, 1,200, and 820. Here again the U.S. legal objective of equality in SALT II is denied.

Mr. President, for all of these reasons I oppose continued U.S. compliance with the unratified SALT II Treaty. There is a strong argument that the prolonged Senate inaction on the SALT II Treaty, together with the Initiation in 1982 of strategic arms reduction talks with the Soviets, provide constructive, de facto evidence of a U.S. intention not to ratify the SALT II Treaty.

Mr. President, I would like to provide the constitutional arguments for my amendment. I believe that the United States should no longer comply with the SALT II Treaty unless the Senate Gives its advice and consent for the President to ratify the SALT II Treaty in accordance with the treatymaking provision of the Constitution. It is simply not proper for the United States to comply with a treaty which is unratified. Moreover, it is improper for the United States to constrain its strategic forces in order to comply with an unratified treaty. There are dangers to our national security in such extraconstitutional compliance.

Only two legal methods exist for U.S. compliance with an arms control treaty: The treatymaking provision of the Constitution must be exercised, or in the case of an executive agreement on arms control, there must be further affirmative legislation enacted by the Congress.

Section 33 of the 1961 Arms Control and Disarmament Act specifies these two methods for constraining U.S. military forces to comply with an arms control treaty or an executive agreement on arms control.

Now, Mr. President, several aspects of my amendment deserve comment in light of these constitutional and legal facts. In regard to the deactivation of 292 U.S. missile and bombers counted in SALT II, I am aware of no further affirmative legislation which either authorizes or appropriates funds specifically for the deactivation of these SALT II-constrained forces. It is my understanding that general operations and maintenence funds of the Defense Department are being used to achieve these deactivations, and these funds should be better utilized to enhance U.S. military readiness and operational capabilities.

Second, in regard to the canceled deployment of our stockpiled Minuteman III ICBM's, there is further affirmative legislation which is both the fiscal year 1981 and fiscal year 1982 Defense authorization bills, specifying the deployment of these stockpiled ICBM's. Yet this deployment was canceled, and the Reagan administration has actually admitted that this cancellation occurred in order to comply with SALT II. Thus both the treaty making powers and the further affirmative legislation proviso of section 33 of the Arms Control Act are being defied by this cancellation.

Third, the funds for modification of our ALCM-equipped B-52's to carry "strakelets," which are "observable differences" required by SALT II, are being explicitly authorized and appropriated by Congress, despite the inconsistency of this modification with the treatymaking provision of the Constitution.

Finally, the reduction of the number of warheads and throw weight of the new MX ICBM in order to comply with SALT II is, to my knowledge, not authorized or covered by further affirmative legislation.

In conclusion, I would also point out that the March 1980 guidance from the Defense Department to the military services to comply with the unratified SALT II Treaty, is also inconsistent with section 33 of the ACDA Act and with the treaty-making provision of the Constitution.

The argument for my amendment is thus compelling. We must comply with our Constitution and our laws, and we must safeguard our national security. U.S. uniliateral compliance with the unratified SALT II Treaty, especially in light of substantial and conclusive evidence of Soviet violatons of SALT II, is both unconstitutional and illegal, as well as dangerous.

Mr. President, this is a historic moment for the Senate and the Nation. For almost 4 years now the powers and prerogatives of the Senate have been ignored and the United States has unilaterally complied with an unratified treaty.

The time is long overdue for the Senate to correct this improper situation, and either give its advice and consent to ratification or end U.S. compliance. The Senate has been inactive on this question since early January 1980, when then-President Jimmy Carter requested that the debate on the SALT II Treaty be deferred pending a thorough review of Soviet intentions after their brutal invasion of Afghanistan. President Carter's request to defer Senate debate and action on SALT II was fortuitous for some Senators, who did not wish to have to take a position and vote on such a momentous issue. However, prolonged Senate inaction on this treaty is an affront to the duty and responsibility of the Senate, and to its prerogatives.

A complete review of Soviet intentions and behavior was never undertaken by the Carter administration, even though President Carter confessed that Brezhnev had lied to him in explaining the Soviet invasion of Afghanistan. Soon after he took office in January 1981, President Reagan also stated that the Soviets would "lie, cheat, and commit any crime" to achieve their objectives. At the time, many foreign policy pundits scoffed at what they thought was too harsh a portrayal of Soviet behavior, but the recent Soviet lies, and counter lies, and retractions regarding the facts about the Korean airliner massacre have vindicated President Carter's and President Reagan's skepticism about whether the Soviets are capable of

good faith, and civilized diplomatic behavior.

Moreover, the new memoirs of former Secretary of State Vance and former National Security Adviser Brezinski both reveal that the President had accused Soviet Foreign Minister Gromyko of lying to him several times.

In sum, a thorough study of Soviet-arms-control intentions and behavior is long overdue. Such a study would be useful to the Senate in its concern over how best to deal with the Soviet Union. I would hope that the Reagan administration would review the files of the national security departments and agencies in order to determine whether some classified studies on Soviet arms control behavior might not already exist. I think there might be a study which showed how Brezhnev lied to the United States in SALT I and SALT II, just as Andropov has lied to us about the Soviet role in the Korean airliner massacre. It would seem that Soviet SALT violations, and Brezhnev's and Andropov's repeated lies would tend to vindicate those analysts of Soviet foreign policy who have been skeptical of détente and SALT.

Mr. President, I ask unanimous consent that excerpts from the Senate Armed Services Committee report, "Committee Analysis and Conclusions on the SALT II Treaty," published on December 4, 1980, be printed in the RECORD. This material shows why the SALT II Treaty is "unequal" and "not in the national security interest of the United States." I also ask unanimous consent that a pamphlet entitled "Arms Control and U.S. Foreign Policy, Fatal Flaws of SALT II", by David S. Sullivan, published by the Foreign Affairs Council in November 1980, also be printed in the RECORD. This book analyzes in detail the main flaws of SALT II and provides some recommendations for U.S. strategic programs.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXCERPTS FROM, MILITARY IMPLICATIONS OF THE PROPOSED SALT II TREATY RELATING TO THE NATIONAL DEFENSE

COMMITTEE ANALYSIS

For the first time in the history of the nuclear age, and as a decade of arms control negotiations comes to an end, the United States now faces the near-certainty that a significant element of its strategic deterrent will be vulnerable to preemptive attack by the Soviet Union. As the Senate convenes its debate on the ratification of the SALT II Treaty signed at Vienna on June 18, 1979 it is faced with incontrovertible evidence that the Soviet Union will have the capacity to destroy virtually the entire U.S. land-based missile force by directing against it a fraction of its own vastly more powerful force of offensive intercontinental ballistic missiles. The United States does not have, and will not acquire during the period of the treaty, a comparable capability. The President of the United States must therefore deal with the Soviet Union around the world with the knowledge that, in a crisis, the United States is at a strategic nuclear disadvantage that carries with it profound political implications.

While the United States still retains awesome strategic nuclear power, its bombing capability is based on an aging fleet of B-52 aircraft built, on average, some 25 years ago and unlikely to be effective in timely retaliation against hardened/defended military targets—even with the addition of cruise missiles. The U.S. fleet of strategic nuclear submarines, the least vulnerable component of our deterrent, carries missiles that lack the combination of accuracy and yield necessary to destroy hardened military targets. And at any given time, the large part of that fleet normally in port is vulnerable.

Thus, a decade after the U.S. negotiators departed for the first SALT discussions in Helsinki, we face a strategic balance more adverse than ever before—a strategic balance that is increasingly uncertain and unstable and which no longer offsets the undisputed Soviet advantages in the areas of conventional and theater nuclear forces.

This state of affairs is, to a significant degree, the consequence of a sustained Soviet military buildup accompanied by a decline, in real terms, in the level of U.S. defense spending and an undue reliance on negotiations with the Soviets as an alternative to our own efforts to assure a military balance.

Current U.S. plans are not adequate to close the gap that has been permitted to develop, either in the conventional, theater nuclear or strategic nuclear area. The committee believes that an essential precondition to effective U.S. action to close the widening military gap is a full appreciation of the extent to which years of Soviet military expansion have placed the United States at a disadvantage. Unwarranted notions about Soviet cooperation, the unfounded assumption that SALT treaties reflect Soviet restraint and forebearance, and overly optimistic hopes that the Soviet threat to our security is being lessened are inconsistent with the facts and undermine efforts to summon the resolve to arrest the decline in our military posture.

In our judgment the SALT II treaty presently before the Senate fails to meet the criteria laid down in 1972 when the Congress adopted an amendment to the resolution authorizing the interim agreement that called for equality in any future SALT Treaty. That amendment, which was the subject of several weeks of debate in the Senate, stated, in what became Public Law 92-448, that:

"The Congress . . . urges and requests the President to seek a future treaty that, inter alia, would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union. Public Law 92-448.)".

Debate on the interim agreement turned on adoption of this amendment, which was subsequently approved by the House and signed into law. A review of that debate establishes clearly that the Congress insisted on equal numbers of intercontinental strategic forces taking account of throw-weight. That has not been done in the present treaty, in which the levels are unequal in favor of the Soviet Union and the Soviet 1972 advantage in throw-weight has actually increased.

The treaty is unequal because it confers on the Soviet Union the right to deploy modern, large ballistic missiles with multiple warheads, a right denied to the United States.

It is unequal because it permits the continued deployment, outside the treaty ceiling, of a Soviet bomber (the Backfire) that has the capability to operate over intercontinental distances against targets in the United States.

It is unequal because it permits the Soviets to deploy more warheads on their strategic missiles than we are able to deploy on ours.

It is sometimes said in defense of these inequalities that the United States does not desire to do the things that the Soviets alone are permitted to do. But the Senate, in 1972 did not insist on equality only with respect to options that a particular administration might wish to pursue. It did insist on equality in the weapons limited by the treaty—ICBMs, SLBMs, and heavy bombers—for broader reasons: to avoid imposing a lasting handicap on the United States in future arms negotiations and to reject the political implications of codified inferiority. The treaty before us does not provide the equality that Public Law 92-448 envisioned.

In receiving over four volumes of testimony from 29 witnesses in and out of government, the committee has sought to understand clearly and completely the rights and obligations that will be incurred by the parties under the treaty and its protocol and to assess the military impact of these rights and obligations. This first task, which is difficult at best, is complicated by the considerable ambiguity surrounding many of the treaty's terms and provisions. Moreover, the frequent resort by the United States negotiators to unilateral assertions as to the meaning of ill-defined terms and the refusal of the Administration to accept clarifying amendments has left the committee unable to conclude precisely what the treaty means on a number of important points. The committee has, therefore, identified a number of definitional issues and ambiguities to which the Senate should turn its attention before final action on the treaty.

The following brief analysis does not attempt to deal with every issue; rather it is centered on several issues important to an appreciation of the treaty as a whole: the balance in land-based intercontinental ballistic missiles; heavy bombers and the Backfire; theater forces in general, and the land and sea-based cruise missiles in particular; qualitative constraints on strategic forces; and verification.

* * * * *

CONCLUSIONS

After extensive examination of the military implications of the treaty, the committee concludes that the SALT II Treaty, as it now stands, is not in the national security interests of the United States of America. The committee reaches this conclusion in view of the inadequacies discussed in the foregoing analysis.

We believe that major changes to the treaty are essential if the treaty is to serve our national security and be in the best interests of the common defense policy. Moreover, we believe that a number of ambiguities must be clarified before the rights and obligations of the parties can be fully understood and agreed.

Among the changes which should be considered in strengthening our national security interests are:

1. Remedying such inequalities as the Soviet advantage in ICBM throwweight, the permitted Soviet possession of modern,

large ballistic missiles, the exclusion of the Backfire bomber, the inclusion of Western theater nuclear forces, and decisively addressing the unwarranted precedents which have been set by the protocol.

2. Closing loopholes in connection with the limitation on the testing and deployment of new types of ICBMs.

3. Obtaining agreement to such measures as may be necessary to assure our ability to monitor Soviet compliance.

4. Clarifying by agreement ambiguities as to the rights and obligations of the parties. Examples of such ambiguities are the following:

(a) Permitted Backfire improvements;

(b) Encryption of telemetry;

(c) Constraints on "modifications" to existing ICBM types;

(d) Verification terms and procedures;

(e) Permitted basing modes for mobile ICBMs; and

(f) Sharing of technology/weapons with allies;

COMMITTEE ACTION

In accordance with paragraph XXVI 7(c) of the Standing Rules of the Senate, following is the tabulation of the vote to submit a report on this matter:

In favor: Senator Jackson, Cannon, Byrd of Virginia, Tower, Thurmond, Goldwater, Warner, Humphrey, Cohen, and Jepsen.

Voting present: Senators Stennis, Nunn, Culver, Hart, Morgan, Exon, and Levin.

ARMS CONTROL AND U.S. FOREIGN POLICY—FATAL FLAWS OF SALT II

(By David S. Sullivan)

SUMMARY

Soviet spokesmen now are openly admitting that the U.S.S.R. has exloited the 1969-1980 decade of détente and SALT to mislead the West into complacency, while using the Western credits, trade, technology and grain derived from détente to pursue a relentless strategic buildup. Key top American leaders have also publicly conceded recently that Kremlin oligarchs deceived them in Moscow in 1972 on all the key issues of the SALT I agreements. Since as early as 1971, Moscow has been steadily outpacing America in the accumulation of military power, despite SALT negotiations. It is clear that an historic shift in the balance of military power occurred during the 1970s, the decade of détente and SALT, and the shift continues.

By 1975, the Ford Administration finally realized the danger of the growing Soviet strategic buildup, and President Ford wisely planned an American strategic buildup, and President Ford wisely planned an American strategic buildup sufficient to match the Soviet threat. He decided to fully fund the new MX Intercontinental Ballistic Missile (ICBM), the new Trident submarine, the new B-1 bomber, and the new air launched crusie missiles. These programs were all of top priority and were included in Ford's Fiscal Year 1976 Defense Budget, the first American defense budget to fund a real increase in defense spending since the mid-1960s (exclusive of Vietnam war spending). Had the Ford schedule been carried out, the U.S. might have regained strategic parity by their deployment before the early 1980s.

Due to the seriousness of the growing Soviet threat, in 1976 President Ford also ordered the CIA to conduct its first experiment in competitive intelligence estimating. He organized the famous "A Team—B Team" competitive analysis of the objectives and scope of the Soviet strategic buildup. The B Team was composed of outside experts on the Soviet threat. The CIA was the A Team. In late 1976, the B Team soundly concluded that U.S. Soviet strategic parity was eroding in Soviet favor, and that growing Soviet strategic superiority was due to their accelerating deployment of multiple (MIRV) warheads on their new missiles, and also to their rapid improvement in the accuracy of their new missiles. In 1976, the B Team realistically projected that the rapidly growing Soviet counterforce capability threatening American strategic forces could cause the United States to be strategically inferior to the U.S.S.R. by as early as 1980. The A Team or CIA estimate was in contrast decidedly optimistic, reportedly projecting a delayed Soviet counterforce threat only after 1985.

In early 1977, the new Carter Administration rejected the ominous conclusions of the sound and realistic B Team estimate. Instead President Carter believed the CIA and chose to ignore the compelling evidence of the seriously worsening strategic trends, asserting complacently that strategic parity was permanent and would not erode.

Carter's Presidential Review Memorandum 10 of early 1977 expressed the hope that arms control would somehow solve our strategic problems and preserve parity with the Soviets. One Carter national security advisor even openly advocated U.S. surrender of any remaining strategic advantages we possessed. Based upon these naive views, the Carter Administration unilaterally cutback both existing and planned U.S. strategic forces so drastically that we have now reached a posture of inferiority and minimum deterrence, while ignoring the relentless Soviet strategic buildup. Carter also ignored continued Soviet deception and duplicity in negotiating SALT II. The resulting Carter SALT II Treaty signed in June 1979 was therefore understandably unequal, destabilizing, and largely unverifiable. SALT II, like SALT I before it, merely codified a growing strategic imbalance in favor of the Soviets.

The Chairman of the Joint Chiefs of Staff and the Commander of the Strategic Air Command recently confirmed the validity of the B Teams's realistic estimate 1976. Our military leaders now publicly concede that since the Carter Administration came to power in 1977, the United States has become inferior to the Soviet Union in strategic forces. Our military also states that America may not be able to overcome this strategic inferiority during the next decade.

In sum, we must conclude that the Carter Administration bears the responsibility for the present dangerous American strategic inferiority to the Soviets, for the following reasons:

Suppressing accurate intelligence estimates of the growing Soviet threat, while believing unrealistic optimistic intelligence assessments now proven wrong. Top Carter Administration defense officials have recently publicly confessed that in 1977 they grossly underestimated the rapidity of both Soviet MIRV missile deployments and accuracy improvements. They concede the grave consequences of their misjudgment.

Pursuing vague hopes for arms control as the sole solution to the immediate and growing U.S. strategic deficiencies.

Cutting back unilaterally U.S. strategic forces massively, to the extreme of inferiority and minimum deterrence, while asking for no quids pro quo in SALT negotiations with the Soviets.

Allowing the United States to forfeit strategic "essential equivalence" to the Soviets in 1977, while deliberately creating the long term "window" of our strategic vulnerability lasting from 1980 to 1990.

Negotiating a fatally flawed SALT II Treaty which would codify American inferiority and vulnerability beyond 1985, and dangerously constrain U.S. strategic options to redress the strategic balance.

Tolerating large scale Soviet disinformation and hostile propaganda campaigns, Soviet negotiating deception in SALT II, and Soviet violations of SALT I, SALT II, and other arms control agreements.

In January 1980, unanticipated Soviet aggression in Afghanistan finally caused President Carter to ask for an indefinite delay in the U.S. Senate's ratification debate on his fatally flawed SALT II Treaty. President Carter also surprisingly admitted that he had at least learned about the dangers of Soviet diplomatic duplicity and aggressive intentions from the Afghan crisis. He nevertheless believed that the United States still has an international legal obligation to fully comply with all the provisions of SALT II. In effect, this policy decision has meant Presidential ratification of SALT II without the advice and consent of the U.S. Senate. The Soviets, in contrast, have authoritatively announced that they will not comply with SALT II until the United States ratifies the Treaty, and their continuous violations of SALT I, SALT II, and the other arms control treaties are consistent with this posture. The Soviets thus have all the benefits of U.S. ratification of SALT II, while themselves accepting none of SALT II's obligations.

SALT II thus continues to impose defacto constraints on all U.S. stragetic forces, despite the fact that this Presidential compliance policy lacks affirmative legislative support and is contrary to Section 33 of the Arms Control and Disarmament Act of 1961. Unilateral U.S. compliance ordered by President Carter has inevitably caused the debate over the merits and flaws of SALT II to continue. SALT II is dead only as it applies to the Soviets, however, because necessary U.S. programs continue to be constrained by it. Since the election of President Reagan and a Republican Senate, it is now clear that the SALT II Treaty will be withdrawn since President Reagan favors complete renegotiation of SALT II in a new form.

The many important fatal flaws of SALT II need to be more fully analyzed since they form the basis for renewed negotiations with the Soviets. There are at least eight fatal flaws of SALT II, of which the four most important are:

The longstanding Soviet monopoly in heavy ICBMs;

The allowed growth in the already overwhelming Soviet counterforce threat;

The failure to limit stockpiled Soviet missiles capable of rapid refire; and

The exclusion of the intercontinental Backfire bomber.

Correction of all eight flaws (see below) must be achieved in SALT III.

Far more significant even than the fatally flawed provisions of SALT II are the harmful effects of the Treaty and the SALT negotiating process upon the sound planning of U.S. strategic forces. SALT II has severely damaged American security, but the scope of the damage is still not well known.

Due to the SALT II negotiating process and to Carter Administration unilateral strategic cutbacks, the United States has forfeited well over 6,000 strategic nuclear warheads previously planned by the Ford

Administration, and Carter has also cutback 710 strategic delivery vehicles.

In contrast, the Soviets already have over 785 more strategic delivery vehicles than the United States, and have been adding over 1,000 new strategic warheads each year since 1974, an increase of over 6,000. They have almost equalled the United States in our one last remaining advantage, number of warheads. Further, they will be able to legally add over 6,000 more warheads to their forces by 1985 to achieve superiority even in warheads.

Before 1985, fully within the terms of SALT II, the Soviets can legally increase their already dangerous strategic counterforce capability and their strategic superiority. They can have over 14,500 mostly large counterforce warheads, compared to the presently planned U.S. total of only 11,900 mostly vulnerable small warheads. They will also have succeeded in excluding from SALT II second-line strategic forces far more numerous than their first-line forces, about 3,000 strategic delivery vehicles (some with multiple warheads) unaccountable in SALT II and unmatched by the United States.

The optimum time to improve U.S. strategic posture, 1976, has long ago passed, and the urgency of strategic force improvement is clear. We must rapidly improve our strategic forces while we attempt to negotiate an equitable and stabilizing SALT III Treaty with the Soviets. Due to the destabilizing geopolitical dangers inherent in present U.S. strategic inferiority and vulnerability, the Congress should also agree to urgently fund the following ten more reasonable, cost effective, and beneficial rapid strategic force improvements:

1. Rebasing part of our Minuteman ICBM force immediately in many new vertical multiple protective structure (MPS) silos. Further, also deploying some 100 extra Minuteman II ICBMs, replaced by 100 presently stockpiled MIRVed Minuteman III ICBMs, in a truck mobile, garrison-based mode. These launchers could be able to move out rapidly onto our interstate highway system within 12 hours of strategic warning;

2. Acceleration of MX ICBM development for rapid replacement of the Minuteman force in new vertical MPS silos;

3. Immediate deployment of a mobile and also hardsite ABM defense for both Minuteman and MX;

4. Initiation of a massive, Manhattan-Project style program to develop and deploy as soon as possible a space-based chemical laser ABM defense;

5. Immediate increased alert rates and immediate inland basing of our B-52 bomber force;

6. Immediate mass production of a modified B-1A multi-purpose, stealthy bomber;

7. Acceleration of Air-Launched Cruise Missile (ALCM) mass production and deployment on B-52s, B-1As, and fighter-bombers;

8. Immediate construction of an operational Extremely Low Frequency communications system to improve Submarine-Launched Ballistic Missile (SLBM) survivability;

9. Retention of our ten Polaris submarines for rapid conversion into Submarine-Launched Cruise Missile (SLCM) platforms; and

10. Acceleration of Trident submarine construction and rapid expansion of Trident I missile retrofit to all 31 of our Poseidon submarines.

The net effect of the above ten rapid strategic force improvements will be to quickly and significantly enhance the survivability of American strategic forces by as early as 1983. They will also add to the lethality and hence to the deterrent effect of our now dangerously weakened strategic posture.

INTRODUCTION: THE DAWNING OF THE NEW AGE OF SOVIET NUCLEAR BLACKMAIL

This statement is now a commonplace assessment of detente and arms control in the West. It is a quotation from the West German centrist leader K. Biedenkopf. What is unusual is that such a statement can be quoted approvingly by the Soviets themselves. It appeared in Kommunist of July 1980 (pp. 70-81) as an example of the persistence of detente despite the increasingly realistic assessment of detente's dangers in the West. The Soviets believe that even though many Westerners now realize that detente has gravely weakened the West, it is so mortally weakened that there is now no alternative to detente and further appeasement.

As a Soviet writer stated as long ago as 1971: "In fact, a nation's diplomatic activity becomes a part of those non-military means of policy implementation which, . . . are contained within the concept of the content of *war.*" (*Voenya Misyl,* No. 7, 1971, V. Dimetriyev, emphasis added.) To the Soviets, diplomacy is a facet of war.

Former President Nixon recently conceded that he was deceived in Moscow in 1972 on the key provisions of SALT. The Soviets must have conducted SALT I negotiations like war, to gain advantages. Nixon admitted this year: "First, they (the Soviets) try to deceive us, in order to disguise their intentions and make us relax our will . . . in some cases, such as substitution of the heavy SS-17 and SS-19 ICBMs for the light SS-11s, Soviet force modernization exploited loopholes in the SALT I agreement contrary to our understanding of that agreement." (The Real War, Richard Nixon, Warner, New York, 1980, pp. 48, 171.)

Soviet public statements indicate clearly that they believe that the world balance of power (the "correlation of forces") shifted decisively in Soviet favor as early as 1971, a whole year before SALT I was signed.

In early 1979, the U.S. Joint Chiefs of Staff finally conceded ominously that the strategic nuclear balance had long ago shifted against America, because of the unrelenting Soviet strategic buildup after SALT I. Because of President Carter's cutbacks and delays in all our strategic programs, the JCS also warned that the strategic balance could not be improved by our delayed MX, ALCM and Trident strategic modernization programs until the mid-1980s.

In February 1980, General Ellis, Commander of the Strategic Air Command, finally echoed the omnious JCS warning with an even more grim revelation. Ellis testified to the Senate that since 1977 we have lost strategic "essential equivalence" to the Soviet Union. But essential equivalence itself has long been recognized by most experts as a euphemism for the American strategic inferiority that has existed through the last 8 years under SALT I. So General Ellis, too, was conceding long-standing American military inferiority to the Soviets.

In January 1980, the JCS predicted more soberly that we will not be able to restore strategic parity until the late 1980s. More pessimistically, General Ellis believes that parity cannot be restored by as late as 1990, even after our planned MX, ALCM and Trident modernization programs are fully deployed.

American strategic inferiority thus has long been an unfortunate reality. It manifests itself in several forms, one of which is vulnerability.

Both the U.S. SALT I unilateral statement of May 9, 1972 and the Jackson Amendment to SALT I made it clear that enhancing the survivability of U.S. strategic forces was to be the fundamental, paramount U.S. goal in seeking a SALT II Treaty. As Senator Jackson precisely stated in regard to SALT I: "The intent of the (SALT I) agreements is to enhance our security by enhancing the survivability of our deterrent." Yet SALT I has allowed U.S. strategic vulnerability to become unprecedented. SALT II has again failed to solve the problem of maintaining survivable U.S. strategic forces.

Beyond American numerical inferiority, Soviet strategic forces of 1980 have already opened a "window of vulnerability" on all U.S. strategic forces, and this window will gape open all the wider throughout SALT II. The SALT process itself has contributed to U.S. strategic vulnerability by offering the false promise that somehow the Soviets would agree to limit their threat to American land-based missiles. Meanwhile, while vainly hoping that the SALT process would solve our ICBM vulnerability problem by encouraging Soviet restraint, we failed to unilaterally solve our own problem through either mobility, active defense, or proliferation of aim points. Now the adverse strategic and military trends against us are unmistakable, and will surely make the 1980s a perilous decade for Americans. The "window of vulnerability" once again leaves America open to Soviet nuclear blackmail, as in the period of Khrushchev's rocket rattling in the 1950s and early 1960s.

But before we analyze SALT II, we need to examine a simplified numerical comparison of United States and Soviet strategic forces. (See chart.)

U.S.-Soviet Strategic Force—Numerical comparisons, 1980-1985

Delivery vehicles 1980: U.S., 1,865; Soviet, 2,650 SALT II accountable (about 2,720 second-line, excluded from SALT II).

Warheads 1980: U.S. 9,000; Soviet, about 8,000.

Delivery vehicles under SALT II 1985; U.S., 2,009; Soviet, 2,250 SALT II accountable (about 3,100 second-line forces excluded from SALT II).

Warheads under SALT II 1985: U.S., 11,900; Soviet, About 14,500 (about 4,400 excluded from SALT II).

Sources: "U.S.-Soviet Military Balance" by John Collins, McGraw-Hill, 1980. "The Military Balance, 1980-81," International Institute of Strategic Studies, 1980. "Analysis and Compliance Enforcement in SALT Verification" by Senator Gordon Humphrey, International Security Review, Spring 1980.

The eight fatal flaws of SALT II

There are at least eight flaws in SALT II, each of which by itself was fatal to the Treaty's ratification. Each fatal flaw will be analyzed and explained in sequence in order of its importance.

The most serious flaw allows the Soviets to neutralize the credibility of the entire U.S. strategic deterrent posture by merely continuing to build the capability for threatening to destroy most U.S. strategic forces in a counterforce first strike. It also entails failure to achieve the equal force levels, including throw-weight, called for by the Jackson Amendment to SALT I.

First, SALT II preserves the existing gross inequalities favoring the U.S.S.R. in both "very heavy" and "heavy" intercontinental ballistic missiles (ICBMs), as measured by their throw-weight (or payload). By exploiting MIRV (multiple, independently targetable re-entry vehicles) technology and equalling the United States in accuracy, the Soviets have dangerously translated their huge throw-weight advantage into massive counterforce capability for threatening the complete destruction of all our land-based missile, bombers, and in-port submarines in a first strike.[1]

SALT I already granted the Soviets superiority in number of missiles and throw-weight since 1972. SALT I also allowed the Soviets a monopoly in very heavy missiles. But the Soviets are granted the same exclusive right to have very heavy SS-18 ICBMs again under SALT II lasting through 1985. In SALT II the United States is again forbidden to have any very heavy ICBMs whatsoever. The Soviets have a permanent monopoly on very heavy ICBMs. We have thus conceded for the second time in eight years the principle that we can be legally inferior to our most dangerous adversary in a decisively significant military capability. The Soviets will also have a de facto monopoly on heavy SS-19 sized ICBMs until 1986, throughout SALT II. These U.S. concessions are already being perceived world-wide as continued U.S. acquiescence in Soviet strategic superiority.

The Soviet SS-18 force of super missiles alone, all by itself, carries more megatonnage or explosive power than the combined total of all U.S. land- and sea-based ballistic missiles. This is a measure of the enormous military significance, and therefore the geopolitical weight, of granting a monopoly on SS-18s to the Soviets.

The Soviet SS-19 force of heavy ICBMs is almost equally formidable. The SS-19 force too can destroy most U.S. strategic forces in a first strike all by itself.

It should be no comfort to Americans that under SALT II the Soviets now have two, independent, first strike forces, one composed of 308 SS-18s, and another made up of about 400 SS-19s. Thus the Soviet monopoly on very heavy SS-18 super missiles, together with their nearly as lethal monopoly on heavy SS-19 missiles, will neutralize the deterrent effect of U.S. strategic forces. These combined forces are simply a measure of the gravity of the Soviet threat endangering strategic stability. But the Carter Administration argued incredibly that since the SS-19 force is almost as deadly as the SS-18 force, we somehow need not worry about either.

The Carter Administration has also argued that the Soviet heavy ICBM monopoly does not matter, because the U.S. military has never desired to have heavy ICBMs. This argument is incorrect for four reasons. First heavy ICBMs are in fact militarily useful, because they can be used to threaten the other side's military forces. Second, from 1960 through 1963, the U.S. Air Force planned to deploy 250 Titan I and Titan II heavy ICBMs. This is a militarily significant number. But a civilian, Defense Secretary McNamara, cut these plans back to only 54 Titan IIs. Third, as late as 1970, even Dr. Henry Kissinger wanted to maintain the right for the United States to have 250 heavy ICBMs in the SALT I agreement then under negotiation. Of course, Kissinger later conceded on this point in May 1972 and the Russians were allowed over 300 heavy ICBMs in SALT I to none for the United States. Finally, the U.S. MX ICBM was designed in 1973 by the Air Force to be a very heavy throw-weight ICBM. All these facts contradict the Carter Administration claim that the U.S. military has never wanted heavy ICBMs.

These unpleasant facts mean that our strategic forces are now being "checkmated." Aggressive Soviet behavior all around the world demonstrates that our deterrent forces are already in the process of being neutralized politically and this will increasingly erode deterrence at intercontinental, theatre nuclear, and conventional levels. Our nuclear umbrella intended for extended deterrence, vital to the security of NATO, our allies in the Middle East, and Japan, is steadily losing credibility. Even Dr. Kissinger himself has recently conceded the geopolitical significance of Soviet counterforce superiority.

In effect, within the terms of SALT II, we are allowing the Soviets to build with impunity precisely the numbers and types of strategic weapons which will enable them to completely defeat our entire deterrent strategy. Thus, the Soviets can threaten nuclear blackmail in order to further their aggressive aims.

As if the existing Soviet SS-18 and SS-19 heavy ICBM forces were not bad enough, the second and even more dangerous fatal flaw of SALT II also deals with counterforce. SALT II allows the already overwhelming Soviet ICBM counterforce threat to grow even further. This counterforce growth is permitted by several loopholes in SALT II's provisions.

The Soviets can reasonably be expected to maximize their warhead capabilities by legally putting ten multiple, independently targetable re-entry vehicle (MIRV) warheads on each of their allowed 820 SS-18, SS-19, and SS-17 MIRVed ICBMs—giving them an allowed total of 8,200 highly accurate counter force warheads. The Soviets can thus upgrade their heavy SS-19 force from six to ten MIRVs each, and their SS-17 force from four to ten MIRVs each.

Moreover, there is no agreement in the Treaty on the specific launch-weight and throw-weight data necessary to define a heavy ICB, thereby allowing Soviet deployment of many more heavy ICBMs. (This point will be addressed in more detail below.)

Further, "new type" Soviet ICBMs are not really limited. Despite the lessons of SALT I, there is also no agreement on the specific missile qualitative characteristic baseline data necessary to measure and verify the allowed increases in missile throw-weight, launch-weight, and volume, and also, silo volume. The SALT II constraints on "new type" ICBMs are too imprecise to be meaningful. These loopholes, together with the allowed encryption (or encoding) of Soviet missile telemetry signals, make it clear that there are no effective constraints on "new type" Soviet missiles. Thus, with one of their new missiles already legally exempted, the Soviets will be able to legitimately deploy all five of their new missiles known to be under deployment.

This "new type" deployment will provide even greater counterforce capabilities than the existing SS-18 and SS-19 forces, which are already devastating. Despite Carter Administration claims that the factionation (MIRVing) limits of SALT II comprise effective constraints, the Soviets will be able to greatly increase their ICBM warhead number under SALT II. They can add over 6,000 ICBM warheads legally under SALT II, which cannot be construed as restraint.

The third fatal flaw deals with the famous Backfire bomber. The intercontinental-ranged, refuelable Soviet Backfire bomber is not counted in the Soviet strategic delivery vehicle aggregate of 2250. But all U.S. intelligence agencies agree that Backfire has the unrefueled range to strike all of the United States on a one-way mission. Range is the key criterion for SALT purposes. Indeed, the Backfire has better range then the oldest variants of the U.S. B-52 and all Soviet Bison bombers, which are counted.

Range is the most important SALT criterion for bombers because all U.S. B-52 bombers are programmed for one-way (or range) missions against the U.S.S.R. Thus, Backfire's one-way mission, intercontinental range capability, should cause it to count in SALT II like all U.S. B-52s, which also have one-way, range missions.

But Backfire also has refueling capability and sufficient tankers are available for it. With refueling and Arctic basing, Backfire can even strike the United States and return to the U.S.S.R. on a round trip radius mission, which gives it better capabilities than most U.S. bombers.

Further, the upgrade of Backfire's already intercontinental range capabilities is totally unverifiable. The Soviets have spurned all of our attempts to limit Backfire range upgrade, and also constraints on basing and operations.

Additionally, even 220 unflyable, mothballed U.S. B-52s count in SALT II, but all 400 eventual Backfires, 220 Soviet bomber variants (and 1300 Soviet stockpiled missiles) do not count. These Soviet exemptions are totally inequitable.

Finally, due largely to Soviet insistence on excluding Backfire, there is no clear, equitable definition of a heavy bomber in SALT II. But there are three additional "new type" Soviet heavy bombers already known to be under development, whose status, under SALT II, is recklessly left unclear. The status of these new Soviet bombers will require further negotiation in the Standing Consultative Commission for determination of whether or not they count. But our negotiating leverage will be greatly weakened by the precedent of Backfire's exclusion.

To add insult to injury, the Soviets have falsely told us that they will not give Backfire an intercontinental or refueling capability, but we know it already has both. Such blatant falsifications are an indication of Soviet duplicity.

The strategic significance of not counting Backfire in SALT II is that this force alone can deliver about 30 percent of the present huge Soviet megatonnage advantage, making Backfire a formidable second strike force. This inequity is compounded by the fact that the United States has no effective air defenses against Backfire. Hence all Soviet bombers would have a "free ride" against the United States.

The fourth flaw, which also will be analyzed in more detail below, relates to how SALT II hinders solution of our prime strategic problem. SALT II constrains all U.S. options to make our land-based missiles survivable. Such options as the "shell game" multiple protective structure (MPS) deceptive basing mode, and truck mobility for our ICBMs are either temporarily or perma-

[1] See Strategic Review, Fall, 1979, "A SALT Debate: Continued Soviet Deception," by David S. Sullivan, pp. 36, 37; Soviet SALT Deception, by David S. Sullivan, Coalition For Peace Through Strength, November 1979, pp. 12, 13.

nently precluded, despite the allowed growth of the already alarming Soviet counterforce threat. SALT II bans both additional fixed ICBM launchers and mobile ICBMs. These restrictions are due to the Treaty's too restrictive definition of what constitutes a fixed ICBM launcer, combined with the constraints on mobile ICMB deployment in the Protocol. The U.S. conceptual designs for the canisterized MX missile do not sufficiently distinguish the moveable canister from its fixed, multiple protective structure. The MX is either a mobile ICBM, in which case the Protocol bans its deployment, or it is launched from multiple fixed positions, in which case the additional fixed positions are banned.

Further, Soviet leaders have already given us an arrogant ultimatum that the new U.S. MX ICBM is unverifiable and inconsistent with SALT II deployed in any basing mode. Despite their arrogance, the Soviet interpretation of SALT II is reasonable. Moreover the Soviets have already challenged our MX even though MX will not be deployed until 1986, well after the Treaty expires. These SALT II constraints on U.S. ICBM options are destabilizing, especially in view of the allowed growth in Soviet counterforce capability.

The fifth fatal flaw also relates to unequal constraints on U.S. options, and this too will be treated in more detail below. The SALT II Protocol contains unequal constraints on new U.S. long-range weapons for the NATO theatre. U.S. ground- and sea-launched, long-range cruise missiles—GLCMs and SLCMs—now under development are constrained and cannot be deployed until after 1981. But a huge Soviet buildup in SS-20 intermediate range ballistic missiles, and other medium- and short-range theatre nuclear missiles and fighter-bombers, is totally unconstrained.

This massive Soviet theatre strategic buildup against Europe began years ago and is still ongoing. There is no end of the Soviet buildup in sight. It is inequitable for U.S. theatre deployment options to be constrained, but not comparable ongoing Soviet deployment programs. Moreover, these constraints on U.S. cruise missiles are still negotiable in the proposed SALT III negotiations, and could well establish a permanent precedent, particularly in light of the fact that ratification of SALT II would put the United States in a grossly inferior position from which to bargain in all future arms control negotiations.

Sixth, it is significant that SALT II limits only launchers, but not missiles or nuclear warheads themselves. The Treaty fails to control the production of all types of missiles and their warheads. Further, the stockpiling of missiles is not banned. Hence stockpiled missiles and extra warheads are fully legal and could easily be used for refire. Moreover, rapid reload and rapid refire capabilities are inadequately defined and constrained. The recent Soviet testing of a rapid reload and rapid refire capability with their SS-18 reported in Aviation Week (22 September 1980, p. 14) is not only a clearcut violation of the terms of SALT II, but it also illustrates well the danger of the huge Soviet missile stockpile (over 1,300 ICBMs) allowed under SALT II. Moreover, even counting only launchers, the United States faces a huge disadvantage under SALT II. The Soviets have 785 more launchers now.

Seventh, there is still no definition of a heavy ICBM in SALT II. The most surprising and significant fatal flaw in SALT II is the continued Soviet refusal to agree to a definition of a heavy ICBM. This is a loophole of major proportion. Soviet refusal to agree to specific, precise provisions indicates that they are protecting dangerous new heavy ICBM programs. It is ironic that this failure to define a heavy ICBM is also widely recognized as the single most significant flaw of SALT I in 1972 and again of SALT II through Vladivostok in 1974. This SALT II failure to define a heavy ICBM is especially dangerous because it means that other "new type" Soviet ICBMs could be even larger and more deadly than their famous heavy SS-19. The Soviets could also increase the size of the SS-18 follow-on, and because there are no agreed SS-18 baselines, the burden would be on the U.S. to prove violations.

The Carter Administration claims that a U.S. unilateral statement not contradicted by the Soviets is somehow agreed. This is precisely the status of the heavy ICBM definition in SALT II. The United States on August 16, 1977 unilaterally provided U.S. data on the launch-weight and throw-weight of the Soviet SS-19 ICBM in an attempt to define the parameters of a U.S. heavy ICBM. This was also an attempt to define a heavy ICBM for both sides. The Soviets, however, did not agree. They did not even respond. The Carter Administration evidently believed that this is another strange case in which Soviet "non-contradiction" constitutes agreement, because despite the facts the Administration nevertheless claimed that there is a "clear, agreed" definition of heavy ICBMs. But this non-agreed heavy ICBM definition must be deemed even weaker than the more explicit and positive U.S. SALT I unilateral heavy ICBM definition of 1972. In 1972, we at least told the Soviets that we would regard any new ICBM significantly larger than their SS-11 to be a violation of SALT I. We have said nothing similarly positive in SALT II. No good corporate lawyer negotiates key aspects of any commercial contract on this kind of "assent by silence" basis. It is obvious that Soviet silence can always be broken with impunity with grave consequences for the United States. Moreover, the Soviets have already told us repeatedly that they would not be bound by U.S. unilateral statements, emphasizing the unreality and danger of U.S. trust in the strange diplomatic device of "non-contradiction."

The eighth fatal flaw relates to the least important issue, verification. Like SALT I, SALT II fails to prevent the already massive, nationwide Soviet camouflage, concealment, and deception program from growing further, and from continuing to hinder U.S. intelligence monitoring and verification. This Soviet program reportedly grew in scope and scale under SALT I, despite the fact that it was deliberate and was, therefore, a violation. Soviet camouflage, concealment, and deception has clearly already hindered verification. The recent losses, compromises, funding reductions, and withholdings in U.S. intelligence collection capabilities, coupled with the more difficult to monitor qualitative constraints of SALT II and the allowed encryption of Soviet telemetry, altogether make SALT II largely unverifiable. For example, we cannot verify the "new type" ICBM provisions, the range of cruise missiles, the upgrade of Backfire, Soviet ICBM fractionation, rapid reload and refire capability, stockpiled missiles, with anywhere near "adequate" confidence.

Any one of these eight fatal flaws in SALT II impairs U.S. national security, and each was cause enough for the Treaty to be voted down in the Senate. Combined, they clearly have made the Treaty unequal, unbalanced, destabilizing, largely unverifiable, and harmful to our NATO, Middle East, and Asian allies.

Some technical SALT II flaws

But in addition, there are several almost equally significant but somewhat more esoteric technical fatal flaws. For example, about 250 mobile Soviet SS-20 intermediate range missile launchers are capable of launching intercontinental missiles, and they have reportedly launched mobile SS-16 ICBMs.[2] The provisions of the Treaty state clearly that any launcher which has launched an ICBM is defined as an ICBM launcher. These Soviet mobile SS-20 launchers therefore explicitly should count. But inexplicably, none of the 250 SS-20 mobile launchers count, although they are capable of being quickly loaded with stockpiled SS-16 ICBMs and then launching them. And a large number—about 100—of SS-16 mobile ICBMs are known to have been already produced and stockpiled, making them readily available for rapid launch by SS-20 launchers.[3]

Secondly, there are inadequate verification rules for determining which old and new ICBM or SLBM launchers will house which types of new missiles in the future. The Treaty does not require "functionally related observable differences" for each launcher type, but these distinctions are necessary for verification.

Moreover, new Soviet SLBMs could easily, covertly circumvent all SALT II testing and deployment restrictions on new ICBMs. Merely by testing ICBMs in the guise of SLBMs, the Soviets could completely avoid all "new types" restrictions.

And finally, the Soviets are allowed to preserve and even increase their already huge advantage in so-called "test and training" missile launchers which do not count, even though these launchers are known to be part of their operational missile force. For example, the Soviets maintained 18 SS-9 Fractional Orbital launchers at a test range for years under SALT I, but these ICBMs did not count. The Soviets reportedly have over 100 test and training launchers which still do not count in SALT II, a significant number.

SALT II in balance

In sum, before 1985, the Soviets can easily achieve a warhead superiority of at least 14,500 to the U.S. planned total of 11,900 warheads, and surpass U.S. missile accuracy, fully within the terms of the SALT II Treaty. Again, they will have overwhelming throw-weight, megatonnage, and counterforce advantages. But the Soviets have excluded significant forces from SALT II. The Soviets can still keep 400 Backfire bombers, about 350 old submarine launched ballistic and cruise missiles, about 220 intercontinental bomber variants, over 100 ICBM test and training launchers, over 350 mobile ICBM launchers, over 1,300 stockpiled old ICBMs totally exempted. Moreover, the Soviets are free to continue to produce excess ICBMs at

[2] William T. Lee, How CIA Estimates Went Astray (National Strategy Information Center, 1976), p. 43.

[3] The New York Times, 2 November 1977, "Pentagon Aides Say Moscow has Mobile Missiles Able to Reach US," by Bernard Weintraub.

their three very active ICBM factories for additional stockpiling.[4]

The Soviets thus actually will have exempted strategic forces more numerous than their first line forces which are counted in SALT II. They now have 2,650 delivery vehicles, compared to 1,865 for the United States. They are allowed 2,250 strategic delivery vehicles under SALT II, but they also will have about 2,720 second-line strategic delivery vehicles totally outside of SALT II. Many of these could also be MIRVed. So the Soviets really have up to 5,370 strategic delivery vehicles, compared to only 1,865 for the United States.

Thus the question of whether SALT II constrains the Soviets is moot and irrelevant. The Soviets already have superiority in almost all strategic measures. Moreover, the Soviets are already producing new strategic weapons on a mobilization, nearly wartime footing. There is strong evidence that they have already negotiated the terms of SALT II to fit their long-term force programming contained in their 1981–1985 five-year defense plan, and their force programming in any case provides them clearcut, overall superiority by 1985.[5] We therefore do not need to worry about even more extreme Soviet threats which could exist in the absence of SALT II. The Soviet threat to the United States allowed within SALT II terms is already so dangerous as to jeopardize U.S. supreme national interests. This is one reason why the Senate Armed Services Committee report on SALT II of December 1979 stated without qualification that the Treaty was not in the national security interest of the United States.

U.S. strategic posture is already approaching minimum deterrence

Many alarming conclusions have emerged from Senate SALT II hearings during 1979 regarding U.S. strategic force posture:

1. All of our ICBMs are already, in 1980, totally vulnerable to first strike from relentlessly improving Soviet ICBM counterforce capabilities. This accelerated U.S. vulnerability is due partly to the fact that U.S. Intelligence has repeatedly under-estimated the growth of the qualitative Soviet counterforce threat throughout the 1970s much as U.S. Intelligence under-estimated all Soviet quantitative strategic deployments through the 1960s.

2. Most U.S. strategic bombers are likewise, even now, vulnerable, and by 1985 all will be vulnerable, due to relentless Soviet advances simultaneously in SLBM and air defense capabilities. Already about 70 percent of our bombers are vulnerable on the ground, and the initially survivable 30 percent on alert face ever diminishing prospects of penetrating the already quite formidable and improving Soviet air defenses.

3. The Carter Administration concedes that our ICBMs and bombers are already vulnerable. With two legs of our strategic Triad now almost totally vulnerable, the vulnerability of our strategic forces is at an all-time high. Indeed, our command and control systems are also unprecedentedly vulnerable. We are clearly facing a window of vulnerability, which provides the Soviets with irresistable geopolitical opportunities. Our most urgent objective therefore should be to enhance the number and capabilities of our survivable strategic forces.

4. Due to the dangerous erosion of ICBM and bomber survivability, we are now and will continue throughout the 1980s to be unduly reliant on the third leg of our Triad, sea-based SLBM force, for most of our deterrence.

5. The SLBM leg of the Triad should therefore be enlarged and made as survivable as possible. But instead of increasing the size of the SLBM leg, the Carter Administration is actually reducing this crucial leg by deactivating ten Polaris submarines with 160 SLBMs. One quarter of our sea-based megatonnage, is being deactivated. This is a strategic force larger than either the entire British, French, or Chinese strategic forces.

The survivability of our submarine missile force is a function of several factors: number of submarines deployable, number of missile launch tubes, range of missiles, quietness, speed, and depth of patrol. But our missile sub fleet is deficient in all categories except quietness, as compared to the Soviets.

6. In addition, President Carter has consistently refused for four years to deploy the Extremely Low Frequency (ELF) submarine communications system. ELF would greatly enhance the survivability of all our missile (and attack) submarines. At present our subs are vulnerable to Soviet detection and destruction because they must patrol near the surface in order to stay in communication. ELF would allow them to patrol fast and deep under full national control. The vital ELF submarine communications system could have been operational by now. Instead, our reduced SLBM force still remains dangerously vulnerable to detection and destruction.

7. For the last 13 years, we have had 41 ballistic missile submarines with 656 SLBMs. But because of Polaris deactivation we now have only 31, with only 496 milliles. These are our lowest force levels since 1964, dangerously increasing force vulnerability. In contrast, the Soviets have over 90 ballistic missile submarines carrying over 1,000 nuclear missiles. Our long delayed first new Trident submarine will not be operational until early 1982, and the second Trident will not be ready until late 1982, so we are prematurely deactivating all Polaris subs well before they can be replaced. Moreover, we will be at greatly reduced sub and SLBM levels for a significant period, for over three years, from 1980 to beyond 1983.

8. While it is true that we are increasing slightly the number of warheads carried on remaining Poseidon subs, we are also reducing the number that will be carried on Poseidon subs retrofitted with longer-ranged Trident I missiles. These factos offset each other. Moreover, the increased range of the Trident I missiles will not significantly enhance overall, force wide survivability until well after 1983, when all 12 retrofitted Poseidon subs will be operational with this missile. Thus each of our remaining 31 subs is a much more lucrative target. Instead of the 656 SLBMs we have had for 13 years, we now have less than 400 SLBMs deployable and available for patrolling. The fact that many subs are off-line is due to the concurrency of Trident I missile retrofits, normal ship overhauls, and deactivation of the Polaris fleet prematurely before any Trident subs are available. Of these 400 SLBMs currently deployable, only about 50 percent reportedly are at sea patrolling at any one time. Thus by drastically decreasing our number of deployable submarines, deployable SLBMs and warheads, and by failing to build ELF, the Carter Administration has dramatically reduced SLBM survivability. Even counting the few new Trident submarines available after 1983, we are putting more nuclear eggs in fewer baskets. We are loading somewhat more warheads onto a significantly smaller force. Finally, while Navy spokesmen concede all the above points publicly, they claim that SLBM force reductions can be temporarily compensated for by our ICBM and bomber forces. But we have already seen that these forces are themselves also unprecedentedly vulnerable.

9. Even more dangerously, only about half of the small number of about 200 SLBMs on patrol reportedly may be able to receive communications at any one time. So our actual deterrent now may consist of possibly less than about 25 percent of our already reduced deployable SLBM force, or only about 100 SLBMs on patrol able to receive communications. Of these 100, about half are reportedly under control of NATO, and are thus dedicated to targets in the Warsaw Pact. So our real strategic deterrent may be more like only 50 SLBMs, only three boat loads on patrol.

10. But the Soviets reportedly are spending about three times more than the United States on Anti-Submarine Warfare (ASW), and they have well over twice as many attack (ASW) submarines as the United States. These 50 SLBMs probably constituting our actual strategic deterrent could therefore suddenly become vulnerable to an unanticipated Soviet breakthrough in ASW, one that we would be unlikely to be able to detect.

In sum, the entire U.S. strategic deterrent could soon be vulnerable, and worse, we might not even know until it was too late to react. Given the inherent difficulty of estimating Soviet ASW capabilities and the clear record of U.S. Intelligence underestimation of the Soviet threat for over 20 years, we simply cannot affort to risk our national security by allowing all of our strategic forces to be so unprecedentedly vulnerable. Without even considering President Carter's cutbacks in our strategic forces, to be discussed below, it is clear that Carter has allowed an extraordinarily dangerous deterioration in our posture.

Why? President Carter stated emphatically in January 1979 that all America needs for deterrence is one single Poseidon submarine. Further, early in his Administration, Carter seriously considered whether U.S. strategic forces could unilaterally be reduced to very low levels, such as to only 200 warheads. This is about as many warheads as are carried on one Poseidon sub. Moreover, most of his top arms control advisors are known to favor a U.S. strategic posture of "minimum deterrence." Deployed against over 5,370 Soviet strategic missiles and bombers and almost 20,000 Soviet warheads, one Poseidon submarine with 16 missiles would adequately fulfill President Carter's vision of minimum deterrence. But minimum deterrence is a dangerous posture for any nation. It is untenable for a nation which has assured many allies of the protection of the American "nuclear umbrella."

SALT II constrains the U.S. much more than the Soviets

We cannot avoid facing the facts that under SALT II the Soviets by 1985 will achieve complete strategic superiority and a dangerous first strike capability. But while SALT II would not prevent Soviet superiority and will allow the continued development

[4] The Washington Post, 9 December 1979, "How We Spy on the Russians and Monitor SALT," by Nicholas Daniloff.

[5] See Strategic Review, Winter, 1979, "The Legacy of SALT I: Soviet Deception and US Retreat," by David S. Sullivan, p. 29.

of their dangerous first strike capability, it in fact would constrain the U.S. ability to cope with that threat, both directly and indirectly. The more important question, therefore, is how SALT II constrains U.S. strategic programs. No experts have yet adequately exposed how dangerously SALT II hinders U.S. programs.

Our most serious strategic problem is the vulnerability of our ICBM force. Yet the best option for preserving the survivability of our ICMBs—anti-ballistic missile (ABM) defense of ICBM silos—is precluded by the constraints in the recently extended 1972 SALT I ABM Treaty. In fact, the U.S. ABM program, which consisted of four sites planned or under construction in 1972, has been abandoned, largely because of the ABM Treaty. It is clear that even a limited two site ABM system defending U.S. ICBMs would have hopelessly confounded Soviet counterforce strike planning, yet even this was prohibited by the terms of the SALT I ABM Treaty.

In 1972, the United States actually had a two site ABM system for ICBM defense under construction with two more planned, but the terms of the ABM Treaty required us to dismantle one of the sites under construction. Then in 1974, the Protocol amending the AMB Treaty limited the United States and the U.S.S.R. to only one site each.

After 1974, we were left with an allowed level of only 100 ABM launchers at our one site, a non-optimal number. And the terms of the ABM Treaty prevent us from deploying mobile ABMs capable of defending our new mobile MX ICBM. But in 1976, we unilaterally deactivated completely even our one allowed ABM complex.

The ABM Treaty in effect destroyed all political support for any American ABM capability whatsoever. Thus the ABM Treaty has ruled out both fixed and also even mobile ABM defenses of our ICBMs.

As noted above, the second best option to make our ICBMs survivable is to use deceptive basing or mobility. Yet both the "shell game," multiple protective structure, deceptive ICBM basing mode and the truck mobile basing mode are precluded under SALT II. The option of using existing Minuteman ICBMs in a "shell game" vertical protective structure deceptive basing mode in existing Minuteman deployment field is:

Technically most feasible;

Most survivable;

Least costly;

Least disruptive environmentally and politically;

Could be begun immediately and completed much more rapidly than MX as currently envisioned;

And, was in December 1978 the first choice of the Air Force, especially because the new MX ICBM could also be made compatible to eventually replace Minuteman.

But SALT II prohibits new fixed ICBM launcher construction or their relocation, which is what the Soviets quite reasonably interpret MPS deployment to entail. This means that truck mobile ICBMs are the only option left.[6] Yet all mobile ICBM deployment and even testing is prohibited by the Protocol until after 1981. But by then, the Soviet counterforce threat of the our ICBMs will already have long been total, and it may well be too late to make our ICBMs survivable.

[6] Summit Statement of Soviet Defense Minister Dmitri Ustinov, June 1979, Wall Street Journal, June, 1979.

Thus we have allowed SALT II to paint us into a dead-end corner. SALT II allows the already dangerous Soviet counterforce threat to our forces to grow, but blocks all U.S. options for making our own forces survivable. This is an absolutely absurd result for a negotiating process which was intended at its outset to ensure the survivability of U.S. forces.

We should also recognize that the MX mobile ICBM is not a panacea. It is important, but it is only a long-term solution to our ICBM survivability problem. But there are four caveats here even. MX will not become operational in even small numbers until 1986 at the earliest, well after SALT II's ostensible limits on Soviet ICBM fractionation expire, and will not be fully operational and thus fully effective and survivable until at least 1989. Thus MX should not really be considered a factor in our debate over the security risks of SALT II, because it will be deployed well outside SALT II's time-frame. Further, the SALT II Protocol's prohibition of mobile ICBMs and the Joint Principles for SALT II both indicated that MX is still a SALT "bargaining chip" which could easily be traded away before its initial deployment in 1986. Since vertical MPS, we have already seen the trench, race track, and now grid deployment modes. Moreover, there are severe environmental, political, survivability, and cost problems with deploying the MX, especially in the hastily devised hybrid horizontal shelter, grid mobile-deceptive mode currently in vogue. These problems could easily combine to eventually cause the United States to cancel the MX unilaterally anyway, just as the Carter Administration has unilaterally cancelled so many other strategic programs.

Finally, the Soviets have already issued several intimidating ultimata that MX in any envisioned basing mode is unacceptable, on both verification and compliance grounds. Thus those who believe that MX could make SALT II acceptable are deluding themselves. With or without MX, the frightening reality is that the Carter Administration planned to somehow live with significant and unprecedented ICBM vulnerability through the late 1980s.

As noted, the Protocol constrains the two best U.S. theatre balance improvement options, SLCMs and GLCMs, while comparable Soviet theatre systems such as the SS-20 intermediate range mobile ballistic missile are totally unconstrained. Moreover, it is simply not true that U.S. cruise missile programs could not have been ready for deployment before 1981, irrespective of SALT. Office of Management and Budget documents indicate that the SLCM program was unilaterally slowed for over three years by the Carter Administration, pending the negotiation of the Protocol constraints. The production of long-ranged SLCMs also was unilaterally cutback. The GLCM program has similarly been deliberately delayed over three years for reasons related to SALT II. Our ALCM programs too were delayed over three years in order to provide for an unnecessary fly-off competition. (The fly-off essentially competed fuel tanks, since all other elements of the competing designs were the same). Thus having already slowed all our cruise missile programs for over three years in order to fit them into the Protocol, the Carter Administration argued that the Protocol does not constrain our programs. But the SLCM, GLCM, and ALCM programs all could have been deployed three years ago if we had wanted to do so.

We should recall that in 1960, the United States deployed large numbers of our first generation SLBMs and ICBMs after only three years of crash development in the late 1950s. Yet our much cheaper and less complex cruise missile programs are *still* in development after over seven years. But America remains capable of launching high priority programs for developing new strategic weapons, if there is consensus on the threat and national leadership with the will to defend our country.

The MX ICBM, also begun in 1973, has likewise been delayed and purposely constrained unilaterally by the Carter Administration to conform to the launch and throw-weight of what became the SS-19. In 1973, the MX was originally being designed by the Air Force to be a very heavy throw-weight ICBM carrying 14 warheads.[7] It is restricted now to much lower throw-weight and to only ten warheads, despite the fact that even the Soviet press still reports that it was designed to carry 14. Moreover, well over 250 MX ICBMs were originally planned by the Defense Department for deployment. What has not been sufficiently realized is that in cutting back from 14 to ten warheads, we have already lost four warheads per missile. We have thus forfeited 1,000 MX warheads. Further, in cutting back from 250 to 200 MX missiles, we have lost another 500 warheads. We have thus lost a total of at least 1,500 warheads on MX. (This is a deliberately conservative estimate. The Air Force at one time planned 400 MX missiles each with 14 warheads, so the warheads forfeited could be calculated to be almost twice as high, or 2,100.)

We should also note that the MX underway since 1973 was planned for an Initial Operational Capability (IOC) in 1983 or even earlier by the Ford Administration. But the Carter Administration has delayed the IOC by three years, until 1986.

Moreover, it is not true that the U.S. military has never wanted heavy ICBMs. Over 250 Tatan I and II ICBMs were planned by the Air Force in the early 1960s, until a civilian, Secretary McNamara cut them back to 54. Even Dr. Kissinger tried to preserve the U.S. right to 250 heavy ICBMs as late as 1970 in SALT I.

The 1200 ceiling on MIRV missiles will constrain presently planned U.S. Trident submarine deployment, despite the fact that this was a U.S. proposed limit. The 1200 ceiling will restrict us to deploying only six Trident submarines, yet at the present Trident construction schedule, the United States will have at least seven Trident submarines completed by 1985, the year that SALT II expires. But the only way we can deploy more than six Trident submarines is to dismantle some of our most modern MIRVed ICBMs or SLBMs, which we should not be forced to do.

There are even further problems with the related 1320 ceiling on MIRVs and ALCM carriers, another U.S. proposed ceiling. This problem involves the Carter Administration's concession that ALCM-equipped U.S. bombers would count within the 1320. Originally at Vladivostok, U.S. ALCM-equipped bombers were not going to be counted at all within the 1320. Despite the fact that the United States in 1975 originally planned 250 ALCM-equipped B-52s, and then later 150, we are now allowed only 120 within the 1320

[7] Soviet SALT Deception op. cit. p. 10.

ceiling. We have thus already lost a total of 130 ALCM-equipped B-52s under SALT II. Because each B-52 would carry 20 ALCMs, we have thus forfeited 2,600 ALCMs. The ultimate irony is that the Carter Administration is not even planning to have the allowed 120 ALCM-equipped B-52s by 1985, and moreover those that we will have will not even carry the 20 maximum allowed number of cruise missiles. Each ALCM-equipped B-52 will instead carry only 12 through 1985. Thus we have forfeited at least 960 more cruise missiles.

It is doubly ironic that the United States proposed on its own initiative both the 1200 and the 1320 SALT II ceilings which limit MIRVs and ALCM carriers. This is because further analysis of the combined effect of these ceilings shows that they have already impacted adversely upon long-term U.S. force plans.

Few analysts realize the magnitude of U.S. unilateral restraint already embodied in these two SALT II ceilings. In 1974, under the Ford Administration, the United States planned to build 11 Trident submarines by 1985. The 1320 MIRV launcher ceiling proposed by the United States was predicated in large part upon this U.S. plan for 11 Trident submarines by 1985. This plan would have given the United States a total of 1310 MIRVed launchers by 1985, including both ICBMs and SLBMs. The Soviets even realized this. As noted, at that time, the United States also proposed to completely exclude all our ALCM-equipped B-52s from the 1320 ceiling. Since 1974, however, because of our construction delays, funding cuts, and other U.S. SALT proposals, we have reduced our Trident plans to only seven submarines through 1985. We then proposed the overly restrictive 1200 MIRV launcher ceiling in May 1977. Further, later, in 1977, we strangely agreed to count all ALCM-equipped B-52 bombers within the 1320. These were major U.S. unilateral reductions and concessions, which seriously degrade our forces. But we neither even asked for not received any quid pro quo in Soviet restraint.

Moreover, the Carter Administration was unilaterally deactivating all ten of our Polaris submarines beginning this year. These ten submarines carry a total of 160 missiles with 160 clustered warheads. So we are forfeiting still more of our strategic power at the very moment the Soviet strategic threat is at its gravest menace ever.

What are the combined results of these U.S. cutbacks and concessions? We have thus lost 5 Trident boat-loads of MIRVed SLBMs, or 120 SLBMs, 10 boat-loads of Polaris SLBMs, or 160 SLBMs, and 130 ALCM carriers. Assuming that we should not have to deactivate any MIRVed ICBMs or MIRVed SLBMs, the combined effect of the 1320-1200 ceilings and unilateral U.S. constraints in force planning has therefore already deprived the United States of 120 MIRVed SLBMs, 160 un-MIRVed SLBMs, and 130 ALCM-equipped B-52s. Counting at least 50 more cancelled MX ICBMs, and 250 cancelled B-1 bombers, we have thus already lost a total of 710 delivery vehicles.

Here are our forfeited delivery vehicles:

	Vehicles
SLBM's on 5 delayed Trident submarines	120
SLBM's on 10 deactivated Polaris submarines	160
ALCM carriers, B-52's for eventual deactivation	130
MX ICBM's canceled	50
B-1 bombers canceled	250
Forfeited delivery vehicles	710

U.S. MIRV and ALCM forces planned by the Ford Administration before Vladivostok in 1974 for 1985 have thus been vastly cutback by SALT II constraints and by U.S. unilateral restraint. Since 1974, the SALT process and U.S. unilateral restraint has cost us well over 6,000 warheads which we would otherwise have had by 1985.

Here is a summary of our already forfeited warhead total, which we would have had in 1985 under the Ford plan:

	Warheads
On down-loaded and fewer MX	1,500
On 5 delayed Trident submarines	960
On 130 dropped ALCM-equipped B-52's	2,600
By not maximizing planning B-52 ALCM loading	960
On deactivated Polaris	160
Forfeited warheads	6,180

The B-1 bomber force of 250 was planned to carry 5,000 more ALCMs, and be additive to B-52 ALCM carriers, so the forfeited warhead total could be almost twice as high, or 11,180. This is the high cost to U.S. national security of putting arms control negotiations at a higher priority than sound defense planning. We have unilaterally cutback over 710 strategic delivery vehicles and well over 6,000 warheads, in the vain hope of reciprocal Soviet restraint.

But, at the same time, the Carter Administration openly conceded that under the 1200 MIRV ceiling, the Soviets will be able legally to add at least 6,000 new warheads by 1985.[*] Indeed, there is reason to believe that the 1320 ceiling actually accelerated Soviet plans for MIRVed SLBMs at the time of Vladivostok in November 1974. Further, the Soviets can be expected to add many more than 6,000 warheads by exploiting all their options. They will probably add at least about 8,000 warheads merely on SALT accountable launchers to reach over 14,500 by 1985.

Summary of Carter's strategic cutbacks

Since 1974, the Soviets have reportedly been adding an average of about 1,000 new warheads to their strategic forces each year, a rate which will continue through 1985.

But under the strategic program of President Carter since 1977, no additional U.S. strategic warheads have been added. Indeed, our warhead level has been frozen until this year, when Carter began deactivating Polaris submarines. The strategic forces of the United States have been cutback by over 6,000 fewer warheads and 710 fewer delivery vehicles by 1985 than were planned by the Ford Administration. And those thousands of additional warheads under the Ford plan would have been carried by the most modern of our strategic delivery systems.

Here is a recapitulation of the Carter strategic cutbacks, which has entailed unilateral disarmament:

President Carter killed the B-1 bomber, acknowledged by our military leaders as the best penetrating bomber in the world, while the Soviets are mass producing the intercontinental Backfire bomber and are reportedly developing three new bombers. Several squadrons of B-1s could have been operational by now.

Carter cut funding and delayed development and deployment of the MX ICBM by over four years, and reduced the number of missiles and warheads, while the Soviets are developing five new lethal ICBMs with many warheads each.

Carter delayed air, ground, and sea-launched cruise missile development and deployment by four years, while the Soviets are developing two new types of cruise missiles and have had many types operational for over 20 years. Carter cancelled the ALCM A deployment program entirely.

Carter delayed Trident submarine construction for over four years and cut the building rate by one third, while the Soviets have had the equivalent to the Trident I missile operational since 1973.

Carter refused timely development of the Trident II missile to maximize the capabilities of the expensive Trident sub, while the Soviets are producing two types of new SLBMs and developing two others.

Carter terminated Minuteman III ICBM production, while the Soviets are currently mass producing eight types of ICBMs.

Carter cancelled plans to deploy 50 additional MIRVed Minuteman III ICBMs, and has actively opposed plans to deploy 100 extra MIRVed Minuteman III missiles, while the Soviets have been deploying over 200 new MIRVed ICBMs each year.

Carter actually destroyed or dispersed the tooling for the Minuteman III production line, the only ICBM production line in the Free World, requiring over four years to resume production.

He ended Minuteman II ICBM modernization, while the Soviets are modernizing all of their single warhead ICBMs.

He ended the production of the Short Range Attack Missile (SRAM), while the Soviets continue to produce similar missiles.

Carter unilaterally deactivated 400 nuclear armed Hound Dog stand off bomber missiles used with the B-52 in 1979, while the Soviets have kept similar missiles in service.

President Carter cancelled the neutron warhead (bowing to Soviet propaganda), cancelled the Lance I missile, negated Lance II, delayed GLCM and SLCM, while the Soviets have opened a two to one superiority in Theatre Nuclear Forces by deploying their SS-20, other short range missiles and new fighter-bombers.

Carter unilaterally withdrew 1,000 U.S. nuclear warheads from Europe, at a time when the Soviet theatre nuclear buildup was accelerating.

Carter opposed ELF submarine communications to enahance SLBM survivability, when the Soviets may have such a capability themselves.

Carter unilaterally deactivated 160 Polaris SLBMs, while the Soviets keep their own obsolete subs and missiles.

He opposed for three and one half years even minimal U.S. nuclear testing and building minimal nuclear weapons production facilities, while the Soviets have been testing and building nuclear weapons at an unprecedented rate.

Under President Carter, our strategic posture has suffered severely. As even Joint Chiefs of Staff Chairman General Jones conceded in June 1980, "Senator Tower, I don't think there is any question but that we are worse off today than we would have been had we had these programs." Thus President Carter is directly responsible for U.S. strategic inferiority and American loss of "essential equivalence" to the Soviets.

With these facts exposed, which side is engaged in an "arms race?" The United States

[*] SALT II Questions and Answers, The White House, Spring, 1979.

has long exercised deliberate, unilateral restraint, but the Soviets have just kept right on building for over 17 years since 1963. There is in fact no "arms race," because the United States have been moving backwards.

The Carter Administration therefore acknowledged that the Soviets will be able to continue their massive MIRV buildup through 1985 completely within the 1200–1320 ceiling. But it is self-defeating that these U.S. proposed 1200–1320 ceilings have already resulted in depriving the United States of about as much strategic capability as the Soviets are allowed to add.

To re-emphasize, under these SALT II 1320–1200 ceilings, we have already forefeited over 6,180 warheads and 710 delivery vehicles, while the Soviets can still add over 6,000 warheads.

But we will also still have to dismantle some MIRVed ICBMs or MIRVed SLBMs anyway if we want to deploy our 7th and 8th Tridents in 1985, or more than 120 B–52 ALCM carriers. Indeed, we may have to dismantle as many as 65 existing MIRVed missile launchers by 1985 in order to deploy our 7th and 8th Trident submarines. If these 65 launchers turn out to be Poseidon SLBM tubes, they would carry about 650 warheads. This could put the U.S. warhead forfeiture total at over 6,830. It is therefore shocking that both these 1,320–1,200 U.S. proposed ceilings actually significantly constrain previous and present U.S. force plans, but not Soviet plans. The Soviets are still building up to the 1,200 MIRVed missile ceiling, which is fully consistent with their future MIRVed missile plans.

In contrast, by deactivating 160 Polaris tubes, under SALT II the United States will never even reach our allowed SALT II level of 2,250 delivery vehicles, which the Soviets have long been well above. The Soviets now have well over 2,650 SALT accountable delivery vehicles, compared to only 1,865 for the United States. Even if the Soviets come down to 2,250 by 1981, the United States will never go up to 2,250. Is this parity or equality in the aggregate ceiling, especially considering the fact that the Soviets have about 2,720 non-SALT accountable, second line strategic delivery vehicles?

Paradoxical SALT intelligence estimates

There are two other important contradictions that relate to SALT II's constraints on U.S. programs in the arguments used by the Carter Administration in its defense of SALT II. First, the CIA has publicly estimated that SALT II will not result in any significant reduction in Soviet defense spending. SALT II will change Soviet defense spending only a miniscule 1.5 percent through 1985, according to the CIA.[9] This clearly implies minimal additional strategic spending by the Soviets in the absence of SALT II. Nevertheless, despite this estimate, the Carter Administration continues to argue that SALT II will prevent the Soviets from adding about 1,000 additional missile launchers.[10] This was the same fallacious overestimate agrument used to justify SALT I by claiming an ostensible constraint on the Soviets. In 1972, the Nixon Administration claimed that there would be 1,000 more Soviet ICBMs without SALT I.

There is an obvious contradiction between the economic estimate that the Soviets will not spend much more on strategic forces in the absence of SALT II, and the concurrent deployment overestimate that they would build about 1,000 more missiles without SALT II. A thousand Minuteman ICBMs cost the United States over 30 billion dollars to procure, and would cost the Soviets at least that much. The Administration must believe that the many projected new missiles and launchers would be extraordinarily cheap. Either CIA's estimate of future Soviet defense spending is wrong, or SALT II's constraints on Soviet programs are illusory.

Moreover, we need to ask why the Soviets might want to build 1,000 more new missiles in the first place, when they are already allowed clearcut superiority fully within SALT II's terms and have major forces exempted. And the Soviets are already spending over 13 to 16 percent of their much smaller Gross National Product on military programs. Their economy is already on close to a wartime footing, and there is very little room for more Soviet spending to finance additional strategic forces. Having already programmed strategic superiority within SALT II, they do not need any more strategic forces in any case.

Secondly, Defense Secretary Brown has argued publicly that SALT II will save the United States about 30 to 100 billion dollars in strategic spending over the next ten years. But Secretary Brown also argues that no U.S. strategic programs are constrained by SALT II, and all can go forward as presently planned. How can SALT II save us money while allowing us to go forward with our programs? It is only because we have already unilaterally cutback our progams drastically to fit below the SALT II ceilings. This kind of paradoxical argument begs the question of whether the Carter Administration ever planned to do what is necessary to counter the Soviet strategic threat, irrespective of SALT II. We thus evidently hope to use SALT II to aid us in avoiding measures to offset the threat. But we have already allowed Soviet superiority within SALT II. And we have already shown the alarming degree to which we have unilaterally reduced our own programs since 1977 in anticipation of SALT II.

These two Carter Administration arguments are therefore mutually contradictory. The Administration has unwittingly put itself into the untenable position of arguing that SALT II constrains Soviet programs but not Soviet spending, while simultaneously arguing that SALT II does not constrain U.S. programs but does constrain U.S. spending. This is the height of illogic, and it is contrary to all the evidence and analysis above. The truth is that SALT II constrains both U.S. programs and U.S. spending, but neither Soviet programs nor spending. The Soviet negotiators were wise and stubborn enough to make certain that their pre-existing and ambitious long-term plans were either exlcuded from SALT II provisions or already consistent with all SALT II ceilings. The U.S. negotiators, on the other hand, unilaterally constrained our forces and then cut them further to fit will beneath the SALT II ceilings.

SALT II codifies Soviet superiority

To sum up, SALT II's significant constraints on vital U.S. options and force levels alone made it intolerable. The facts that SALT II contains so many unilateral advantages for the Soviets, has so many ambiguities, loopholes, and exclusions, all favoring the Soviets, does not contain agreed qualitative missile baseline data, is largely unverifiable, does not constrain Soviet programs, and allows legal Soviet superiority by 1985, combine to make the Treaty anathema.

The fatal flaws of SALT II merely reflect and codify the shifting strategic balance. The strategic balance has already shifted against us long ago during the 1969–1979 SALT decade. Since 1969, the Soviets have added over 1,000 new operational missile launchers and over 250 Backfire bombers, while the United States has maintained a constant but lesser number of missile launchers and has deactiviated over 250 B–52 bombers. The Soviets are now far ahead of us in missile launchers and bombers. By about 1981, the Soviets will also have added over 6,000 warheads, and will have overtaken the United States in warhead numbers and accuracy by 1985. Because most Soviet warheads are large and are on accurate ICBMs, they are much more lethal. Well before 1985, they will be ahead in all strategic measures. The shifting strategic balance makes SALT II unenforceable, even if it were verificable, which it is not. The shifting balance also will reduce U.S. bargaining leverage in any SALT III negotiations.

This Soviet thrust to strategic superiority has been expensive. Since about 1969, the Soviets reportedly have also spent a total of over $100 billion more than the United States on strategic forces, a yearly investment rate of 250 percent more than the United States. The Soviets have spent over $250 billion more than the United States on defense since 1969. While the Soviets spend more than 16 percent of their much smaller Gross National Product on defense, the United States spends only 5 percent. Of this small fraction, the United States spends only a miniscule .005 percent of our GNP on strategic forces.

In sum, fully within the terms of both the SALT I and II agreements, the Soviets have managed first to quadruple and then even to quintuple their counterforce threat to U.S. ICBMs, while removing the best U.S. option to redress their counterforce threat—ABM defenses of ICBMs and mobile ICBMs. The SALT I agreements were not a good bargain. Resting upon this unsound foundation, the SALT II Treaty is likewise even more dangerous to us, because it allows the Soviets to continue building precisely the types and numbers of strategic weapons capable of completely defeating our deterrent strategy.

In May 1972, a significant U.S. unilateral statement said that a permanent offensive limitation treaty would have to be reached in five years, by 1977. We went on to say that if a severe threat to the survivability of our strategic forces developed in the meantime, this could consitute grounds for abrogation of both the SALT I agreements—the ABM Treaty and the Interim Agreement—on the basis of jeopardy to our supreme national interests. Moreover, the Jackson amendment to SALT I of 1972 called for equal force levels in SALT II. This meant equality in throw-weight and heavy missiles in SALT II. The Jackson amendment re-emphasized that failure to constrain the Soviet threat to the survivability of our forces in SALT II would make such a treaty unacceptable.

SALT II clearly does not meet these fundamental U.S. SALT II objectives as established in 1972.

SALT II does not provide equality in either numbers of delivery vehicles, numbers of warheads, counterforce capability, heavy missiles, or in throw-weight. SALT II does not help our survivability problem.

[9] CIA, *Estimated Soviet Defense Expenditures, 1978–1985*, unclassified, June 1978.
[10] *Op. cit.* #8.

Indeed, it allows the Soviet counterforce threat to grow and it hinders the solution of our vulnerability problem. SALT II has further jeopardized our supreme national interests. Therefore, SALT II must be rejected. Further, the SALT I ABM Treaty must be modified to allow mobile ABMs or be abrogated, and U.S. compliance with the SALT I Interim Agreement should be abandoned.

U.S. failure in long-term strategic planning

A fundamental U.S. problem has been our failure to accomplish effective long-term strategic planning. The unfavorable strategic trend has been well recognized for well over five years, but nothing was done to reverse it. This is partly because we have a "rolling" five year defense plan which is never fulfilled—a new long-term plan each year. In practice, due to the Congressional appropriations cycle, this becomes a one-year, short-term plan. Moreover, the difficulties of U.S. short-term planning are compounded by our documentable tendency noted above to accommodate our own defense plans to our own or to Soviet SALT proposals. This U.S. behavior can be termed "pre-emptive compliance." It is a form of unilateral disarmament, and it has exacerbated the already noble U.S. unilateral restraint in new strategic launcher deployments since 1967. Another problem is the tendency to assume that detente in general, and arms control in particular, will solve our strategic deficiencies. This has proven a wholly unrealistic basis for national security policy.

Predominance of the Soviet military

The Soviet military, in contrast, carefully controls all Soviet defense planning, which is long-term and rather rigid. The Soviet five year defense plan entails long-term commitments, and it is not readily altered. The Soviet military's dominance of defense planning also gives them the decisive role in Soviet SALT decision making. The practical effect of the political power of the Soviet military in both defense planning and SALT decision-making is that arms control takes second place to Soviet defense plans. Restated, the Soviet military formulates its defense plans many years in advance, and then carefully negotiates the terms of SALT agreements to protect from constraint the ongoing strategic programs to which they are committed.

Declining U.S. bargaining leverage

Another U.S. handicap is the fact that the U.S. has always been the diplomatic demandeur in the SALT process; we initiated the entire process and over the years we have made most of the concessions and accommodations. As the strategic balance has shifted against us, we have lost bargaining leverage in SALT negotiating, and enforcement leverage in SALT compliance. Our primary motivation for SALT has been to try to use the process to solve bilaterally what is rather really a unilateral strategic problem: The growing vulnerability of our ICBMs and other strategic forces in the face of the expanding Soviet counterforce threat. But it has proven futile to try to constrain the Soviets instead of building up our own strategic forces to maintain at least parity. SALT I did not constrain the Soviets, and SALT II will not either.

It is clear that arms control negotiations have not solved the U.S. vulnerability problem; only unilateral strategic programs will protect our national security. Indeed, even sound arms control arrangements will be dependent upon our doing for ourselves what is necessary. Otherwise there will be no Soviet incentive to negotiate. Experience shows that the Soviets will use the SALT process to improve and maximize their own strategic advantages. The violations of SALT I and the flaws of SALT II show that they play SALT to win significant unilateral strategic advantages. They stubbornly seek to constrain or delay U.S. strategic programs, while advancing their own.

The opening threat window

The danger of the impending unstable strategic balance is finally becoming well understood and of increasing concern in the United States. As noted above, most strategic experts agree that the U.S. land-based missile force is even now dangerously vulnerable to a Soviet counterforce first strike. Equally severe vulnerabilities also exist, however, in our bomber forces, warning systems, command and control systems, and even our submarine forces. The threat of the Soviet counterforce capability has opened a destabilizing "window of vulnerability" on the United States, and this Soviet capability has profound geopolitical significance. To make matters even worse, the Soviets will easily be able to gain overall strategic superiority before 1985, fully within the terms of SALT II. Moreover, the Soviets have already achieved clear theatre nuclear and conventional superiority against NATO, and are rapidly approaching naval supremacy as well.

Need for new U.S. strategic doctrine

U.S. foreign policy has always placed heavier reliance on strategic forces than Soviet foreign policy. Indeed, flexible response and extended deterrence, still our ostensible strategic doctrines, have always required U.S. strategic superiority in order to control escalation and be credible. But with U.S.-Soviet strategic parity having declined for parity to first sufficiency, then to strategic inferiority, then to essential equivalence, we must rethink our entire strategic and military doctrine.

One of the problems is that American defense planners have not realized that all U.S. military strategy is still predicated upon our original intercontinental strategic superiority. This superiority long deterred war not only at the intercontinental level, but also at the theatre nuclear and conventional levels. NATO's flexible response nuclear strategy, designed to offset the continuous Soviet conventional superiority through nuclear escalation dominance, is still based upon the presumption of both U.S. theatre nuclear and intercontinental strategic superiority. But U.S. ssperiority is gone at all three levels—intercontinental, theatre nuclear, and conventional. The deterrent credibility of the U.S. "nuclear umbrella" over our NATO, Middle Eastern, and Japanese allies is now understandably being questioned. Because U.S. strategic doctrine is still essentially predicated upon the assumption of U.S. superiority, however, we can conclude that Mutual Assured Destruction (MAD) and "Flexible Response" are obsolete strategies. We can conclude that we have no military strategists worthy of the name. Formulation of new U.S. strategy is long overdue, but the fiscal year 1980 Defense Department report's "countervailing strategy" is only a first and unsatisfactory step in this direction.

One concept for a new U.S. strategic doctrine might be "assured surviving counterforce." But such a strategic doctrine requires more surviviable and more lethal strategic forces, which are not now even being programmed. It also requires a rethinking of the entire U.S. strategic posture.

The purposes of U.S. strategic doctrine should be reformulated to transcend mere deterrence. Mutual Assured Destruction is a long obsolete, unfounded, and totally inadequate objective. U.S. stragegic forces should instead be designed for multiple purposes, such as:

To pose a severe counterforce threat to the Soviets;

To create uncertainty that possessing a counterforce capability, the United States might strike first;

To be able to control escalation at each level in general nuclear war;

To control escalation in limited nuclear war;

To possess selective nuclear options for different geographical areas with different levels of intensity;

To ease deterrence of theatre nuclear war and conventional war by reestablishing the credibility of the U.S. nuclear umbrella; and

To be able to actively defend U.S. strategic forces from a Soviet first strike and assure their survivability.

Achievement of these purposes would in effect re-establish U.S. strategic superiority, thereby enabling the United States to tolerate imbalances at the theatre nuclear or conventional levels. "Assured surviving counterforce" would be a good way to describe such a new doctrine, but much work needs to be done in conceptualizing, formulating, and refining it.

Rapid force improvements

Some strategic experts believe that with or without ratification of the SALT II Treaty, there is little that the United States can do between now and 1985 to avoid the destabilizing dangers of strategic inferiority to the U.S.S.R. The Carter Administration created the 1980-1985 window of vulnerability, and then planned to accept if for the entire decade of the 1980s. The Strategic Alternatives Team's book, Strategic Options for the Early Eighties: What Can Be Done? edited by W. Scott Thompson and William Van Cleave, (National Strategy Information Center, Inc., 1979), however, provides the analytical basis for a different view. The Strategic Alternatives Team believes that there is ample evidence to reject the notion that there is little that can be done in time to arrest the strategic pendulum and swing it back to equilibrium. The book sets forth several options for quickly correcting the deficiencies of our strategic nuclear forces.

As noted, the Soviet ten year investment advantage in strategic forces alone is over $100 billion since 1969. If only a fraction of this were invested by the United States, it could easily restore equilibrium to the overall military balance by about 1983. The irony of the U.S. strategic decline is that the United States is still the world's leading technological, industrial, and economic power. As noted, in 1960, we deployed massive missile forces after only three years of R & D. If the American people understood the grave threat, and developed the national political consensus, we could gain readily concentrate more resources upon strategic forces to capitalize on our national advantages, and simultaneously enhance deterrence of lower level conflicts. The funds required are very small, compared to the Soviet outlay, the danger, and the huge American Gross National Product.

In sum, the massive Soviet buildup of military forces has compelled us to find effective strategic solutions much more rapidly

and vigorously than planned. We need both rapid force improvements and long-range programs. While the MX ICBM, ICBM, ALCMs, and the Trident submarine and missiles are necessary for our future security, they are all nevertheless long-term programs for the mid and late 1980s not relevant to what has become a near-term period of grave national peril. Our past inadequacies in planning have created an immediate security gap. As the fiscal year 1981 military posture statement recognizes, most of our strategic modernization programs now underway will not be completed until very late in the 1980s, if even by then, but meanwhile, our threat window of dangerous vulnerability is 1980 to at least 1986 and beyond. Already, each leg of the strategic triad is unacceptably vulnerable, the Soviets will have overall strategic supremacy, essential equivalence will have been absent since 1977, and we will have only a minimum deterrence posture relying on a few patrolling submarines. At a minimum, we must accelerate our MX, ALCM, and Trident long-term modernization programs.

But at the same time and without disrupting the acceleration of our long-term programs, it is on near-term, "quick fixes" that we must concentrate. Some criteria for evaluating our rapid force improvement options should be:

Strategic and political soundness;
Crisis stability;
Improved survivability;
Countering a Soviet capability;
Allied support;
Relative cheapness;
Technical and operational feasibility;
Re-utilizability of previous R & D investment and existing industrial capability; and,
Achievable quickly, by 1982-83.

We can no longer continue to allow the better long-term options to drive out the merely good short-term options, because our strategic situation is growing desperate. Of the above criteria, survivability and quick achievement are the most crucial. The strategic triad is the core of our entire military posture of deterrence, and it provides redundancy by design. We must quickly provide for the short-term survivability of each element of our triad as a top priority, no matter what the cost. What we need are survivable strategic forces which are at least equal in number and capability to Soviet forces. If any of the most attractive "quick fix" options are in conflict with the SALT II Treaty or the SALT I ABM Treaty or the SALT I Interim Agreement, then the Soviets have forced us to seek a way to modify both Treaties to accommodate our vital national security requirements.

Our objective should be to thoroughly frustrate Soviet conterforce capabilities. Thus we need to proliferate lauch points, increase mobility, increase CN[3] survivability, add active defense, and increase readiness.

But even before most of our quick fix or long-term options can be achieved, we need urgently to increase our capability to produce and test nuclear warheads. We simply must completely upgrade our nuclear weapons complex, at a cost of over 5 billion dollars.

The following listing assembles our most reasonable and attractive rapid force improvement options, which have been carefully selected because they meet most of the above criteria. They are listed in order of priority.

ICBM Rapid Improvement Options

1. Rebasing part of our Minuteman III ICBM force immediately in new vertical multiple protective structure silos. Further, some extra Minuteman ICBMs could also be deployed in a truck mobile, garrison-based mode, able to scramble on our interstate highway system with 12 hours of strategic warning, Initial Operational Capability (IOC) by 1982.

2. Accelerate MX ICBM development, to deploy MX to replace Minuteman in vertical MPS, possibly with "split basing," IOC by 1983, Full Operational Capability with 400 missiles and 4600 MPS by 1986.

3. Develop zero CEPs for Minuteman and MX, IOC by 1983.

4. Accelerate air-borne launch control system and batteries, and add to entire force, IOC by 1982.

5. Accelerate mobile ABM R & D. Abrogate the SALT I ABM Treaty, and deploy mobile, hard site ABM defense of Minuteman and MX in vertical MPS or grid, IOC by 1983.

6. Start a massive, Manhattan-project style program to deploy a spacebased chemical laser ABM system, IOC by 1985.

Bomber Rapid Improvement

1. Accelerate production and deployment of ALCMs on B-52s, and increase total deployment, IOC 1981, full ALCM deployment by 1983.

2. Rebase B-52s and FB-111s inland, IOC by 1981.

3. Increase B-52 alert rates, especially for those equipped with ALCMs, IOC by 1981.

4. Start immediate production of a modified, multi-purpose B-1A, including adapting Stealth techniques, IOC by 1983.

5. Mass production of both competing ALCMs, for deployment on fighter-bombers and a modified 747 Cruise Missile Carrier, IOC by 1982.

6. Accelerate production of the KC-10 tanker and accelerate KC-135 reengining, IOC by 1982.

SLBM Rapid Improvement Options

1. Proceed immediately with the austere ELF communications facility in either Wisconsin or Michigan, IOC by 1982.

2. Extend life of Polaris submarines and convert to SLCM platforms, IOC by 1981. This will increase sea-based nuclear firepower by about one third, target coverage by five-fold, at the cost of 1 Trident submarine.

3. Accelerate SLCM production for Polaris, 688 class SSNs, and deployment on all surface ships, IOC on 688 class 1982.

4. Accelerate C-4 Trident I missile production and expand retrofit to all 31 boats, full capability by 1984.

5. Accelerate Trident submarine construction.

6. Accelerate D-5 Trident II missile R & D to achieve increased accuracy capability, IOC by 1984.

7. Plan a Poseidon ship life extension program (SLEP), IOC 1984 to extend to 1995.

8. Restudy Hydra launch of ballistic missiles from surface warships.

Theatre Nuclear Rapid Improvement

1. Accelerate GLCM deployment, IOC by 1981.

2. Accelerate Pershing II, R & D and deployment, IOC by 1981.

3. Deploy ALCMs on NATO fighter-bombers, IOC by 1981.

4. Deploy SLCMs on NATO surface ships and attack submarines, IOC BY 1981.

Strategic Defense Rapid Improvement

1. Counter Backfire by increased F-15 interceptor, AWACS, and new SAM production, IOC 1981.

2. A massive civil defense program, IOC by 1981.

3. Improve strategic C[3]1, ASAT, and early warning capabilities, IOC by 1982.

Approximate costs of rapid strategic improvement options, fiscal year 1981

	Billions
ICBM:	
1. Minuteman III vertical MPS redeployment and truck mobile mode	$4.0
2. Acceleration of MX R&D	.4
3. Airborne launch control system acceleration	.5
5. Hard site ABM to defend MPS or grid MX	2.0
Reactivate Grand Forks ABM	.1
Accelerate mobile ABM R&D	.5
6. Space-based Laser ABM, Manhattan project priority	1.0
Bomber:	
1. ALCM production and deployment acceleration on B-52	1.0
2. Rebase B-52's, FB-111 inland	1.0
3. Increase B-52's alert rate	1.0
4. Immediate production of modified B-1A	2.0
5. CMC for ALCM's in mass production	1.0
6. Accelerated production of KC-10	.5
SLBM:	
1. Austere ELF	.1
2. SLEP Polaris and convert to SLCM	.3
3. SLCM production acceleration	1.0
4. Increase and accelerate Trident I C-4 retrofit	1.0
5. Accelerate Trident sub production	1.0
Total	18.4

NOTE.—Increase above fiscal year 1981 strategic budget of $12,500,000,000. Sum total of $30,000,000,000 in fiscal year 1981 for strategic forces.

SOVIET SALT DECEPTION

(By David S. Sullivan)

In the summer debate in the Senate over SALT II, much attention was focused on the issue of verification. The Members of the Senate and their staff assistants wanted to know about the capabilities of U.S. intelligence-gathering satellites and about the importance of the facilities in Iran that were lost as a result of the revolution. The Senate Intelligence Committee was asked to provide a report on the subject, which has recently been published.

In the course of this investigation, no one questioned the intentions of the Soviets or their skills in frustrating U.S. attempts at verification.

A review of the record of SALT I will show a pattern of deception by the Soviet Union, both during the negotiations and afterwards. Moreover, the deception employed during the negotiating phase of SALT I has been repeated by the Soviets during the negotiating phase of SALT II. Therefore, it is logical to anticipate continued Soviet deception during the operational phase of SALT II.

Several months ago, I released a short paper to the press and published an article in the January 1979 issue of Strategic Review describing Soviet deception during SALT I. In the course of time, the proponents of SALT II responded with rebuttals of that paper.

Unintentionally, those rebuttals amounted to indictments of the SALT I documents. Those rebuttals rested their case heavily on the point that the Soviets had noted violated the terms of the agreements. But the

lack of precision and explicitness in the terms was carefully engineered by the Soviets and constituted part of the Soviet deception. Those rebuttals ignored altogether the obvious violations by the Soviets of the intent and purpose of the agreements. To no small degree, those rebuttals amounted to apologies for Soviet noncompliance with SALT I.

There is a fundamental philosophical disagreement between the authors of those rebuttals and those who believe, as I do, that the Soviets have engaged in purposeful deception throughout the SALT process. At issue is the political significance of strategic nuclear power. Those who have defended Soviet compliance with SALT I have in the process revealed a willingness to accept the loss of strategic parity by the U.S. in favor of a posture of minimum deterrence.[1] Those of us who question Soviet compliance with SALT I believe that the U.S. should emphasize strategic power, in order to maximize U.S. technological superiority and best ensure deterrence against a nuclear or conventional attack at the theater level. We also hold that if U.S. strategic superiority is to be abandoned forever, then the maintenance of world peace demands that the U.S. have nothing less than strict equality, precisely applied, to all strategic measures.

CONFIRMATION OF SOVIET NEGOTIATING DECEPTION IN SALT I

The crux of the case regarding Soviet deception in the SALT I negotiations can be found in the issue of the SS-99. The SS-19's deployment is one of the chief factors in the growth of the Soviet counterforce threat, because it comprises about half of this threat. The Soviet SS-19ICBM carries six highly accurate, large, hard-target warheads, and about 300 to 400 will be operational by the early 1980's. The SS-19 is thus a key U.S. national security issue. Those who assert that in May 1972 there was no Soviet negotiating deception regarding the SS-19 argue that the Soviets told us in May 1972 "quite precisely," "quite clearly," and "explicitly" about the large size and heavy throwweight of the SS-19. Ambassador Gerard Smith, for example, chief of the SALT I delegation, made this claim in a New York Times article of January 16, 1976.[2] Assistant Secretary of Defense Walter Slocombe is another who has gone to great lengths to apologize for the Soviets and to try to explain away both Soviet deception and U.S. gullibility.

THE SS-19 DECEPTION

Denials of Soviet deception fly in the face of all of the evidence. Dr. Henry Kissinger's 1972 and 1975 statements on the SS-19, cited in my original article, clearly indicate that he did not know about the large size of the SS-19 in May 1972. If, of course, Dr. Kissinger did know of the SS-19's large size in May 1972, as Assistant Secretary Slocombe claims, then Dr. Kissinger's 1972 and 1975 statements suggest that he not only misled Congress by incorrectly implying that the U.S. Unilateral definition of a heavy ICBM would bind the Soviets, but that he also knew in 1972 that the Soviets would later violate the U.S. heavy ICBM definition by deploying the SS-19. The issue thus could become the old Watergate question: What did Kissinger know and when did he know it? Mr. Slocombe's own analysis raises the unpleasant question of whether there was an attempt during SALT I to suppress critical intelligence information, a Watergate within Watergate, regarding the coverup of bona fide national security issues. Slocombe's description of the SS-19 case therefore implies a much more serious criticism of Dr. Kissinger than that he was simply duped by the Soviets and that he incorrectly assured the Congress that the U.S. unilateral heavy ICBM definition was binding on the Soviets. Slocombe's analysis implies that Kissinger knowingly misrepresented U.S. knowledge of the SS-19 to the Congress in 1972 and again in 1975. Further, Slocombe's analysis could also imply that Kissinger suppressed information on the SS-19 in order to delay widespread recognition of the true facts.

However, we need not settle these troubling questions here. There is additional evidence which shows clearly that U.S. SALT I negotiators were simply naive and did not know about the large size and throwweight of the SS-19 in May 1972.

The key lesson for us to learn from the SS-19 is that when the Soviets refuse to agree to a constraint or a precise definition, they are defending a program. Equally obvious, to claim that a U.S. unilateral statement will have a constraining effect on the USSR is foolish. Nevertheless, neither of these lessons was followed in negotiating Article IV of SALT II, as we shall see.

Ambassador Smith's *New York Times* article contains only half of an important story. Strangely, the facts have been suppressed and distorted. It is true that in early May 1972, the Soviets informally told U.S. SALT negotiators that they had two new missiles, now known as the SS-19 and SS-17, both of which were somewhat larger than the SS-11.

How much larger and how committed the Soviets were to these new missiles were the crucial questions, however. On these two key points, it is clear that the Soviets actively misled the U.S.[3] I would like to make several points to support this contention. First, the Soviets implied that the SS-19 was *not* much larger than the SS-11, when in fact they knew the SS-19 *was* much larger. By suggesting that it was not their intention to *approach the mid-point* in volume between the SS-11 and the SS-19 with their new missiles, as Smith reveals, they exploited U.S. uncertainties about the volumes of their earlier missiles as well as the complete U.S. ignorance of the volume of the SS-19, which at that point had not been flight-tested. The SS-19 had been under development since the mid 1960's; the Soviets clearly knew all along that the SS-19 was a heavy ICBM. *In fact, the SS-19's volume is closer to the mid-point between the volumes of the SS-9 and the SS-11 than it is to the SS-11's volume.*[4]

Second, the Soviets tried in May 1972 to justify their refusal to agree to a definition of a heavy ICBM by arguing that such a definition was unnecessary because both sides already knew which ICBMs were heavy and light. The Soviets said *repeatedly* in May 1972 at the Moscow Summit:

"There was no need for a definition of a heavy ICBM since *the Soviet approach fully precluded conversion of launchers for other types of ICBMs covered by the agreement into launchers for heavy ICBMs* [Article II]. It was the Soviet view that *both* sides had a *clear* understanding of what light and heavy ICBMs were and that there was no reason to believe that during the period of the Interim Agreement *this understanding would not continue to prevail.*[5]" (Emphasis added.)

This Soviet position was precisely the opposite of the true situation and a camouflage of their true intentions. They regarded the SS-19 as a heavy ICBM all along and as the prime candidate to replace the light SS-11. Hence the above Soviet statements were directly deceptive and misleading. They were a deliberate Soviet effort to circumvent Article II's prohibition against replacing light ICBMs with heavy ICBMs, and to deceive the U.S. about their intentions.

Third, the Soviets also hinted that they might be willing to agree to a total ban on any larger missile replacing the SS-11. This suggestion was, however, likewise diametrically the opposite of their true intentions, as revealed by their later large scale deployment of the SS-19. Contrary to Slocombe's account, the Soviets implied the opposite of their true plans. All three of these little-known Soviet ploys were deliberately misleading, and each constituted a negotiating deception. They comprise clearcut evidence of an active, deliberate Soviet intention to mislead.

Was U.S. intelligence deceived? In 1971, U.S. Air force intelligence warned of the likelihood that the Soviets would replace their small SS-11 missile with a much larger, heavier missile. This accurate USAF warning went unheeded, and in 1971 the U.S. intelligence community wrongly estimated that the SS-11 replacement missile would be a "new small ICBM." This judgment persisted through the May 1972 negotiations.

In the fall of 1972, even after SALT I was ratified and before the large SS-19 was flight-tested, U.S. intelligence was still wrongly referring to the SS-19 as the "new small ICBM." The SS-19 was not flight-tested until early 1973; so there probably was no feasible way that the U.S. could have known about its true size or throwweight throughout 1972.

Were senior Nixon Administration policymakers also deceived about the SS-19 in 1972? As noted, Dr. Kissinger assured Senator Henry Jackson and Congress on June 15, 1972, that: "There is the safeguard that no missile larger than the heaviest light missiles now existing can be substituted," and that we had "adequate safeguards against a substantial substitution of heavy missiles for light missiles."[6]

All policy statements to the Congress during the summer of 1972 SALT I ratification hearings are fully consistent with Kissinger's "safeguard" assurances. For example, on June 6 and July 24, 1972, Defense Secretary Melvin Laird said this about volumetric constraints on new Soviet ICBMs:

"Senator Jackson . . . I believe that any growth of light missiles, in either diameter or depth, that exceeds 10 to 15 percent would be a violation of the agreement. . . . In no case would it be possible for the Soviet Union to retrofit their SS-11 silos with a new significantly larger missile. . . . I believe that up to a 30 percent volume increase in one dimension could be possible and I believe anything over and above that would be a violation under the most liberal interpretation of the agreement."[7] (Emphasis added.)

Ambassador Smith said on June 28, 1972 to the Senate: "Well, [what] our position stated unilaterally was if they tried to deploy in SS-11 holes a missle substantially larger in volume than the SS-11, that would be considered a heavy missile and would count, and would be a violation of the nonconversion provision." When asked what the limits were on the size of new missiles, Smith then conceded, "We have no specific

Footnotes at end of article.

benchmark. I think we will have to look at what comes along." [8] (Emphasis added.)

Finally, Admiral Elmo Zumwalt advocated clearer and stricter standards. He put the following statement into the Senate Hearing's record on July 21, 1972:

"It is my view that the same 10 to 15 percent understanding . . . should be applied also to the term "significantly greater" in Unilateral Statement D [i.e., the U.S. Unilateral Statement defining the volume of a heavy ICBM as any missile significantly greater in volume than the SS-11.][9]" (Emphasis added.)

Thus any Soviet ICBM from ten to fifteen percent larger in volume than the SS-11 was to have been prohibited according to the U.S. unilateral definition as it was clearly explained to Congress. But the SS-19 turned out to be fifty to sixty percent larger in volume than the SS-11, however, and has four to five times the SS-11's throwweight.

We can therefore conclude that Dr. Kissinger, Secretary Laird, Ambassador Smith, and Admiral Zumwalt would clearly not have made these precise statements to the Congress in 1972 if they had known then that the SS-19 was in fact fifty to sixty percent larger than the SS-11 and at least 400 percent heavier in throwweight. Through a combination of our own sloppy negotiating and Soviet duplicity, the USSR was able to wrest a clear strategic advantage from SALT I. My belief is that Dr. Kissinger was duped by the Soviets and misled the Congress by implying that the U.S. unilateral definition could bind the Soviets. Although some contend that the SS-19's deployment does not violate the SALT I Agreement in international legal terms, the fact cannot be denied that it violates the Interim Agreement as it was explained to the Congress.

Further evidence of U.S. ignorance of the SS-19 in 1972 comes from Defense Secretary James Schlesinger in March 1974:

"What we were unprepared for was the enormous expansion of Soviet throwweight represented by the SS-X-19 as the potential replacement for the SS-11. Earlier versions of the SS-11 were of lesser throwweight but the SS-X-19 has a throwweight of 2 to 3 times as much as even the SS-11 Mod 3. . . . In recent years the USSR has been pursuing a vigorous strategic R & D program. This we had expected. But its breadth, depth, and momentum as now revealed come as something of a surprise to us. During the past year alone, the Soviets have tested four new ICBMs SS-X-16, SS-X-17, SS-X-18, and SS-X-19 . . . the new ICBMs are of special interest. Three of the four have been flown with MIRVs, and all of them are being designed for increased accuracy. . . . The SS-X-17 and SS-X-19 are considered as successors to the relatively light SS-11. They have from three-to-five times the throwweight of the earlier model SS-11s. . . .[10]" (Emphasis added.)

Dr. Schlesinger added in a 1974 press conference that the SS-17 and SS-19 "can no longer be treated as light missiles." Nevertheless, it took the U.S. as long as until early 1975, after the signing of the Vladivostok Accords, to raise the question with the Soviets about the SS-19 for the first time. And even then, the U.S. did not bring a charge of SALT violation; instead, the U.S. abjectly conceded to the Soviets that the SS-19 counterforce, first-strike weapon was really a light missile and not a heavy one after all. This was the surprising resolution of an issue at the core of U.S. national security.

In sum, even Dr. Kissinger reluctantly had to admit on August 12, 1979, that he had been outfoxed" in SALT I by the Soviets:

"In 1972, the Soviet Union had two missiles that we were aware of. The SS-11 and the SS-9. The SS-9 was a heavy missile. At that time, the biggest worry that we had—in fact, the only worry we had about substitution—was the emplacement of the SS-9 into the SS-11 silos, and we thought that we had sufficient assurance that the SS-9—that is to say, the heavy missile—would not be emplaced into the SS-11 silo. What we did not understand at that time *and on which we had no evidence whatever at the time, because it didn't exist,* was that the Soviet Union would construct a missile [i.e., the SS-19] which was *sort of halfway between the SS-11 and SS-9;* that is, technically it did not violate the limitations of a fifteen percent increase [i.e., silo size], . . . using all the fine points of the print, [it] was technically within the agreement. It was simply our lack of knowledge that such a missile existed or could be build. . . . I would call it *sharp practice* [i.e., by the Soviets].[11]" (Emphasis added.)

Kissinger thus explicitly conceded that he had been deceived by the Soviets in SALT I.

The CIA has concluded that "we cannot exclude the possibility that the Soviet leaders, if they believed they could succeed, would approve a program of concealment and deception designed to help gain a strategic advantage over the U.S."[12] We can now be more certain than the CIA. The Soviet leadership perpetrated the SS-19 deception, and this deception achieved a significant Soviet strategic advantage by dramatically increasing the Soviet counterforce threat. In sum, the Soviets actively misled the U.S. about the SS-19's size by suggesting that it was only slightly larger than the SS-11, and by suggesting that a large SS-11 replacement missile might be banned. They also falsely argued that there was no need for a heavy ICBM definition and that they did not intend to replace light missiles with heavy ones.[13]

Finally, we can conclude that the failure to anticipate a Soviet SS-11 replacement missile as large as the SS-19 was a massive U.S. intelligence failure as significant as the continuously worsening underestimates of Soviet strategic deployments during the 1960's.

THE SLBM DECEPTION

In addition to the SS-19 deception, the Soviets executed a quite complex deception regarding SLBMs in May of 1972. This deception consisted of four false elements:

The Soviet-proposed level of 62 submarines/950 missile-launchers was, in fact, the *Soviet planned level* for 1977, although the U.S. did not realize this. The thirty old SLBMs on nuclear H-class subs were also hidden within the 950. This, too, was not known to the U.S. in 1972.

The Soviets actively *falsified* their claim of 48 subs with 768 SLBMs operational and under construction in May 1972 in order to minimize the number of old ICBMs they would have to deactivate. The U.S. only discovered this fact in 1978.

The agreed compromise level of 740 was also probably significantly higher than the actual Soviet level, still allowing them to minimize the required deactivation.

Most significantly, the whole Soviet rationale for such a high level of 62/950 was completely undercut by the existence of the long-range SS-N-8 SLBM which existed but was not demonstrated until after the May 1972 SALT I summit.

Since that summit, the Soviets have physically concealed submarine hull sections under construction, have built dummy submarines, have camouflaged subs, and have constructed berthing tunnels to conceal them. Thus there has been active physical deception related to all SALT I submarine issues, and this physical deception clearly aided the May 1972 negotiating deception.[14]

Those who defend Soviet compliance of SALT usually concede the SLBM deception. They generally admit that Soviet SLBM deployment was not frozen, but they argue that U.S. negotiators knew in 1972 that Soviet SLBMs were not really frozen. The main supporting evidence for the judgment that 62 subs with 950 missiles was the originally planned Soviet program through 1977 comes from Ray Garthoff. Garthoff wrote that the 62/950 was the highest level estimated in 1972 for 1977, and that this level provided no real restraint. From 1969 to 1972 Garthoff was a key member of the U.S. SALT I negotiating team. He made his analysis during the period 1972-77, with the benefit of hindsight and also the freedom to criticize the faulty submarine overestimates of 1972.

More significantly, all senior U.S. officials testified to Congress in 1972 that Soviet SLBM construction would be stopped by SALT I. They argued then unanimously in Senate testimony that in the absence of the ostensible SALT I 62/950 "freeze" on the Soviet SLBMs, the Soviets could have had eighty to ninety strategic submarines by 1977. Both Garthoff and John Newhouse point out, however, that this eighty to ninety boat estimate was exaggerated and was not a national intelligence estimate.[15] It was a deliberate overestimate, concocted by the National Security Council staff after the 62/950 was agreed upon, in order to make this level look like a major constraint of about eighteen to twenty-eight boats.

Finally, it should be clear to all that the SS-N-8's long range of over 4,300 n.m. completely undercut the rationale for allowing the Soviets their SALT I superiority of twenty-one more submarines than the U.S. This rationale was the "geographical asymmetry" argument. This was a Soviet, not a U.S. argument. The long range of the SS-N-8, however, demonstrated only after SALT I was signed, falsifies the Soviet argument for allowing Soviet superiority, and amounts to another clear-cut case of Soviet deception. Dr. Kissinger's public acceptance of the Soviet geographical asymmetry argument in May and June 1972 proves that the U.S. was deceived.

Americans need to understand clearly that the negotiations have been almost exclusively conducted using U.S. data for both sides. Even the SALT II quantitative data exchange, which some think is a breakthrough in traditional Soviet secrecy, can be faulted. Judging from the Data Exchange memoranda of SALT II, the Soviets merely provided data about the numbers of their own systems which could easily have been derived from the U.S. press. It should not surprise us that these data, of U.S. origin, are consistent with the U.S. intelligence data they are used to confirm. As long as the U.S. continues to provide essentially the data on the numbers and characteristics of the weapons for *both* sides, the U.S. will be at a crippling disadvantage. The Soviets have obviously been able to exploit this wholly one-sided negotiating environment quite well. It can reasonably be argued that the U.S. should negotiate no further arms limitation agreements with the Soviets until

they provide all of their own data, especially qualitative data, in detail. Otherwise they will continue to exploit and even manipulate U.S. intelligence. The intelligence asymmetry is an extremely important Soviet advantage in the negotiations which has persisted thoughout SALT I and II.

Finally, the Soviets could be charged with still another violation of SALT I. They reportedly now have more than their 62 allowed strategic missile submarines, but Defense Secretary Laird and Admiral Zumwalt both said in 1972 that simply having, even under construction, more than 62 strategic submarines by the end of SALT I would be a violation.[16]

THE MOBILE ICBM BUILDING DECEPTION

On mobile ICBMs, the Soviets not only ignored the U.S. Unilateral Statement against mobile ICBM *deployment*, but, more important, the Soviets violated Brezhnev's pledge to President Nixon not to "*build*" mobile ICBMs. The Soviets nevertheless have "built," tested, and stockpiled mobile ICBMs—a large number, over 100 SS-16s.[17] The testing, production and stockpiling of the SS-16 ICBMs were also *thoroughly concealed*, through active Soviet camouflage.[18]

Although it may be argued that the SS-16s have not been deployed, this status is in fact even *more dangerous* than if they were overtly deployed. Deployment could now occur suddenly in a crisis and dramatically shift the strategic balance. Moreover, the mobile SS-20 ICBM launcher is *identical* to the mobile SS-16 ICBM launcher, and the missiles are so similar that it would be very difficult under any circumstance to prove that SS-16s are *not* deployed.

Further, there is still *more* evidence of deception regarding mobile ICBMs. According to Ambassador Gerard Smith, the Soviets told us in SALT I that the Interim Agreement was a freeze on "ongoing programs," and that "neither side had mobile ICBMs." The Soviets added: ". . . therefore it was inappropriate to include them in a freeze."[19] Yet, on the contrary, the Soviets did have an ongoing mobile SS-16 ICBM program. This is another example of active Soviet falsification.

Finally, there has been continued deception in SALT II on mobile ICBMs. The Soviets were able to agree to SALT II's constraints on mobile ICBMs because they had probably already tested and produced as many as they needed. The U.S. has again been deceived into believing that SALT II constrains Soviet mobile ICBMs, when in fact it is the less advanced U.S. mobile M-X ICBM program which is constrained by the SALT II Protocol. And the ban on Soviet mobile SS-16 ICBM production is totally unverifiable.

THE OFFENSIVE "FREEZE"

The contention that the Interim Agreement did not constrain Soviet ICBM and SLBM programs is easily supported. There is good evidence that there was no restraint in SALT I on Soviet SLBMs. As we have noted, the originally planned Soviet SLBM program through 1977 was actually codified in SALT I, not limited. If SLBMs were not constrained, then it would seem unreasonable for the Soviets to have accepted constraints only on their ICBM deployment, the most important component of their strategic forces.

Why, then, have the Soviets halted the increase in their ICBM inventory? The following seven factors, not attributable to SALT, indicate that the Soviets themselves decided to stop adding additional ICBM launchers and to switch to MIRVing in 1970-1971:

The Soviets had already exceeded the long-frozen U.S. ICBM launcher number of 1,054.

The U.S. was at the same time emphasizing qualitative improvements—adding more warheads rather than launchers, through MIRVing.

Soviet ICBM factory production capabilities could not provide enough missiles for both new launchers and the retrofitting of old ones; and new MIRVed ICBMs had been under development since 1965, implying some dedication of production capability.[20]

U.S. ABM and MIRV deployments in early 1970, concurrent with U.S. SALT proposals designed to constrain Soviet ICBM MIRVs, combined to give the Soviets strong incentives to shift from quantitative to qualitative MIRV deployments themselves. An April 1970 Brezhnev speech also suggests this.[21]

In July 1970, the Soviets reportedly proposed that they might accept being allowed only 300 to 350 heavy ICBMs. These numbers probably reflected their original SS-9/SS-18 plans, because they bracket the 313 SS-9s allowed in SALT I.[22]

The Soviets reportedly started SS-19 and SS-18 silos in late 1970, and these were intended for MIRVed ICBMs.

The Soviet 1971-1975 five-year plan was approved in February 1971, just after the time the Soviets began construction of new silos for MIRVed ICBMs in 1970, suggesting that the emphasis in the 1971-1975 plan was upon MIRVing rather than additional launchers.

Garthoff sums up the situation of early 1970:

". . . having surpassed the U.S. in number of ICBMs, the Soviet leaders decided to cease the buildup of ICBM launchers. After SALT began, no additional groups of ICBM silos were begun for a year. Indeed, three groups of SS-9s in early construction were abandoned in 1970. . . . The Soviet cessation of its ICBM buildup was, in my view, intended as a "signal" in SALT, although it also reflected a Soviet intention to shift to a new generation of ICBMs . . . construction began [in 1970] on some 80 new ICBM launcher silos. . . ."[23]

Garthoff adds that these new silos were for the MIRVed SS-18 and SS-19, and the abandonment of the old SS-9 silos at the same time reinforces the conclusion that a shift in ICBM generations was occurring then. The decision by the Soviets to shift from increasing the number of launchers to MIRVing, i.e., increasing the numbers of RVs, was reached well before SALT I was signed.

Finally, we need to consider U.S. overestimates of Soviet forces used to justify SALT I. In mid-1972, the President, the Joint Chiefs of Staff, and the National Security Council did estimate that without the ostensible constraints of SALT I, the Soviets might have had as many as 2,400 ICBMs and eighty to ninety strategic missile submarines by 1977. These levels are obviously much higher than the Soviet SALT I levels of 1,408 ICBMs and 62 subs with 950 SLBMs. However, the Department of Defense conceded in 1972 that:

"A growth of 1,000 in the Soviet ICBM force over the period 1972-77 is not projected in any NIE [National Intelligence Estimate]. The President was alluding to Soviet capabilities. The Soviets have demonstrated a capability to deploy some 200 ICBMs per year. . . . At a production rate of eight [i.e., strategic missile submarines] a year [i.e., the maximum demonstrated rate], the Soviets could have about 67 [strategic submarines] operational at the end of the five-year period."[24]

Thus the overestimates were made by the White House, and were not agreed, coordinated NIEs. Moreover, by 1972 the Soviets had already stopped adding ICBMs, and the eighty to ninety submarine level was much higher even than the "maximum" level of 67. This evidence indicates that there were deliberate overestimates to justify SALT I, and a failure to recognize MIRVed ICBM retrofit as the Soviet intention.

Finally, since there has been widespread discussion of a highly classified CIA study by the present writer, it seems only fair to cite this evidence that SALT I did not constrain Soviet programs.

"The study . . . cites specific, documented instances when the late Marshal A. A. Grechko—until his death in 1976, the Soviet Defense Minister—issued dictates to Brezhnev concerning what was not acceptable to the Soviet military in the Politburo's SALT posture . . . the Soviet military five-year plan predetermines Moscow's SALT negotiating positions in a binding way. . . ."[25]

The Soviet military did not allow any SALT constraints on their strategic programs.

THE SOVIET BOAST OF SALT VICTORIES

A number of defense officials have admitted to being puzzled about the purposes underlying Soviet deception and their massive strategic buildup. Assistant Secretary Slocombe, for example, declared, "Exactly why the Soviets are pushing so hard to improve their strategic nuclear capabilities is uncertain."[26] But, the Soviets are not uncertain; they clearly seek strategic and geopolitical supremacy over the U.S.

Unusual and striking evidence of aggressive Soviet intentions in SALT I and II has recently reached the West. A senior researcher on U.S. military policy, affiliated with the Institute of the USA and Canada (IUSAC), Rostislav G. Tumkovskiy, published the following frank description of SALT I and II in the Soviet historical journal (*Voprosy Istorii*) intended for *internal* Soviet dissemination:

"In essence, signing of the Interim Agreement . . . affirmed the effectiveness of the USSR's *reciprocal measures* to strengthen its defense and deter imperialist nuclear aggression. *The political significance of this victory of the Soviet Union in the arms race . . . can hardly be overevaluated . . .* [the] 1972 Moscow agreements, *like the Vladivostok agreement of 1974* [i.e., the basis for SALT II], noted the *defeat of the American strategic arms race policy.*"[27] (Emphasis added.)

Tumkovskiy's unusual forthrightness about SALT I and SALT II through Vladivostok is surprising, especially given the timing of its publication just prior to the U.S. Senate's SALT II debate. Such a statement would indeed be unlikely to appear in the IUSAC's journal *USA*, which is intended for American readers.

Tumkovskiy does not mention strategic parity as a possible Soviet SALT goal. In fact, he states elsewhere that parity had to exist *before* SALT could begin. Nor does he deny that the Soviets seek superiority. He therefore implies that defeat of a presumed U.S. intention to preserve superiority left the way open for a Soviet attempt to go beyond parity. The recognition of Soviet victory in the arms race thus strongly implies the Soviet intention to achieve strategic superiority. Moreover, his references to

Soviet reciprocal military measures apply to the massive Soviet military buildup now *in fact* heading for strategic superiority. The appearance of these statements suggests that the Soviets have confidence that the "correlation of forces" (including political, economic, social, psychological, as well as military factors) has shifted sufficiently in Soviet favor for them to express their stark SALT objectives more candidly. Further, the IUSAC is known to have close ties to the Soviet Politburo, so Tumkovskiy's views can be assumed to have reached the leadership. Indeed, their publication suggests that they were authorized by the leadership.

Tumkovskiy also exposes a highly competitive Soviet view of SALT, in contrast to the widespread Western view that SALT is a cooperative, *non* "zero-sum" game in which both sides and the whole world can win through mutual concessions and mutual advantages. Under the rules of detente, agreed to in May 1972 in the Declaration of Principles of U.S.-Soviet relations, seeking unilateral advantages in diplomacy is supposed to be illegitimate. Tumkovskiy reflects the Marxist dialectical, "zero-sum" approach to all negotiations, however, in which one side must win and the other must lose. Unilateral advantages at the expense of the other side are the standard Marxist goal.

Tumkovskiy's boast also implies that, as in SALT I, the Soviet leadership would only sign a SALT II Treaty in which it believes it has again won important unilateral advantages at U.S. expense. Just as he provides evidence that the leadership believes that it "won" in SALT I and through Vladivostok, he also implies that the leadership may believe that it has won again *since* Vladivostok in SALT II. By defeating ostensible U.S. aims for "superiority" in SALT I, they surely recognize that they have achieved quantitative strategic superiority, at least in the explicitly acknowledged category of number of "strategic delivery vehicles." Soviet SALT I quantitative superiority of 648 ICBMs and SLBMs is indisputable. His statements support the judgment that the Soviets will continue to try to increase their superiority even within the terms of SALT II, that they believe they have achieved the upper hand. Would Americans like to have the SALT II Vienna Agreement described as another Soviet victory in a few years?

Further evidence of Soviet recognition of their unilateral advantages and superiority from SALT I comes from an earlier volume of the same Soviet historical journal. Another Soviet strategic expert acknowledged with satisfaction the facts that the SALT I agreements directly resulted in a cutback of 200 in U.S. strategic delivery vehicles and also a cutback in U.S. strategic expenditures.[28] In contrast, it is well known that the massive Soviet strategic buildup in additional SLBMs and new MIRVed ICMS continued uninterrupted throughout the 1972 period, and Soviet strategic spending has consistently risen throughout SALT I and II. In fact, the Soviets have spent over $100 billion more than the U.S. during the 1969-1979 SALT decade on strategic forces, about two and one half times more each year. During the 1969-1979 SALT decade, the Soviets have added over 1,000 new operational missile launchers and 150 Backfire bombers, while the U.S. has maintained a constant number of missile launchers and unilaterally deactivated over 250 B-52 bombers.

Finally, Tumkovskiy's recent statement can be contrasted with the May 26, 1972, statement of Soviet TASS Director, Leonid Zamyatin:

"In the opinion of the Soviet leaders, the concluded agreements should help us to avoid a new round of the strategic arms race . . . the agreements signed today are based on the recognition of the principle of equal security for both parties and do not give unilateral advantages to either side. . . .[29]"

But there was a new Soviet round in the arms race after SALT I, and a Soviet "victory" in SALT I can only be a unilateral advantage. Zamyatin's false 1972 assurance is merely another example of Soviet deception.

THE SOVIET THRUST TO SUPERIORITY THROUGH SALT

After ten years of detente and SALT, there is now sufficient evidence to conclude that the Soviets have been exploiting the SALT negotiating process to retard U.S. weapons programs and to lull the U.S. into complacency, while they complete their broadly-based military buildup and try to achieve overall geopolitical supremacy. The chief architect of detente and SALT Dr. Kissinger, finally publicly recognized the relentless aggressive thrust of Soviet military and foreign policy. He said in 1979:

". . . The 1980's could turn into a period of great instability . . . for a period five to seven years the Soviets may develop an advantage in power useful for political ends . . . we could be heading into a period of maximum peril . . . by some time in the early 1980's the Soviet Union will have the capability to destroy with a reasonable degree of confidence most of our land-based ICBMs. In the same period of time we will not be able to destroy the Soviet ICBM force. This creates a gap in the design to the two forces that is bound to have a geopolitical consequence, especially since we are clearly inferior in forces capable of local intervention. . . . The present Treaty [SALT II] comes up for ratification at a time of grave danger to our national security and to the global equilibrium. The military balance is beginning to tilt ominously against the United States in too many significant categories of weaponry . . . the immediate future is a period of great peril." [30]

William Hyland, a former Kissinger deputy, also said recently. "We are already witnessing the political consequences resulting from a shift in the overall military balance." [31] These are disturbing forecasts from those who were SALT I's negotiators and defenders. The principal cause of the shift in the strategic balance was SALT I. This shift will not be arrested by SALT II. Given the long lead times required for strategic weapons, it may be almost too late for the U.S. to avoid the opening Minuteman vulnerability "threat window" of the early 1980's. By 1985, fully within the terms of SALT II, the Soviets will have achieved strategic supremacy.

In terms of Marxist dialectics, the shift in the "correlation of forces" is inevitable to the Soviets. The shift reflects their belief in the determination of history. The Soviets and their proxies have already been exploiting this shift, as their relentless foreign policy achievements reflect:

SALT I, which the Soviets regard as a great "victory";

The Soviets' "Great Grain Robbery" of 1972;

The "face down" of the U.S. in the Yom Kippur crises, 1973;

Angola, 1974-76;

Zaire, 1976, 1978;

Viet Nam, 1972-75;

Laos, 1975;

Cambodia, 1975;

Ethiopia, 1976-77;

South Yemen (PDRY), 1976-1979;

Afghanistan, Iran, 1977-1978;

Nicaragua, 1979;

Economic and trade relations with the West, 1971-1979, in which the Warsaw Pact has run up a credit debt to the West of about $60 billion. This is an indirect Western subsidy to the Soviet defense effort.

These expansionist and provocative activities by the Soviet Union in this era of detente provide a framework for a look at the more specific violations and falsifications of arms control agreements and related diplomatic provocations by the Soviet Union:

Questionable compliance with all major provisions of both SALT I agreements, most notably the failure to deactivate old ICBMs on time, testing air defense missiles and radars in an ABM mode, and massive circumvention of the ban on deliberate camouflage, concealment and deception through their nationwide camouflage program;

Encryption of telemetry in all SS-20 and in recent SS-18 ICBM tests;

Falsification of the number of ABM test launchers deactivated in 1973;

Falsification of the number of SS-7/8 ICBM's being deactivated during 1976, three times. They may not have been in compliance for as long as two years between 1976 and 1978; [32]

Keeping eighteen SS-9 Fractional Orbital ICBMs clandestinely operational at a test range throughout SALT I, circumventing SALT I's implicit limit on the number of Soviet ICBMs; [33]

The maintaining of eighteen Fractional Orbital Bombardment Systems (FOBS) in the Soviet operational inventory is also a violation of both U.N. Resolution 1884, October 17, 1963, and the Outer Space Treaty of October 10, 1967. Both agreements forbad the placing in space of weapons of mass destruction. The Soviet argument, when challenged on FOBS, namely, that the agreement forbad their being "placed in orbit" but not their development, is a classic example of Soviet deception and of U.S. acquiescence in that deception.

Failure to notify the U.S. in advance as required about their new ABM radar at Kamchatka;

Reportedly providing false and misleading data on the range of the Backfire bomber during SALT II negotiations in Geneva, 1975-1976; [34]

The presence of an SS-11 ICBM canister and ground support equipment at an SS-4 MRBM silo, and sighting of large numbers of old SS-7 ICBMs at an unidentified installation,[35] suggesting that their 1,200 stockpiled old ICBMs may be used as a strategic reserve circumventing SALT I's numerical limits;

The fact that Brezhnev's SALT II statement on the Backfire bomber implies that it does not have intercontinental and refueling capabilities. But the Backfire, in fact, does have both intercontinental and refueling capabilities already; [36]

Soviet falsification of their conventional force levels in the MBFR negotiations;

Recently exceeding the 150 kiloton limit in at least five underground nuclear tests, likely Soviet violations of the Threshhold Nuclear Test Ban Treaty, together with many reported venting violations of the 1963 Limited Nuclear Test Ban Treaty; [37]

The successful, unprecedented, Soviet propaganda campaign against U.S. deployment of neutron warheads in NATO;

Recently resuming microwave bombardment of the U.S. Embassy in Moscow;

Using components from the Western-exported Kama River truck factory for military purposes contrary to the intent of Western exporters; [38]

Reneging recently on the previous Soviet agreement to allow U.S. seismic sensors on Soviet soil for monitoring a Comprehensive Nuclear Test Ban Treaty; [39]

Faulty compliance with the Helsinki (CSCE) agreements;

Reportedly sending "G" class diesel submarines carrying long-range sea-launched ballistic missiles to Cuba twice in 1974, in violation of the secret 1962 Cuban Missile Crisis agreement and the 1970-71 Cienfuegos agreement. Also, the reported presence of an "E" class nuclear submarine carrying long-range cruise missiles in Cuba. And the recent completion at the Soviet Cienfuegos submarine base of a nuclear warhead and missile handling facility. Moreover, recently deploying nuclear-capable MiG-23 fighter-bombers in Cuba in 1978, and maintaining a Soviet combat brigade in Cuba. And, the Soviet manning of Cuban air defenses since 1974; [40]

Finally, laying down an intimidating ultimatum to the U.S. Senate that no amendments to the SALT II Treaty would be tolerated.

The above list is merely a brief recitation of some Soviet challenges to the U.S. Soviet provocation and deception in foreign policy is nothing new, however. They are merely behaving like the same familiar opportunists they have always been, probing Western resolve and exploiting our weakness wherever possible, all the while expanding their spheres of influence.

The SALT negotiations are only another arena for competition, albeit an important one. Arms control negotiations are not an abstract exercise in legal compromise. SALT is an integral element of Soviet military policy, and the Soviet military clearly dominates their SALT decisionmaking. Their negotiators have no concept of mutual accommodation and concession which could lead to a mutually satisfactory middle ground. Their objective, based upon Marxist-Leninist ideology, is to gain unilateral advantages, which once achieved, are stubbornly defended. They seek to induce complacency and raise false hopes. They provide false information in the negotiations to bolster their negotiating positions. Their patience and tenacity are well known. The history of Soviet foreign policy contains many examples of falsifications, forgeries, and negotiating deceptions. The duplicity of Soviet diplomacy and their noncompliance with international agreements are notorious. Moreover, traditional Soviet military camouflage, concealment, and deception remain routine. After all, Stalin once said:

"Words must have no relations to actions—otherwise what kind of diplomacy is it? words are one thing, actions another. Good words are a mask for concealment of bad deeds." [41]

This attitude toward diplomacy helps to explain Stalin's greatest diplomatic deception of the West, the surprise Nazi-Soviet Non-Aggression Pact of August 1939. In a similar vein, Khrushchev used Sputnik, missile production boasts, and rocket rattling threats to perpetrate the 1957-1961 "Missile Gap" deception on the U.S. And, in October 1962, Soviet Foreign Minister Gromyko *twice* personally lied to President Kennedy, denying the presence of Soviet offensive missiles in Cuba. Is this the same Gromyko who participated in SALT I and personally negotiated much of SALT II?

SOVIET "GOOD FAITH" IN SALT I?

Dr. Kissinger said to Congress in 1972 that:

"The possibility always exists that the Soviets will treat the Moscow [SALT I] agreements as they have sometimes treated earlier ones, as just another tactical opportunity in the protracted conflict. *If this happens, the United States will have to respond. . . .* If this agreement were being *circumvented*, obviously we would have to take compensatory steps in the strategic field . . . the two countries have a unique opportunity right now to move into an entirely different relationship of building *additional trust*. . . . If it turns out that through legalistic interpretations of provisions of the agreement or through *failing to specify numbers* about which we have left absolutely no doubt as to our interpretation . . . if it should turn out that those numbers are being challenged in any significant way at all, then this would cast a doubt. It would not only threaten disagreement, but it would threaten the whole basis of this new relationship. . . ." [42]

On August 12, 1979, Kissinger finally confessed, "I think the Soviets have pressed against the legal limits of SALT I," and, as we have seen, he conceded that the Soviet approach to defending the SS-19 from SALT I constraints was "sharp practice." [43] The conclusive evidence of Soviet negotiating deception in SALT I should raise serious and legitimate questions about their "good faith" in the entire SALT and arms control negotiating process.

Nevertheless, President Carter has averred several times in speeches that the Soviets negotiated both SALT I and II in "good faith." Moreover, Soviet spokesman Georgiy Arbatov (IUSAC Director) also reaffirmed recently, "I would like to reiterate that we conducted [SALT] negotiations in good faith with representatives of three U.S. administrations." [44] But beyond the equally difficult problems of trusting or verifying Soviet SALT compliance, can we trust the sincerity and validity of their negotiating positions?

In fact, however, the clearest evidence of Soviet "shyster" behavior in SALT negotiations and compliance should completely undermine the "good faith" basis of the entire arms control negotiating agenda, from SALT, TTBT, CTBT, MBFR, to ASAT negotiations. How can we even negotiate with a nation which deliberately misleads and falsifies basic data and which violates solemn agreements?

LEGACIES OF SALT I FOR SALT II

SALT I in fact codified U.S. strategic inferiority, which will persist throughout SALT II. The quantitative levels of about 2,650 Soviet to 2,060 U.S. delivery vehicles under SALT I and presently existing are indisputable, as are the massive Soviet advantages in ICBM and overall throwweight. While SALT II does provide, by 1981 various equal levels of 2,250, 1,320, and 1,200, the Soviet Backfire bomber force, numbering about 375 by 1985 will be completely excluded, while U.S. Poseidon SLBMs dedicated to NATO are included in all U.S. SALT II aggregates. Moreover, the U.S. is going to deactivate unilaterally ten Polaris submarines carrying 160 SLBMs. We may never reach our allowed level of 2,250, and we will never have our allowed 820 MIRVed ICBMs, 550 being our ceiling.

Further, the Soviets will, under SALT II, be able to preserve their monopoly on heavy ICBMs. Their 308 SS-18 heavy ICBMs carry at least 3,080 warheads. The Soviet SS-18 force, by itself, carries more megatonnage than the entire U.S. missile force of ICBMs and SLBMs, about 2,618 megatons to 1,814 megatons.[45] The SS-18 force, by itself, can thus neutralize or checkmate all U.S. strategic forces, thereby giving this force profound geopolitical importance. Moreover, the SS-19 force of 300 to 400 heavy ICBMs carrying at least 1,860 warheads can also by itself, threaten all U.S. strategic forces. The Soviets thus have two independent first-strike forces. Their remaining ICBM, SLBM, and bomber forces would comprise a formidable second-strike capability.

Further, the last remaining U.S. advantages, warhead number and accuracy, will be gone by 1985, with or without SALT II. By then, the Soviets could realistically have about 14,500, mostly large, accurate warheads, compared to a U.S. total of, at most, 11,900, half of which would be relatively small and inaccurate SLBM warheads. Their warhead superiority could be achieved fully within the terms of SALT II and with 375 Backfires excluded. By exercising their "new type" exemption option to put ten MIRVed warheads on the entire force of 820 MIRVed ICBMs (which the U.S. has conceded is both feasible and legal and which the Soviets are likely to exploit), and by legally putting fourteen MIRVed warheads on each of 380 allowed SLBMs, the Soviets could achieve a force of about 8,180 counterforce, hard-target ICBM warheads and 5,320 retaliatory SLBM warheads by 1985. In addition, by 1985 they could have over 1,000 unMIRVed ICBM and SLBM warheads, for a probable likely total, approved and authorized by SALT II, of about 14,500 warheads.

But further, large numbers of Backfires, heavy bomber variants, G and H class SLBMs, stockpiled SS-16s, SS-20s, E class SLCMs, test and training ICBM launchers, and older stockpiled SLBMs and ICBMs would be *totally excluded* from the 2,250/14,500 Soviet SALT II force levels. They have as many as 1,200 stockpiled older ICBMs.

Both Defense Secretary, Harold Brown, and Chairman of the JCS, General David Jones, have testified recently about this issue, General Jones declared:

"In some areas, they [the Soviets] have already *surpassed* us, and we are concerned because their momentum will allow them to gain advantage over the United States in *most of* the static indications of strategic force by the early 1980's . . . because of the lead times in modern weapons, this progressive *shift in the military balance* will continue into the *mid-1980's with or without SALT.*[46] "

Defense Secretary Brown confirmed that statement, noting that the already declining U.S. strategic posture will get *worse* before it can get better:

". . . The [strategic] balance will be *less favorable* in the early 1980's than it is now . . . our position will get worse between now and 1981 or 1982 . . . the growing vulnerability of our land-based missile force in the early 1980's could, if not corrected, eventually produce a significant element of U.S. disadvantage and contribute to a perception of U.S. strategic inferiority.[47] "

Secretary Brown does not acknowledge that the reason for this further U.S. decline goes far beyond the Soviet counterforce "threat window" to Minuteman opening in 1980. We will have no significant increase in strategic capabilities until about 1982, when a few air-launched cruise missiles and Trident submarines begin to come into the force. Further, the combination of prema-

ture Polaris SLBM deactivation, Trident submarine delays, and Trident I missile replacement all occurring concurrently in the early 1980's will severely reduce the number of our *deployable* retaliatory SLBMs from 656 to less than 400. This alarming SLBM drawdown in the 1980's will occur precisely when the threat to our ICBMs is at its highest peak ever, and when we will most need our sub-based, survivable deterrent. Far fewer than even these minimal 400 SLBMs will be at sea at any one time, giving us a very thin sea-based leg of the Triad indeed. An international perception of further declining U.S. strength will inevitably result from the unilateral deactivation of our Polaris SLBMs during a period of growing vulnerability.[48]

More significantly, Under Secretary of Defense William Perry admitted in 1979 Senate hearings that, *in addition* to the severe SLBM drawdown in the early 1980's, *the other two legs of our strategic Triad will become vulnerable during the 1979–1985 term of the SALT II Treaty.* He said that our ICBMs will be vulnerable by 1982 (really 1980) and our bombers by 1985.[49] Thus, by 1985, we will be relying totally *on only part of one leg of our Triad*—patrolling SLBMs. We will lose "essential equivalence" and *we will in fact have a dangerous "minimum deterrence" posture under SALT II.* This is the thinking underlying the President's statement that all we need is one Poseidon submarine.

Probably most alarming is this 1979 JCS statement:

"The Soviets have been outspending us in this area [*i.e.*, strategic forces] by a factor of between two and three for many years and they may well believe that they can achieve a margin of superiority over us in the early 1980's. It is now generally accepted by most defense analysts that, *regardless of U.S. actions,* Soviet strategic capability will increase relative to that of the U.S. through the mid-1980's, *with or without a SALT agreement.*[50] " (Emphasis added.)

SALT II FLAWS

Pro-SALT advocates assert that SALT II permits the Soviets to deploy only one ICBM of a "new type" and make only "minor modifications" to others. But we have seen that the Soviet modernization and replacement allowed under SALT I exceeded expectations and went well beyond "minor modifications." Again, the SS-19 and the SS-N-8 were much more capable than expected. Yet the Soviets have again negotiated deceptively to achieve the ambiguous language in SALT II's Article IV on "new type" ICBMs. Their provocative, continued use of encrypted telemetry on recent deceptive SS-18 tests indicates clearly that they still have many capabilities to hide. There is sufficient ambiguity in both Articles IV (on new type ICBMs) and XV (on verification) to ensure that the Soviets will be able to test and deploy all five of their reported new fifth-generation ICBMs and SLBMs within the terms of SALT II. The Soviet insistence on this lack of precision and ambiguity in Article IV and their refusal to agree to specific baselines constitute negotiating deception. Just as at the time SALT I was signed the Soviets had convinced U.S. negotiators that what became the fourth-generation SS-19 ICBM would be banned, they have again succeeded in convincing U.S. negotiators that their new missiles will be constrained.

The Administration claims publicly that SALT II will prevent the Soviets from deploying more than one of their five new ICBMs. Nevertheless, the CIA Director reportedly has testified correctly in secret to the Senate Intelligence Committee that the Soviets could deploy all five of their new missiles legally within the terms of the SALT II Treaty.[51] Moreover, a defense official reportedly said privately that *U.S.* SALT II negotiators *"know* that the Russians deliberately negotiated Article IV so that they could go ahead and test and deploy all their new missiles without violating the Treaty." [52]

The massive new Soviet ICBM R&D and deployment activity is not likely to halt, even if SALT II is ratified. There is evidence, reportedly, of three new type test silos for the new fifth-generation Soviet ICBMs. As in the cases of the SS-19 and SS-N-8 in SALT I, the characteristics of the five new fifth-generation ICBMs and the new Typhoon SLBM will surprise us. Indeed, Dr. Kissinger sorrowfully said in August 1979:

"We have to count on the fact that the Soviet Union is likely to push to the very limits of the [SALT II] agreement and do things that we cannot now foresee that would be technically legal but are now unforeseeable.[53] "

Moreover, U.S. intelligence, especially the CIA, has a well-documented track record of underestimating both the quantity and quality of Soviet strategic forces, as well as the level of Soviet defense expenditures.[54] The CIA is also capable of overestimating Soviet forces on White House command to show how SALT agreements ostensibly constrain them. This scandalous track record should affect CIA's credibility regarding how SALT II "constrains" Soviet programs, and also U.S. verification capability.

A counter line one occasionally hears from SALT advocates is that U.S. military leaders never wanted heavy ICBMs. In fact, the USAF actually did have plans in the early 1960's for a total of about 250 Titan I and II heavy ICBMs. But a *civilian,* Defense Secretary Robert S. McNamara, cut those plans back to fifty-four. Moreover, in 1973 the M-X ICBM was originally planned to be a heavy throwweight ICBM carrying about fourteen warheads. The Soviet press *still* takes note of these early U.S. plans for fourteen RVs on the M-X. The designed throwweight and RV number of ten for the M-X has in fact been scaled down to fit into the SALT II defintion of a "light" ICBM—the launch weight and throwweight of the SS-19. Most significantly, in 1970 the U.S. wanted to maintain the right in SALT I to have *250 heavy ICBMs* while restricting the Soviets to the same number.[55] Hence, it has never been the case that the U.S. had no plans or military need for heavy ICBMs.

THE BACKFIRE FLAW

The proponents of SALT II also charitably accept the Soviet position on the Backfire. That position deserves analysis.

First, judgments about the mission of the Backfire are inferential, and its basing patterns are subject to rapid change.

Second, the Soviet concession in 1974 at Vladivostok to drop their insistence on counting U.S. "Forward Based Systems" (FBS) in SALT II is cited by the Administration as having been given in exchange for U.S. dropping of our insistence that Soviet heavy ICBMs be constrained. But, the Administration also argues that U.S. FBS were exempted from SALT II in exchange for exempting Backfire. U.S. exemption of our FBS was thus paid for by allowing both a Soviet monopoly on heavy ICBMs as well as a Soviet exclusion of Backfire. The U.S. has, in fact, paid *twice* for exempting our own FBS. Moreover, U.S. FBS already have Functionally Related Observable Differences (FROD) to fully justify their exclusion, and are also inferior in both number and quality to massive and growing Soviet theater nuclear forces. Finally, U.S. FBS are *still negotiable* in SALT III.

Third, counting three B-1s used only for flight tests and about 220 mothballed, unflyable B-52 hulks, while exempting 120 "un-FRODed" Soviet TU-142 Naval Bears, 30 "un-FRODed" Bison tankers, and 375 Backfires is hardly equitable, especially when over 1,200 stockpiled Soviet *missiles* are also exempted.

Fourth, Backfire's *one-way* range capability reportedly allows it to cover the entire U.S. on mission profiles *exactly* like those used on most B-52 and FB-111 missions, which are in fact *one way* missions recovering in third countries. But Backfire also reportedly has the capability for *two-way* coverage of the entire U.S. with refueling and Arctic basing. It also has the necessary refueling probes, and sufficient tankers for Backfire are probably available.[56]

Fifth, Backfire has capabilities superior to some of those heavy bombers which do count, the Bison and B-52. For example, the Backfire probably has a range superior to that of the Bison.

Sixth, by declaring that Backfire will not be given intercontinental or refueling capability, the Brezhnev Backfire statement contradicts the well-known facts that Backfire already has both capabilities. These Brezhnev falsifications are another example of Soviet negotiating deception.

Seventh, Backfire probably has further range growth potential, and its range upgrade is probably going to be difficult if not impossible to determine. Installation of long-range ALCMs on Backfire will probably also be difficult to detect. Further, there are no constraints on Backfire basing and training, another U.S. concession.

Finally, in the course of the negotiations, in 1975 and 1976 the Soviets also provided the U.S. with falacious and inconsistent range data on the Backfire. These Soviet data were questioned and quietly withdrawn, but they are another example of Soviet negotiating deception—active disinformation.[57]

In addition to Backfire, three more Soviet heavy bomber types are reported under development. Their status and exclusion will be dangerously left to further negotiations, where the U.S. will have reduced bargaining leverage.

FAILURE TO DEFINE HEAVY ICBMS

That the proponents of SALT II accept the current definition of a heavy ICBM is of equal if not greater significance than their acceptance of the Soviet Backfire position. There is a similar need for analysis of the definition of the heavy ICBM. One would think that the difficulties for the U.S. growing out of the imprecise terminology in SALT I would have demanded an exceedingly precise definition of the heavy ICBM. It is interesting to note that Walter Slocombe has declared that in negotiating SALT II, the U.S. has learned from our hard lessons of SALT I. He says that "the most important lesson was to be as specific and precise as possible in drafting treaty language constraining Soviet option." Nevertheless, during the course of SALT II we have twice repeated the most important mistake of SALT I—failure to define a heavy ICBM.

First, at Vladivostok in November 1974, we preserved the key SALT I prohibition on heavy ICBMs, but again as in SALT I, we did so without an agreed definition of a heavy ICBM.

In recognition of our lack of success with our 1972 Unilateral Statement on a definition of a heavy ICBM (and most of our other 1972 unilaterals), former SALT II chief negotiator Paul Warnke clearly ruled out U.S. unilateral statements in SALT II during his February 1977 Senate Confirmation hearings:

"My conviction is that with regard to any agreement which is entered into at this time on control of offensive nuclear weapons, that we could not afford to have unilateral declarations. The trouble with the unilateral declaration is that you say, "I am now about to say something which you refuse to say." So that is almost a built-in formula for disagreement, and I don't think that in the kind of arms control agreement that we ought to use to replace the interim agreement, we ought to have that kind of a situation.[58]" (Emphasis added.)

Second, there is nevertheless an important U.S. unilateral statement in the SALT II Treaty. Again, unbelievably, the unilateral statement involves the troublesome definition of a heavy ICBM. Paragraph 7 of Article II partially defines heavy ICBMs as any missile larger in launch weight and throwweight than the SS-19, but, as we learned in SALT I, a clear, agreed distinction between light and heavy ICBMs must be established.

The Administration has conceded that the purpose of defining a heavy ICBM is to provide three key constraints in Article IV of the Treaty: 1) the freeze on the numbers of fixed launchers for modern heavy ICBMs, 2) the obligation that the one permitted new type ICBM be a light ICBM, and 3) the ban on mobile launchers of heavy ICBMs, on heavy SLBMs, and on heavy ASBMs. A heavy ICBM definition is thus again the key definition of SALT II.

The SS-19 is to be the baseline between light and heavy ICBMs. In order to be effective, however, the definition must have clear, specific, agreed data on the SS-19's launch weight and throwweight. Here is the full negotiating record for these specific weights:

"On August 16, 1977, in a plenary statement, the United States informed the Soviet Union that ". . . for planning purposes, with respect to ICBMs it might develop, test or deploy in the future, the United States considers the launchweight limit on light ICBMs to be 90,000 kilograms and the throwweight limit to be 3,600 kilograms." These figures are based on our estimates for the SS-19. The Soviet Union did not respond to this statement. The United States will regard these figures as the limits for the one new type of light ICBM permitted to the United States under Paragraph 9 of Article IV.[59]" (Emphasis added.)

Thus the U.S. unilaterally defined only U.S. heavy ICBMs in terms of the SS-19. But we evidently did not even try to get the Soviets to agree to such a definition for Soviet ICBMs. The above statement thus only implies unilaterally that any ICBM on the Soviet side with a launch weight greater than 90,000 kilograms (198,000 lbs.) and a throwweight greater than 3,600 kilograms (7,937 lbs.) will be regarded by the U.S. to be a heavy ICBM.

Not only did the Soviets not agree to these vital specific baseline data, they did not even respond to them. Despite this, the U.S. State Department in July 1979 still claimed; "The U.S. and USSR delegations agreed in the SALT II Treaty on a clear demarcation in terms of missile launch weight and throwweight, between light and heavy ICBMs." This Administration claim is fallacious and shows wishful thinking. The Administration advances the strange idea that Soviet silence in the face of U.S. unilateral statements somehow confirms their agreed status.

The State Department claim notwithstanding, there is in effect a U.S. unilateral statement defining a heavy ICBM, just as in May 1972, the U.S. defined a heavy ICBM unilaterally. The only difference is that in 1972 we explicitly called it a unilateral statement. Indeed, our present SALT II unilateral definition is even weaker than our more explicit and more positive 1972 heavy ICBM unilateral statement.

Thus, there is still not agreed definition of a heavy ICBM in SALT II, well recognized as the major and most dangerous flaw in both the SALT I Interim Agreement and also the November 1974 Vladivostok Accord.[60]

One step the U.S. might have taken somewhere in the SALT II negotiations was to suggest a three-tiered classification for ICBMs: light, medium, and heavy ICBMs or light, heavy, and very heavy. Such a distinction would have facilitated the SALT II negotiations and the implementation of the "equal aggregates" provision of the Vladivostok Accord.

But, as Slocombe himself stated, "The Soviets should be presumed to be protecting something when they refuse to agree to a specific limitation." In 1976, Slocombe also said: "The lesson drawn from this episode [i.e., the SS-19 problem] by U.S. officials is the need for *explicit* and *precise acknowledgement by the USSR* on even the most technical *details* of these issues."[61] (Emphasis added.) Slocombe and other U.S. negotiators ignored this advice in negotiating SALT II.

It is curious that the new pro SALT II history of the negotiations, by "SALT supporter" Strobe Talbott recognizes that the Soviets "had exploited the failure of SALT to define heavy missiles."

Talbott nevertheless goes on to describe the strange U.S. use of the new diplomatic device of Soviet "noncontradiction" in SALT II:

"This rather contorted procedure, involving a Soviet lacuna filled by American "unilateral interpretation" in turn *confirmed* by Soviet 'noncontradiction,' had for a long time been a curious but common feature of the negotiating ritual in SALT. . . . the Russians would assent by their silence . . . it had become a mutually accepted practice in SALT that if one side confronted the other with an explicit, unilateral interpretation and the second side did not object, then the interpretation was considered agreed and became enshrined in the negotiating record. . . . according to diplomatic practice, Gromyko's 'noncontradiction' would be considered tantamount to assent, and it would become part of the negotiating record that would accompany and amplify the treaty. . . .[62]"

Thus the Administration claims that a U.S. unilateral statement not contradicted by the Soviets is somehow agreed. This is precisely the status of the heavy ICBM definition in SALT II. The U.S. on August 16, 1977 unilaterally provided U.S. data on the launch weight and throwweight of the Soviet SS-19ICBM. This was an attempt to define a heavy ICBM. The Soviets, however, did not agree. *They did not even respond.* The Carter administration evidently believes that this is another case in which Soviet "noncontradiction" constitutes agreement, because the Administration claims that there is a clear, agreed definition of heavy ICBMs.

Talbott himself recognizes the danger inherent in such U.S. wishful thinking, however:

"One trouble with the diplomatic device of noncontradiction is that an understanding arrived at by the silence of one party is easily undone; all that party has to do is break silence.[63]"

Would a good lawyer negotiate key aspects of a commerical contract on this kind of "assent by silence" basis? Moreover, the Soviets have told us repeatedly that they would not be bound by U.S. unilateral statements, emphasizing the unreality and danger of U.S. trust in the strange diplomatic device of "noncontradiction."

The significance of the continued failure to define a heavy ICBM is that it continues to allow dangerous Soviet deployment options. No launch weight or throwweight baselines for heavy ICBMs means that the Soviets can test and deploy new ICBMs somewhat heavier than the heavy SS-19. If the U.S. would complain or charge noncompliance, the Soviets can be expected to reply simply that they never agreed to the U.S. supplied baseline data on the SS-19, and that these data are in any case wrong. They could then supply their own "correct" data. Hence, the road is open for continued Soviet deception and noncompliance.

Moreover, all constraints on testing and deploying new ICBMs, which are no more than five percent larger or smaller than existing Soviet ICBMs, also rely upon U.S. baseline data on the launch weights and throwweights. The same is true of the data on Soviet silo dimensions which would comprise the baseline data from which to measure the inexplicable increase of up to thirty-two percent in silo volume allowed in Article IV. But in all these cases, we have reportedly not revealed our data to the Soviets. They have thus not yet had the chance to avoid response, and it is equally unlikely that they would agree with our data.

In sum, there are significant U.S. unilateral statements and unilateral baselines in SALT II, despite Warnke's disclaimer and our own hard experience in SALT I. Dr. Kissinger conceded on August 12, 1979, in his first explicit criticism of SALT II, that the failure to achieve an agreed definition of the SS-19 "was a weakness in the drafting" of SALT II.[64] Indeed, it could be a fatal weakness. How can Article IV constrain the new Soviet ICBMs without agreed baselines from which to measure five percent variances? Are we going to rely only on Soviet uncertainties about what U.S. baseline data are and on our increasingly weakening enforcement leverage?

The U.S. thus did not learn the main lesson of SALT I.

We should not have to tolerate Soviet secrecy in SALT. The proposition that we can somehow outsmart the Soviets about the status and capabilities of their own secret programs, and then somehow induce them to agree to constrain themselves through SALT is preposterous. Moreover, as we have seen, the Soviets made many significant false and deceptive statements to the U.S. during SALT I and II, but because they have never been called to account for them, they have gotten away with them all.

SUMMARY OF SALT II'S MAJOR FLAWS

In sum, we have not yet learned from Soviet negotiating deception in SALT I. Soviet deception, together with their exploitation of the intelligence asymmetry advantage and the superior negotiating leverage provided by their much more dynamic programs, have resulted in the following six additional fatal flaws in the SALT II Treaty beyond the failure to agree to heavy ICBM and heavy bomber definitions and baseline data:

The gross inequalities allowed in heavy ICBMs, throwweight, and counterforce capabilities. The Soviet monopoly on heavy SS-18 ICBMs, together with their potent heavy SS-19 force, will neutralize or checkmate all U.S. strategic forces, and reduce deterrence at intercontinental, theater nuclear, and conventional levels. And SALT II allows the Soviet counterforce threat to continue to grow dangerously;

The failure to include the intercontinental Backfire in the Soviet aggregate;

The destabilizing constraints, even if temporary and negotiable, on vital U.S. ICBM survivability options (MPS or mobility) in the face of the allowed growth in the Soviet counterforce threat;

The grossly unequal constraints on theater systems such as the U.S. GLCM and SLCM, while the Soviet SS-20 and Backfire run free;

The failure to adequately control ballistic or cruise missile production, stockpiling, excess missiles, and refire capabilities;

And the failure to prevent the nationwide Soviet camouflage, concealment, and deception program from hindering verification.

Totally within SALT II's provisions, the Soviet Union will have superiority in total warheads and accuracy, the last remaining U.S. advantages, by 1985. They will probably have 14,500 warheads compared to 11,900 for the U.S. They will have more than four times the U.S. ICBM throwweight, and more than two times the U.S. total throwweight (including bomber payload equivalent).

On balance, the present and growing Soviet counterforce capability is what is most dangerous to U.S. national security, because by threatening Minuteman and the other legs of the Triad, the strategic situation in the 1980's will be highly unstable. The Soviets can checkmate or neutralize all U.S. strategic forces, puncturing the U.S nuclear umbrella over NATO and Japan. Deterrence will be eroded, and U.S. foreign policy is already on the global defensive.

Contrary to all assertions, SALT I and II are in large part responsible for the Minuteman vulnerability problem. The SALT I ABM Treaty denied the U.S. an adequate four- or even two-site ABM defense of Minuteman, which would have unilaterally solved our most serious strategic problem—the vulnerability of our ICBMs. The ABM Treaty does not allow the U.S. even "hard site" defense of ICBMs. We tried to constrain Soviet mobile ICBMs in SALT I, but in doing so we compromised our own option to make ICBMs mobile and therefore more survivable.

Further, both the U.S. Unilateral Statement of May 9, 1972, and the Jackson Amendment to SALT I made it clear that enhancing the survivability of U.S. strategic forces was the fundamental U.S. goal in SALT II.[65] It is obvious that SALT II has not achieved this U.S. goal; so in this sense SALT itself is responsible for the vulnerability of U.S. ICBMs. SALT II is thus unbalanced, unequal, and destabilizing. And it actually increases U.S. vulnerability. We should not have tried to use SALT to solve what were U.S. unilateral strategic problems.

Allowing the Soviets to achieve an overwhelming counterforce capability and overall strategic superiority through negotiations is indeed a severe indictment of SALT.

[7] *Military Implications*, op cit., pp 165 and 548; in addition, Senator Jackson asked the following questions for the record in July 1972, and Defense Secretary Laird and the Defense Department supplied the following answers: *Question:* "The largest part of the Soviet land-based ICBM force is in the SS-11 silos. If the Soviets were to retrofit their SS-11 silos with a new missile, how much could they (a) increase the volume of those silos, and (b) increase the *volume* of the *missiles* that go into those silos." *DOD Answer:* "Up to about *30 percent in both* cases. This volume increase is not sufficient to permit installation of an SS-9 class missile in an SS-11 silo." [Author's note: The SS-19 is 50-60 percent larger in volume than the SS-11 and can thus be considered an SS-9 class missile.] *Question:* "Why in your view did the Soviets refuse to agree to a prohibition on the deployment of ICBMs larger than 70 cubic meters [in excess of 313 permitted "heavy" launchers]?" *DOD Answer:* "In my view the Soviets might have decided they wanted to retain the option to deploy a *slightly* larger version of the SS-11." (Emphasis added), *Military Implications*, op. cit., pp 565, 566; in December 1974 former Defense Secretary Laird wrote: "There is no question that if information is available indicating that the SS-X-19 missile deployment will go forward in 1975 with a volume 50 percent greater than the SS-11, such deployment would be in violation of the 1972 Interim Agreement . . . unless amended." Schlesinger to the Congress on the FY 1975 Defense Budget and FY 1975-1979 Defense Program, March 4, 1974, p 5; See also, "News Conference with Secretary of Defense James Schlesinger and Dr. Fred C. Ikle, Director, Arms Control and Disarmament Agency." (Washington: Department of Defense, 1974), p 12; Senate Foreign Relations Committee, *U.S.S.R. Strategic Policies*, 1974, pp 4-5, in which Defense Secretary Schlesinger said: "Subsequent to the signing of the agreement [SALT I] we see a Soviet research and development program of *astonishing depth and breadth.* This is not to say that they deceived us in the agreement or that the program had been designed to emerge after the agreement. Obviously, these developments were in the cards years in advance because the Soviets have the same kind of lead time problems that we have. But I think it is fair to say that many people, particularly people in the arms control community, have been *surprised* by the strength of those programs." Emphasis added. Later evidence has allowed the judgment that the Soviets in fact did deceive the U.S. with the SS-19, SS-16, and SS-N-8, and that the flight-tests of these programs may have been timed or conducted with the status of SALT I in mind.

[65] Defense Secretary Laird said on July 24, 1972: "I believe that if the Soviet Union goes forward with a program and that we receive evidence that they are proceeding in a direction which goes beyond normal modernization and which appears to be a concerted attempt to undermine the survivability of the minuteman deterrent force, we would view this with great concern. In my view, such a program would be contrary to the intent of the agreements that have been arrived at in SALT." Emphasis added. See also Military Implications, op. cit., p. 588. Further, Senator Jackson said, "The intent of the agreements is to enhance our security by enhancing the survivability of our deterrent. So you would view Soviet behavior that threatens the survivability of our deterrent as a violation of the intent of the agreements?" Secretary Laird answered, "I would agree." Ibid., p 563. Emphasis added. William Hyland concedes that, "The main criticism of SALT II, however, is likely to be that it fails to make a dent on the problem of ICBM survivability." "SALT and Soviet-American Relations," International Security, Fall 1978, p. 160.

Mr. SYMMS. Mr. President, I rise in support of Senator McCLURE's Amendment ending U.S. unilateral compliance with the unratified SALT II Treaty. I have been arguing that this should be done for over a year. I ask unanimous consent that a pamphlet entitled "Soviet SALT Deception," by David S. Sullivan, published in October 1979 by the Coalition For Peace Through Strength, be printed in the RECORD. This pamphlet presents substantial arguments that the Soviets have negotiated deceptively in both SALT I and SALT II in order to achieve substantial unilateral advantages over the United States and overall strategic superiority.

I also ask unanimous consent that an article by myself and one of my aides entitled "Soviet Violations of Existing Arms Control Treaties May Make Future Treaties Ineffective," be printed in the RECORD. This article will be published in a forthcoming book, but it is appropriate to make available to colleagues now.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SOVIET VIOLATIONS OF EXISTING ARMS CONTROL TREATIES MAY MAKE FUTURE TREATIES INEFFECTIVE

(By U.S. Senator Steve Symms and David Sullivan, Legislative Assistant)

INTRODUCTION: ARMS CONTROL'S LAST CHANCE?

Some observers are now arguing that the present arms control negotiations underway with the Soviet Union—in particular START (Strategic Arms Reduction Talks) and INF (Intermediate Range Nuclear Forces) talks in Geneva—are the world's last chance for meaningful arms control. They fear that the world is on the brink of new U.S. and Soviet strategic modernization programs which, if unconstrained before deployment by new arms control treaties, will make the world increasingly dangerous and thus perhaps remove the possibility of arms control agreements forever. These fears for the prospects of arms control surely exaggerate its past effect, however, because the world is already exceedingly endangered by an altogether unprecedented and highly destabilizing Soviet military build-up, largely in violation of a whole panoply of existing arms control agreements.

The increasing popular pressure for progress in arms control negotiations with the Soviets is curious, in light of the fact that the Soviets are violating all existing arms control agreements with varying degrees of provocativeness and certainty. The respected columnist, George Will, stated on television recently that world public opinion was not at all a deterrent to Soviet violation of arms control treaties, because the U.S. has explicitly accused the Soviets of violating several important arms control treaties, yet there has been neither an outburst of international public outrage nor a cessation of the Soviet violations. Will argued that previously many American arms control enthusiasts had posited that arms control agreements with the Soviets would be self-enforcing, due to Soviet reluctance to be publicly accused before the world of even possible violations.

This concept now must be abandoned, because not only do U.S. accusations of Soviet arms control violations not deter further Soviet violations, but they do not even effect the arms control negotiations process itself. U.S. and world public opinion evidently assumes that, despite Soviet violations of all existing arms control treaties, some concrete security gains can be forthcoming in continued negotiations for further scraps of treaty paper. Thus if existing arms control agreements are worthless because they are not being kept by the Soviets, perhaps some future agreement will somehow nevertheless bring security and peace.

Accompanying this wishful thinking is a strange example of circular reasoning: the U.S. should not insist too firmly on accusations of Soviet arms control violations, for fear that these U.S. accusations of Soviet arms control violations will preclude further agreements. Always there is the noble but forlorn hope that, despite the historical record of Soviet arms control negotiating deception and treaty non-compliance, somehow the Soviets will eventually become "good faith" partners in arms control accords of the future.

Also implicit in this wishful thought-world is the idea that nuclear weapons and other weapons of mass destruction are just so horrible and uncivilized that their reality must be denied and they must be negotiated away. Forgotten is the fact that a nuclear balance has deterred general war for over 38 years, but that this balance of deterrence is increasingly tenuous due to Soviet gains. The utility and value of negotiated arms control treaties is therefore nil if the compliance of all parties cannot be enforced. Indeed, unenforceable arms control treaties can even be counterproductive to security and peace if they provide a license for one party to cheat, while convincing the other complying party that the current arms control agreement, while faulty, cannot be sacrificed over current violations charges without also foreclosing the prospects for future agreements.

One analogy worth noting relates to the fact that in a bipolar power relationship, one party can be indisputably sincere in its quest for equitable and verifiable arms control agreements, while the other can be just as disagreeable and duplicitous as possible. Due to the bipolar relationship, the sincere power will indefinitely tolerate and even encourage continued treachery by the other power. A recent movie, The Duelists, contained the analogy of a noble Napoleonic officer continuing to be forced to duel with a

constantly duplicitous, aggressive fellow officer, who was oblivious to all attempts at peacemaking from the first. Thus the Soviets can be as hostile an arms control partner as they want to be, because the bipolar nature of world power means they are the only power around to negotiate with, and arms control is the only alternative to cold war.

THE SAD RECORD OF SOVIET TREATY COMPLIANCE

There are 14 reported examples of Soviet negotiating deception in SALT I and II. Former Arms Control Agency Director Eugene Rostow has confirmed that the Soviets negotiated deceptively in SALT I. Henry Kissinger has charged the Soviets with "sharp practice" in SALT I, and a top Reagan White House official has accused the Soviets of "sharp practice" in SALT II. There are more than 30 reported violations or circumventions of SALT I and II and other arms control agreements, as well as over 50 examples of Soviet treaty violations, disinformation and diplomatic duplicity. (See *The Bitter Fruit of SALT, A Record of Soviet Duplicity,* by David S. Sullivan, The Texas Policy Institute, 1982.) For example, in May 1920, the Soviets signed a treaty with the independent Georgian Republic pledging non-interference in its internal affairs. Less then one year later, Soviet troops invaded the country and incorporated it into the USSR. The Soviets signed similar non-aggression bilateral treaties with Czechoslovakia, Lithuania, Estonia, Latvia, Poland, Romania, and Afghanistan. Eventually, the Soviet Union took military action against all of these treaty partners and imposed new Soviet-dominated governments on all of them.

An official U.S. State Department Soviet Affairs Note published in 1959 stated:

"Few nations can match the USSR in vociferous protestations of loyalty to international obligations. However, such declarations—which are typical of Soviet propagandists and scholars alike—diverge widely from actual Soviet practice. In the years since the Bolshevik Revolution the Soviet government, while consistently accusing others of bad faith in international dealings, has not hesitated to violate its own treaty obligations when such action appeared to be in its interest."

It is indisputable that there have been many Soviet treaty violations. The Soviets use international law, like warfare and subversion, as an instrument of policy. A Soviet international legal expert succinctly confided:

"Those institutions of international law which can facilitate the accomplishment of the stated tasks (of Soviet foreign policy) are recognized and applied in the USSR; those which contradict these aims in any way are rejected."

Soviet foreign policy explicitly serves the objectives of world revolution and world domination.

The above official 1959 State Department document authoritatively concluded that:

"The history of the last 40 years provided numerous examples of deliberate treaty violation by the Soviet regime. A cursory examination of the public conventions entered into by the Soviet Union during this period reveals well over *50 violations.* The USSR has disregarded treaty provisions inconvenient to itself, has unilaterally denounced conventions to which it was a party, has threatened abrogation as a means of intimidation, and has on several occasions attacked fellow signatories to treaties of friendship and nonaggression." (Emphasis added.)

An *official* U.S. government book entitled *Soviet Treaty Violations* was published by the Department of Defense on November 5, 1962. This official book also describes over 50 Soviet treaty violations since 1917. In the view of early Soviet theorists, the purpose of treaties "was not to stabilize world order, or world peace, but rather to function as a temporary armistice in the movement towards the world revolution." (Grzybowski, *Soviet Theory of Treaties,* in S. Agrawala, *Essays on the Law of Treaties,* p. 198 (1972)). As V. I. Lenin declared frankly in 1918 in regard to the March 1918 Soviet-German Brest-Litovsk peace treaty: "Yes, of course we are violating the treaty. We have already violated it 30 or 40 times." The Soviets then went on to assist the German Weimar Republic in violating the disarmament provisions of the Versailles Treaty. The Soviets violate their own Constitution. They violate the Litvinov Agreement of 1933 establishing U.S.-Soviet relations.

A. Soviet SALT violations

An advisor to President Reagan, Laurence Beilenson, stated in a recent book:

We consider ourselves sagacious in staking our survival on treaties with the USSR, whose ideology blesses cheating as a virture."

And as Reagan's National Security Advisor, Judge William Clark, stated, "Historically, Soviet behavior does not give us great confidence in their willingness to live up to their word."

Analysis of Soviet compliance with Strategic Arms Limitation Treaties (SALT) has long been complicated by the ambiguity of many of the provisions of the agreements. But this ambiguity was deliberately intended by the Soviets and is the direct result of Soviet negotiating deception to create loopholes to protect their strategic programs from constraints. Analysis of Soviet SALT compliance is also hindered by the well known ambiguity of U.S. intelligence data and judgments. But this ambiguity also stems largely from Soviet behavior. Since 1972, the Soviets have engaged in a massive camouflage, concealment, and deception program involving all Soviet strategic forces. This program has deliberately and clearly interfered with U.S. national technical means of verification. The harmful effects of Soviet camouflage, concealment, and deception can be recognized in the role it had in misleading U.S intelligence estimates of both the basic Soviet Intercontinental Ballistic Missile (ICBM) and Submarine Launched Ballistic Missile (SLBM) levels during SALT I. These were the key verification parameters of SALT I, and U.S. intelligence miscounted and underestimated both of them.

Thus the Soviets deceptively negotiate ambiguous SALT provisions, and then try to confound U.S. monitoring and analaysis of their compliance behavior by throwing sand in our eyes. To add injury to insult, the Soviets often deliberately circumvent and even violate arms control treaties and other treaties. Nevertheless, the Soviets have had the gall to claim frequently that the U.S. should "trust" the Soviets to comply with SALT agreements, and in one case, to even wrongly accuse the U.S. of a SALT violation.

Both the SALT I ABM Treaty and the SALT I Interim Agreement on Strategic Offensive Arms explicity stated in their preambles that their purpose included the "Strengthening *'trust'* between states." Dr. Kissinger also emphasized several times in May and June of 1982 that SALT I was supposed to strenthen U.S.-Soviet *"trust."* The Soviets themselves have also stated that trust was important in SALT:

"The SALT II agreement presupposes *Mutual trust* and the creation of an atomosphere of *good will* which would promote the improvement of relations between the USSR and the United States." (Emphasis added.)

"Trust" was therefore an important concept in SALT. However, recently published analyses of Soviet negotiating deception in May 1972, together with the massive Soviet comouflage and concealment effort since 1972, and the Soviet record of non-compliance with important provisions of SALT I, cast certain doubt on the concept of "trust" and "good faith" in the SALT negotiations.

In fact, the Carter Administration was ambivalent about trust in SALT. In the State Department SALT Compliance White Paper released in 1978, the Carter Administration contradicted itself on the issue of "trust." On page 8 the documents stated: ". . . confidence and *trust* . . . are *important* to mutual efforts to establish and maintain strategic arms limitations." Five pages later the same document stated: ". . . The United States does not rely on *trust,* on Soviet intentions . . . inassessing whether verification of a SALT agreement is adequate."

Probably because the Carter Administration did not want to admit the fact that there was substantial evidence of Soviet deception and bad faith in SALT negotiating in compliance, the preamble to the SALT II Treaty contained absolutely *no* reference at all to "trust." This omission is remarkable, and should raise important questions about our ability to verify the Treaty. The Carter Administration conceded that although we cannot trust the Russians, we could still "adequately" monitor, verify, and enforce Soviet compliance with SALT II. But the question of Soviet negotiating and operational deception was ignored by the Administration, as were the problems of defining a violation and enforceing compliance.

The conclusion that the Soviets have violated SALT treaties should not be suprising, however, when viewed against the background of the history of Soviet diplomatic duplicity and treaty violations since the Bolshevik Revolution of 1917. Moreover, the conclusive evidence of Soviet negotiating deception throughout the SALT negotiations is a good indication of Soviet compliance behavior. This pattern of negotiating deception, operational camouflage and concealment, and treaty violations and circumventions is part of a much larger Soviet effort in diplomatic duplicity which involves propaganda, disinformation ploys, and "active measures" of covert action and subversion designed to totally defeat the West. Marxist-Leninist ideology justifies and rationalizes all Soviet foreign policy behavior, from treaty violations to progaganda, and "active measures" such as forgeries. The Soviets are merely behaving like the same Russians of the Cold War era.

The record of Soviet non-compliance with arms control treaties suggests that evasion, circumvention, and violation are endemic to Soviet ideology and diplomatic behavior. The SALT negotiating and compliance record confirms that the Soviets have entirely different and hostile objectives in arms control which are fundamentally incompatible with those of the U.S. These Soviet arms control objectives are derived directly from Marxist-Leninist ideology.

Thus the Soviets have found evasion, circumvention, and violation of arms control agreements to be in their interest and have behaved accordingly. They have circumvented, evaded, or violated SALT agreements in order to further the shift in the correlation of forces in their favor. Yet thus far the U.S. has failed to respond with compensatory strategic programs or even to challenge Soviet SALT violations. The ultimate irony is that Soviet peace propaganda has successfully obfuscated Soviet SALT cheating, and instead made the U.S. seem to be the main villain and obstacle to successful arms control.

The Soviet Union is guilty of more than 30 reported violations or circumventions of the SALT I ABM Treaty, SALT I Interim Offensive Weapons Agreement, SALT II, and other arms control agreements. The SALT violations "coverup" began under the Nixon Administration and was orchestrated by Dr. Henry Kissinger, who continued to perpetuate the coverup under the Ford Administration. It was continued and expanded under the Carter Administration, which extended the coverup to Soviet violations of SALT II. The Nixon, Ford, Carter Administrations and now even the Reagan Administration either suppressed these Soviet SALT violations and circumventions from the American people, or distorted or misleadingly presented them. The arms control violations and circumventions are as follows:

1. SALT I Violations and Circumventions—Anti-Ballistic Missile (ABM) Treaty

Soviet SAM testing in ABM mode for Surface to Air missile (SAM) upgrade for nationwide defense;

Soviet deployment of ABM Battle Management Radars for nationwide defense;

Soviet ABM camouflage and concealment;

Soviet falsification of ABM deactivation;

Soviet creation of anew ABM Test Range without required prior notification;

Soviet development of a rapidly deployable, mobile ABM, also for nationwide defense.

2. SALT I Violations and Circumventions—Interim Agreement

Soviet deployment of the heavy SS-19 ICBM as the replacement of the light SS-11, which is the most dangerous and demonstrable of all Soviet SALT violations or circumventions;

Soviet failure to deactivate old ICBMs on time, and continuous falsification of official deactivation reports;

Bringing back ICBM equipment to deactivated ICBM complexes;

Keeping 18 SS-9 ICBMs at an ICBM test range illegally operational;

Soviet deployment of "IIIX" silos with a configuration too similar to a missile-launch silo;

Soviet massive use of deliberate camouflage, concealment, and deception which actualy increased after 1972;

Encryption of missile telemetry (electronic encoding of signals sent during flight testing);

Camouflage of ICBM testing, production, deployment;

Concealment of SLBM submarine construction, berthing, dummy subs, construction of berthing tunnels;

Constructing over 68 strategic submarines, when only 62 were allowed;

SS-20 Intermediate Range Ballistic Missile (IRBM) deployment, which should count as ICBM deployment;

Violation of Brezhnev's pledge not to build mobile ICBMs;

Deploying SS-11 ICBMs at SS-4 Medium Range Ballistic Missile (MRBM) sites, probably having a covert soft lauch capability;

Keeping about 1,300 to several thousand old ICBMs stockpiled for both covert soft launch and rapid reload of silos for refire.

As former Director of the U.S. Arms Control and Disarmament Agency Eugene Rostow stated on October 20, 1981: ". . . The SALT I Agreements and the process of negotiating SALT II did not prevent the worst decade of the Cold War or the extraordinary buildup of the Soviet nuclear arsenal." According to Under Secretary of Defense Richard DeLauer in the Fical Year 1984 Defense R&D Report, "The Soviets, in fact, never slowed or even perturbed their strategic development and deployment programs in spite of detente, active arms control negotiations, or the SALT agreements."

3. Four Other Arms Control Violations

There have been over 15 Soviet underground nuclear tests over 150 kilotons, in clearcut violation of the 1974 Threshhold Test Ban Treaty put into effect in 1976. Several of these high yield underground tests are unambiguous violations; indeed, the Soviets actually tested more weapons above 150 kilotons after 1976 than before. President Reagan stated at a Press Conference on March 29, 1983, in a reference to the TTBT: "We have reason to believe that there have been numerous violations . . ." of the TTBT. As former ACDA Director Rostow testified to the Senate on July 29, 1982: ". . . We have real concerns about a number of tests conducted by the Soviets since the TTBT and PNET Agreements were signed." Defense Secretary Weinberger stated on August 11, 1982 that some Soviet tests have been big enough "to raise serious questions about compliance" with the 150 kiloton threshhold of the TTBT.

There have been over 30 unambiguous Soviet ventings of radioactive debris from underground nuclear tests in clearcut violation of the 1963 Limited Test Ban Treaty. These ventings are all unequivocal, and resulted in the spread of radioactive debris outside of Soviet borders.

In addition to the Soviet Combat Brigade deployed in Cuba, there has been Soviet deployment to Cuba since 1970 of Golf and Echo class submarines carrying long-range nuclear missiles. There has been deployment to Cuba of nuclear-capable MiG-23 fighter bombers to Cuba, and deployment of longrange Bear bomber type aircraft capable of carrying nuclear bombs and missiles, all in direct violation of the 1962 and 1970 Agreements Prohibiting Offensive Weapons and their support facilities in Cuba. This clearcut arms control violation is even more serious than SS-19 deployment. President Reagan and 3 other top officials have directly accused the Soviets of violating the Kennedy-Khrushchev Agreement of 1962.

CIA Director William Casey was asked in *U.S. News and World Report* of March 8, 1982 "Does what is happening now in Cuba violate the 1962 Kennedy-Khruschev Agreement ending the missile crisis?" CIA Director Casey answered: "Oh sure it does, because the 1962 agreement said the Soviets would send no offensive weapons, and it also said there would be no export of revolution from Cuba. The agreement has been violated for 20 years."

On March 8, 1982, Congressman Jack Kemp asked the then Chairman of the Joint Chiefs of Staff: ". . . Is it not true that . . . there is a *de facto*, if not a *de jure* violation by the Soviet Union of understandings that this country has had with them?" General Jones answered: "We interpret . . . Soviet actions in Cuba as a violation . . . In my judgment, they the Soviets have gone beyond the 1962 accords . . ." (Emphasis added.)

On March 11, 1982, Under Secretary of Defense for Policy Fred Ikle confirmed that the Soviets had bases in Cuba capable of nuclear attack, and testified to Congress that the 1962 Kennedy-Khrushchev Agreement "had been eroded away to nothing" by Soviet actions.

In May, 1982, President Reagan stated in a nationally televised press conference that: "The only place he [i.e., the late Soviet President Brezhnev] could install them [Soviet nuclear weapons] in this hemisphere would be in Cuba, which is his [Brezhnev's] satellite now . . . But this would be in total violation [i.e., of the 1962 Kennedy-Khruschev Agreement]. You know there's been other things we could think are violations, also of the 1962 agreements." If the Soviets are violating the very agreement that settled the Cuban-Missile Crisis, then the world must be back in a crisis situation. Indeed, the Soviet threat from Cuba is today greater than it was in 1962.

There is also the now confirmed April 1979 germ warfare accident of Sverdlovsk, indicating conclusive Soviet violation of the 1975 Convention banning germ warfare. Moreover, there is now also conclusive evidence of illegal Soviet use of biological toxins and chemical agents in Southeast and Southwest Asia. And the Soviets also have an intercontinental delivery capability for Biological Warfare (BW) weapons. These clearcut Soviet arms control treaty violations are easily understandable, and all by themselves have graphically demonstrated the duplicitous Soviet approach to arms control. President Reagan has twice explicitly accused the Soviets of violating the 1975 Biological and 1925 Chemical Warfare Conventions. For example, on January 26, 1983, President Reagan stated that there is "overwhelming evidence of Soviet violations of international treaties concerning chemical and biological weapons." He stated at the United Nations on June 17, 1982 that: "The Soviet Union and their allies are violating the Geneva Protocol of 1925, . . . and the 1972 Biological Weapons Convention. There is conclusive evidence . . ." The State Department has also directly accused the Soviets of violating the BW and CW Conventions. (But in 1977, Soviet Foreign Minister Gromyko even hypocritically told the UN that BW weapons were "cruel and barbaric.")

There has long been more than adequate evidence to challenge Soviet SALT violations. The shift in the strategic balance in Soviet favor, and U.S. advocacy of a minimum deterrence posture in which Soviet strategic advantages are deemed meaningless, are the principal causes for U.S. acquiescence in the Soviet SALT violations. Soviet circumventions and violations have shifted the strategic balance further in Soviet favor, which in turn has made it more provocative and dangerous for the United States to challenge these violations. It is now almost impossible for the U.S. to enforce Soviet arms control compliance, and the Soviets know that this U.S. paralysis gives them added incentive to continue to violate arms control treaties, while hypocritically continuing negotiations for further arms control treaties.

Ambassador Seymour Weiss, former Director of the State Department's Office of

Political-Military Affairs, has succinctly explained the problem of Soviet SALT violations for the U.S.:

"Once a democracy has committed itself to a major, formal arms control treaty, a treaty seen as the linchpin of a broader policy of detente, finding the partner in violation of that treaty tends to undermine its own foreign policy. It amounts to an admission of past failure. Violations—and their political as well as military implications—must be explained to the electorate and to one's allies. This means that further arms control proposals will be difficult if not impossible to advance. The consequences are almost endless and all bad, from the point of view of those supporting arms control and those who insist agreements must be and in fact are verifiable. The violation must be made to go way. It did not occur, or if it did it was a passing aberration, of no military or political consequences, unworthy of open discussion. At all costs, the process of arms control must be protected. These are not overstatements. It is this pressure of political events that bears most heavily on verification, that causes even relatively clearcut violations to be rationalized away. Unfortunately, our failure to confront the Soviets can only be interpreted by them on one way: as proof that the massive shift in the "correlation of forces" away from capitalism and toward socialism has left the leaders of the West no choice but to accommodate themselves to the Soviet position that no violations have occurred. This, in their view, is a "forced concession" caused by Soviet possession of superior power. The Soviet world view allows them no other interpretation of our acquescence in the face of *overwhelming objective evidence that the Soviets have violated SALT and other arms control agreements* and the West has taken no action to repudiate or modify them." (Emphasis added.)

Ambassador Weiss has thus answered the question of why the United States has not acted upon Kissinger's 1972 warning that the United States would abrogate SALT if the Soviets were circumventing or cheating. Detente and continuing the SALT process are evidently more important than U.S. unilateral actions to preserve U.S. national security.

Probably the most authoritative accusation of Soviet SALT violations ever made has been completely ignored. According to the *Washington Times* on September 15, 1982, Dr. Henry Kissinger stated: "On actual [Soviet SALT] violations, I am familiar with one . . ." Kissinger went on to describe this Soviets SALT violation as testing SAMs in an ABM mode. Thus by explicit admission of the chief architect of detente, Henry Kissinger, the Soviets have violated SALT Treaties.

Another authoritative accusation was made by Ambassador Paul Nitze, who is now Chief U.S. Negotiator for International Range Nuclear Force Negotiations. He was asked by Senator Zorinsky during Senate Foreign Relations Committee SALT II hearings in 1979: "Do you know of any violations that have come before the SALT I Standing Consultative Commission that were not resolved under SALT I?" Ambassador Nitze replied: "No, but how were they resolved? *They were resolved by accepting what had been done in violation.*" (Emphasis added.) Thus, Paul Nitze, one of our most knowledgeable and experienced SALT negotiators, has strongly bolstered the thesis that the Soviets have violated SALT agreements.

Roberta Wholstetter has also written that:

"The cheater in an arms agreement and the side cheated . . . both need to preserve the illusion that the agreement has not been violated. The British fear of an arms race (i.e., in the 1930s) so skillfully manipulated by Hitler, led to a (1935) naval agreement, in which the British . . . tacitly revised the Versailles Treaty. And British fear of an arms race prevented them from recognizing violations of the new agreement."

VERIFICATION HANDICAPS

One indication of the unreliability of our intelligence and verification process is the fact that the historical record of Soviet activities in SALT can be tampered with for political reasons by the White House. Both evidence and analysis of SALT verification issues have on occasions been suppressed within the U.S. intelligence community. As the Pike Congressional Committee reported in 1975:

"The spectre of important information, suggesting Soviet violation of strategic arms limitations, purposely withheld for extended periods of time from analysts, decision-makers, and Members of Congress, has caused great controversy within the Intelligence Community."

And, as Admiral Elmo Zumwalt clearly demonstrated in a January 1976 Aviation Week article:

". . . in six cases cited by Chairman Pike, key intelligence items were withheld at Kissinger's direction for periods in excess of two months—in one case for almost six months."

Moreover, Congressman Jack Kemp has noted recently that key Communications Intelligence evidence related to the large size of the Soviet SS-19 ICBM and the Soviet commitment to its large scale deployment was intercepted by the U.S. in May 1972. Kemp then notes the contradictions between Dr. Kissinger's assurances to Congress in June 1972, that the Soviets could not deploy heavy ICBMs the size of the then still secret SS-19 in place of light ones, and the intercepted evidence.

Kemp goes on to ask: "Was any vital evidence ever suppressed within the intelligence community, and did Dr. Kissinger have any role in this?"

The public statements of Dr. Kissinger in June 1972, juxtaposed against Congressman Kemp's analysis of the intercepted COMINT evidence suggest either the suppression of intelligence information, the failure of intelligence analysis, or both.

The official unclassified report of the Senate Select Committee on Intelligence published on October 4, 1979, concerning the verifiability of SALT II confirms that:

"It is clear from the SALT I record that intelligence of possible Soviet violation of the Treaty [sic] *was*, in some cases, and for a time, *withheld* from Executive branch officials who had a need for such information." (Emphasis added.)

A fundamental problem with verification is the need to restore the integrity of the intelligence analysis and dissemination process. This is inherently a very fragile process, and damage to its integrity, timeliness, and accuracy is extremely dangerous. Intelligence evidence should never be suppressed. Competing and dissenting analysis must instead be brought to the attention of our policymakers. Common sense, the "American way," and the need for duplication of functions and debate within the intelligence community suggest that dissent and competitive analysis should be encouraged, rather than being penalized as is so often the case. Evidence that is withheld distorts intelligence analysis, and delays in reporting findings prevent recognition of Soviet deceptions, as the record of SALT I verification efforts clearly indicates.

But the Senate Intelligence Committee has so far failed to require procedural changes in the Executive branch which would prevent intelligence from being withheld in the future from Executive offices with a "need to know." Moreover, there are still no procedures to prevent information on Soviet SALT violations from being withheld from Congress. There have also been public reports that Dr. Zbigniew Brezinski has participated in the Carter Administration's suppression of a highly-classified CIA study on Soviet SALT deception. Taken with the evidence presented above, one cannot avoid concluding that elements within the U.S. government have suppressed intelligence concerning Soviet noncompliance with all of the SALT-related accords. This suppression, in the opinion of some Senators, constitutes a clear and present danger to our national security.

Second, even without considering the suppression and distortion of intelligence regarding Soviet compliance with SALT, it is readily apparent that the record of U.S. intelligence collection and analysis in counting the numbers of both Soviet ICBMs and SLBMs, the main quantitative constraints of SALT I, is not good. In fact, U.S. intelligence miscounted both of these levels during SALT I, and the bias was to underestimate as throughout the 1960's. These heretofore unrevealed miscounts were the result mostly of bad analysis. Our declining collection capabilities suggest that such errors are all too likely to be repeated in the future.

Third, there are long delays in the analysis of Soviet SALT compliance. Collection, analysis, and enforcement are in fact not prompt, despite Carter Administration claims. In three cases it took respectively seven, three, and two and one-half years after detection to "resolve" a compliance question. Of even greater importance, after these long delays, final resolution of *all* significant compliance problems amounted to U.S. acquiescence in Soviet circumvention or violation. The Soviets themselves have also falsified basic data in SALT negotiations, treaties, and compliance questions, and they have officially lied to the U.S. several times. The U.S. has only once challenged Soviet falsification, but the Soviets evidently never corrected the record or rectified the situation.

Former Arms Control Agency Director Eugene Rostow stated to the U.N. on February 9, 1982:

"Troubling questions have arisen about Soviet compliance with international agreements concerning chemical and biological warfare . . . they cast a shadow over the possibility of verifying Soviet compliance with treaties on the control of other arms, *particularly nuclear arms.*" (Emphasis added.)

In the same speech, Rostow directly accused the Soviet Union of Flagrantly violating both the UN Charter and the Helsinki Final Act by intimidating the Polish people. Rostow was willing to accuse the Soviets of violating vaguely worded agreements, but not precisely worded SALT agreements. The closest Rostow has apparently come to questioning Soviet SALT compliance is the following statement also made on October 20, 1981:

"During the last ten years we have had many shocks and surprises in attempting to follow and anitcpate the growth of the

Soviet nuclear arsenal, and to monitor Soviet compliance with existing arms control agreements. Officials . . . (are) troubled about the effectiveness of verification and of our procedures for ensuring the enforcement of arms control treaties and disturbed about the implications of their experience. *Their concern is easy to understand.*" (Emphasis added.)

Rostow added realistically, however, that the American public have "a healthy skepticism about what the Soviets are up to."

SOVIET SALT II VIOLATIONS: A U.S. NATIONAL SECURITY AND CONSTITUTIONAL CRISIS

This section provides evidence that the Soviet Union is flagrantly violating the second Strategic Arms Limitation Treaty—SALT II—in seven significant cases, as well as other arms control agreements. As noted above, there are also massive Soviet violations of the Biological and Chemical warfare conventions (the "Yellow Rain" situation), and also Soviet violation of the Thresh-hold Nuclear Weapons Test Ban and the Kennedy-Khrushchev Cuba Agreement of 1962. The Reagan Administration (and the President himself) has officially charged the Soviets with violations of the Biological and Chemical Warfare Conventions, with violation of the Yalta and Potsdam Agreements, and with violating the Kennedy-Khrushchev Agreement, while stating its grave concern over probable Soviet violations of the Thresh-hold Test Ban Treaty. This dangerous Soviet noncompliance gravely threatens U.S. national security and the preservation of world peace, because it contributes to the strengthening of Soviet strategic superiority. In stark contrast to this ongoing Soviet strategic buildup in violation of SALT II, the U.S. is complying strictly and unilaterally with the unratified SALT II Treaty. U.S. strategic forces have been constrained in nine significant but little publicized cases in order to comply unilaterally with the unratified SALT II Treaty. Further, this U.S. unilateral compliance with SALT II is occurring in violation of the U.S. Constitution and law.

The Soviets thus have all the benefits of U.S. SALT II compliance, while themselves accepting no obligations. This situation is allowing already significant Soviet strategic superiority to grow dangerously, further shifting the world balance of power against the U.S.

A. Soviet SALT II violations

In his recently published memoirs, "Keeping Faith," former President Carter declared that there was: "an erroneous belief . . . that the Soviet leaders have habitually violated earlier [SALT] agreements, but that their defaults were somehow concealed by disloyal American leaders." (p. 214)

But in the same book, Carter contradictorily quotes former Secretary of State Henry Kissinger as conceding that the Soviets have violated or circumvented SALT Treaties:

"He [Kissinger] added that the Soviets . . . would honor the letter of an understanding, but that one had to be very careful because they would probe for every loophole in the language in order to gain some advantage, even if it violated the intent of the original deal." (p. 188)

Carter was acknowledging Soviet SALT circumventions by so citing Kissinger.

As noted, according to the Washington Times of September 15, 1982, Henry Kissinger stated, "On actual violations, I'm familiar with one . . .". This Soviet SALT violation was SAM testing in an ABM-mode. Thus, according to Jimmy Carter, the Soviets have at least circumvented SALT Treaties, and by explicit admission of the chief architect of detente and SALT, Henry Kissinger, the Soviets have actually violated SALT Treaties. Many other American leaders have authoritatively accused the Soviets of SALT violations, ranging from INF negotiator Paul Nitze, former Defense Secretary Melvin Laird, retired Admiral Elmo Zumwalt, Senators Jake Garn, Gordon Humphrey, Jesse Helms, Steve Symms, former Senator James Buckley, former Congressman David Emery, defense analyst Colin Gray, and Ambassador Seymour Weiss.

The clear fact of massive Soviet violation of SALT Treaties under Carter and Kissinger was recognized by President Reagan's 1980 Republican Party Platform. The 1980 Republican Platform twice explicitly accused the Carter Administration of a "coverup" of Soviet violations of SALT I, II, and other arms control agreements:

The Republican party deplores the attempts of the Carter Administration to *cover-up* Soviet non-compliance with arms control agreements, including the now overwhelming evidence of blatant Soviet violation of the Biological Warfare Convention by secret production of biological agents at Sverdlovsk . . . *We pledge to end the Carter cover-up of violations of SALT I and II,* to end the coverup of Soviet violation of the Biological Warfare Convention. . . ." (Emphasis added.)

The Soviets have been violating the SALT II Treaty ever since they signed it in 1979. President Reagan himself recognized the existence and danger of Soviet SALT II violations when he stated on May 9, 1982:

"So far, the Soviet Union has used arms control negotiations primarily as an instrument to restrict U.S. defense programs, and in conjunction with their own arms buildup, as a means to enhance Sovet power and prestige. *Unfortunately, for some time suspicions have grown that the Soviet Union has not been living up to its obligations under existing arms control treaties.*" (Emphasis added.)

Defense Secretary Weinberger added in the fiscal year 1984 Defense Posture Statement that:

"Our experience with the effects of some previous arms control agreements has not been positive. They had the effect of limiting our own forces while enabling the Soviets to continue a massive arms buildup. *Despite the SALT accords, the Soviet Union has steadily increased its nuclear arsenal,* making our missile forces much more vulnerable and our deterrent capability less stable and secure." (Emphasis added.)

This statement is tantamount to an official Reagan Administration acknowledgement of at least Soviet circumvention of SALT I and SALT II.

President Reagan's and Defense Secretary Weinberger's suspicions of Soviet SALT II circumventions and violations are well founded. A top Reagan Administration verification official has testified to Congress that he has "grave concerns about Soviet compliance with SALT I and SALT II."

Another set of factors suggests that the Reagan Administration should move toward charging Soviet violations of SALT II. Soviet diplomatic behavior has been officially linked to Soviet arms restraint under the SALT II Treaty. Even before the Soviet Combat Brigade in Cuba was discovered and the Soviet invasion of Afghanistan occurred in late 1979, the leadership of the Senate realized that SALT II could not be passed. Since then, the Soviets have continued their repression in Afghanistan, intimidated the Polish people, and have increased their arms shipments to Cuba threefold over the rate of 1962. Moreover, four top officials of the Reagan Administration have confirmed that the Soviets have violated the Kennedy-Khrushchev Agreement ending the 1962 Cuban Missile Crisis.

These aggressive Soviet actions totally contradict the 1972 agreement on Basic Principles of U.S.-Soviet Relations. This agreement states that the principles of "cooperation"; "peaceful co-existence"; "equality"; "avoidance of military confrontation"; "restraint"; "mutual accommodation"; "no efforts to obtain unilateral advantages"; "and renunciation of the use or threat of force", are the basis of the U.S.-Soviet relations. Soviet agressive actions in Cuba, the Caribbean, Poland, Afghanistan, and elsewhere in the world totally contradict the principles of the 1972 agreement.

But the Preamble to the SALT II Treaty explicitly states that the SALT II treaty "proceeds" from the 1972 agreement.

Thus the very foundation of the SALT II Treaty is being violated by the Soviets.

The Soviets have been violating or circumventing the SALT II Treaty flagrantly. The following examples of Soviet SALT II violations or circumventions have been widely reported in the press, and are well known:

First, the reported Soviet rapid reload and refire exercises for their giant SS-18 cold-launched ICBM. This violates or circumvents all the SALT II ceilings on launchers, and also specific provisions prohibiting such a capability. It enormously increases the already overwhelming Soviet counterforce capability.

Second, the reported Soviet covert deployment of 100 to 200 camouflaged and concealed mobile SS-16 ICBMs at the Plesetsk test range. This activity explicitly violates several provisions of SALT II specifically prohibiting SS-16 deployment and prohibiting operational use of test range launchers. It also violates the SALT II Data Exchange, an integral part of the Treaty. It is similar to the Soviet illegal deployment of 18 SS-9 ICBMs at the Tyuratam test range during SALT I. It provides the Soviets with a significant, covert strategic reserve force. (See SALT II Agreement, U.S. Department of State, Selected Document No. 12B, 18 June 1979, p. 37.) The Arms Control and Disarmament Agency has reportedly recently done a study confirming Soviet deployment of SS-16s in violation of SALT II, and Assistant Defense Secretary Perle on November 27, 1982 stated in regard to the SS-16 that there "was some considerable evidence that could well have indicated a violation." On October 3, 1982, former ACDA Director Rostow stated "certainly evidence has come along that causes great concern about whether the SS-16 provisions of SALT II are being respected."

Third, the Soviet deployment of AS-3 "Kangaroo" long-range air-to-surface missiles on 100 TU-95 Bear intercontinental bombers, in explicit violation of several provisions and launcher ceilings of SALT II. An official Defense Department publication, Soviet Military Power (October, 1981) establishes the fact of this violation. This is also a Soviet falsification of the Data Exchange, an integral part of the Treaty, calling into question all Soviet supplied data.

Fourth, Soviet deployment of long-range air-to-surface missiles on the intercontinental Backfire bomber. This deployment explicitly violates several provisions and

launcher ceilings of SALT II, as well as the Brezhnev Backfire Statement, another integral part of the Treaty. Moreover, according to Congressional testimony by Under Secretary of Defense DeLauer on March 4, 1983, the Soviets are producing more than 30 Backfires per year, which also violates the Brezhnev Backfire Statement.

Fifth, as reported in the Congressional Record, p. S 15698, December 20, 1982, and May 13, 1982, p. S.5164, the continued almost total encryption (or encoding) of telemetry signals from the following Soviet missile programs: the SS-NX-20 SLBM, the SS-NX-19 SLCM, the SS-18 Mod X ICBM, the SS-20 IRBM, and now reportedly even the new Soviet medium-heavy ICBM equivalent to the U.S. MX ICBM. Moreover, 4 more new Soviet ICBMs are reportedly ready for flight-testing at any time. These new missiles will surely be almost completely encrypted as well. This almost complete Soviet encryption is in clearcut, flagrant, conclusive violation of several provisions of SALT II, as will be seen below.

Sixth, the fact that the massive Soviet strategic camouflage, concealment, and deception program is intended to deliberately interfer with U.S. National Technical Means of SALT verification—satellite reconnaissance—and therefore constitutes another SALT II violation. This violation is confirmed by a Soviet military dictionary dated as early as 1966, which states explicitly that all Soviet interference with U.S. satellite reconnaissance is deliberate, thereby proving the violation. Moreover, there are recent reports in the New York Times and Aviation Week and Space Technology that the Soviets damaged a U.S. digital imaging satellite by beaming a laser weapon on it. This is another flagrant SALT violation.

Explanation of the Soviet camouflage, deception, and telemetry encryption violations is straightforward. The SALT II Treaty states in paragraph 3 of Article XV:

"Each Party undertakes *not* to use *deliberate* concealment measures which impede verification by national technical means. . . ." (Emphasis added.)

More specifically, the Second Common Understanding to paragraph 3 states further that:

"Each Party is free to use various methods of transmitting telemetric information during testing, including its encryption, except that, in accordance with the provisions of paragraph 3 of Article XV of the Treaty, neither Party shall engage in deliberate denial of telemetric information, such as through use of telemetry encryption, *whenever such denial impedes verification of compliance with the provisions of the Treaty.*" (Emphasis added.)

In regard to the new Soviet missiles now undergoing testing, the text of the SALT II Treaty itself specifies that the U.S. needs to be able to verify: launch-weight; throw-weight; number of warheads; number of stages; length; type of propellant; diameter of stages; and procedures for releasing warheads.

All of these characteristics of the new Soviet missiles now reportedly being flight-tested are being concealed from U.S. verification monitoring by the almost total Soviet telemetry encryption.

The Carter Administration pledged that it would have immediately challenged as SALT II violations Soviet telemetry encryption as complete as is now reported on the new Soviet medium-heavy ICBM and the SS-NX-20 Typhoon SLBM. The Soviets are reportedly encrypting 95 percent of the telemetry on these missiles. (See Evans and Novak, The Washington Post, December 15, 1982, "Of Hostages and Cheats," and New York Post, December 15, 1982, "Soviets Black Out New Missile Tests".) As former President Carter stated to a Joint Session of Congress on 18 June, 1979 after returning from the Vienna SALT II Summit:

"It is the SALT II agreement itself which forbids concealment measures . . . [it] forbids the encryption or the encoding of crucial missile test information. *A violation* of this part of the agreement—which we would quickly detect—*would be just as serious as a violation of the limits on strategic weapons themselves.*" (Emphasis added.)

Carter's statement means that complete Soviet encryption must be regarded as being just as serious a SALT II violation as exceeding the launcher ceilings, which the Soviets are also doing. Telemetry encryption would be irreversible and would defeat the object and purpose of SALT II, according to Robert F. Turner ("Legal Implications of Deferring Ratification of SALT II," Virginia Journal of International Law, Summer, 1981). The U.S. thus has compelling grounds for declaring the SALT II Treaty null and void.

Moreover, a Carter Administration State Department White Paper on SALT II verification published in August 1979 stated:

"Deliberate concealment efforts are themselves a *violation*, and if detected *could be grounds for abrogating the Treaty*, even if we are not certain what activity is being concealed . . . concealment measures designed to impede verification would themselves be violations." (Emphasis added.)

The Senate Foreign Relations Committee, by a 15 to 0 vote in 1979, adopted an understanding to the SALT II Treaty proposed by Senator Biden. This understanding stated that telemetry encryption that impedes verification "will be raised by the United States in the Standing Consultative Commission and, if the issue is not resolved to the satisfaction of the U.S., the U.S. reserves the right to exercise all other available remedies, including but not limited to the right to withdraw from the treaty." Thus Senator Biden was concerned about Soviet encryption of telemetry in 1979.

Thus, the Carter Administration and the Senate Foreign Relations Committee in 1979 pledged to abrogate SALT II if the Soviets used concealment measures such as almost complete telemetry encryption. The Reagan Administration, in contrast, mysteriously tolerates and covers up Soviet SALT II violations, while charging the Soviets with violations of the no less significant BW and CW Conventions, the Kennedy-Khrushchev Agreement, and the Threshold Test Ban Treaty.

There is now overwhelming evidence of a seventh significant violation of the SALT II Treaty. According to the recent Human Events of February 26, 1983, p. 4:

". . . The Soviet fired a new intercontinental ballistic missile which many in the U.S. intelligence community believe is a *'triple violation'* of the SALT II Treaty. . . . On February 8, the Soviets tested a small, solid-fuel missile from Plesetsk in northern Russia that has alarmed members of the intelligence community. Known as PL-5 (Plesetsk Range 5), it has four MIRV warheads and is mobile. Its radio signals . . . telemetry . . . which the SALT II pact says are supposed to be uncoded so the U.S. can determine critical ICBM performance characteristics—were *'100 percent encrypted'* says Defense Department intelligence. The information known about the test, according to intelligence information circulating at the Pentagon, establishes the following three violations of SALT II . . . (1) As an SS-16 derivative, the PL-5 violates the prohibition on SS-16 testing, development, production and deployment contained in SALT II and its protocol (i.e., Common understanding to point 8 of Article 4, and Article I of the Protocol); (2) The PL-5 is a *second new type* of Soviet ICBM tested since SALT II, yet Article II [Sic. i.e., Article IV] of SALT II allows the U.S. and the Soviets to build only *one* new type of ICBM. The U.S. confirmed last year that the Soviet Union had flight-tested a new type of ICBM in October. In December, amid reports that the Soviets were preparing for another missile test, State Department spokesman Alan Romberg said that, *'if they begin to test another new type of ICBM, this would conflict with the terms of SALT II.'*; (3) The 100 percent encryption of the PL-5's telemetry signals conclusively violate [Sic. i.e., violates] SALT II's article XV prohibiting encryption from interfering with U.S. verification. As a Defense intelligence summary says, 'This new Soviet missile, coming on the heels of the new Soviet PL-4 medium-heavy ICBM with 10 MIRVed warheads and 98 percent telemetry encryption, makes the Reagan Administration's policy of not undercutting the unratified SALT II Treaty as long as the Soviets show "equal restraint" *untenable.* The Soviets are undercutting SALT II by violating its provisions conclusively, thereby showing no restraint at all.'" (Emphasis added.)

According to Evans and Novak (New York Post, February 24, 1983) President Reagan himself has confirmed this Soviet SALT II violation. They report: "Regarding Moscow's February 8 missile test, Reagan virtually accused the Russians of breaking an informal agreement to obey the unratified SALT II treaty's provisions."

President Reagan stated at the press breakfast on February 23, 1983, that:

". . . There have been hints (i.e., of Soviet SALT II violations) and yet so far and up until this last case . . . *you could say I'm convinced that these are violations,* but it would have been very difficult to find the hard evidence to make it hold up in court. *This last one comes closest to indicating that it is a violation* . . . but there is no question that while there was a kind of informal agreement that since the (i.e., SALT II) Treaty had not been ratified but was still in existance there, having been signed, that both sides would agree in good faith that they would observe the things that they had arrived at in that (i.e., SALT II) Treaty. *This one, (i.e., the second new Soviet ICBM test) I think, makes it plain. The Soviet Union has really continued its buildup . . .*" (Emphasis added.)

Thus the President himself has indeed virtually accused the Soviets of violating the SALT II Treaty. The President evidently believes that a mobile SS-16 follow-on is prohibited by SALT II, that the Soviets are only allowed one new type ICBM under SALT II, and that almost complete telemetry encryption is inconsistent with SALT II. The President's interpretation of the Provisions of SALT II and the intelligence evidence is sound. The Carter Administration repeatedly emphasized that SALT II allowed the Soviets only one new type ICBM, and the U.S. put the Soviets on notice during the SALT II negotiations that we would challenge the testing of more than one new type in the SCC.

But, as noted, the Soviets stated in Izyestia of May 6, 1979 that:

"The SALT II Agreement presupposes *mutual trust* and the creation of an atmosphere of *good will* which would promote the improvement of relations between the USSR and the United States." (Emphasis added.)

B. Unconstitutional U.S. compliance with the unratified SALT II treaty

In December, 1979, the U.S. Senate Armed Services Committee stated that the SALT II treaty was not in the U.S. national security interest, because it was deemed unequal, unbalanced, destabilizing, and unverifiable.

Regettably, former President Carter and President Reagan have both defied the U.S. Senate's prerogatives in contravention of the Treaty-making power of the Constitution. Both Carter and President Reagan committed the U.S. to compliance with the SALT II Treaty, without the advice and consent of the Senate.

This U.S. SALT II compliance policy began under the Reagan Administration in March, 1981, with a State Department announcement that the U.S. would not "undercut" the SALT II Treaty, as long as the Soviets "showed equal restraint." But the U.S. Senate is supposed to have a voice in U.S. compliance with treaties. Moreover, the U.S. SALT II compliance policy is conditioned upon reciprocal Soviet behavior. But the U.S. Constitution says nothing about giving the Soviets a role in deciding whether or not the U.S. complies with a treaty.

Further, despite his suspicions of Soviet violations of "existing arms control treaties" expressed on May 9, on May 30, 1982 President Reagan himself stated:

"As for existing strategic arms agreements, we will refrain from actions which undercut them, so long as the Soviet Union shows equal restraint." (Emphasis added.)

The above listing of seven Soviet SALT II violations or circumventions clearly indicates that the Soviets are not showing any restraint at all. SALT II is an existing strategic arms agreement, although it is an unratified Treaty. The U.S. Consitution states that: "He [the President] shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur. . . ."

This constitutional language is being contradicted by President Reagan's policy that the U.S. not undercut the unratified SALT II Treaty contingent upon similar Soviet retraint. Logically, in order not to undercut SALT II, the U.S. should do nothing to defeat its object and purpose. This means that the U.S. should abide precisely with all its provisions. Indeed, the Secretary of State has testified to Congress that the "no undefeat" policy means full U.S. compliance. This concept could even be further interpreted to mean that the U.S. is bound to comply not only with the precise provisions of SALT II, but also with the undefined "spirit" of SALT II, as interpreted by the President or even by the Soviets. Thus the President's policy of not undercutting SALT II is in effect Presidential ratifiction of the SALT II Treaty, committing the U.S. to complete compliance with all of SALT II's precise provisions. But not only have the Soviets officially never informed the U.S. that they will not undercut SALT II, they are themselves in fact flagrantly undercutting SALT II with their many SALT II violations. Moreover, the Soviets have authoritatively informed the U.S. several times that they will not comply with SALT II until it is ratified. (The Soviet propagandist Zamyatin told Time magazine in 1981 that the USSR would not undercut SALT II as long as the U.S. did not, but this was not an official USSR statement in a Soviet publication.)

Thus, the Soviets have all the benefits of U.S. compliance with SALT II, while they themselves have accepted no obligations.

The President's policy of compliance with the unratified SALT II Treaty has official, formal status as Department of Defense Directives 5100.7, 5100.72 and Air Force Regulation 28-1, which require U.S. compliance with the unratified SALT II Treaty. Further, these directives require quarterly reports from the military services on U.S. compliance with the unratified SALT II Treaty. Indeed, these directives even require U.S. compliance with the Unilateral Statements of SALT. Meanwhile, the Soviets have directly violated five of the seven U.S. Unilateral Statements attached to SALT I, which were misleadingly presented to Congress as integral parts of SALT I.

There are many significant examples of U.S. unilateral compliance with the unratified SALT II Treaty during the Reagan Administration. The following is only a partial listing:

First, the U.S. unilateral deactivation of 292 strategic delivery vehicles—160 Polaris SLBMs, 54 Titan II ICBMs, 80 B-52D bombers—counted in the unratified SALT II Treaty and in its Data Exchange, an integral part of the Treaty. These delivery vehicles constitute about 13% of the delivery vehicles allowed the U.S. under SALT II, and they carry over 500 warheads. They constitute about 33% or one third of existing U.S. deliverable nuclear firepower (megatonnage). Hence, this U.S. SALT II unilateral deactivation is extremely significant. Meanwhile, as the Reagan Administration has cut these 292 delivery vehicles, the USSR has added almost 100 more delivery vehicles and twice as many warheads.

Second, U.S. cancellation of deployment of 50 (or 100) stockpiled Minuteman III MIRVed ICBMs, in compliance with the unratified SALT II Treaty's ceiling of 1,200 MIRVed missiles. This extremely cheap deployment costing only about $50 million was originally intended to partially compensate for the Titan II ICBM deactivation, and it would have increased U.S. counterforce capability by about 15%. Hence, here is another extremely significant case of U.S. unilateral compliance with the unratified SALT II Treaty.

Third, the U.S. modification of B-52 bombers to carry "strakelets" on those models which are being equipped with air-launched cruise missiles. These rather expensive "strakelets" costing about $80 million are supposed to be "Functionally Related Observable Differences" (FRODs) required by the unratified SALT II Treaty. This action demonstrates that the U.S. is willing to spend large sums to comply with the unratified SALT II Treaty, but not to increase U.S. strategic capabilities in the case of the cancelled Minuteman III deployment.

Fourth, the redesigning by the U.S. of the B-1B bomber in order to carry 2 fewer air-launched cruise missiles—20 instead of the 22 each bomber is capable of carrying, in unilateral compliance with the unratified SALT II Treaty. This is about an 11% reduction in the B-1B's payload, a fairly significant constraint of an expensive system.

Fifth, the U.S. limitation of the throw-weight of the MX ICBM to only somewhat above 3,600 kilograms, in compliance with the unratified SALT II Treaty.

Sixth, the U.S. limitation of the launch-weight of the MX ICBM to 90,000 kilograms, in compliance with the unratified SALT II Treaty.

Seventh, the U.S. limitation of the number of warheads on the MX ICBM to 10, instead of the 14 originally intended in 1973, in compliance with the unratified SALT II Treaty. This constitutes a reduction in the payload of the already expensive MX ICBM of about 30%, an extremely significant constraint. Meanwhile, in 1982 the Soviets deployed more MX type warheads than the U.S. plans to deploy on the MX between 1987 and 1989—1000. The Soviets have been deploying warheads at this yearly rate since 1975.

Given the above seven examples, President Reagan's November 22, 1982, decision to deploy the MX ICBM in the "Dense Pack" basing mode is not surprisingly being justified as being in full compliance with the unratified SALT II Treaty. This is the eighth case of U.S. unilateral SALT II compliance.

Both Defense Secretary Weinberger and Assistant Defense Secretary Perle argue that MX Dense Pack does not violate the unratified SALT II Treaty. The Reagan Administration argues (unconvincingly) that the MX canister, not its silo, is the launcher, and that this launcher is mobile. The SALT II Treaty allows deployment of mobile ICBMs after 1981. Thus, in sum, the U.S. has already constrained its strategic forces in at least 8 significant ways. Over 33% of the capability of our existing strategic forces has been cut-back, and about 46% of the capability of our modernized strategic forces has been cut-back.

Given the fact that the U.S. has already constrained its strategic forces in 8 important ways, in unilateral compliance with the unratified SALT II Treaty, we should again not be surprised even by a recent ninth example.

On December 20, 1982, Senator Gary Hart (Democrat of Colorado and Presidential Candidate) offered an amendment to the Fiscal Year 1983 Extended Continuing Resolution Appropriations Bill. This amendment, which passed by voice vote, is the ninth case of U.S. unilateral compliance with SALT II. Senator Jake Garn and Senator Steve Symms (R-Idaho) were the only senators to speak and vote against the Hart Amendment. The Hart amendment states:

". . . no initial flight test of the MX missile may be conducted until *after* both Houses of the Congress have agreed . . . [to] a basing mode for such missile." (Emphasis added.)

The Congress may not agree by 1 March 1983 or at all on a basing mode for MX. Hence, MX flight-testing under the Hart amendment is delayed indefinitely and may in fact be completely prevented from ever beginning. The Hart amendment will delay MX flight testing indefinitely due to the U.S. unilateral policy of complying with the unratified SALT II Treaty. While the wording of the Hart amendment itself does not specifically mention the unratified SALT II Treaty as the reason for delaying indefinitely the first flight test of the MX ICBM, it is clear that the intent and purpose of the Hart amendment is to comply with SALT II. In his December 16, 1982 Senate speech justifying the Hart Amendment, Senator Hart stated that under SALT II, ". . . each side was limited to the testing of one new ICBM type." Article IV of SALT II limits both the U.S. and the USSR to only one new type ICBM each. This was what the Carter Ad-

ministration told the Congress that SALT II achieved. Indeed, the Carter Administration argued that the main constraint of SALT II was the prohibition on no more that one new type ICBM on a side. Senator Hart argued correctly that the MX ICBM was the one new type ICBM allowed for the U.S., and that any "common missile" or road mobile missile would not be allowed to the U.S.

Indeed, the sole and only reason for the Hart amendment is to comply with the unratified SALT II Treaty. This is because under the second agreed statement to paragraph 9 of Article IV of the unratified SALT II Treaty, the U.S. should not flight test a "new type" ICBM type to be flight-tested. In other words, once the U.S. initially flight tests the first MX—with its four stages—we could not under SALT II then legally test launch a second new ICBM type with three stages, which would probably be the number of stages on a small mobile ICBM.

For the past six years, the first flight test of the MX ICBM has been scheduled for January 1983. Now, under the Hart amendment, this test is delayed indefinitely, and perhaps permanently, all because of continued U.S. compliance with the unratified SALT II Treaty.

Beyond the above constitutional, legal, and political problems, the Hart amendment would also have the following deleterious effects on the MX program:

First, it delays MX R&D indefinitely, which previously the Congress, the President, and the Joint Chiefs of Staff had all agreed should go forward as soon as possible as a top priority.

Second, it will increase the cost of the MX program.

Senator Garn stated on December 16, 1982 in a speech against the Hart Amendment: "I said to the Senator from Colorado the Soviets are testing two or three [new type ICBMs] right now. Under Senator Hart's interpretation, right now the Soviets are in absolute violation [of SALT II] three or four times over for the new generation of missiles they are testing." Thus, the Soviets are violating SALT II by testing at least two new type ICBMs, while the U.S. is prohibited from testing even one new type ICBM. The Soviets reportedly also have 4 more new type ICBMs ready for testing at any time. In sum, SALT II is not affecting Soviet ICBM testing, but it is affecting U.S. ICBM testing.

The Hart amendment is probably unconstitutional, as is each of the other 8 cases of U.S. unilateral compliance with the unratified SALT II Treaty presented above. The evidence is growing ever greater that the constitutional treaty-making power and prerogatives of the U.S. Senate are being contravened and circumvented by the U.S. "interim" SALT II compliance policy. Someday, U.S. Senators may begin to challenge U.S. unilateral SALT II compliance directly, on the Senate floor.

In addition to being unconstitutional, the nine cases of U.S. unilateral compliance with the unratified SALT II Treaty contradicts Section 33 of the Arms Control and Disarmament Act of 1961. Section 33 states: "No action shall be taken under this or any other law that will obligate the U.S. to disarm or reduce or to limit the armed forces or armaments of the U.S., except pursuant to the treaty-making power of the President under the Constitution, or unless authorized by further affirmative legislation by the Congress of the U.S."

The legislative history of this language makes it clear that Congress intended that it be consulted in any U.S. agreement or policy to comply with an arms control regime. Many of the 9 cases of U.S. SALT II compliance described above are not only occurring without the "further affirmative legislation" stated above, but in at least one case it is being done in defiance of affirmative legislation. Deployment of 50 to 100 MIRVed Minuteman III ICBMs was authorized by Congress in both Fiscal Years 1981 and 1982, yet it is not being done, in order to comply with SALT II.

The 1980 Republican Party Platform stated: "The Republican Party rejects the fundamentally flawed SALT II Treaty." Presidential candidate Reagan's own personal opposition to U.S. ratification of or compliance with the SALT II Treaty was made crystal clear to the whole world many times. The best example of Reagan's views was expressed during the climactic, nationally televised Reagan-Carter debate of October 30, 1980 in Cleveland, Ohio. In that debate, candidate Reagan stated that:

"SALT II is illegal, because the law of the land, passed by Congress, says we cannot accpet a treaty in which we are not equal, and we're not equal in this treaty for one reason alone: our B-52 bombers are considered to be strategic weapons; their Backfire bombers are not." (Emphasis added.)

Reagan was referring to the "Jackson Amendment" to SALT I, or Public Law 92-448, which required equal force levels in any SALT II Treaty. (SALT II not only excluded the intercontinental Backfire, but gave the Soviets a monopoly over the U.S. on heavy and very heavy ICBMs, and a great advantage in ICBM throw-weight and counterforce capability.)

Another good example of candidate Reagan's views on the SALT II Treaty was supplied to the Arms Control Association by the Reagan Campaign Committee in May 1980. Reagan's answer to a question on SALT II compliance stated: "I believe the SALT II Treaty should be withdrawn, and I especially believe that the U.S. should *not abide* by its terms prior to ratification. To abide by the terms of the proposed agreement would *violate* Article XXXIII of the Arms Control and Disarmament Act of 1961." (Emphasis added.)

On September 17, 1979, candidate Reagan stated this about SALT II: "I believe the Senate should declare that this treaty, fatally flawed as it is, be shelved . . ."

On August 18, 1980, candidate Reagan added that: "I cannot, however, agree to any treaty, including the SALT II Treaty, which, in effect, *legitimizes the continuation of a one-sided arms build-up."* (Emphasis added.)

On May 25, 1982, former Arms Control Agency Director Eugene Rostow stated that the Soviet lead over the U.S. in missile capabilities is the most profound and difficult foreign policy problem America faces. Professor Rostow also stated in London on November 30, 1981: "The fruits of SALT I and SALT II have turned to ashes in our mouths."

Rostow added in an article published in 1979 by the Committee On the Present Danger that the SALT II Treaty was an act of "appeasement" and as such actually increased the danger of world war. (See below.)

In a letter to President Reagan of 21 May, 1981, a bi-partisan group of 23 Senators led by Senators Garn and Stevens stated that the Soviets "continue with a standard practice which contradicts the very spirit of SALT." Yet President Reagan somehow believes that the Soviets are showing "equal restraint" to the U.S. in their strategic programs.

In a Committee on the Present Danger paper published on July 25, 1978 entitled "SALT II—A Soft Bargain, A Hard Sell," former ACDA Director Eugene Rostow stated in regard to continued U.S. compliance with SALT I:

"We have had a SALT [I] agreement with the Soviet Union since 1972. It expires in 1977, but we and the Soviet Union announced simultaneously that its terms remain in effect, despite the provisions of an American statute [i.e., Section 33 of the ACDA Act] which specifies that *the U.S. can undertake arms limitation obligations only by treaty or statute.* Far from stabilizing world politics, SALT I has been part of the most turbulent and dangerous period of the Cold War." (Emphasis added.) This statement confirms that President Reagan's SALT I and SALT II compliance policy, like President Carter's, is illegal in Rostow's view.

In regard to SALT II, Rostow stated in the same 1978 paper: "The kind of SALT [II] agreement the [Carter] Administration is so frantically trying to sell the country is not a step toward detente or toward peace, but an act of *appeasement* which can only invite more Soviet pressure and more risk. It would *freeze* us in a position of *inferiority,* deny us the opportunity to redress the balance, weaken our alliances, and isolate us. It [the SALT II Treaty] would be a step toward *war,* not peace." (Emphasis added.)

Such pre-Reagan Administration statements as the above from former ACDA Director Eugene Rostow further suggest that the Reagan Administration will eventually be forced by events to reject U.S. unilateral compliance with SALT II and declare Soviet SALT violations.

C. Conclusion: The Soviets violate SALT II while the U.S. violates its own laws to comply with SALT II

In sum, we have seen how President Carter's denial that there had been a U.S. cover-up of Soviet SALT violations has been first charged by the 1980 Republican platform, but then the SALT violations cover-up itself has at least until very recently been perpetuated under President Reagan. Carter at least told Congress that extensive Soviet telementry encryption was as serious a violation of SALT II as breach of the weapons ceilings themselves. In contrast, President Reagan is still allowing both Soviet complete missile testing encryption, as well as breach of the weapons ceilings in the form of SS-18 rapid refire and covert SS-16 capabilities. President Reagan is also allowing Soviet violation of SALT II's prohibition on more than one new type of ICBM. Thus, Carter pledged strong enforcement of Soviet compliance with SALT II, while Reagan also pledged strong enforcement, but instead has at least until recently continued the cover-up of the seven Soviet SALT II violations and engaged in no SALT II enforcement.

The nine cases of significant U.S. compliance with the unratified SALT II Treaty are indisputable, and the evidence for most of the seven Soviet SALT II violations ranges from strong to conclusive. Thus, we have two concurrent crises: one involving safeguarding U.S. national security and the other involving compliance with the Constitution.

Resolution of the national security crisis is simple, but difficult enough. We could simply expose the many example of Soviet SALT cheating, and begin to rebuild American strategic power to at least equality with the Soviets. The difficulty here is that challenging Soviet violations in order to enforce compliance is extremely provocative. The Soviets will react with extreme hostility, and even with nuclear blackmail threats. We must then be prepared to stand up to the Soviets, and to live without SALT, in order to enforce their compliance with SALT.

Resolution of the Constitutional crisis is also simple but even more difficult—all the Senate has to do is vote its advice and consent to ratify the SALT II Treaty, or alternatively, vote to send the treaty back to the President as unratifiable. Such a weighty vote would be dramatic, but the U.S. Senate has ample reason to send the unequal, destabilizing, fatally flawed SALT II Treaty back to the President, even beyond the seven Soviet violations of SALT II.

As President Reagan himself stated so eloquently before the United Nations General Assembly on June 17, 1982: "Simply collecting agreements will not bring peace. Agreements genuinely reinforce peace only when they are kept. Otherwise we are building a paper castle that will be blown away by the winds of war."

EPILOGUE

Since the main text was written, both the U.S. House of Representatives and the U.S. Senate have voted to produce and test the MX ICBM. Hence, the constraining Hart Amendment has been negated.

Also, since the main text was written, there have been press reports confirming that the new Soviet PL-5 ICBM is indeed over 200% heavier than the old SS-13 ICBM in throw-weight. Thus there is confirmation of Soviet violation of Article IV Paragraph 9 of the SALT II Treaty, the most significant constraint of SALT II. In fact, the PL-5 violates SALT II in at least 5 significant provisions.

In recognition of these Soviet SALT II violations, Secretary of State Shultz has made some recent firm statements. In testimony to the Senate Foreign Relations Committee on June 15, 1983, Secretary Shultz criticized "Moscow's continuing practice of stretching a series of treaties and agreements to the brink of violation *and beyond.*" (Emphasis added.) Shultz added that the United States is "becoming increasingly concerned about Soviet practices—including the recent testing of ICBMs—that raise questions about the validity of their claim of compliance with existing SALT agreements."

We must now address the questions posed to us by the editors. First, "Can the examples of non-compliance be considered as attempts to explore the limitations, of the [SALT] treaties, or should they be considered so severe that they represent a major obstacle to any further agreement?"

It is clear that the Soviets do both. First, they use negotiating deception to negotiate SALT treaties which do not constrain their proviously planned strategic programs. Then they engage in attempts to explore the limitations of the agreements. Then the Soviets go on to circumvent the SALT agreements. Still finding no American challenge, they begin to violate the SALT agreements. The U.S. response has always been to acquiese in Soviet negotiating deception, circumvention, and violation. These Soviet actions do represent a major obstacle to further arms control agreements, because they result in unequal agreements which are not enforceable. U.S. "law of the land" on American arms control objectives, the 1972 Jackson Amendment to SALT I, requires U.S.-Soviet equality in any future arms control treaties. The Soviets will not agree to equality, because their behavior already demonstrates the they seek unilateral advantages.

The second question is: "What kind of verification provisions could be incorporated in future INF and START treaties to make them unambiguously clear if violations occur?"

The premise of this question assumes that perfect or near perfect verifiability is possible or attainable. This is of course a false premise. Intelligence collection and analysis is an art form, and verification, especially the decision to challenge and enforce compliance, is a political process. Violations are seldom "unambiguously clear." However, we should strive to incorporate as much verifiability as possible in each arms control treaty being negotiated. We should look in the future more to supplements to National Technical Means of Verification, such as data exchange, cooperative measures and confidence building measures, and even on-site inspection. On-site inspection itself is not a panacea, because it can be successfully evaded, but it would be a useful aid to NTMs, expecially in synergyism with other supplements.

Question three is: "From Western Europe one gets a feeling that the question of Soviet violations is more a matter of American politics than a question of real violations. For example, Presidents Nixon, Ford, and Carter have always said that the Soviet Union complied with the arms control agreements. Even President Reagan has not made any positive statement to date that the Soviet Union is in violation.

Furthermore, President Reagan has stated that the U.S. would continue to abide by SALT II so long as the Soviet Union abides by this agreement. Recently, Senator Glenn, who was deeply concerned with the verification issues of SALT II, stated that the U.S. should now ratify the SALT II treaty. Is verification a technical or a political process? Is it possible to separate the technical matters from the political issues?"

Real Soviet SALT violations have occurred, and have been pointed out by over 12 prominent American leaders. As noted, President Reagan has in effect accused the Soviets of violating SALT II, the TTBT, the Kennedy-Khrushchev Agreement, the BW Convention, and the CW Protocol. President Reagan's so called "interim no undercut" SALT II compliance policy is arguably un-Constitutional. Senator Glenn has indeed called for ratification of SALT II, but he has also conceded that between 1979 and 1981 the U.S. NTMs were ineffective and the U.S. was partially "blind." Glenn's revelations about the malfunctioning of our NTMs confirms his own skepticism of the verifiability of SALT II. Finally, as noted, verification is both a technical and a political process, in which political factors usually predominate. Thirty-four Republican Senators, including 5 of the leadership and the Republican National Committee Chairman, sent a letter to the President on June 22, 1983. These 34 Senators expressed their strong support for President Reagan's verification and compliance studies, and represent a potential bloc able to successfully kill any new arms control treaty on grounds of Soviet violations.

Question four is: "It is our understanding that the SALT II limits were such that they permitted all the force modernization programs that the U.S. and the USSR were planning. Since the USSR could implement its currently planned modernization within the constraints of the agreement, why should the Soviet Union violate the agreement?"

It is true that the SALT II limits did not constrain Soviet programs at all. SALT II allowed an enormous Soviet buildup. The Soviet violations of SALT II are explainable largely as Soviet willingness to contemptuously exploit American appeasement. They will get away with what the traffic will bear.

Question five is: "Do you not discuss possible violations with the Soviet Union in the Standing Consultative Commission (SCC)? Have compliance issues been resolved in this commission?"

The answer is that most SALT II compliance issues have not been discussed in the SCC, for fear of giving legitimacy to the unratified SALT II Treaty and also raising U.S. constitutional problems. Some SALT I compliance issues were discussed in the SCC, but as Ambassador Paul Nitze has testified, the U.S. acquiesced in the Soviet violation in each case. Moreover, those Soviet SALT I violations which were discussed took as long as seven years to come before the SCC after which the U.S. acquiesced in the Soviet violation.

Question six is: "Even if one were to accept your evaluation of Soviet compliance, it is clear that the Soviet Union has respected the major provisions of the SALT agreements. For example, they have not exceeded the ICBM and SLBM launcher limits. Under such conditions, is it not better to have agreements even with some borderline violations, rather than no agreement which would allow the Soviet Union to increase their nuclear forces without any limitation? Why could a new round in the arms race be better than just some marginal increases at the limits of current agreements?"

The Soviets have, in fact, exceeded the ICBM and SLBM launcher limits of both SALT I and SALT II. This question contains a non-sequitur, because major violations are incompatible with the belief that the major provisions have been respected. There are both Soviet borderline violations and major violations. The Soviets are in fact "breaking out" of both SALT II and the SALT I ABM Treaty, and increasing their strategic nuclear forces without any limitations. There is in fact no arms race, because the U.S. has in fact been moving backward. Since 1969, when SALT I negotiations began, the U.S. has deactivated or cancelled over 710 missile launchers and bombers either deployed or planned, carrying over 6,000 nuclear warheads. In contrast, since 1969, the Soviets have added over 1,000 missile launchers and over 250 intercontinental bombers, carrying over 6,000 warheads.

A final question was posed: "In the USA there are political groups with different views. What do those groups, which are engaged advocates of a general arms control and disarmament politics, say about your accusations towards the USSR?"

The Carnegie Endowment for International Peace is the only political group which has commented on the recent charges of Soviet SALT violations, and then not directly. The Carnegie Endowment recently merely reiterated the Carter Administration's official apologies for Soviet SALT compliance behavior. The Washington Post

of July 18, 1983 contained the following statement on this problem:

". . . Another potentially explosive issue faces both sides, i.e., the U.S. and the USSR. It concerns allegations of Soviet cheating on previous agreements on chemical and biological weapons and testing of new missiles and encoding the test date. Many conservative Senators, and one high ranking official in the U.S. Arms Control and Disarmament Agency in particular, are pressing the White House to accuse Moscow openly of violations. A top-level White House group is studying this, and Reagan has not made such accusations. The issue is difficult because *the view is widespread,* even among Administration moderates, that the Soviets are *skirting* past agreements. But the wording of the agreements, in the missile area, is extremely vague." (Emphasis added, p. A21.)

This statement ignores the above cited Reagan accusations, but does point out that there is increasing consensus in the U.S. on the fact of Soviet SALT violations.

Finally, we should like to discuss briefly four areas of arms control verification where better quantitative methodologies could be usefully introduced.

First, probability analyses of the likelihood that possible signs of violations are real could be beneficial. Such analyses might focus on the likelihood that evidence of violations might be false or the result of unintended actions. Alternatively, such analyses might focus on the net probability that a perceived pattern of activity might indeed be a series of related violations.

Second, there could usefully be quantitative analyses of the potential advantages gained by cheating. What is the military significance of various violations, in quantitative terms?

Third, we could use analyses of the probabilities that certain prohibited activities could be actually detected. Thus various cheating scenarios could be analyzed quantitatively.

Finally, better quantitative methods could be developed to help strategic analysts to better portray the strategic balance. For example, more creative and explanatory ways to show Soviet strategic advantages are clearly possible. Alternatively, ways to measure the relative stability in the strategic balance need to be devised.

AMENDMENT NO. 2225

(Purpose: To express the sense of the Senate that the President should request the resignation of the Secretary of Interior, Mr. James Watt)

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. BYRD) for himself and Mr. RIEGLE proposes an amendment numbered 2225:

Strike all after the word "that:" in the first line and insert in lieu thereof the following:

Since the Secretary of the Interior James Watt in his recent remarks characterized the membership of the Commission on Fair Market Value Policy for Federal Coal Leasing in a manner which was insensitive and insulting to all Americans;

Since the Secretary of the Interior James Watt has made public statements which question the patriotism of American citizens with whom the Secretary disagrees;

Since such remarks and statements are totally unbefitting a senior cabinet member of the United States government;

Since these remarks and statements seriously impede his ability to function effectively in his dealings with the United States Congress and the public at large; and

Since Mr. Watt's policies and personal style have promoted a polarization in the Nation which has frustrated the achievement of consensus necessary to execute policies which both preserve our spectacular natural heritage and carefully develop our abundant natural resources.

Now, therefore, It is the sense of the Senate that the President should, without delay, request the resignation of Secretary James Watt.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I take note of a UPI wire story which is as follows:

Maureen Reagan said Friday if Interior Secretary James Watt is loyal to President Reagan, he should resign for his faux pas on cripples and minorities. The President's daughter, who is serving as a consultant on women's issues to the Republican National Committee, made the statement during a Chamber of Commerce program broadcast by cable and satellite to television stations around the country. "If he"——

Apparently there is a line left out of the wire story. The wire story reads as follows:

"If he was truly * * * this resignation," Miss Reagan stated. She was asked if she was offended by Watt's joking comment that an advisory committee looking into his coal leasing company was made up of "a black, a woman, two Jews and a cripple." It was made Wednesday at the Chamber of Commerce headquarters.

"I can't imagine anyone who didn't find what he said offensive," she said. "I would be very shocked to hear someone who didn't feel that line was just totally off the wall and not in keeping with the traditions of this country. My sadness about Mr. Watt is that in the last couple of years, he must have said enough apologies to the President to paper a wall. Why doesn't he just send in his resignation."

Mr. President, I yield the floor.

Mr. McCLURE. Mr. President, I suppose it would be inevitable to assume that somebody would wish to speak with respect to Secretary Watt and might even utilize the existing measure as a vehicle to create a debate on that issue.

I think it is particularly inappropriate and particularly unfortunate that the minority leader has chosen this particular time and this particular manner in which to do it.

I assume that the minority leader is aware of the substance of the amendment he now seeks to strike. I know that the minority leader will certainly regard the question of the service of the distinguished Secretary of the Department of the Interior, Mr. Jim Watt, as a matter of seriouness and a matter of concern. I do not question the sincerity of motivation in dealing with that question, both in personal and in political terms. But it seems to me to be unfortunate to treat so lightly the question of U.S. compliance with SALT II and whether or not we, in the Senate of the United States, ought to comply with our constitutional responsibility of dealing with the ratification issue of the SALT II treaty.

That matter has been before us for a long time. I know we will not resolve it this afternoon, and the offering of my amendment this afternoon was not intended to be a final resolution of that very, very serious matter. But I do believe it deserves some attention by itself, without diversion. I believe it requires the serious attention of the Senate without the side trip down a different alley.

I hope the Senator from West Virginia might withdraw his second-degree amendment and reoffer it at another time, after the pending amendment has been disposed of.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield to the distinguished Senator from West Virginia.

Mr. BYRD. Mr. President, I think the Senator has stated my case very well. He has indicated that my amendment has been offered at a time, perhaps, when there needs to be more Senators here and considerably more discussion of the matter. I would say the same about his amendment, most respectfully.

It is an amendment that ought to have the attention of the Senate. There ought to be debate, and there ought to be more Senators around. I think it should be debated carefully and thoroughly.

So I do not feel that this is the point in time that an amendment of such far-reaching significance—although it is a sense-of-the-Senate amendment—should be discussed. I am not prepared to withdraw my amendment at this time, partially for the same reasons that I am not prepared to vote on the Senator's amendment this afternoon, with so many Senators being absent on both sides of the aisle.

I say this respectfully, but in response to his statement.

I believe that the responsibility of the Senate of the United States to exercise its constitutional responsibility with respect to the ratification or failure to ratify that treaty is also a matter that deserves serious consideration.

I also believe that the question of the U.S. administration's compliance with a treaty which is not the law of the land and whose very compliance requires a violation of at least two statutes of this country and subse-

quent action by the Congress of the United States is also something that should be considered seriously.

I regret that it is late on a Friday afternoon. I regret that many of our colleagues have already found it necessary, for many very legitimate reasons and because of expectations of legislative scheduling, to be absent from the Senate at this hour.

I cannot quarrel with any Senator—I would not quarrel with the minority leader under any circumstances—about the right to have this considered at an appropriate time and in an appropriate manner. But this has been languishing in a desultory fashion for a long, long time—desultory because, although we know it is happening, we never really address it. Not because anybody thinks it is not important. It is simply that we have allowed it to go along in a course of events without really taking hold of that course of events and attempting here to modify it.

Mr. McCLURE. Mr. president, maybe I am reading between the lines. I inadvertently or accidently read the real reason, and perhaps the Senator from West Virginia stated that real reason—that the amendment was not really concerned about Secretary Watt but was concerned about the amendment of the Senator from Idaho.

If indeed that is the reason, I am perfectly willing to entertain a discussion with respect to the timing of the debate and the nature of the debate with respect to the SALT II Treaty.

When I offered the amendment, I anticipated that there would be a number of people who would say, "Hey, wait a minute. That's an important subject. But let's don't talk about it now. Let's don't talk about that subject now."

I am perfectly willing to enter into that discussion on the record or off the record, as various Members might desire. However, I had not anticipated that it would be treated in quite the manner it has been, by trying to divert attention away from the underlying amendment.

I think the issue of the SALT II Treaty, the issue about U.S. compliance with SALT II Treaty, is, of itself, a matter of grave importance to the security of this Nation and of the whole world.

I suspect that the difference may lie in the constitutional majorities required for ratification, as differentiated from legislative actions, and that, therefore, one can be achieved, whereas another could not be, because of the difference in constitutional majorities. But those are issues which need to be explored, explained, and exposed to the view of the people of this country as we look at what is actually happening in a world in which the Soviet Union is increasingly free to violate the terms of ordinary commerce between nations, where they are increasingly permitted to violate the terms of solemn agreements and the ordinary standards of human conduct, and increasingly we do little or nothing about it.

I think it is worthwhile to look at what is happening to the U.S. security as a result of that action by the Soviet Union and the actions by our own Government. I think the American public is intitled to that view.

Mr. BYRD. Mr. President, I may or may not join the Senator in support of his resolution at some point, but I do not think that this afternoon is the time to discuss that very weighty matter. Many Senators from both sides have left the Hill.

So I hope that the Senator would not automatically read into my having offered an amendment to his amendment that I am opposed to the amendment. I may very well support it. It would not be beyond the stretch of one's imagination that I might do that.

However, I do not think this is the right time to discuss or to vote on the Senator's resolution. I think he has made a very good argument, incidentally, for careful consideration of the War Powers Act by this body and the fact that that is a law and should not be ignored by the administration downtown. It seems to me that some of the things the distinguished Senator has said would support the argument I have been making with respect to the War Powers Act.

So it is perfectly all right with me if Senators want to have a tabling vote on my amendment this afternoon. It is all right with me if the majority leader wants to send us home. It is all right with me if the majority leader wants to pull the bill down—whatever he wishes to do.

So I think there is just as much reason—and more so—to debate the matter I have now placed before the Senate as there is reason to debate the matter offered by the distinguished Senator from Idaho.

I say this respectfully to him. He is the chairman of the Appropriations subcommittee on which I sit as the ranking member. He is always very fair and considerate.

But it seems to me there is just as much reasoning or more so in what he has said about my amendment than would apply to his own amendment.

I think mine is a very important amendment, especially when it comports with the remarks of the President's daughter, Maureen Reagan. She fully agrees with me 100 percent, and I just wish that somehow we could hear more from that lady on this subject at this moment because I think I would find myself totally in agreement with what she said and perhaps others in the Senate on both sides of the aisle would, for that matter.

I can see that the majority leader is here and he has that usual twinkle in his eye and he is smiling, and I expect that something is about to happen once I give up the floor—if I do give up the floor.

And I am just trying to imagine what I would do if I were in his place in a situation of this kind. There are several avenues of action open to him, and I fully respect him in whatever he does.

I am just pondering whether or not I should give up the floor.

Mr. BAKER addressed the Chair.

Mr. BYRD. Mr. President, I have the floor.

I yield to the distinguished majority leader, or he may prefer to wait to get the floor in his own right, but if he wants me to yield to him I will be glad to.

Mr. BAKER. Mr. President, I ask the Senator if he will yield.

Mr. BYRD. I certainly will yield.

Mr. BAKER. I am gratified.

Mr. President, I was sitting in my office listening, and it suddenly dawned on me that I did not recognize a debate on the State Department authorization bill and that perhaps I should come to the floor and find out what is going on.

I think what is going on is Friday afternoon, and I think that what I have said so many times has proven true once more, and that is there is not a man or a woman alive who can make the Senate do something it does not want to do.

I think what I heard on the squawk box in my office was the Senate saying we adjourned, and I wondered how long it will take BAKER to find out. [Laughter.]

I think that is what happened.

Mr. President, I do not like to say this, but I do not think there is any way we are going to finish this bill today, and as I look at the manager on this side and the manager on the minority side, I do not see any energetic shaking of the head to the contrary. So it looks to me, Mr. President, like we pretty well finished and as soon as the minority leader yields the floor, if he yields the floor, and, of course, if intellect and eloquence do not compel him to do so at some point physical conditions will, but when he yields the floor as surely he must do at some point, I would presume even to offer one word of advice to my friend, the chairman of the Energy Committee, the chairman of the subcommittee of this Appropriations Committee, that perhaps he withdraw this amendment and if that is done, I rather expect that the Chair would rule that at this juncture at least the amendment in the second degree of the minority leader would go with it and that would leave us back to square 1.

And as soon as we finish the war powers resolution I am confident that the Chair would lay before the Senate the unfinished business which would then be the State authorization bill on Wednesday or Thursday of this week.

That is what I heard on the squawk box in my office.

And when and if the minority leader decides to yield the floor and when my friends and colleagues on both sides consider carefully the wisdom of the suggestion I have made, if there is an assent to that, it would be my purpose then to ask the Senate to adjourn until Monday noon, adjourning, of course, based on our ability to get the usual and necessary protective language for that purpose.

I thank the Senator for yielding.

Mr. GARN. Mr. President, will the Senator yield?

Mr. BYRD. I yield to the distinguished Senator without losing my right to the floor and for the purpose only of his asking a question or making a statement if he wishes.

Mr. GARN. I wish to make a statement.

Mr. BYRD. May I say, before I yield, I will soon yield to the majority leader for the purpose that he has indicated.

Mr. GARN. Let me just say that as I entered the Chamber the purpose for coming to the Chamber, and I was surprised to find that we were on something different than the McClure amendment, and I have always known the minority leader to be very fair and very patient, and I suppose I was a little bit surprised with the brief time that the McClure amendment had been up that the minority leader acted in any fashion to try and see that it did not come up today.

The only reason I mention that is I think in discussing it with the Senator from Idaho we discussed this amendment earlier and I fully support his amendment and was called to the Chamber for the sole purpose of stating my support of that amendment and then suggesting that the Senator from Idaho withdraw it with his agreement for the sole purpose that it is a very important issue and certainly there are Senators who are missing from both sides of that debate. So there was simply no intention, I say to the minority leader, for the Senator from Idaho or the Senator from Utah to push this to a vote today.

It was to discuss it for a relatively short period of time and then I would suggest that it be brought down so that it could have the full discussion, so if the minority leader had exercised his normal patience in allowing the debate to run, the debate probably would have been over by now and the amendment would have been withdrawn. I came to the Chamber for that purpose to make a statement and then have the amendment withdrawn for another day so that it could have proper discussion and have Senators on both sides of the aisle and both sides of the argument have adequate time to discuss.

I thank the minority leader for yielding.

Mr. BYRD. The Senator is welcome. Does the Senator wish me to yield?

Mr. McCLURE. Mr. President, will the Senator from West Virginia yield to the Senator from Idaho for a brief statement and possibly action with his concurrence, without losing his right to the floor?

Mr. BYRD. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, I ask for the yeas and nays on the basic amendment.

The PRESIDING OFFICER. It will take unanimous consent to order the yeas and nays on the McClure amendment.

Mr. BYRD. I doubt that I would get that.

I ask unanimous consent that it be in order to order the yeas and nays on the amendment by Mr. McClure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Now, Mr. President, I yield to the distinguished Senator with the understanding that I do not lose my right to the floor and with the further understanding that I yield only for a question or for a statement.

Mr. McCLURE. Mr. President, I thank the Senator for yielding.

I am a little troubled by the precaution that he thought it was necessary to take that the Senate take action so that I could not ask the amendment be withdrawn because in my first remarks I addressed to the Senate when I asked him to yield I said possibly action with his concurrence because I have no intention to try to take some action that in any way would offend him or seek to take him by surprise or put him at any disadvantage, since he was courteous enough to yield to me for this statement.

Mr. BYRD. Mr. President, I think I can satisfy the Senator on that point. I did not realize that the Senator wanted to withdraw his amendment.

I ask unanimous consent that if the Senator wishes to withdraw his amendment he may do so without my losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I thank the Senator from West Virginia. He does properly understand the direction in which I am moving and the intention that I have.

I thank the Senator from Utah for the statement that he made. I fully recognize, as I did before I offered this amendment, that this is not the kind of a subject matter which is going to be fully dealt with this afternoon. I had no illusions when I offered it that the managers on both sides, without careful reading or with careful reading, would say, "Hey, that is all right; let's go ahead and do it." It is more portentous than that and is intended to be. I intend it to be dealt with seriously, the subject matter and the question of U.S. compliance with all of the provisions of SALT II at a time when the Soviet Union is not. I think that requires some very serious consideration on the part of the Senate.

That is the reason I offered the amendment, to give the Senate both the opportunity and the motive to discuss those issues.

Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. BYRD. Mr. President, I thank the Senator for withdrawing his amendment. And I am not stating an untruth when I say that, in the final analysis, I may or may not support such an amendment.

I would like to know if the Soviets are violating the SALT treaty, which was never ratified by this body. I think there is some indications that they may be. I would like to know. I think they should be called upon to answer some questions.

AMENDMENT NO. 2226

(Purpose: To express the sense of the Senate that the President should request the resignation of the Secretary of the Interior, Mr. James Watt)

Mr. BYRD. Mr. President, I reoffer my amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. BYRD) proposes an amendment numbered 2226.

Strike all after the word "that" in the first line and insert in lieu thereof the following:

Since the Secretary of the Interior James Watt in his recent remarks characterized the membership of the Commission. . . .

Mr. BYRD. Mr. President, without losing my right to the floor, I will change the verbiage so it will comport with the basic bill that is before the Senate.

The PRESIDING OFFICER. The clerk will report the modified amendment.

The legislative clerk read as follows:

At the end of the bill, insert the following new section:

Since the Secretary of the Interior James Watt in his recent remarks characterized

the membership of the Commission on Fair Market Value Policy for Federal Coal Leasing in a manner which was insensitive and insulting to all Americans;

Since the Secretary of the Interior James Watt has made public statements which question the patriotism of American citizens with whom the Secretary disagrees;

Since such remarks and statements are totally unbefitting a senior cabinet member of the United States government;

Since these remarks and statements seriously impede his ability to function effectively in his dealings with the United States Congress and the public at large; and

Since Mr. Watt's policies and personal style have promoted a polarization in the Nation which has frustrated the achievement of consensus necessary to execute policies which both preserve our spectacular natural heritage and carefully develop our abundant natural resources.

Now, therefore, It is the sense of the Senate that the President should, without delay, request the resignation of Secretary James Watt.

Mr. BYRD. Mr. President, being a man of few words, I yield the floor.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I yield to the distinguished Senator from Idaho of a request.

Mr. McCLURE. Mr. President, I was suggesting that perhaps the Senator should not yield to me for that purpose because what I am about to say may cause more excitement than it is worth.

It crossed my mind that it might be a useful device for me to send my amendment to the desk as a second degree amendment to the amendment of the Senator from West Virginia, but I shall not do that.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, before this goes any further, I ask unanimous consent that there now be a period for the transaction of routine morning business of 1 minute in length, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR MONDAY

Mr. BAKER. Mr. President, I have a request that I would like to make in respect to the convening of the Senate on Monday.

Mr. President, I ask unanimous consent that, if the Senate adjourns today, when it reconvenes it do so on Monday, September 26, 1983, under the conditions that the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with and, following the recognition of the two leaders under the standing order there be special orders in favor of Senators as follows: Mr. GORTON for not to exceed 15 minutes and Mr. WILSON for not to exceed 15 minutes; to be followed by a period for the transaction of routine morning business not to exceed 30 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each; and provided further that the morning hour be deemed to have expired.

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, will the distinguished majority leader change the 30 minutes to 60 minutes?

Mr. BAKER. Mr. President, I modify the request in that respect.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I would propose now to call up H.R. 3871 for routine action if the minority leader concurs.

Mr. BYRD. Yes, I have no objection.

AMENDMENTS TO OMNIBUS BUDGET RECONCILIATION ACT OF 1982—H.R. 3871

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 3871.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, I ask unanimous consent that H.R. 3871 be held at the desk until the close of business on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, let me say that it is not my intention ordinarily to take up measures that do not appear on the calendar, at least for 1 day on the printed calendar.

Now, since matters held at the desk do not ordinarily appear on the printed calendar, I am going to ask now that the Secretary of the Senate and the Parliamentarian confer with representatives of the two leaders to devise for some way for the calendar to show items that are held at the desk. That is already done, I believe, on resolutions coming over under the rule, rule XIV, and the like. But things held by unanimous consent do not appear anywhere on the calendar.

I urge some provision be made for that and that we begin on Monday by showing this bill at some point on the printed calendar.

Mr. BYRD. Mr. President, I think the majority leader's suggestion is a good one.

Mr. BAKER. I thank the minority leader.

THE DEATH OF CONGRESSMAN LARRY McDONALD

Mr. THURMOND. Mr. President, since paying tribute on September 14, 1983, to Congressman Larry McDonald of Georgia, who was a victim of the Soviet destruction of Korean flight 007, two additional newspaper articles have come to my attention.

In an effort to share more about this outstanding Member of Congress with my colleagues, I ask unanimous consent that the articles, one from Neighbor Newspapers and another from Neighbor Want Ads, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Neighbor Newspapers, Sept. 8, 1983]

LOSS OF McDONALD IS OUTRAGE

Communist atrocities certainly are nothing new. However, the Wednesday murder of 7th District Congressman Larry McDonald and 268 others aboard a Korean jetliner brings such actions closer to home—far too close to home.

We join everyone in Cobb and across the nation in expressing shock and anger over the almost certain death of those aboard the jetliner destroyed by a missile-firing Soviet MiG fighter plane.

Once again, the Soviet Union has demonstrated its belligerent nature and total lack of regard for human life, despite its leaders' frequent assertions to the contrary.

According to reports, the Soviets tracked the commercial airliner for some 2½ hours. The Soviet planes were in constant contact with Soviet ground control, according to U.S. State Department officials. Later, the Soviet pilot reported that he fired a missile and the target was destroyed.

However, no explanation has been offered by the Soviets for the murderous international act. TASS, the official news agency of the Soviet Union, said that warnings to the aircraft were ignored, assistance was refused and the plane continued its flight.

However, U.S. officials say monitoring of radio transmissions emanating from the Soviet and Korean planes showed there were no exchanges between the passenger plane and the fighter which shot it down.

As usual in situations where the Soviets are caught red-handed, their propaganda machine is stonewalling; they won't admit what is clearly evident to the rest of the world as an act of aerial terrorism.

It is ironic that the most notable victim of this tragedy is Larry McDonald, probably this nation's most outspoken foe and critic of communism. He continually fought what he saw as a worldwide communist menance, not only as a member of the U.S House of Representatives but also as a leader of ultra-conservative, anti-communist organizations such as the John Birch Society, of which he was national chairman.

Our nation's government must act swiftly and decisively to let the Soviets know that the United States will not tolerate such abominable acts as the downing of the KAL plane. The Soviets must realize that the civilized nations of the world will not stand by while an unarmed civilian plane is blasted from the skies in an unprovoked attack by a sophisticated military warplane.

Whatever sanctions can be brought to bear short of military retaliation would be welcomed by all Americans—and, indeed, people of all nations—who are outraged by this tragedy.

State House Majority Leader Al Burruss, D-Marietta, expressed the mood of all of us. Burruss, who was among the Georgians scheduled to participate in the Friendship Force trip to the Soviet Union next week,

said, "I'm not going to any country on a friendship mission when they kill a friend of mine."

We share the feelings of McDonald's widow, Kathy, who said Thursday, "This is a typical action of communists and the Soviet Union. It was against this type of behavior that my husband spoke out so loudly and so long. I only hope we will finally discover the truth about this and action will be strong."

McDonald was viewed as a deeply patriotic American not only by those who shared his views but by almost everyone. McDonald will always be thought of as an articulate and knowledgeable advocate of old-fashioned, basic constitutional beliefs. Although he was a genial individual, he was known as one who would not compromise his beliefs for political gain. McDonald was elected to Congress five times—showing people respected him for holding on to those beliefs. He never was afraid to express his opinion or give his assessment of a situation. In many areas, such as Central America, his warnings unfortunately were correct—and he probably will be proven correct in still others.

We shall miss him and, along with all Cobb Countians and Georgians, extend our deepest sympathies to the McDonald family.

[From the Neighbor Want Ads, Sept. 8, 1983]

LARRY MCDONALD: A MAN WITH MANY ATTRIBUTES

Seventh District Congressman Lawrence Patton McDonald, 48, was first elected to the U.S. House of Representatives in November 1974.

The conservative Georgia Democrat first sought the 7th District seat in 1972, but was narrowly defeated by incumbent John Davis of Rome. In 1974, McDonald defeated Davis in the Democratic primary and went on to win election to the congressional seat.

He won re-election in 1976, 1978, 1980 and 1982, despite a large number of challengers.

McDonald was named national chairman of the John Birch Society in March. In an interview last week with The Marietta Daily Journal, he described the society as "a constitutionalist education-action organization.

McDonald, born in Atlanta, graduated from Darlington School in Rome in 1951.

He completed premedical training at Davidson College, N.C., in 1953 and received his doctor of medicine degree from Emory University in 1957.

McDonald spent four years in the U.S. Navy, completing his tour of duty at the rank of Lieutenant Commander. He is a captain in the U.S. Naval Reserve.

After spending a two-year residency in general surgery at Atlanta's Grady Memorial Hospital, McDonald did a three-year residency in urology at the University of Michigan Hospital in Ann Arbor.

McDonald is from a family of physicians. His father, Dr. Harold McDonald, who died in July, was the senior member of the McDonald Urology Clinic in Atlanta, and his brother, Dr. Harold McDonald, Jr., is a member of the clinic.

McDonald's grandfather, Dr. Paul McDonald, was in general practice in Bolton, Ga., for more than 50 years.

McDonald is a member of the Cobb County Chamber of Commerce and the Smyrna Rotary Club, where he is an honorary member. He has served on dozens of committees and boards of conservative groups throughout the country.

He is the president and the chairman of the board of the Western Goals Foundation, a conservative organization that publishes works critical of communism.

McDonald and his wife Kathy have two children, Lawrence Patton McDonald Jr., age 2, and Lauren Aileen McDonald, born Christmas Day 1982.

They reside in Fairfax County, Va.

McDonald also has three older children, Trygve, a University of Georgia student; daughter Callie, a Georgia Southern College student; and daughter Mary Beth, who lives with her mother, McDonald's former wife Anna, in Vinings.

The congressman also serves on the board of the Southern Medical Research Foundation.

McDonald was one of the key House members seeking approval of the Lockheed C-5B transport plane after it had been defeated in the Senate. The House approved the plane by a 3 to 1 margin and the Senate went on to concur with the House and to approve the aircraft.

McDonald was the only member of Congress to speak out against the proposed Martin Luther King Jr., national holiday.

In July, testifying before the House Ways and Means Committee, McDonald said he was against "most favored nation" status for Romania, Hungary and Red China.

This summer McDonald was named one of the most admired conservatives in Congress in a national poll conducted by the Conservative Digest magazine.

The congressman in January called for a congressional investigation into an alleged coverup of Russian KGB involvement in the attempted assassination of Pope John Paul II in 1981.

McDonald serves on the House Armed Services Committee. Among the conservative groups he is a member of are: the Committee for Survival of a Free Congress, American Conservative Union, American Security Council Conservative Caucus, National Federation of Independent Business, Committee for a Free China and the National Rifle Association.

McDonald is the author of several books and articles.

"We Hold These Truths" is a review of the U.S. Constitution. McDonald also wrote "Trotskyism and Terror: The Strategy of Revolution," published by the American Conservative Union's Education and Research Institute.

He is a contributing editor to American Opinion magazine, a weekly publication by the Birch Society.

Other committee and association memberships include:

Movement to Restore Decency.

Georgia Right to Life Committee.

National Pro Life Political Action Committee.

National Committee to Keep and Bear Arms.

The Second Amendment Foundation.

American Civil Defense Association.

Joseph McCarthy Foundation.

Conservatives Against Liberal Legislation.

National Federation of Independent Business.

McDonald is a member of Northside Independent Methodist Church. He is an ex-officio member of the Georgia Democratic Committee and a member of the Floyd County Democratic Association.

The National Taxpayers Union has presented McDonald the "Most Frugal Member of Congress" award for his voting record against wasteful and inflationary government spending.

McDonald was the U.S. representative to the World Freedom Day Rally on Taiwan in 1976 at the request of the World Anti-Communist League.

McDonald was a member of a special Armed Services Committee Panel that investigated Western defenses in Japan. Taiwan and South Korea in 1978.

He was the chairman of a House delegation that studied civil defense operations in Norway, Ireland, Switzerland, Egypt and Israel during the winter of 1979.

MARTIN LUTHER KING HOLIDAY BILL

Mr. PERCY. Mr. President, yesterday the majority leader notified the Senate that the Senate would take up the Martin Luther King holiday bill on Monday, October 3. I am pleased that we now have a time certain for taking up this important matter.

Two days ago I was visited by a good friend of mine, Mr. Ronald Taylor of Chicago. Ron is a Republican ward committeeman in Chicago, representing the 16th ward. He was kind enough to share with me a copy of a resolution adopted earlier this week by the National Black Republican Council (NBRC) urging the Senate to enact the Martin Luther King holiday legislation.

I ask unanimous consent that the NBRC resolution be printed in the RECORD and urge my colleagues to review it.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

To the United States Senate:

Be it resolved, That the National Black Republican Council in conference assembled this 19th day of September, 1983, does hereby urge the Senate of the United States of America to pass forthwith the Martin Luther King Holiday Bill. This measure commemorates a great American who courageously led the struggle for freedom, dignity and opportunity on behalf of all Americans, black and white. It is fitting that the United States of America set aside one day each year to continue Martin Luther King's dream and pledge that we will make that dream a reality in our lifetime.

AMENDMENT TO SUSPEND ALGERIAN IMPORT AUTHORIZATION

Mr. PERCY. Mr. President, just about a year ago consumers in central Illinois and other parts of the Midwest began receiving very expensive liquefied natural gas from Algeria. This LNG was being sold at over $7 per mcf, while plenty of domestic gas was available at less than half that amount.

In March, consumers in the Midwest began paying for this exorbitantly priced gas. These are the same consumers who have experienced up to 50 percent hikes in their gas rates over the past year. These are the same consumers who have been hit hard by the

recession. We are not talking about small change here. We are talking about people's jobs, their daily lives, sometimes even their choice between eating and keeping warm.

Yet, despite the awareness by virtually everyone involved that this gas is vastly overpriced in today's market, little has changed over the past year. I and a number of my colleagues from affected States have tried to encourage regulatory agencies to solve this problem. But to date we have seen no concrete results in terms of relief for consumers. Both the FERC and the ERA have acknowledged in their proceedings that the price of this LNG is well above market levels and should be renegotiated. In addition, the FERC this summer issued a show cause order requesting an explanation of why the import license for the project should not be revoked given an apparent failure by the parties involved to fulfill the provisions of the contract. However, this case is still pending before the FERC after a full year. The regulatory process has simply been too slow to bring a remedy to the consumers in my State and across the Midwest.

In the past, Sonatrach, the Algerian oil and gas company, and others of our gas trading partners have not hesitated in pressing for higher gas prices during tight gas markets. Now that markets are soft, it is only fair—and in the interest of our long-term trade relations—that prices come down to a more reasonable level or that other actions be taken to reduce the current problems associated with this high-priced gas.

I have personally raised this concern to Ambassador Yaker and other representatives of the Algerian Government. It has become a central issue in United States-Algerian relations. The LNG issue was a primary agenda item for the Vice President's recent visit to Algeria.

In my discussions with the Algerians, I told them that the current LNG contract with Trunkline is far too one-sided. It is not mutually beneficial. It is not the way for us to develop a strong, long-term bilateral trading relationship. By contrast, Algeria's LNG contract with Distrigas, serving customers in New England, is mutually beneficial. It is the kind of contract that can help foster a solid bilateral trading relationship. But as long as the Trunkline situation festers, overall economic relations are bound to suffer. Rather than let this happen, I would rather put the matter to rest. Let us give it a cooling-off period. That is why I am today introducing, with nine cosponsors, a bill to suspend Trunkline's LNG import authorization.

This bill will simply place a moratorium on the sales of Trunkline LNG to the United States—let me make clear, it will have no effect on LNG imported by Distrigas—by suspending Trunkline's license to import this LNG for a period of at least 18 months. After this period, the Department of Energy will determine whether or not it is in the public interest to reissue the import authorization. Such a moratorium will allow a period of time for LNG prices to adjust to market conditions, while preserving the rights of all parties to resume these imports in the future.

Reflecting the deep concern this issue has generated throughout the Midwest, I am pleased to announce that Senators DIXON, LUGAR, DOLE, DANFORTH, KASSEBAUM, EAGLETON, LEVIN, METZENBAUM, and RIEGLE are original cosponsors of this bill. They, like myself, feel that the consumers of Illinois, Indiana, Ohio, Michigan, Missouri, and Kansas should no longer have to pay exorbitant prices for Algerian LNG.

I feel now, as I have always felt, that legislation of this kind is a last resort—a matter to pursue if all else fails. We have so far seen no tangible results from direct party-to-party renegotiation. Nor have we seen final action from regulatory agenies with the authority to suspend these imports.

However, Secretary Hodel has given me his personal assurance that the Department of Energy will resolve this matter before the onset of winter—another winter in which many, many Midwesterners will have a great deal of difficulty affording their energy bills. Just today, the Department of Energy is taking action which shows that it does indeed take this matter seriously.

Today, the Department is reopening the Trunkline proceeding it suspended last February. In approximately 2 months, we will receive a final order from the Department that will address the issue of whether this LNG is fairly priced, and, if not, whether these LNG imports should be suspended or other appropriate action taken, until Trunkline and Algeria negotiate contract terms consistent with the public interest.

I am pleased with this recent development. However, this bill will state clearly for all concerned what action I and my Midwestern colleagues will seek if necessary.

JAMES F. BERE

Mr. PERCY. Mr. President, James F. Bere, chairman and chief executive officer of the Borg-Warner Corp. in Chicago, and recent Chairman of the Advisory Council on Japan-United States Economic Relations has guided his company through hard economic times without sacrificing growth or innovation. At the same time he has maintained and actually increased earnings during the recession.

The August 15, 1983, issue of Forbes magazine carried an excellent article on Mr. Bere, with an eye-catching heading: "Healthy Smokestacks." The article notes at the onset that "Here's a midwestern manufacturer whose earnings were scarcely dented last year. What's Borg-Warner doing that's right?"

Mr. President, this Forbes article lays out Mr. Bere's enormous contribution to his company and his community. I ask unanimous consent that it be included in the RECORD at the close of my remarks.

As the chief executive officer at Borg-Warner, a company which specializes in the production of chemicals, plastics, and automotive and industrial air conditioners, Mr. Bere has overseen the diversification of his company into financial services and industrial and residential protection. In doing so Mr. Bere has demonstrated an executive ability that has won him respect both here and abroad. This can be seen in his appointment as Chairman of the Advisory Council on Japan-United States Economic Relations. The Council was formed to provide a national forum to propose solutions to problems within the Japan-United States economic relationship which may limit trade and investment between the two countries. As Chairman, Bere testified last year before the Senate Foreign Relations Committee on United States-Japanese trade and the yen/dollar relationship.

Mr. Bere's company has worked closely with the Japanese, most recently in the joint production of a turbocharger with the Japanese manufacturer IHI. Underscoring his commitment to United States-Japanese trade, and the importance of economic cooperation, Mr. Bere comments:

Whatever the long-term manufacturing position of the American in Japan will be, there is, and will be a market. We are determined in Borg-Warner to command a larger share of that market for our products. I sense a growing intent in many American companies to become busier in the very lively Japan market.

I have known Jim Bere for many years and was pleased to see the Forbes piece on him and his company. At a time when there is much debate in Washington about our smokestack industries, Jim Bere and Borg-Warner show how successful our basic industries can be with the right talent. I commend this article to my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Forbes Magazine, Aug. 15, 1983]

HEALTHY SMOKESTACKS

(By Ellyn Spragins)

One day in 1966 ten division presidents of Borg-Warner's automotive group walked

into the conference room at the Rockford, Ill. plant. They expected a routine meeting with their boss, Jim Beré. But Beré, just over a year on the job as group vice president, had a surprise in store. In outright violation of a company rule against disclosure of certain financial data, Beré revealed all ten divisions' sales and profits or losses. Beré wasn't fired, as some of the managers thought he would be. His boss was upset. Yet two years later B-W plucked Beré, at the age of 45, from a group of older and more experienced candidates and promoted him to the B-W presidency. The board that picked him had realized the very openness which had once gotten Beré into trouble was a great virtue in leadership. Because he was so frank, people trusted him and would do what he asked.

The board had chosen wisely. Beré has transformed a collection of ill-fitting industrial operations into a conglomerate that really works. Beré shucked off B-W business lines with nearly $1 billion in sales and acquired new ones, heavy on the service side, with over $500 million in sales. Just one comparison shows the striking effect on the company's finances. In the recession before last, the 1973-75 slump, B-W's earnings shrank by 37 percent. But in 1982 the shrinkage, to $167 million in earnings on sales of $3.2 billion, amounted to only 3 percent from the prior year, and earnings were actually up 33 percent from 1980.

B-W, headquartered in Chicago, remains a place where employees spend their entire working lives, where the president still stops by the dining room kitchen to chat with the staff and where, despite diversification, smokestack industry still accounts for 71 percent of business. B-W's gritty side consists of manufacturing chemicals and plastics, air conditioners and equipment for the automotive and energy industries. The diversification managed by Beré—now chairman and chief executive—has thrust the company into financial services and industrial and residential protection, which together contributed 34 percent to 1982 earnings.

Yet Beré doesn't sneer at smokestack America. Industrial manufacturing, he says, will never account for less than roughly half of B-W's business. "I think mob psychology is very prevalent among CEOs," he says. "Everyone is going after electronics companies. Prior to that they were all chasing insurance companies." But he draws no sharp distinction between manufacturing and service businesses. "When you are manufacturing something," he says, "the whole essence of business is to serve."

Take B-W's oldest business, founded on metal-bending to make automobile and other parts. Beré dumped the lines that weren't consistently profitable. He stuck with parts that automobile manufacturers can less easily make for themselves. That meant getting out of automatic transmissions, for example, and closing plants. B-W has wound up with its warehouses filled with proprietary products like the Hy-Vo chain, used in front-wheel-drive transmissions, for which service—in the form of engineering and design—can add value and profitability. Although the biggest recent drop in U.S. auto production was about 25 percent, in 1980, B-W's sales to the auto industry that year fell only 16 percent.

B-W's chemicals and plastics division found a way to increase its service to customers last year by becoming a broker of other producers' resins. Now B-W's small wholesale customers, such as Mike Schuitt at Keco Inc. in Oklahoma City, place more business with B-W; he orders five times as much, in fact, as he used to. "I get much better service now," he says. "Monsanto and Dow only go after the larger accounts. Borg-Warner saw this void and stepped in."

Illustrative of B-W's approach is a device developed by the air-conditioning group. This device embodies some of Beré's most ambitious plans for Borg-Warner's industrial businesses—to marry brains to machines. It's the Turbo-Modulator, a box that "senses" the coolness of water returning through an air conditioner and tells the machine how fast to run the motor in order to hit a desired air temperature. Nothing too fancy, but customers can add it to their systems and save energy immediately. "We don't want to automate the factory like GE," Beré says. "We want to make the components people can buy to automate themselves."

Despite his dedication to manufacturing, Beré has not hesitated to go outside his industries for knowhow. Under Beré, B-W has bought 5 percent and 10 percent interests in small electronics and software companies, to gain their expertise, and has entered into several joint ventures to acquire technology. "It became obvious that the global turbocharger market was going to take off," says Scott Merlis, an analyst for Shearson/American Express. "How does Borg-Warner develop a turbocharger overnight? They signed a joint venture with IHI, a Japanese manufacturer, and now Warner-Ishi turbochargers will be in the new Ford Escort models."

Beré's ability to enter productive partnerships is also evident in B-W's three major equity interests in other companies. Rather than sell off B-W businesses outright, Beré chose to swap three of them for stock. Thus did B-W end up with substantial stockholdings in Hughes Tool, Echlin and Amedco. B-W's 1.8 million shares of Amedco, originally worth $7.5 million, are now worth $44 million. B-W's 19 percent interest in Hughes Tool, while currently depressed in price, is a jewel many companies would gladly buy if B-W were to offer it for sale. But such a sale is unlikely even to finance the purchase of another service business Beré wants. It is estimated that divestitures of other operations could fetch $100 million to $150 million in cash, and B-W's debt amounts to only 24 percent of equity. Beré is as modest as he is open. He takes little credit for B-W's specific innovations. He does accept the credit for helping motivate the people who innovate. "If you communicate with people, you can release their creativity," he says. "They can go to work and be part of the decision tree."

Call it good communications, call it good leadership, Beré's style produces results. Old-time employees say they know more now than they ever did before about what must be done to help the company compete. Even a union official says that he came to trust senior management under Beré. "A few years ago," he says, "I sat down with management and said, 'I'm not going to lie to you anymore.' " Says one officer, "Beré is the kind of guy who, if he asks you to do something, you say, 'Watch out, five-foot-thick brick wall, because I'm coming through.' "

No amount of employee zeal can strengthen sick markets, of course, and B-W would be doing much better if it weren't for weakness in Europe, in oil drilling, in air-conditioning and in other divisions. Nevertheless, in the first half of 1983, although total earnings slipped slightly, operating profit from manufacturing groups rose by 30 percent and for the full year B-W is headed for an earnings record. If smokestack America is dying, you wouldn't guess it here.

UNDER SECRETARY FOR AGRICULTURAL AFFAIRS

Mr. HEFLIN. Mr. President, I strongly recommend to my colleagues the creation of a new position within the Department of State to be entitled the Under Secretary for Agricultural Affairs.

We need to be sure that there is at least one high level State Department official who is an expert on the relationship between agricultural and foreign policy since, increasingly, our agricultural policy is being set by officials in the State Department. For example:

In the past decade there have been four embargoes of agricultural goods, and in the wake of the Korean airliner incident, calls for yet another grain sanction against the Soviets. It is clear that the only party injured by such embargoes is the United States since the Soviets have plenty of other suppliers to choose from. Moreover, the embargoes have critically harmed America's reputation as a reliable supplier and reduced prospects for future sales.

Agricultural products account for 20 percent of all U.S. exports and contribute $26 billion to the balance of trade. Agricultural exports account for $95 billion of our domestic economic activity and provide 1.2 million jobs. Each extra $1 billion in exports creates as many as 35,000 new jobs.

State Department employees are stationed in nearly every nation around the globe and are in an excellent position to monitor economic conditions and promote trade. Aggressive U.S. export policies will expand trading partnerships, especially in the developing nations, and where trade increases, so does U.S. influence.

Agricultural issues have become a sticking point with several of our traditional allies, and Foreign Service personnel are in a position to help reduce trade barriers and resolve agricultural subsidy disputes.

Other agriculture-related issues that must be dealt with by our foreign policy establishment, on a bilateral or multilateral basis, include Commodity Credit Corporation guarantees to the Eastern bloc, matters relating to the Caribbean Basin Initiative, Food For Peace, agricultural exchange programs and general economic trends.

Today the American farmer has little or no access to the makers of our foreign policy. We need to provide a permanent, specialized conduit for the concerns of the farmer, who has borne the brunt of many of our foreign policy decisions.

50TH ANNIVERSARY OF AMERICAN TRUCKING ASSOCIATIONS

Mr. HOLLINGS. Mr. President, this week the American Trucking Associations is celebrating its 50th anniversary of distinguished service to the American motor carrier industry and to the Nation as a whole.

ATA is a federation with affiliated associations in every State and the District of Columbia, plus 12 national conferences. In the aggregate, it represents every type and class of motor carrier operation in the country, both for-hire and private.

ATA was incorporated on September 22, 1933, amid the despair and confusion of a devastating national depression. Yet the founders of this organization saw through this chaos. They were men of vision, men of boundless optimism, men of immense energy. They were eager to meet the many challenges head on. Today that same spirit still is alive within the trucking industry.

When ATA was founded, the motor carrier industry was just beginning to show signs of strength. The truck had proven its value and capabilities in the rugged campaigns of World War I. Those World War I trucks—labeled surplus—found their way into American industry and the great saga of the motor carrier was underway.

These early trucks were not much by today's standards. They had solid tires and a top speed of 18 miles an hour. Often, the trucks were improvised wagons mounted on old car bodies.

In 1916, there were but 250,000 trucks in the United States. Four years and one World War later, the number had quadrupled to 1,108,000. This growth has continued apace. Today there are nearly 34.5 million trucks operating in America.

The trucking industry is by nature a highly responsive, flexible and specialized industry. It hauls everything from potatoes to electrical generators, from paper to the King Tut exhibit. It does so safely and efficiently. The greatest tribute that can be paid to it is the degree to which we take it for granted. Nearly everything we eat, wear or use comes at least part of the way by truck.

Perhaps more importantly, trucking has played an integral role in the Nation's economic development. When ATA was founded in 1933, railroads were the dominent freight transporation mode. Today, trucks haul 83.2 percent of all fresh fruits and vegetables, 73 percent of all clothing, 73.6 percent of all toys, amusement and athletic goods, and 63 percent of all televisions and radios. In short, trucks haul nearly 60 percent of all manufactured goods.

It is not accidental that the rise of the trucking industry paralleled the great economic growth that has taken place in this country. Trucks allow businesses and people the freedom to locate in any area no matter how small without fear of prejudicial rates or services.

America's trucking industry works for all of us. On behalf of my colleagues in the Senate, I want to take this opportunity to congratulate ATA on its 50th anniversary and to send my best wishes for the future.

ARMY WINS GOLDEN FLEECE AWARD FOR SEPTEMBER

Mr. PROXMIRE. Mr. President, I gave my Golden Fleece Award for the month of September to the Department of the Army for spending about $20,000 to prepare 30,000 fancy, multicolored pamphlets explaining how to play "King of the Hill"—that is right—the old playground game. The Army has made a mountain out of a molehill but the poor taxpayer has taken the financial tumble.

The pamphlet contains a preface, four pages of detailed rules, and a multicolored diagram of an "earthen mound" to be used when playing the game. The Army states that the purpose of the pamphlet is to "incorporate leadership, strategy-planning, and decision-making skills into the physical fitness training program."

I believe this statement is bottled-in-bond nonsense and here is why.

First, while the U.S. Army is practicing "King of the Hill," the Russian Army practices blitzkrieg tactics, massed infantry attacks, chemical warfare, and subversion. Our playing "King of the Hill" will not keep Defense Minister Ustinov awake nights.

Second, "King of the Hill" has little resemblance to the modern battlefield, which is fluid, makes use of high technology weapons including remote targeting and attack, and is not bound by detailed rules. Whatever lessons about strategy which can be learned from "King of the Hill" will be useless on the battlefield.

Third, the rules of "King of the Hill" can be easily learned. Children have been doing so for decades if not centuries. Drill instructors are notably proficient at keeping the troops fit. If these instructors want to play "King of the Hill" to improve fitness, they do not need a Defense Department pamphlet filled with silly rules.

Fourth, the pamphlet is written like a second grade "Dick and Jane" reading primer. Here are some direct quotes from the pamphlet:

> King of the Hill uses a defending team and an attacking team.
>
> The game is played under the supervision of three referees. One of them is designated chief referee. All referees have whistles.
>
> When possible, senior NCOs and/or officers from other units or sections should be used as officials. It is important that their authority not be questioned during play. If it is, the game quickly gets out of hand.
>
> Unsportsmanlike conduct is called for abusive or insulting language directed at a referee or language determined to be excessive or blatant.

The rules also provide that the defending team leader cannot be attacked by anyone but the attacking leader as long as the defender remains in an "inner circle." Ordinary soldiers are expendable but the leaders are exalted personages only to be attacked by others of equal rank. Is this a lesson the Army wants to teach?

Mr. President, I believe physical fitness should be a goal for every American. It is especially important that our soldiers be fit. But using "King of the Hill" to teach strategy and decision-making strikes me as an exercise in futility.

URGENTLY NEEDED: A TOUGH ANTINUCLEAR PROLIFERATION POLICY

Mr. PROXMIRE. Mr. President, we have so sharply focused our gaze on the threat of a nuclear attack by the Soviet Union that we have become transfixed, unable to see the far more likely threat of a nuclear war. Listen to the New York Times columnist, William Safire, for example. No one has more consistently recognized the military threat the Soviet Union represents to our country than Safire. And few if any have counseled a tougher or more uncompromising policy of vigorous and forthright opposition to the Soviet Union, including strategic and conventional military strength, feed grain embargo and the termination of all trade that might even indirectly strengthen the Soviet military strength. Now what would you assume that Safire would regard as the most serious threat of nuclear war? A strike against this country by the U.S.S.R.? No.

Last Sunday Safire wrote in the New York Times: "The spread of nuclear weapons to additional nations is the likeliest road to world war." And Safire is right. This country will spend at least $50 billion this year and at least $250 billion over the next 5 years to build a bigger, more lethal and less vulnerable nuclear arsenal for the purpose of deterring an attack by the Soviet Union. This Senator agrees that we need much but not all of that nuclear military strength. That immensely costly build-up will do nothing to prevent the spread of nuclear weapons which—as Safire observes—represents a more likely road to nuclear war. And how much are we spending to halt this proliferation? Answer: Nothing. We not only are devoting none of our resources to stopping this road to a nuclear holocaust, we as a nation are actually in the process of aiding and abetting the proliferation. Argentina has refused to sign the non-

proliferation pact which would pledge her to shun attempts to develop nuclear weapons. Safire points out that "with a two paragraph announcement in the Federal Register, the United States recently slipped Buenos Aires 143 tons of heavy water." And Safire also reports that "according to one U.S. intelligence analysis, a secret plan is afoot in Buenos Aires to divert a ton of uranium from one of the Argentine atomic energy plants to make enough plutonium for a bomb, with no international inspection agency the wiser." And Safire adds: "This analysis, circulated widely in our Government since May, evaluates the supposed plan with a curt 'can be done.' Plant has a 150-ton annual capacity. One ton could be done by bookkeeping error."

Now, Mr. President, all of us can recall that it was only a few months ago that Argentina was locked in mortal combat with the United Kingdom in a war over the Falkland Islands which Argentina had invaded and then was defeated by the United Kingdom with conventional arms. Let us entertain the shuddering thought that Argentina had the bomb at that time. Would she then have accepted that humiliating defeat as she did? Would she have threatened the United Kingdom with a nuclear bomb explosion in the heart of London if Britain did not withdraw its armada from the Falklands? Think of it—a nuclear bomb—made courtesy of a U.S. export to Argentina of heavy water, made in spite of our full knowledge of Argentina's refusal to sign the nonproliferation treaty, and in spite of our further knowledge that Argentina had every intention of diverting enough plutonium from its reactor to make a bomb. But an Argentine nuclear attack on London? The United Kingdom after all is a nuclear power. It has not one nuclear warhead but 1,500. It also has the capability of delivering its nuclear missiles by air and sea and land. Some will argue that Argentina would be engaging in an act of transparent idiocy to threaten a nuclear explosion against the United Kingdom—a mouse threatening to bite an elephant. But could the United Kingdom take the gamble of calling Argentina's bluff and if it did would the Argentinians in desperation and humiliation take the chance that the United Kingdom would achieve nothing by retaliation even after being nuked and if the United Kingdom did retaliate where would the nuclear madness end?

Mr. President, admittedly the Argentine-United Kingdom example would probably not bring a nuclear war. What would be the odds? Ten to one against, thirty to one against. But the odds shorten considerably when we consider the likely fruits of our total policy in spreading nuclear armed goodies around like pennies from heaven. Consider our record: We have sent nuclear materials or equipment to Pakistan, to India, to South Africa. And so we have had no grounds for protest when the French have provided nuclear capabilities to Iraq and Iran or when the Germans, the Japanese, and even the Swiss—none of whom either have a nuclear arsenal or appear to have any interest in developing one—nevertheless sell nuclear know-how to other countries.

Safire reports that the State Department has been salivating about selling nuclear reactors to China—noting that China has been a nuclear power for some time but is helping to give a nuke power to Pakistan which is also helped along the nuclear road by Israel.

Mr. President, survival is crying out for a nonproliferation policy on the part of our Government that should be tough, uncompromising and have a priority over everything else. We should start as Safire suggests with this: "The U.S. Government should make clear to Argentina and other allies that our help in atomic energy development is available only to countries willing to pledge to forego the bomb."

One of the concrete reforms that the Congress can take to stem the tide of dangerous U.S. nuclear equipment and materials exports is to pass the Proxmire Non-Proliferation Act Amendments bill, S. 475. That legislation puts teeth into the exports controls governing sensitive U.S. technology. Mr. WOLPE of Michigan is the House sponsor of the companion bill.

Mr. President, I ask unanimous consent that the article from the Sunday, September 18 issue of the New York Times by William Safire headlined: "Atoms for Argies" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ATOMS FOR ARGIES

(By William Safire)

WASHINGTON.—The Argentines may be busily building themselves an atomic bomb. With such a weapon, Argentina would be able to deal with Great Britain on the Falkland Islands as a nuclear equal, as well as menace Chile in the dispute over islands at the tip of South America.

According to one U.S. intelligence analysis, a secret plan afoot in Buenos Aires is to divert a ton of uranium from one of Argentina's atomic energy plants to make enough plutonium for a bomb, with no international inspection agency the wiser. This analysis, circulated widely in our Government since May, evaluates the supposed plan with a curt "can be done. Plant has a 150-ton annual capacity. One ton could be done by bookkeeping error."

State Department officials dispute this interpretation, and other intelligence analysts argue that no credible evidence has come our way to suggest that the Argentina nuclear program—by far the most extensive in Latin America—has been diverting nuclear fuel to produce a bomb.

That brouhaha among spooks may be academic; as Philip Boffey of The New York Times reports, Argentina mines is own uranium and is building a plant that could turn out bomb material with nobdoy the wiser.

Here comes the controversy: Since Argentina refuses to sign the Nuclear Non-Proliferation Treaty, should the United States help that nation develop its nuclear potential by selling it heavy water and computers?

That question is slanted to elicit a no. But the Reagan Administration argues that our previous policy of refusing to cooperate on anything nuclear with non-signing countries did not stop their development, and left us with no connective tissue. That is why, in the dead of night, with a two-paragraph announcement in the Federal Register, the U.S. recently slipped Buenos Aires 143 tons of heavy water; now the Argies will at least talk to us about safeguards. Isn't some progress, and contact that might lead to more, better than a sterile all-or-nothing posture?

That is the way the Reagan men slant the question to elicit a yes, but the answer is still no. Old détenteniks still hope that trade and aid to foes and friends will somehow make them dependent or grateful; that naive approach does not work. The way to discourage any nation not now a member of the nuclear club from building a bomb is to bring our diplomatic, intelligence and economic pressure to bear to stop it.

The temptation to a proud people, recently humiliated in war, to convert atomic facilities to bomb production is obvious. Argentines, with inflation approaching 500 percent, are flirting with bankruptcy. With abundant coal and hydroelectric energy resources, billions spent on atomic development are misdirected. They need our economic help; we should link that help to their willingness to join the nations willing to submit to close inspection of all atomic facilities.

Blackmail? You bet. Is it unfair for the nuclear nations to insist that other nations stay out of their club? Yes. But the need to stop the spread of nuclear weapons into more hands overrides all equity.

Argentina is now preparing for democratic elections next month, which will be the military junta's Good Deed. Although the middle-class candidate is getting most of the international media buildup, keep your eye on Italo Luder, the Peronist candidate, who is in the pocket of the unions. When Peronists are allowed to run, they win; they pioneered the "third position" in international affairs; over half the trade in Argentina today is with the Soviet Union. If Professor Luder wins, the U.S. will be holding out its nuclear carrots to a neutralist nation.

Fortunately, proliferation is one of those rare cases in which superpower interests are parallel. The U.S. should join with the U.S.S.R. in leaning against the pursuit of the bomb by the new government in Buenos Aires. Although we will be competing with the Russians for influence in Argentina, on that subject Moscow and Washington can agree to a superpower priority: Keep the nuclear club exclusive.

The same overriding concern should apply to our dealings with China, long a nuclear power, on matters atomic. Foggy Bottom has been smacking its lips at the prospect of selling Westinghouse reactors to Peking. But China is helping its ally, Pakistan, build the Islamic bomb, and we cannot count on Israel to nonproliferate the Pakis as they did the Iraqis. Before we agree to deal with

China, the U.S. should require a promise of safeguards on all its atomic exports and bomb-making data to other nations, complete with international inspection of Chinese civilian nuclear facilities.

First things first. The spread of nuclear weapons to additional nations is the likeliest road to world war. The U.S. Government should make clear to Argentina and other allies that our help in atomic energy development is available only to countries willing to pledge to forgo the bomb.

JUDAIC EXHIBIT SERVES AS A REMINDER OF THE NEED FOR RATIFICATION OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in November a cultural event of transcending importance will occur in Washington, D.C. The Smithsonian Institution will open an exhibit of Judaic treasures from the Czechoslovak state collections.

The negotiations to bring a portion of the collection, which has never been shown outside of Czechoslovakia, to the United States began with the discovery of its existence by a former colleague, Congressman Charles Vanik, during a visit to Prague in 1968. It is due to the perseverence of Mark Talisman, Vanik's former administrative assistant, and the efforts of many others that the Czech Government finally agreed to permit the exhibit to be shown here.

These cultural treasures, the story of how they were collected, and the decision of the Czechoslovakian Government to allow the exhibit to be shown in the United States form a remarkable chapter in the history of men's indomitable spirit.

The items to be shown at the Smithsonian are a small fraction of a huge collection of Jewish religious objects, art, and cultural items assembled during the Nazi occupation of Prague. That city had been for almost 900 years one of the great centers of Jewish culture. Because it was a city world famous for Jewish life, the Nazis decided to turn it into a monument of Jewish death.

The Nazi plan was to scour central Europe for Jewish art and artifacts, add them to the existing collections in Prague, and turn them into one vast museum of an extinct race. It was intended to document the successful annihilation of an entire people.

Mr. President, the ghoulish story represented by this collection, which has been described in recent press reports, is both distrubing and haunting. I was particularly moved by its sensitive portrayal on the September 19 edition of the MacNeil-Lehrer report.

In listening to their broadcast I was constantly reminded how impossible it is to comprehend the Nazi mentality: Driven to commit the most heinous crime known to man—genocide—and driven just as relentlessly to painstakingly document and memorialize their unspeakable crime.

The Nazi brutality and insensitivity is mind-numbing. But the reaction which this broadcast evokes—and I am confident that this important exhibit will magnify—is the spontaneous, human cry of "Never again."

Mr. President, former Congressman Vanik, Mark Talisman, the Smithsonian Institution, and the many individuals responsible for this exhibit have done all of us an important service by bringing this collection to America.

But is this collection merely serves as a reminder of one of the darkest chapters in mankind's history then it has only been partially effective. It needs to serve as a catalyst to America, and the world, to take every step possible to prevent the reoccurrence of genocide.

Here in the Senate we have one very concrete step we can take—ratification of the Genocide Convention. By giving our advice and consent to this important human rights treaty we can help to assure that there will never be another museum to an "extinct race" assembled as long as we have the ability to act.

Mr. President, just after this collection opens in November at the Smithsonian the world will mark the 35th anniversary of the adoption of the Genocide Convention by the General Assembly of the United Nations.

That anniversary and this exhibit provide an ideal opportunity for the Senate to ratify the Genocide Convention. We can not procrastinate any longer. We must make use of this opportunity to express the feelings of tens of thousands of Americans who will see or read about the Smithsonian exhibit and cry "Never again."

Mr. President, let us not waste that opportunity.

Mr. President, I ask unanimous consent that the transcript from the September 19 edition of the MacNeil-Lehrer news hour be reprinted in the RECORD, as well as news articles from the Washington Post on September 19 and the New York Times on September 20, which describe the exhibit.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PRICELESS CZECH JUDAICA TRACES THE HISTORY OF A PEOPLE

ROBERT MACNEIL. Finally today, there was news of an unusual cultural event. The Smithsonian Institution announced that after 15 years of negotiations, the Czech government has agreed to lend part of the state Jewish museum collection in Prague. The collection was assembled during the Nazis' destruction of the centuries-old Czechoslovak Jewish community. One of those making the announcement at a Washington press conference was Anna Cohn, project director of the exhibition, called Precious Legacy.

ANN COHN, (project director). The Precious Legacy tells the story of a museum turned upside down in a world gone mad. The Precious Legacy first as a major international loan exhibition which makes available to American audiences for the first time one of the largest and most important collections of ethnic art in the world.

MACNEIL. The Prague collection is unique. It is the largest and most significant collection of Jewish religious art anywhere. But what is haunting about it is the story of how it came to exist, and what the Nazis' purpose was—to actually create a museum to an extinct race. It is one of the strangest stories to come out of World War II and the Holocaust. It begins centuries ago in one of the most beautiful cities of Europe.

Prague—for nearly 900 years, a center of Jewish culture. In the Middle Ages, it was called the Jerusalem of Europe. In the solemn streets of modern Prague, only the architectural landmarks recall the cultural diversity and richness of the city's past. Prague was the Paris of the east, the golden city. From the tenth century through the Renaissance until 1939, it was one of the artistic and economic centers of the world.

The Jewish community was fully integrated into the life of the city. They lived grouped around the synagogues, centers of learning and religious life. The Altneuschul synagogue, built 700 years ago, is still in use.

The high synagogue illuminates the craftsmanship and wealth of the community in the 18th century; the Spanish synagogue from the late 19th century, ornate and elegant; the Pinchas, where archaeologists have found the remains of an 11th century ritual bath. A statue of Rabbi Loew, mystic and spiritual Jewish leader, stands outside the old Czech town hall.

The well preserved gravestones in the ancient Jewish cemetery carry the epitaphs of scholars, doctors, vintners, shoemakers, lawyers, a testimony to the diversity of Jewish life. It wasn't always simple; there were many persecutions of the Jews.

But from the turn of the century, the Jews in Prague enjoyed a period of extraordinary peace and development, fully integrated into Czech and German culture. Jews enrolled in Czech schools and universities, traded freely and practiced all professions. Bourgeois and secure, the intellectual community flourished. Jewish minds sparked ideas that changed the way we see the world.

Freud, born in Bohemia, was a student in Prague. Einstein made his discoveries at the university in Prague. Gustav Mahler began to write music in Prague. Kafka wrote in Prague. In 1939, it all ended.

JIRI LAUCHER (Holocaust survivor). And when the Germans came to occupy this country, we knew sooner or later something would happen.

Dr. BEDRICH NOSECK, (Curator, Czech State Jewish Museum). In Czech lands, we know that the peaceful cooperation between Jews and non-Jews was very useful. But for the first time that idea was a false idea.

IRMA LAUCHER (Holocaust survivor). We had to give up, at first warm things, keys, shoes . . .

Mr. LAUCHER. They took our wireless set and our sewing machines and next week all the optical instruments and next week all the animals, one week all the surgeon's instruments, and every week something else, and we were informed what we had to do.

MACNEIL. From the beginning, all the way to the showers at Auschwitz, the Nazis' process involved systematic method and elaborate illusions of normalcy. It began with the elimination of legal rights and proceeded to the confiscation of Jewish proper-

ty—objects of use to the Nazis, objects of value.

The Jews, fearing the dispersal and loss of their religious objects, proposed to the Nazis that they be gathered into a small existing Jewish museum. For the Nazis, it was a means of further confiscation, a way to use the Jews. And they saw another use for the museum after the war.

Mr. LAUCHER. People say they wanted after the war to make a museum of the destroyed nation.

NOSECK. It was a little perversity of Nazis, because Prague was known as one of the well-known Jewish centers in Europe, and that's why the Nazis wanted to create here an anti-Semitic center.

Mrs. LAUCHER. Here was a center, and here was already the first embryo of a museum because the Jews wanted to save the culture of their ancestors.

NOSECK. And the aim of the Jewish specialists was contradictory to the aim of Nazis. They wanted to save Judaic items against the Nazis for future generations.

MACNEIL. Housed in the unused synagogues all over Prague, the collection grew like a cancer. Did the Nazis merely appreciate the value of the objects? Did they need to understand the culture they despised? Or were they exorcising ghosts by cataloging, organizing, controlling the artifacts of the lives they were destroying?

In 1943, systematic exhibition work began at the Gestapo central Jewish museum in Prague. The Jewish curators set up regular exhibitions about Jewish life for the Nazis. They worked hard. They hoped to touch them with the exhibitions. In 1944, the museum staff was deported.

The Jews of Prague were sent to Terazin, a walled town 60 miles from the city. It was described by the Nazis as a model city for the Jews in the Third Reich, another step in the awful deception. It was, in fact, a way station to Auschwitz and Dachau. Built for 18,000 people, it housed over 60,000 Jews. They were humiliated and starved and tortured and finally deported.

As they had forced the Jews to organize the confiscation of their property, the Nazis forced the Jewish committee of elders to make up the lists of transports to Auschwitz.

Mr. LAUCHER. We got to—we saw a postal card with signs, best regards from your mother. It means best regards from your dead, in Hebrew. We didn't want to believe it. It's impossible they are killing people by gas. We didn't know what happened in Auschwitz, we knew only the transports to go to the east go to a bad place.

Dr. DESIDR GALSKY (Head, Prague Jewish Community). We had about 350,000 Jews in the year 1939. In the whole country, only five percent of Czech Jews survived the Second World War.

MACNEIL. After the war, the evidence of what had happened to the Jews of Czechoslovakia was revealed—the thousands deported, the few who survived. Of the 15,000 children sent to Terazin, 94 survived. There were reminders of the horror, and in the enormous collection of Jewish artifacts in Prague, reminders of the glory of the life that was destroyed.

Hundreds of thousands of priceless historical objects—fabric, glass, silver. There were 2,500 exquisitely made Torah curtains, 400 Torah mantels, 600 Torah plates, 100,000 rare books, nearly 1,000 Torah finials in silver. Thousands of objects representing the details of Jewish life for hundreds of years.

The decimated Jewish community could not afford to care for the collection, they offered it to the Czech government which created the Czechoslovakia State Jewish Museum. Including the cemetery and housed in six synagogues, the museum is a center of attraction in Prague.

Given the limited resources available, the conservation and preservation of the collection by the Czech authorities has been excellent, and as few people get to Prague, it has been a lost or hidden treasure.

After years of negotiations, in an unusual opening up, 350 of the objects are coming to the United States under the auspices of SITES of the Smithsonian. The preparation of the exhibition created important relationships between Czech and American curators and scholars. The objects reveal the quality and values of the culture and the close relationship between daily life and spiritual life.

Certain of the objects are moving for their lack of value—half-burned Havdalah candles, used to symbolize the end of the Jewish sabbath. Others are of splendid sophistication—this Eastern-influenced 19th century spice box; a very simple thing, a matzo rolling pin; ancient burial society tools from the 1600's; elaborate textiles from the 17th and 18th centuries; extraordinary silver work on an 18th century burial society cup; a simple pewter Passover plate, inscribed by the child Zonn in the 1800's; a very personal Torah mantle, made for the birth of a boy.

Mr. LAUCHER. In Hebrew, mei hatikva ish chai—from the hope, the men keeps the life, and we tried to believe and we tried it, we tried all to do to survive.

GALSKY. This is, you know, for us, for our generation, we are coming from the time before the Second World War, the history, the heritage is very important, and this is the power for us and also a stimulation, you know, for the activities here now. But what about the future? The average age of this community is very high.

MACNEIL. That exhibition will open in Washington in November and will later be seen in Miami Beach, New York, San Diego, Detroit and Hartford.

[From the Washington Post, Sept. 19, 1983]

TREASURES OF A LOST WORLD: JUDAIC ART FROM A NAZI COLLECTION

(By Charles Fenyvesi)

After 15 years of negotiations with the Czechoslovak government, nearly 400 objects from a vast collection of Judaica assembled by the Nazis for a "Museum of the Extinct Race" have arrived in Washington for a major exhibition at the Smithsonian Institution.

"The Precious Legacy: Judaic Treasures From the Czechoslovak State Collections" is a sampling of 500 years of Jewish art and life gathered and shipped to Prague just as the Jews themselves were being sent to death camps. The experts who catalogued the collection—everything from pianos to cut-glass pitchers, from the prayer books of a village synagogue to sheaves of medieval manuscripts—were Jews who, upon completion of their task, were deported and killed. In 1950 the Czech government took over the collection and created the State Jewish Museum in Prague.

The loan exhibition will be shown for the first time outside Czechoslovakia when it opens Nov. 9 at the Evans Gallery at the Museum of Natural History, where it will be on view through Dec. 31. It will then travel to Miami Beach, New York, San Diego, Detroit and Hartford, Conn.

The process by which the exhibition came to the United States began in 1968, when Charles Vanik, a Roman Catholic congressman of Czech descent, visited Prague's medieval Jewish quarter, accompanied by his legislative aide Mark Talisman, and broached the idea of an exhibition in the United States. The Czechs agreed in principle, but implementation then had to be worked out with the many-layered state bureaucracy.

"Between 1968 and 1979, the project was laid on the shelf," said Vanik. "Mark [Talisman, now the Washington representative of American Jewish communal institutions] went through one agony after another. He'd deal with one person and then someone else intervened. The professional diplomats wanted the project, but had to work their way through the system. I can't answer who held it up." Vanik, who speaks Czech and has devoted much time to promoting better U.S.-Czechoslovak relations, pressed his proposal during half-a-dozen visits to Prague during the 1970s.

"The Czechs are the most frozen Stalinists, three times worse than the Russians," said one foreign service officer, a frequent visitor to Eastern Europe, who asked for anonymity. "Normally, the Czech government wants to keep the lowest possible profile here. To send out the treasures of the Prague Jewish Museum means that the fate of the Jews and the Czech regime gets reviewed, which opens up too many questions."

Asked for his explanation for the delay, Talisman said, "Let's just say that Czechoslovakia is not your typical international cultural loan country."

Jaroslav Kubista, of the Czechoslovak Embassy here, had this explanation: "The idea was developing a long time. At the beginning, neither side had a perfect idea. Some political questions are involved."

In 1979, Vanik was told by the Czech foreign minister that the exhibit had been approved. He promptly telephoned Talisman, who was on vacation—the call had to be patched through from the American Embassy in Prague to a laundromat in Cape Cod. Forty-eight hours later, Talisman was on his way, accompanied by two American Judaica experts.

The storage rooms were unlocked and the Americans were shown the entire collection. For the first time, they were allowed to take photographs.

"Seeing the material was mind-boggling," said Linda Altshuler of the B'nai B'rith Klutznick Museum here, who went five times to Prague. "They have their exhibits and storage areas in as many as seven buildings. In one old synagogue are all the textiles, another old synagogue has all the silver. Attics, basements are full, and the items are clean and meticulously catalogued. There are case after case of similar objects.

"One gets the feeling of confiscated property—it is all so wholesale. You walk up three flights of stairs and open a locked door, and there are, from the floor to the ceiling, cases of Torah finials. Or charity boxes. Or Torah ark curtains. You start thinking how many people the objects represent. I work in a small museum where we consider ourselves fortunate to have several dozen Torah finials. In Prague they have hundreds, even thousands."

Experts estimate the Holocaust destroyed 90 percent of European Jewry's liturgical

objects. Yet the Prague museum has rooms crammed with hundreds of Torah mantles, many of them executed with stunning craftsmanship, and Sabbath wine cups, circumcision knives, seven-branched candelabras and other necessaries of Jewish religious life. There are also the finest quality 19th-century oil paintings of luxuriantly bearded rabbis and dignified merchants, and children's drawings of trees and butterflies from the Nazi concentration camp of Theresienstadt.

After World War II, ownership of the collection reverted to the Jewish community—those few thousand Czech Jews who returned from the camps—which set up a museum in 1946 in synagogues of the medieval Jewish quarter. Following the Communist takeover in 1948, the state took title to the museum; in exchange, it paid the curators and maintained the collection.

In a 1968 book, Vilem Benda, then director of the museum, describes how this transfer took place: "The Council of Jewish communities, as the highest organ of the surviving Jewish community, occupied with worries to provide materially for its members, discovered before long that it was beyond their powers to finance the establishment of the museum. At its session in November 1949 they discussed a proposal to offer the museum premises and the entire collections to the Czechoslovak state as a gift. The Government of the Czechoslovak Republic discussed the proposal at its meeting on April 4th, 1950 and generously decided to accept the gift . . . The museum ceased to exist in isolation and became an equal partner of all Czechoslovak museums helping to educate the new generations in the spirit of socialism."

Thus the relics of centuries of Jewish piety collected by the Nazis came under the guardianship of a staunchly atheistic communist government. It was a transaction worthy of Franz Kafka, who was himself a Prague Jew.

There may be as many as 15,000 Jews left in Prague, but only 2,000 attend synagogues. The Jewish Museum, however, is one of the city's great tourist attractions, with 800,000 visitors a year—the great majority not Jewish and the largest single group among them Germans.

"I was overwhelmed by the beauty and the wisdom of the people who created and used the items," Talisman said. "This is not a collection in which the viewer is expected to descend into a grave. The drawings of children in the concentration camp of Theresienstadt is the greatest collection of optimistic art." (These drawings will be shown in a companion exhibition at B'nai B'rith's Klutznick Museum.)

For Talisman, it was one thing to learn from history books that there had been 400,000 Czech Jews before World War II. But the finality of their death was expressed for him when he saw cases full of Havdalah candles with blackened wicks—burned briefly at the end of the Sabbath—that would never be used again.

Talisman was shown a drawer full of knives ritual slaughterers used. He tested one, a huge knife from the 18th century, and cut his thumb. "What a klutz I am," he remembers thinking. "But what an incredible privilege it is to hold such a knife in your hand!"

Talisman and Anna Cohn, the Smithsonian's project director for the exhibit, have lost count of the number of times they visited Prague, but they say their visits have changed them.

"I now think it's immaterial where I come from," said Cohn. "In another life, I'll be from Prague. Of all the places I know, Prague is the closest solution to my soul."

"I have become the most patient person," reflected Talisman. "The wisdom of Prague seeps from those stones.

"The Czech curators were wonderful. But the government officials were skittish: This is their national treasure, lovingly maintained, and they have the right to decide about it."

"Throughout the negotiations, the preeminent Czechoslovak concern was security, but as to the security of what, we never got an answer," said Ron Neitzke, who was the State Department's director of Czechoslovak affairs in the 1980s, until the final stages of the negotiations this summer.

"Since the items were heavily insured, there was never any question of monetary loss," said Neitzke. "We had to develop a secure feeling in the Czech government that the items would be returned."

Neitzke believes that the main stumbling block was the 18.4 metric tons of Czechoslovak gold reserves, entrusted to the Western allies by the democratic Czech government during World War II and finally returned to Prague in February 1982. Negotiations over the gold went on for years, and at one point, in 1974, the U.S. government pulled back at the last minute.

"We had a heritage of perceived bad faith on both sides," Neitzke said, "and no major accomplishments. There were moments when we had doubts if the exhibit will ever come off. That we got it through was nearly a miracle."

In 1982, the American Embassy cabled Talisman that the Czechs were ready.

"I was buoyant," Talisman says. But just before he was due to leave for Prague, he developed chest pains and failed a stress test. His doctor strongly advised him not to go.

Talisman flew to Prague. A special U.S. Air Force medical plane was kept in readiness in Frankfurt in case he had to be sent home.

But Talisman was lucky. "My heart held out," he recalls, "and the Czechs agreed to a two-year exhibit traveling through the United States, to a joint selection process and to an opening at the Smithsonian in the fall of 1983. Within 20 minutes they granted everything I asked for. I couldn't believe it."

Philip Morris Inc. agreed to become the corporate sponsor with a contribution of $350,000. The cost of presenting the exhibit is more than $1 million; most of it is being paid by private donors.

Talisman said he could accept the reality of the exhibit only after the items arrived in the West.

Cohn said she always had faith that the exhibit would happen—"a rational faith," she said, based on "the tremendous good will" among Czechoslovak curators and cultural affairs specialists. She said she felt "reassured" by "the old world craftsmanship" of the movers, employes of the German firm Hassenkamp, which also packed the King Tut exhibit that came to the United States in 1976. They cut special, acid-free foam rubber padding for each item, then came layers of bubble paper and foam packing—all to be placed in a cardboard box protected by a padded wooden crate. She felt "heartened" by the cooperation of the Czech customs officers and cultural ministry officials who checked each item as it was packed.

"In the end it was like clockwork," Cohn said. "It took the moving company five days to pack the exhibit. All was done by Friday 5 p.m. Before sunset. I checked and saw that everything was packed. Then I took a broom and swept the synagogue where the crates were kept. The workmen tried to take the broom from me.

"They didn't know that it is one of the highest honors in Jewish life to clean a synagogue."

[From the New York Times, Sept. 20, 1983]

TROVE OF JUDAICA PRESERVED BY NAZIS TO TOUR UNITED STATES

(By Bernard Weinraub)

WASHINGTON, September 19.—A landmark exhibit of centuries of Jewish artistic and historical objects, which were preserved by Nazi Germany to create a "museum of an extinct race," is to appear in New York City next year as part of a nationwide tour, the Smithsonian Institution announced today.

The showing, "The Precious Legacy," will mark the first time the religious and secular objects, now stroed in the State Jewish Museum in Prague, will appear in the United States. The collection is scheduled to be shown at the Jewish Museum in New York from April 15 to Aug. 26.

Mark E. Talisman, director of the Washington Office of the Council of Jewish Federation, who negotiated for nearly a decade with the Czechoslovak Government to bring the exhibit to the United States, said: "The collection will be a landmark in the Jewish and general art world. It is unprecedented in its depth, breadth and richness of cultural history."

VIBRANCY OF JEWISH LIFE

Mr. Talisman, as well as officials of the Smithsonian Insitution, which is organizing the national tour, said that the more than 400 objects to be shown illustrate both the vibrancy of European Jewish life from the Middle Ages to the 20th century as well as the devastation that occurred at the hands of the Nazis.

The items include an embroidered silk flag, dated 1628, of the messianic pretender, Solomon Molcho, as well as portraits, centuries-old coffee grinders, molds and ladles, 18th-century manuscripts, kitchen equipment, tablecloths and wine cups, satin and silk Torah mantles, skull caps and prayer shawls.

"What we will have here is a major international exhibition which makes available one of the largest and most important collections of ethnic art in the world," said Anna Cohn, the project director.

Also on display will be children's objects of the Terezin concentration camp, including drawings, a "deportation suitcase," a sports medal and charms. Of the 15,000 children in Terezin under the age of 15, only 100 survived the Holocaust, in which the Nazis set out to exterminate the Jewish people.

NATIONAL TOUR PLANNED

The exhibition will be open at the Smithsonian's National Museum of Natural history in Washington, D.C., Nov. 9-Dec. 31. It will also appear at museums in Miami Beach, San Diego, Detroit and Hartford.

Although portions of the little-known collection have been on loan to museums in Manchester, England, The Hague and Vienna over the last two decades, there has been nothing on this scale in memory from the State Jewish Museum in Prague, which has housed the Jewish objects. Attending today's press conference was an official, Jar-

oslav Kubitsa, of the Czechoslovak Embassy here.

The show, which will cost $1.4 million, is being underwritten by several corporations as well as individuals. Philip Morris Inc., which contributed $350,000, is the key corporate sponsor, Mr. Talisman said.

According to Mr. Talisman, as well as American curators of the exhibit and Smithsonian officials, more than 145,000 artifacts of Jewish religious and cultural life have been stored in the State Jewish Museum in Prague since World War II.

GOAL SET BY THE NAZIS

At that time Germany, which expected to use the Prague Museum as a way of documenting the Nazis' "final solution" to "the Jewish question," began amassing objects confiscated from Jews in Bohemia, Moravia and elsewhere in Central Europe. The task, taken up by Reinhard Heydrich, Hitler's chief officer in the region, was designed to offer evidence of a culture that Nazi Germany intended to ridicule in a "Central Jewish Museum" dedicated to an "extinct race."

By the time the Nazis were defeated in 1945, they had amassed more than 100,000 items filling eight buildings in Prague's Jewish quarter and 50 warehouses throughout the city.

"The purpose of the museum reflected Nazi pathology," said Miss Cohn. "They wanted to explore in bizarre and minute detail that which was to be killed and also to have a means of documenting in detail the so-called success of the destruction."

German officers employed eight Jewish curators, most of whom were later killed, to preserve and document the items. "These were people of extraordinary courage who waged their own resistance," said Mr. Talisman. "They were unable to save lives, so they endeavored to salvage, with tremendous care, the legacy that was left to them."

After World War II, the museum was placed under the control of Prague's remaining Jewish community but they had neither the money nor the people to maintain the vast collection. In 1950, the Czechoslovak Government took over the museum as a memorial and a research institute, which employs more than 40 curators and historians.

Because of Czechoslovak concern about security and the fragility of most of the items, the exhibitors arranged for a United States Air Force cargo plane to fly the artifacts to the United States. The Air Force was reimbursed for the flight.

Mr. Talisman paid tribute to State and Defense Department officials who were especially helpful in arranging the move, as well as Charles Z. Wick, director of the United States Information Agency, and Jack Matlock, former United States Ambassador to Prague and currently on the White House National Security Council staff.

SENATOR HENRY M. JACKSON

Mr. FORD. Mr. President, I ask unanimous consent to have printed in the RECORD certain editorials from Kentucky, and that they be included in the Senate document that is being prepared in honor of our former colleague, Senator Henry M. Jackson.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Ashland Independent, Ashland, Ky., Sept. 8, 1983]

THE CHANGING SENATE

Scoop Jackson is gone. Howard Baker and John Tower are leaving. The face of the United States Senate is changing—and not necessarily for the good.

With the sudden death last week of Henry M. "Scoop" Jackson, D-Wash., the Senate lost one of its most respected elder statesmen, a specialist in defense matters who preferred the broad sweep of issues to the technical details. During his 42 years in Congress—30 of them in the Senate—Jackson proved to be one of the more reasoned senators. His death creates a huge void in the Democratic leadership of the Senate.

Jackson's death follows announcements by Senate Majority Leader Howard Baker, R-Tenn., and Sen. John Tower, R-Texas, to not seek reelection. Both confessed to tiring of the routine of Senate politics and the difficulty in getting significant legislation approved by Congress.

Baker and Tower, along with Sen. Robert Dole, R-Kan., Sen. Pete Domenici, R-N.M., and a few others, formed the nucleus of Senate Republicans who have often served to save President Reagan from his own policies. On more than one occasion, they have provided a moderate voice to balance the excesses of Reagan-backed policies.

Jackson, Tower and Baker all shared a common trait which helped them be such effective national legislators. Because all three enjoyed immense popularity in their home states, they could afford the luxury of concentrating on long-range national issues rather than constantly worrying about getting reelected.

Unfortunately for our government, the younger senators who will assume the leadership posts of Jackson, Tower and Baker have yet to exhibit the skill and wisdom of the three elder statesmen.

[From the Advocate Messenger, Danville, Ky., Sept. 7, 1983]

HENRY M. JACKSON

Sen. Henry M. (Scoop) Jackson, who died unexpectedly Thursday at the age of 71, was one of America's best known senators, a forceful spokesman for a strong defense and twice a presidential contender.

The Washington Democrat was third in seniority in the Senate, where he had served since 1952. Until his election to the Senate he served in the House, to which he was elected for the first time in 1938, making him a 45-year congressional veteran.

Jackson cast his 11,000th roll call vote as a Senator in July, when he drew an ovation from his colleagues. The vote was in the majority on a 50–49 decision to kill an effort to delete funds for nerve gas production.

The ranking Democrat on the Senate Armed Services Committee, Jackson was sometimes called the "Senator from Boeing" for his support of interests dear to the heart of the aerospace industry, much of which is centered in Washington.

But his admirers called him "the last cold warrier" for his hard-line stands on defense issues.

Jackson was elected to office for the first time at the age of 26 when he was chosen prosecuting attorney of his native Snohomish County. He sought the Democratic presidential nomination in 1972 and 1976, losing to George McGovern and Jimmy Carter. He served as chairman of the Democratic National Committee in 1960 and 1961.

Funeral services were to be held today in Everett, Wash. where he died Thursday. An autopsy performed Tuesday attributed cause of death to a burst blood vessel instead of a heart attack as had been earlier reported.

His death comes as a surprise since he had been considered in excellent health and was still a dynamic leader, denouncing the Soviet attack on a South Korean jetliner hours before he was stricken. Jackson's view of the Soviet threat may, in fact, gain further acceptance in the wake of the unprovoked attack and loss of civilian lives.

[From the Herald-Leader, Lexington, Ky., Sept. 4, 1983]

USUAL LABELS DIDN'T FIT JACKSON

Democratic Sen. Henry M. "Scoop" Jackson leaves behind a legacy of faithful service to state and nation—service marked by a consistency that was maintained regardless of the political climate in Washington.

Jackson died Thursday. He was twice an aspirant for the Democratic nomination for president. He served 44 years in Congress, 12 as a representative, the rest as a senator.

Because of the airline industry in his state, Jackson frequently was referred to as the "senator from Boeing." He was much more, however.

Jackson was liberal on matters of civil rights, a conservative on relations with the Soviet Union and a hawk on military questions. As ranking Democratic member of the Senate Armed Services Committee, his views there greatly helped shape American policy.

Perhaps because of his views on military issues, Jackson was a liberal who could communicate with conservatives. His stature in Washington was such that his counsel was sought by presidents of both parties and advoctes of all ideologies. President Nixon considered asking him to be secretary of defense; two decades before, President Truman wanted him as an under-secretary of the interior.

He first gained national recognition when, with two other seantors, he resigned temporarily from the Senate's permanent investigating subcommittee to protest the investigation methods of Sen. Joseph McCarthy.

Jackson first defined the "missile gap" between the United States and Russia, an issue that later was an integral part of President Kennedy's campaign. The senator also was a leader in supporting the Navy's nuclear submarine program. He was a consistent supporter of Israel and a fervant advocate of Russian Jews, tying Soviet emigration policies toward them to any U.S. deals with that nation.

Jackson also was floor manager for Alaska and Hawaii statehood bills.

Last July he cast his 11,000th roll call vote as a senator.

Jackson will be missed as a senator. More importantly he will be mised as a leader, a counselor whose advice was based on stature, experience and a dedication to his state and his country.

[From the Paducah Sun, Paducah, Ky., Sept. 8, 1983]

PUBLIC LIFE ENRICHED BY SENATOR JACKSON

(By George Will)

WASHINGTON.—A silly person once said that only silly persons have heroes. But only exceptionally small people will not acknowledge the exceptionally large persons among us. Heroes make vivid the values by which we try to live.

I say, with many others: Henry Jackson was my hero.

He was an insoluble problem for the image-tinkers and a splendid puzzle for the label-makers who infest contemporary politics. Because he was uninterested in the cosmetics of politics, dull persons considered him dull. Discerning persons considered his kind of character as exciting as it is rare. Persons who, under the pressure of fashion, are as flexible as fly rods found Jackson incomprehensible. They came to the absurd conclusion that he had departed from the liberal tradition.

He was a pioneer of environmentalism. He was the preeminent champion of civil rights. He fought for the full domestic agenda and authored legislation that put teeth into U.S. pronouncements on behalf of Jews and others persecuted by the Soviet regime. And if Jackson's proposals for substantial force reductions had been adopted, we might have had arms limitation agreements that actually limit arms.

Jackson was one of those persons—Felix Frankfurter was another—whose constancy was mistaken for change. He never wavered from his party's traditional belief that there is no incompatibility between government with a caring face at home and government with a stern face toward adversaries.

From Wilson confronting Lenin and FDR confronting Hitler, through Truman confronting Stalin, Kennedy confronting Castro and Johnson confronting Ho Chi Minh, the Democratic Party has been the foremost opponent of this century's foremost evil—totalitarianism. Jackson was an anchor against weariness, wishful thinking and apostasy in the world's oldest party.

He nurtured in this Republic something without which no republic can long endure: a sense that problems are tractable. To be in his presence was to experience the wholesome infection of a reviving spirit. This was especially remarkable because he, more than any contemporary, looked unblinkingly at, and spoke uncomfortingly about, the terrors of our time. He taught less clear-sighted, less brave persons how to combine realism and serenity.

He missed the ultimate prize of our politics, perhaps because he lacked the crackling temperament that marks persons who burn on the surface with a hard, gem-like flame. If his political metabolism seemed uncommonly calm, that is because he had the patience of a mature politician—a gift for planning, thirst for detail, and a sense of ripeness in issues. He had a flame, but he had depth in which he kept it.

In committees and on the Senate floor, he was a cannon loaded to the muzzle with knowledge born of diligence. His unrivaled effectiveness was a rebuke to the less industrious and a refutation of the theory that fancy footwork is necessary and sufficient.

A legislature is a face-to-face society, where character and moral force tell. What Jackson did in committees and on the floor was awesome. But it was only a small fraction of the work he did during four decades of 18-hour days, working with one member after another, one member at a time, building coalitions of common sense.

His legendary energy flowed as much from his spirit as from his physiology. His biography is an essay on the sources of American vitality. He was the son of immigrants, and of the American West. His parents crossed not only an ocean but a continent, seeking an open future in our most open region.

For longer than I have been alive, Congress has been embellished by his presence. And for longer than I live, public life shall be enriched by the radiating force of his character.

If you wonder who real leaders are, find out who has real followers—persons who follow a leader onto a path of life, who adopt careers where they navigate by stars he taught them to see. The social geology of this city is layer upon layer of persons pulled into public life by the example of lives worth emulating. In numerous public offices, and in law and journalism, there is a thick layer of Henry Jackson's men and women.

There are those, and they are legion, who call themselves "Jackson Democrats." I can say with absolute authority that there is such a thing as a "Jackson Republican."

Henry Jackson mastered the delicate balance of democracy, the art of being a servant to a vast public without being servile to any part of it. He was the finest public sevant I have known.

STEADFASTNESS BRED LOYAL CONSTITUENCY

(By Joseph Kraft)

WASHINGTON.—Any number of senators can replace Scoop Jackson in such specialized areas as energy, defense, civil liberties and Great Power politics. But nobody else can draw all these themes together in ways that make things happen.

So his untimely death represents a genuine national loss. The more so as it comes against a general decline in the caliber of public servants.

The Scandinavian heritage marked Jackson in palpable fashion. He was a self-reliant individual, not, as so many politicos, a groupie. He liked to work things out for himself. While not a subtle or deep thinker, his convictions, once established, held firm.

Much fuss has been made as to whether he was a liberal or a conservative. In fact, his shaping political experience was the New Deal. Like all New Dealers, he believed in the power of government to solve problems. He looked to government to redress the balance between rich and poor, to protect the rights of labor and minorities, to make available cheap power and abundant water and recreation. He also counted on government to manage national security in a robust way.

Because his views were so steadfast, he developed over time a personal constituency of extraordinary depth and reach. He won six terms as a congressman from the state of Washington, and six as a senator—the last with 69 percent of the vote. No one was closer to the Jewish community in this country. Nor to labor. So unlike almost all other senators and congressmen, Jackson did not merely speak for himself. He commanded big battalions.

His New Deal connections, moreover, carried him beyond narrow support of the congressional prerogatives to a presidential perspective. He knew the ins and outs of the federal agencies better than most of their leaders. He sought the White House twice himself, and worked hand in glove with two Democratic presidents—Kennedy and Johnson. A Republican, Richard Nixon, offered him the post of secretary of defense.

Because he had troops and a feel for the presidential viewpoint, he exerted extraordinary influence on the course of events. He practically determined energy policy. He shaped basis legislation on the environment and the development of water resources. His insistence on tying relations with Russia to explicit guarantees on Jewish emigration frustrated the policy of detente undertaken by Henry Kissinger under Nixon and Ford.

Most important, he personified bipartisan support for a strong defense. Other senators—notably John Tower, the Texas Republican who now heads the Armed Services Committee, and Sam Nunn, the Georgia Democrat—set as much store by efficient military force as Jackson. But he alone crossed ideological lines. He fostered trust between the Pentagon and the unions. He kept labor patriotic, and the generals in touch with ordinary people. He thus served as a potent factor in the building of national consensus.

Had he lived slightly longer, the true extent of his influence might have been made manifest. For the chances are the Democrats will carry the Senate in 1984. Jackson would have become chairman of the Armed Services Committee. He would have dominated the Appropriations Committee, for the likely chairman, John Stennis of Mississippi, is over 80 and not in the pink. The combination would have given Jackson far more power than any senator has held since Richard Russell some 30 years ago.

He was the last of a breed. New senators are made on television, and in an age where ideological fashion is turned against government. They do not build loyalties quietly from within. They go for the evening news, usually by profiling themselves, from right or left, against the powers that be. More and more, the Senate is a collection of egos.

The corrosive forces at work in the Senate operate throughout government. The quality of Cabinet officers, and governors, and mayors, has slipped. private satisfaction exerts, particularly for intelligent people, a stronger appeal than public glory.

[From the Kentucky Post, Sept. 6, 1983]

HENRY (SCOOP) JACKSON

The death of Sen. Henry Jackson removes one of the giants from the national legislature.

The Democrat from the state of Washington was not among those flamboyant legislators who are more froth than substance. He was solid, hardworking, honest—one of those members who form the backbone of Congress.

It was a mark of the respect in which he was held that he had strong support from elements ranging across the political spectrum. Organized labor, the Jewish community, civil rights activists, hardliners on defense, staunch anti-communists—all liked the cut of his jib. Democratic and Republican presidents alike sought his counsel.

Jackson's diligence accounted for the acquisition of his nickname. As a 15-year-old in Everett, Wash., he delivered so many copies of the hometown newspaper without complaint from subscribers that they started calling him "Scoop."

Many of his political colleagues thought Jackson was among the most qualified Americans for the presidency. But that job eluded him, though he tried for it a couple of times.

He was an expert on energy matters, a staunch supporter of Israel, a friend of organized labor. He was a strong supporter of civil rights; it was typical of Jackson that he quietly sent his children to public integrated schools while many other politicians who bragged about their civil rights records sent their children to private schools.

Perhaps he is best known for his support of a strong defense. He knew the nation needed it in a world in which one of the su-

perpowers was the Soviet Union. He once said the Soviet leadership reminded him of "burglars walking down a hotel hallway, trying every door."

A friend who is a heart specialist said that Jackson's anger over the Soviet's downing a Korean commercial airliner may have contributed to his fatal heart attack. Just hours before, he had appeared at a press conference in Everett to denounce the Soviet attack.

Jackson's presence will be missed on Capitol Hill. He was a superb legislator. He also was one swell fellow.

HENRY JACKSON FORGED COALITIONS OF COMMON SENSE

(By George F. Will)

WASHINGTON.—A silly person once said that only silly persons have heroes. But only exceptionally small people will not acknowledge the exceptionally large persons among us. Heroes make vivid the values by which we try to live. I say, with many others: Henry Jackson was my hero.

He was an insoluble problem for the image-tinkers and a splendid puzzle for the label-makers who infest contemporary politics. Because he was uninterested in the cosmetics of politics, dull persons considered him dull. Discerning persons considered his kind of character as exciting as it is rare. Person who, under the pressure of fashion, are as flexible as fly rods found Jackson incomprehensible. They came to the absurd conclusion that he had departed from the liberal tradition.

He was a pioneer of environmentalism. He was the pre-eminent champion of civil rights. He fought for the full domestic agenda and authored legislation that put teeth into U.S. pronouncements on behalf of Jews and others persecuted by the Soviet regime. And if Jackson's proposals for substantial force reductions had been adopted, we might have had arms limitation agreements that actually limit arms.

Jackson was one of those persons—Felix Frankfurter was another—whose constancy was mistaken for change. He never wavered from his party's traditional belief that there is no incompatibility between government with a caring face at home and government with a stern face toward adversaries.

From Wilson confronting Lenin and FDR confronting Hitler, through Truman confronting Stalin, Kennedy confronting Castro and Johnson confronting Ho Chi Minh, the Democratic Party has been the formost opponent of this century's foremost evil—totalitarianism. Jackson was an anchor against weariness, wishful thinking and apostasy in the world's oldest party.

He nurtured in this Republic something without which no republic can long endure: a sense that problems are tractable. To be in his presence was to experience the wholesome infection of a reviving spirit. This was especially remarkable because he, more than any contemporary, looked unblinkingly at, and spoke uncomfortingly about, the terrors of our time. He taught less clear-sighted, less brave persons how to combine realism and serenity.

He missed the ultimate prize of our politics, perhaps because he lacked the crackling temperament that marks persons who burn on the surface with a hard, gem-like flame. If his political metabolism seemed uncommonly clam, that is because he had the patience of a mature politican—a gift for planning, thirst for detail, and a sense of ripeness in issues. He had a flame, but he had depth in which he kept it.

In committees and on the Senate floor, he was a cannon loaded to the muzzle with knowledge born of diligence. His unrivaled effectiveness was a rebuke to the less industrious and a refutation of the theory that fancy footwork is necessary and sufficient.

A legislature is a face-to-face society, where character and moral force tell. What Jackson did in committees and on the floor was awesome. But it was only a small fraction of the work he did during four decades of 18-hour days, working with one member after another, one member at a time, building coalitions of common sense.

His legendary energy flowed as much from his spirit as from physiology. His biography is an essay on the sources of American vitality. He was the son of immigrants, and of the American West. His parents crossed not only an ocean but a continent, seeking an open future in our most open region.

For longer than I have been alive, Congress has been embellished by his presence. And for longer than I live, public life shall be enriched by the radiating force of his character.

If you wonder who real leaders are, find out who has real followers—persons who follow a leader onto a path of life, who adopt careers where they navigate by stars he taught them to see. The social geology of this city is layer upon layer of persons pulled into public life by the example of lives worth emulating. In numerous public offices, and in law and journalism, there is a thick layer of Henry Jackson's men and women.

There are those, and they are legion, who call themselves "Jackson Democrats." I can say with absolute authority that there is such a thing as a "Jackson Republican."

Henry Jackson mastered the delicate balance of democracy, the art of being a servant to a vast public without being servile to any part of it. He was the finest public servant I have known.

[From the Cincinnati Enquirer, Sept. 3, 1983]

HENRY JACKSON—THE WASHINGTONIAN WAS A LIBERAL WHO BELIEVED IN A STRONG AMERICA

Henry M. Jackson went to Washington the same year Franklin D. Roosevelt won his-third term. First as a member of the House, and then, for 30 years, as a senator, he was one of the most respected figures in Washington and one of the most influential.

The congressional system gives great weight to seniority. So Senator Jackson was the beneficiary of his long service. But his influence stemmed from considerably more than longevity. It stemmed to an even greater extent from personal and political integrity, from consistency, from dogged courage.

Senator Jackson came upon the national scene at a time when a powerful coalition was in the making—a coalition whose creators recognized the dangers that beset the United States and resolved to meet them.

During the years of World War II, through the Cold War years, Democrats and Republicans argued long and hard about domestic issues but stood remarkably together in forging and implementing such audacious initiatives as the Marshall Plan, the Truman Doctrine, the North Atlantic Treaty.

Eventually, in the mid-1960s, that consensus began to erode. But Henry Jackson, to his credit, stood his ground. Despite all the lures of detente, he continued to see the Soviet Union as a burglar at large in a hotel corridor—a burglar tried every door. If the door was locked, he moved on; if it was unlocked he made away with everything in sight. History is likely to demonstrate that his diagnosis was on the mark.

Ultimately he stood almost alone in believing that it is possible to espouse liberal domestic policies and still believe in an adequate national defense and a vigilant foreign policy.

On two occasions Senator Jackson sought the Democratic nomination for President. In 1972, he ran as a supporter of the Kennedy-Johnson administration's policies in Vietnam. But his party had already moved away from the foreign-policy coalition of the postwar years, and the prize went to South Dakota's George McGovern.

He tried again in 1976, but that proved to be a year when the party and the country wanted a non-Washingtonian in the White House.

His disappointments subtracted nothing from his zeal or his convictions. He remained, until his last breath, a dedicated lawmaker and a respected participant in the national debate. The Senate is diminished by his sudden death.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without recommendation without amendment:

S. Res. 193: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the Consideration of S. 1090 (Rept. No. 98-235).

S. Res. 195: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1009 (Rept. No. 98-236).

S. Res. 196: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1513 (Rept. No. 98-237).

S. Res. 197: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 242 (Rept. No. 98-238).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 208: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1267 (Rept. No. 98-239).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HELMS:

S. 1881. A bill to amend the Federal Election Campaign Act of 1971 to prohibit the use of compulsory union dues for political purposes; read the first time.

By Mr. PERCY (for himself, Mr. DIXON, Mr. LUGAR, Mr. DOLE, Mr. DANFORTH, Mrs. KASSEBAUM, Mr. QUAYLE, Mr. EAGLETON, Mr. LEVIN, Mr. METZENBAUM, and Mr. RIEGLE):

S. 1882. A bill relating to the suspension of trunkline LNG import authorization; to the Committee on Energy and Natural Resources.

By Mr. PERCY:

S. 1883. A bill entitled the "Federal Unemployment Compensation Program Extension Act"; to the Committee on Finance.

By Mr. DOMENICI:

S. 1884. A bill to relieve the Elephant Butte Irrigation District of certain repayment obligations and for other purposes; to the Committee on Environment and Public Works.

By Mr. METZENBAUM (for himself and Mr. DIXON):

S. 1885. A bill to provide special relief for the payment of Federal income taxes and interest on income attributable to a new home which was won in a radio contest and which was specially designed for the handicapped child of the winner; to the Committee on Finance.

By Mr. GRASSLEY:

S. 1886. A bill to amend the Tariff Schedules of the United States to suspend for a 3-year period the duty on a certain chemical intermediate; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. PELL (for himself and Mr. CHAFEE):

S. Res. 228. Resolution wishing good luck to the "Liberty"; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PERCY:

S. 1883. A bill entitled the "Federal Unemployment Compensation Program Extension Act"; to the Committee on Finance.

FEDERAL UNEMPLOYMENT COMPENSATION PROGRAM EXTENSION ACT

Mr. PERCY. Mr. President, I am introducing legislation which would extend the Federal supplemental unemployment compensation program (FSC) for another 18 months, and provide additional relief to areas of the country which have been hardest hit by unemployment. This bill was introduced by the distinguished House Republican leader, Congressman MICHEL, earlier this week.

I am confident that we have turned the corner on high unemployment, and are heading for a sustained recovery. However, while the national unemployment rate is dropping, unemployment in some areas continues to be far higher than the national average. In Illinois, for example, unemployment is 11.5 percent, and remains even higher in some cities. For example:

Rockford—18.7 percent; Joliet—23 percent; Danville—17.4 percent; Decatur—16.5 percent; Kankakee—16.1 percent; Moline—17.1 percent; and Peoria—18.2 percent.

It is of paramount importance that these areas and others in similar situations elsewhere receive special help. We must recognize that it will take longer for these cities, where just a few months ago unemployment topped 25 percent, to get back on their feet again. While it is difficult for many Americans to find work, in these areas it can be next to impossible considering that one out of every four to five persons is searching for employment.

The bill I am introducing would provide 26 weeks of FSC benefits for unemployed persons living in areas with 15 percent or higher unemployment rates. Those residing in areas with 14- to 15-percent unemployment would be eligible for 21 weeks, and areas with 13- to 14-percent unemployment would provide its unemployed workers with 16 weeks of FSC benefits.

Mr. President, according to preliminary estimates provided by the Department of Labor, targeting benefits in this way will cost only an additional $50 to $100 million over the cost of the current program. This 5-percent increase in the cost of FSC is a small price to pay for the tremendous relief that would be brought to hundreds of thousands of unemployed individuals across the country.

The House has already passed a 45-day extension of the FSC program, providing up to 16 weeks of FSC benefits. However, their proposal does not target benefits to the areas needing the help the most, and costs over $1 billion more than the current system—if extended over the entire fiscal year. When the Senate takes up the FSC extension bill, it will have a unique opportunity to make important improvements to the program to bring relief directly to those areas needing it the most, and reduce the amount of money spent on FSC in the House version.

Mr. President, I ask unanimous consent that a more detailed explanation of this legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A BILL PROVIDING TARGETED UNEMPLOYMENT BENEFITS TO HIGH UNEMPLOYMENT AREAS

Extend the current Federal Supplemental Compensation Benefits Program for 18 months, through March 31, 1985.

Provide for the payment of 26 weeks of supplemental benefits to unemployed individuals residing in targeted areas of 15% or greater unemployment, 21 weeks of benefits to individuals in targeted areas of between 14 and 15% unemployment, and 16 weeks of benefits to individuals in targeted areas of between 13 and 14% unemployment.

"Targeted Areas" are defined as Metropolitan Statistical Areas, when compromised solely of complete counties, and counties when counties do not fall within such Metropolitan Statistical Areas.

A targeted area's eligibility would be determined quarterly, beginning October 1, 1983. Should a targeted area become ineligible at the beginning of a subsequent quarter, all extra benefit payments under the program would cease for that quarter and the area would be treated the same as the rest of the state with respect to supplemental benefits. Should such an area then become ineligible in a later quarter, an eligible individual's extra benefits would resume where they left off.

An individual's eligibility would be based on place of residence. An individual would be eligible for targeted benefits if he exhausts other unemployment benefits during the period that his place of residence is eligible for targeted benefits, or if he exhausted other unemployment benefits within 6 months of the time that his area initially triggers on to the targeted program.

The Bureau of Labor Statistics currently collects county and Metropolitan Statistical Area unemployment statistics every month. Such statistics would be the basis of determining an area's eligibility for targeted benefits. Such statistics reflect the total unemployment rate, not the insured unemployment rate. Targeted benefits thus would be based on the total unemployment rate.

Targeted benefits would depend solely on the area's unemployment rate. The state unemployment rate would be irrelevant. A state with a low unemployment rate might have pockets of high unemployment. Such pockets would be eligible for targeted benefits.

At present, most states are ineligible for the extended benefits program. Consequently, the unemployed in such states are eligible for 26 weeks of regular benefits plus between 8 and 14 weeks of supplemental benefits, for a total of between 34 and 40 weeks of benefits. Under this bill, individuals in targeted areas of 15% or more unemployment would be eligible for a total of 52 weeks of benefits. In targeted areas of between 14 and 15% unemployment, they would be eligible for 47 weeks of benefits, and in targeted areas of between 13 and 14% unemployment, they would be eligible for 42 weeks of benefits.

If such individuals in targeted areas have received, or are receiving, extended benefits, they would be eligible for up to 26 weeks of supplemental benefits, for a total of 65 weeks in areas of 15% or more unemployment.

The estimated cost of the targeted benefits is between $50 and $100 million a year.

By Mr. DOMENICI:

S. 1884. A bill to relieve the Elephant Butte Irrigation District of certain repayment obligations and for other purposes; to the Committee on Energy and Natural Resources.

RELIEF OF ELEPHANT BUTTE IRRIGATION DISTRICT

● Mr. DOMENICI. Mr. President, today I introduce a bill that will correct a situation which occurred when operation of a Federal water project was turned over to local project users following their repayment of the money used to finance the construction of the project.

Under the terms of the agreement, which turned maintenance and upkeep of the Elephant Butte irrigation project over to the local district, certain expenses were paid by the Federal Government while others were assumed by the irrigation district.

In as much as a few Federal workers were displaced by the change in control of this project, the Federal Government required the irrigation dis-

trict to assume the costs associated with the displacing of those workers.

Use of a special fund which the district maintained derived from grazing fees charged to ranchers grazing on parcels of the water project land was contemplated.

Unfortunately, under the laws and regulations of the Bureau of Reclamation that fund, which should rightly go to the irrigation district now operating the project, cannot be used for such a purpose. Simply stated, that money cannot be touched. It increases each year but cannot be used by the irrigation district. Rather than change the entire generic law that governs the use of the funds, this legislation instead allows for money from that fund to be transferred to cover the fees the district owes the Federal Government when the changeover occured.

In reality, all this bill does is make bookkeeping corrections. Once the district obligation of roughly $60,000 is taken care of the fund reverts back to its former state.

I would remind people that in the case of this water district the project costs have been repaid by the project beneficiaries. They have also taken over the operation of the irrigation district and finally, and most importantly, the bill does not cost the Federal Government any money. It only gives the district the right to use a fund that they should have access to since they are one of the few completely paid off water projects in the West.

I think our Nation can be proud of the Elephant Butte Irrigation District because I know our State of New Mexico is. They are the symbol of what Theodore Roosevelt was attempting to build when he pushed through the 1902 Reclamation Act.

Today hundreds of family farms are found in that irrigation district in southern New Mexico. Those families have served their local communities, have served their State, and have served their Nation well over the years, while at the same time providing our country with food and fiber at a reasonable cost.●

By Mr. METZENBAUM (for himself and Mr. DIXON):

S. 1885. A bill to provide special relief for the payment of Federal income taxes and interest on income attributable to a new home which was won in a radio contest and which was specially designed for the handicapped foster child of the winner; to the Committee on Finance.

RELIEF FROM TAXES IN A CERTAIN INSTANCE

Mr. METZENBAUM. Mr. President, on behalf of Senator DIXON and myself, I am today introducing legislation designed to bring to an end a harsh, painful, and unnecessary confrontation between a needy family and the Internal Revenue Service.

Tony Zocchi, a Chicago teenager, was born with one kidney and a bad heart. Heart surgery at age 7 left Tony partially paralyzed—he cannot walk, but he is able to move his legs enough to crawl.

When Tony was 10, his mother, who was herself a diabetic, could no longer care for him. Rosann York, Tony's aunt, became his foster mother.

But there were problems.

The building in which Tony's foster mother lived had halls too narrow to accommodate a wheelchair. As a result, Tony had to crawl.

He told a reporter that it made him "feel like a dog."

In 1980, however, it seemed that the fortunes of Tony and his stepmother were about to change for the better.

In a contest sponsored by a radio station, Rosann York won a new trilevel house in the suburbs. And when the developer learned of Tony's hardship, he built for the family a special single-level house designed to meet Tony's special needs.

It seemed to be a dream come true. But the dream turned into a nightmare when Rosann York learned that her prize was subject to a tax bill of $26,000.

Ms. York, who earns $14,000 a year as a school computer operator, was unable to find a bank willing to give her a mortgage to pay the taxes.

When the IRS placed a lien on her home she tried to work out a repayment schedule. She negotiated a $108-a-month payment. But it was voided by an IRS supervisor.

Then she negotiated a $200-a-month payment plan, and it too was rejected by an IRS supervisor.

Today, with interest and penalty charges, the bill has grown to $45,000. And the IRS has given Rosann York and Tony 3 months to sell their house before foreclosing. By the time the IRS takes its share, the real estate agent collects a fee, and the capital gains taxes on the home are paid, Rosann and Tony will have nothing left.

Mr. President, I am one who believes that everyone should pay their taxes. But I also believe that by negotiating repayment schedules, Ms. York has demonstrated her willingness to comply fully with the tax laws. I do not think that anyone's interest is served by throwing these two people out of their home and depriving Tony of his barrier-free environment.

Mr. President, the bill I am introducing today on behalf of myself and Senator DIXON does not relieve Rosann York of her obligaton to pay her taxes. It does, however, give her a fair chance to comply by instructing the IRS to accept an agreement under which she will pay $200 per month.

I hope that in the interests of fairness and compassion, the Senate will move rapidly to enact this legislation.

I ask for its referral to the appropriate committee.

ADDITIONAL COSPONSORS

S. 123

At the request of Mr. INOUYE, the names of the Senator from Michigan (Mr. LEVIN), and the Senator from Arkansas (Mr. BUMPERS) were added as consponsors of S. 123, a bill to amend titles XVIII and XIX of the Social Security Act to provide that clinical psychologist services shall be covered under part B of medicare and shall be a required service under medicaid.

S. 400

At the request of Mr. MATHIAS, the name of the Senator from Kansas (Mr. DOLE) was added as a cosponsor of S. 400, a bill to designate the birthday of Martin Luther King, Junior, a legal public holiday.

S. 702

At the request of Mr. DANFORTH, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 702, a bill to correct any misinterpretation in the classification of textile fabrics, articles, and materials, coated, filled, or laminated with rubber or plastics.

S. 722

At the request of Mr. HUDDLESTON, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 722, a bill to amend the Foreign Trade Zones Act to exempt bicycle component parts which are not reexported from the exemption from the customs laws otherwise available to merchandise in foreign trade zones.

S. 1047

At the request of Mr. MELCHER, the name of the Senator from Michigan (Mr. RIEGLE) was added as a consponsor of S. 1047, a bill to direct the President to impose certain limitations on the amount of milk protein products that may be imported into the United States.

S. 1145

At the request of Mr. DENTON, the name of the Senator from Lousisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1145, a bill to recognize the organization known as the Catholic War Veterans of the United States of America, Inc.

S. 1163

At the request of Mr. GLENN, the name of the Senator from New Jersey (Mr. LAUTENBERG) was added as a cosponsor of S. 1163, a bill to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes.

S. 1498

At the request of Mr. SPECTER, the name of the Senator from New Jersey (Mr. BRADLEY) was added as a cospon-

sor of S. 1498, a bill to amend title 23, United States Code, to modify the apportionment formula for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System.

S. 1691

At the request of Mr. ARMSTRONG, the name of the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of S. 1691, a bill to amend the Social Security Act to recognize effective program administration in the financing of State programs of child support enforcement, to improve the ability of States to collect child support for non-AFDC families, and othewise strengthen and improve such programs and for other purposes.

S. 1716

At the request of Mr. GRASSLEY, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 1716, a bill to clarify the personal injury and death provisions of section 844 of title 18, United States Code, relating to arson.

S. 1749

At the request of Mr. THURMOND, the names of the Senator from Virginia (Mr. WARNER), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of S. 1749, a bill to grant the consent of the Congress to the Southeast Interstate Low-Level Radioactive Waste Management Compact.

SENATE JOINT RESOLUTION 112

At the request of Mr. INOUYE, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of Senate Joint Resolution 112, a joint resolution to proclaim the month of March 1984 as National Social Work Month.

SENATE JOINT RESOLUTION 155

At the request of Mr. WILSON, the names of the Senator from South Dakota (Mr. ABDNOR), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of Senate Joint Resolution 155, a joint resolution designating the week beginning November 6, 1983, as "National Disabled Veteran's Week."

SENATE CONCURRENT RESOLUTION 62

At the request of Mr. MATTINGLY, the name of the Senator from Virginia (Mr. WARNER) was added as a cosponsor of Senate Concurrent Resolution 62, a concurrent resolution to direct the Commissioner of Social Security and the Secretary of Health and Human Services to develop a plan outlining the steps which might be taken to correct the social security benefit disparity known as the notch problem.

AMENDMENT NO. 2205

At the request of Mr. HUMPHREY, the names of the Senator from Illinois (Mr. PERCY), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of Amendment No. 2205 proposed to S. 1342, an original bill authorizing appropriations for fiscal years 1984 and 1985 for the Department of State, the U.S. Information Agency, and the Board for International Broadcasting, and for other purposes.

AMENDMENT NO. 2208

At the request of Mr. PERCY, the names of the Senator from Rhode Island (Mr. PELL), and the Senator from New York (Mr. MOYNIHAN) were added as cosponsors of Amendment No. 2208 proposed to S. 1342, an original bill authorizing appropriations for fiscal years 1984 and 1985 for the Department of State, the U.S. Information Agency, and the Board for International Broadcasting, and for other purposes.

AMENDMENTS SUBMITTED

EXPORT-IMPORT BANK ACT AMENDMENTS

GORTON AMENDMENT NO. 2209

Mr. GORTON proposed an amendment to the bill (S. 869) to amend the Export-Import Bank Act of 1945, as follows:

On page 17, immediately after line 16, add the following new section:

COMPETITIVE INSURANCE

SEC. 108. Section 2 of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(d)(1) In carrying out its responsibilities under this Act, the Bank shall work to ensure that United States companies are afforded an equal and nondiscriminatory opportunity to bid for insurance in connection with transactions assisted by the Bank.

"(2) In furtherance of that effort, the Chairman of the Bank shall review Bank policies and programs in regard to this issue, and in coordination with the United States Trade Representative and the appropriate agencies of the Department of State, the Department of the Treasury, and the Department of Commerce, undertake actions designed to promote equal and nondiscriminatory opportunities to bid for insurance in connection with all aspects of international trade activities.

"(3) The Bank shall report to the Committee on Banking, Finance and Urban Affairs of the Senate not later than May 15, 1984, regarding—

"(A) the existing obstacles to equal and non-discriminatory bidding for insurance related to transactions assisted by the Bank;

"(B) the efforts that the Bank has taken in addressing such problems; and

"(C) any recommendations for additional action by the appropriate agencies of the executive branch or the Congress."

HEINZ AMENDMENT NO. 2210

Mr. HEINZ proposed an amendment to the bill S. 869, supra, as follows:

On page 15, strike lines 20 and 21, and insert in lieu thereof the following:

"by the President for such an increase in its authority as he deems appropriate.";

On page 29, line 2 strike "and" and insert in lieu thereof, "or";

On page 15, line 9, strike out "7(b)(2)" and insert in lieu thereof, "7(a)(2)";

On page 19, line 10, strike "adequatehy" and insert in lieu thereof, "adequately".

On page 21, between lines 15 and 16, insert the following new section:

"TECHNICAL AMENDMENTS

"SEC. 111. (a) Section 2(b)(1)(B) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(1)(B)) is amended by striking out "businessmen" and inserting in lieu thereof "business concerns".

"(b) Section 2(b)(4) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(4)) is amended by striking out "he" wherever it appears and inserting in lieu thereof "the Secretary".

"(c) Section 3(e) of the Export-Import Bank Act of 1945 (12 U.S.C. 635a(e)) is amended by inserting after "his", "or her" and by inserting after "he", "or she".

"(d) Section 4 of the Export-Import Bank Act of 1945 (12 U.S.C. 635b) is amended by striking out "he" and inserting in lieu thereof "the President".

"(e) Section 7(b) of the Export-Import Bank Act of 1945 (12 U.S.C. 635e(b)) is amended by striking out "he" wherever it appears and inserting in lieu thereof "the President".

"(f) Section 1912(a)(2) of the Export-Import Bank Act Amendments of 1978 (12 U.S.C. 635a-3(a)(2)) is amended by striking out "he" and inserting in lieu thereof "the Secretary".

"(g) Section 1912(b) of the Export-Import Bank Act Amendments of 1978 (12 U.S.C. 635a-3(b)) is amended by striking out "he" and inserting in lieu thereof "the Secretary".".

DANFORTH AMENDMENT NO. 2211

Mr. DANFORTH (for himself, Mr. CHAFEE, and Mr. DOLE) proposed an amendment, subsequently modified, to the bill S. 869, supra, as follows:

On page 20, on line 7, after "shall" add the following "simultaneously refer the request to the International Trade Commission for a determination, of material injury and shall."

On page 21, line 5, after "and" add the following: ", following an affirmative preliminary determination of material injury by the International Trade Commission by the forty fifth day after referral of the request and subsection (b) of this section." On page 21, line 9, add the following: "By the nineteenth day following the preliminary determination by the International Trade Commission, the Commission shall make a final determination of material injury. If the determination is affirmative, the Commission shall assess a duty on the goods equal to the amount of the subsidy determined by the Secretary under subsection (c)(1) of this section. If the determination, is negative, the Secretary shall direct the Commission to remove the prohibition on the entry of goods or services into the United States.

On page 21, line 2, strike "and" and strike line, 3 and 4.

On page 20, line 25, add the word "and" after the semicolon.

On page 19, line 25, after the word "interested" strike the word "person" and substitute the words "party as, defined in section 771 of the Tariff Act as amended."

On page 20, line 10, delete the word "thirty" and substitute therefor "forty".

KASTEN (AND OTHERS) AMENDMENT NO. 2212

Mr. KASTEN (for himself, Mr. LEVIN and Mr. HEINZ) proposed an amendment, subsequently modified, to the bill, S. 869, supra, as follows:

On page 15, between lines 21 and 22 insert the following:

"(B) If the Bank finds that the amount of direct loan authority or guarantee authority available to it for any fiscal year exceeds the amount which will be necessary to carry out its functions consistent with the availibility of qualified applications and limitations imposed by law during such year, it shall promptly transmit to the Congress a request for legislation to eliminate the amount of such excess direct loan or loan guarantee authority. Upon the expiration of a period of 45 days after the date on which the Bank makes such request, the Bank shall make the amount of such excess authority available for commitment unless the Congress has completed action on legislation eliminating or reducing the excess amount. For the purpose of computing the 45-day period under the preceding sentence, there shall be excluded any days on which either House of Congress is not in session because of an adjournment of more than 3 days."

BOSCHWITZ (AND OTHERS) AMENDMENT NO. 2213

Mr. BOSCHWITZ (for himself, Mr. MATTINGLY, Mr. SASSER, Mr. D'AMATO, Mr. PRESSLER, Mr. GLENN, Mr. HATCH, Mr. GRASSLEY, Mr. TSONGAS, Mr. EAST, Mr. COHEN, Mr. HUDDLESTON, Mr. HELMS, Mr. HEFLIN, Mr. KASTEN, Mr. LUGAR, Mr. DURENBERGER, Mr. RANDOLPH, Mr. PELL, Mr. DECONCINI, Mr. DOMENICI, Mr. TOWER, Mr. PERCY, Mr. HEINZ, Mr. LEVIN, Mr. BUMPERS, Mr. BENTSEN, and Mr. PROXMIRE) proposed an amendment to the bill, S. 869, supra, as follows:

On page 13, between lines 14 and 15, insert the following:

(c) Section 2(b)(1)(B) of such Act is amended by inserting "export trading companies," after "independent export firms," in the third sentence, as amended by subsection (b).

On page 13, line 23, after the period, insert the following: "Not less than three members appointed to the Advisory Committee shall be representative of the small business community.".

On page 15, between lines 7 and 8, insert the following:

(c)(1) Section 3(c) of such Act is amended by adding at the end thereof the following: "Of the five members of the Board appointed by the President, not less than one such member shall be selected from the small business community and shall represent the interests of small business.".

(2) In order to carry out the amendment made by paragraph (1), the first member appointed by the President of the United States to the Board of Directors of the Export-Import Bank of the United States after the date of the enactment of this section shall be selected from among the small business community and shall represent the interests of small business.

On page 19, strike out lines 8 through 11, and insert in lieu thereof the following.

"(iii) The Director appointed to represent the interests of small business under section 3 (c) shall ensure that

On page 19, line 15, strike out the close quotation marks and the final period.

On page 19, between lines 15 and 16, insert the following.

"(iv) To assure that the purposes of subparagraphs (i) and (ii) are carried out, the Bank shall make available, from the aggregate loan, guarantee, and insurance authority available to it, an amount to finance exports by small business concerns (as defined under section 3 of the Small Business Act) which shall be not less than 6 per centum of such authority for fiscal year 1984, 7 per centum of such authority for fiscal year 1985, 8 per centum of such authority for fiscal year 1986, 9 per centum of such authority for fiscal year 1987, and 10 per centum of such authority for fiscal year 1988 and thereafter. The Bank shall utilize the amount set aside pursuant to the preceding sentence to offer financing for small business exports on terms which are fully competitive with regard to interest rates and with regard to the portion of financing which may be provided, quaranteed, or insured. Financing under this subparagraph shall be available without regard to whether financing for the particular transaction was disapproved by any other Federal agency.

"(v) The Bank shall utilize a part of the amount set aside pursuant to subparagraph (iv) to provide lines of credit or guarantees to consortia of small or medium size banks, export trading companies, State export finance agencies, export financing cooperatives, small business investment companies as defined in section 103 of the Small Business Investment Act of 1958, or other financing institutions or entities in order to finance small business exports. Financing under this subparagraph shall be made available only where the consortia or the participating institutions agree to undertake processing, servicing, and credit evaluation functions in connection with such financing. To the maximum extent practicable the Bank shall delegate to the consortia the authority to approve financing under this subparagraph. In the administration of the program under this subparagraph, the Bank shall provide appropriate technical assistance to participating consortia and may require such consortia periodically to furnish information to the Bank regarding the number and amount of loans made and the credit worthiness of the borrowers.

"(vi) In order to assure that the policy stated in subparagraph (1) is carried out, the Bank shall promote small business exports and its small business export financing programs in cooperation with the Secretary of Commerce, the Office of International Trade of the Small Business Administration, and the private sector, particularly small business organizations, State agencies, chambers of commerce, banking organizations, export management companies, export trading companies, and private industry.".

On page 19, lines 18 and 19, strike out "designated to assure that such policy is carried out" and insert in lieu thereof "appointed to represent the interests of small business".

On page 19, between lines 19 and 20, insert the following:

(c) Section 9 of such Act is amended by adding at the end thereof the following:

"(c) The Bank shall include in its annual report to the Congress a report on the allocation of the sums set aside for small business exports pursuant to section 2(b)(1)(E). Such report shall specify the total number and dollar volume of loans made from the sums set aside, the number and dollar volume of loans made through the consortia program under subparagraph (v) of such section, the amount of guarantees and insurance provided for small business exports, the number of recipients of financing from the sums set aside who have not previously participated in the Bank's programs, the number of commitments entered into in amounts less than $500,000, and any recommendations for increasing the participation of banks and othr institutions in the programs authorized under section 2(b)(1)(E). For the purpose of this subsection, the Bank's report shall also be referred to the Committees on Small Business." .

On page 17, line 16, strike out the quotation marks and the period.

On page 17, between lines 16 and 17, insert the following:

"(E) The Bank shall urge the Foreign Credit Insurance Association to provide coverage against 100 per centum of any loss with respect to exports having a value of $100,000 or less.".

HEINZ AMENDMENT NO. 2214

Mr. HEINZ proposed an amendment to the bill, S. 869, supra, as follows:

On page 21, between lines 15 and 16, insert the following new section:

"SPECIAL FACILITIES IN SUPPORT OF UNITED STATES EXPORTS TO BRAZIL AND MEXICO

"SEC. 110. (a) The Export-Import Bank of the United States is authorized to establish facilities not to exceed 18 months duration consisting of guarantees and insurance in support of export transactions to Brazil and Mexico in the aggregate amount of $1.5 billion and $500 million respectively.

"(b) Section 2(b)(3) of the Export-Import Bank Act of 1945 is amended by inserting after "no loan or financial guarantee" in the first sentence "or general guarantee or insurance facility".

"(c) Section 2(b)(3)(A) of the Export-Import Bank Act of 1945 is amended to read as follows:

"(A) in the case of a loan or financial guarantee a brief description of the purposes of the transaction, the identity of the party or parties requesting the loan or financial guarantee, the nature of the goods or services to be exported, and the use for which the goods or services are to be exported, and in the case of a general guarantee or insurance facility, a description of the nature and purpose of the facility, the total amount of guarantees or insurance, the reasons for the facility, and its methods of operation; and".".

ARMSTRONG AMENDMENT NO. 2215

Mr. ARMSTRONG proposed an amendment to the bill, S. 869, supra, as follows:

On page 13, line 9, after the period, insert the following: "For the purpose of the preceding sentence, rates and terms and conditions need not be equivalent to those offered by foreign countries, but should be established so that the effect of such rates, terms, and conditions for all the Bank's programs, including those for small businesses and for medium term financing, will be to

neutralize the effect of such foreign credit on international sales competition.".

PERCY AMENDMENT NO. 2216

Mr. HEINZ (for Mr. PERCY) proposed an amendment to the bill, S. 869, supra, as follows:

At the bottom of page 24, add the following:

(e) Concessional financing or grants offered by the Agency for International Development for the purposes of the mixed financing program established under this section shall be made available in accordance with the provisions of subsections (c), (d), and (e) of section 205 of this Act.

On page 26, line 17, after "Funds." insert the following new sentence:

"The Administrator of the Agency for International Development is authorized to establish a fund, as necessary, for carrying out a mixed credit financing program as described in this section."

On page 27, line 4, by striking out "shall" and inserting in its place "is authorized to."

HEINZ AMENDMENT NO. 2217

Mr. HEINZ proposed an amendment to the bill, S. 869, supra, as follows:

On page 15, strike lines 1 through 3, and on line 4 strike "(3)" and insert in lieu thereof "(2)".

HELMS (AND RANDOLPH) AMENDMENT NO. 2218

Mr. HELMS (for himself and Mr. RANDOLPH) proposed an amendment to the bill S. 869, supra; as follows:

On page 29, after line 4, add the following:

TITLE IV—IMF LENDING POLICY

SEC. 401. The President shall instruct the United States Executive Director of the International Monetary Fund to oppose actively any credit drawings on the Fund or any of its facilities by any country which practices Communist dictatorship.

FOREIGN RELATIONS AUTHORIZATION, 1984

MATHIAS AMENDMENT NO. 2219

Mr. MATHIAS proposed an amendment to the bill (S. 1342) to authorize appropriations for the fiscal years 1984 and 1985 for the Department of State, the U.S. Information Agency, and the Board for International Broadcasting, and for other purposes; as follows:

On page 24, after line 19, insert the following new section:

SEC. 122. Section 5 of the joint resolution entitled "Joint Resolution to authorize participation by the United States in parliamentary conferences of the North Atlantic Treaty Organization," approved July 11, 1956 (22 U.S.C. 1928e), is amended by inserting immediately after the first sentence the following: "In addition to the amounts authorized by section 2, there is authorized to be appropriated $450,000 for fiscal year 1984 to meet the expenses incurred by the United States group in hosting the thirty-first annual meeting of the North Atlantic Assembly."

PELL (AND OTHERS) AMENDMENT NO. 2220

Mr. PELL (for himself, Mr. PERCY, Mr. GLENN, and Mr. CHAFEE) proposed an amendment to the bill S. 1342, supra, as follows:

At the end of the bill add the following new title:

"TITLE VII—INTERNATIONAL ENVIRONMENTAL PROTECTION"

SEC. 701. This title may be cited as the "International Environment Protection Act of 1983".

ENDANGERED SPECIES

SEC. 702. The Foreign Assistance Act of 1961, as amended, is amended further by adding the following new section:

"SEC. 119. ENDANGERED SPECIES.—(a) The Congress finds the survival of many animal and plant species is endangered by overhunting, by the presence of toxic chemicals in water, air, and soil, and by the destruction of habitats. The Congress further finds that the extinction of animal and plant species is an irreparable loss with potentially serious environmental and economic consequences for developing and developed countries alike. Accordingly, the preservation of animal and plant species through the regulation of the hunting and trade in endangered species, through limitations on the pollution of natural ecosystems, and through the protection of wildlife habitats should be an important objective of the United States development assistance.

"(b) In order to preserve biological diversity, the President is authorized to furnish assistance under this part to assist countries in protecting and maintaining wildlife habitats and in developing sound wildlife management and plant conservation programs. Special efforts should be made to establish and maintain wildlife sanctuaries, reserves, and parks; to enact and enforce anti poaching measures; and to identify, study, and catalog animal and plant species, especially in tropical environments.

"(c) The Administrator of the Agency for International Development, in conjunction with the Secretary of State, the Secretary of Interior, the Administrator of the Environmental Protection Agency, the Chairman of the Council on Environmental Quality, and the heads of other appropriate Government agencies, shall develop a United States strategy, including specific policies and programs, to protect and conserve biological diversity in developing countries.

"(d) Each annual report required by section 634(a) of this Act shall include, in a separate volume, a report on the implementation of this subsection. Not later than one year after the date of enactment of this section, the President shall submit a comprehensive report to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate on the United States strategy to protect and conserve biological diversity in developing countries.".

ENVIRONMENTAL EXCHANGES

SEC. 703. Section 102 of the Mutual Educational and Cultural Exchange Act of 1961, as amended, is further amended by striking the final ".", inserting in lieu thereof a ";" and adding the following:

"(11) interchanges and visits between the United States and other countries of scientists, scholars, leaders, and other experts in the fields of environmental science and environmental management.".

SEC. 704. Of the amount by which expenditures for the Fullbright Academic Exchange Programs, for the Humphrey Fellowship Program, and the International Visitor Program for fiscal year 1984 and for fiscal year 1985 exeeds the expenditures for these programs in fiscal year 1982, five per centum shall be used to finance programs carried out pursuant to section 3 of the Act.

PELL AMENDMENTS NOS. 2221 AND 2222

Mr. PELL proposed two amendments to the bill S. 1342, supra, as follows:

AMENDMENT 2221

On page 24, after line 19, insert the following new section:

UNITED STATES CONSULATES

SEC. 122. Section 103 of the Department of State Authorization Act, Fiscal Years 1982 and 1983 (Public Law 97-241) is amended by adding the following language at the end of subsection (b):

", to the extent authorized to do so by each foreign government involved. A report shall be made to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives concerning the extent to which such foreign government authorization has been received, and the progress achieved with respect to the reopening of consulates in those respective countries."

At the appropriate place in the bill, add the following new section:

SEC. . Section 5928 of title 5, United States Code, is amended by adding at the end thereof the following: "The presence of nonessential personnel or dependents shall not preclude payment of an allowance under this section. In each instance where an allowance under this section is initiated or terminated, the Secretary of State shall inform the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate of the action taken and the circumstances justifying it.".

STEVENS AMENDMENT NO. 2223

Mr. STEVENS proposed an amendment to the bill S. 1342, supra, as follows:

On page 25, line 4, strike "$636,000,000 for fiscal year 1984" and insert in lieu thereof "$644,000,000 for fiscal year 1984".

On page 32, line 8, insert:

"SEC. 210. In addition to the amount already authorized for Tsukuba, Japan Exposition 1985, $8,000,000 shall be available for the United States Information Agency for the fiscal year 1984 for use in connection with the Exposition. These funds shall remain available until appropriations are made, and when the funds are appropriated they are authorized to remain available until expended.".

McCLURE AMENDMENT NO. 2224

Mr. McCLURE proposed an amendment to the bill S. 1342, supra, as follows:

At the end of the bill add the following new sections:

1. (a) The Congress finds that since the SALT II Treaty was signed in 1979 the U.S. is deactivating 292 ICBM's, SLBM's and B-52 bombers all of which are counted in the SALT II Date Exchange; the United States

has cancelled deployment of stockpiled Minuteman III MIRV'd ICBM's; the United States has modified B-52 bombers equipped to carry ALCM's with "strakelets", as "observable differences"; and the United States has reduced the potential number of warheads and throw-weight of the MX ICBM.

(b) The Congress finds that the Defense Department guidance issued in March 1980 not to take programmatic actions which would violate the unratified SALT II Treaty is still in effect.

(c) The Congress finds that the Senate Armed Services Committee has determined that the SALT II Treaty is "unequal", unbalanced, destabilizing, and "not in the national security interest of the United States."

(d) The Congress finds that there has been constructive notice of the intention of the United States Government not to ratify the SALT II Treaty by the initiation of Strategic Arms Reduction Talks, and the prolonged inaction on the Treaty by the United States Senate.

2. It is therefore the Sense of the Congress that no national defense program involving the national security of the United States shall be terminated, impeded, delayed, or affected in any way in order to comply with the terms of the SALT II Treaty, unless and unitl the Senate has given its advice and consent for the President to ratify the Treaty under the Treaty-making provision of the Constitution.

BYRD AMENDMENT NO. 2225

Mr. BYRD proposed an amendment to the amendment No. 2224 to the bill S. 1342, supra, as follows:

Strike all after the word "that:" in the first line and insert in lieu thereof the following:

Since the Secretary of the Interior James Watt in his recent remarks characterized the membership of the Commission on Fair Market Value Policy for Federal Coal Leasing in a manner which was insensitive and insulting to all Americans;

Since the Secretary of the Interior James Watt has made public statements which question the patriotism of American citizens with whom the Secretary disagrees;

Since such remarks and statements are totally unbefitting a senior cabinet member of the United States government;

Since these remarks and statements seriously impede his ability to function effectively in his dealings with the United States Congress and the public at large; and

Since Mr. Watt's policies and personal style have promoted a polarization in the Nation which has frustrated the achievement of consensus necessary to execute policies which both preserve our spectacular natural heritage and carefully develop our abundant natural resources.

Now, therefore, it is the sense of the Senate that the President should, without delay, request the resignation of Secretary James Watt.

BYRD AMENDMENT NO. 2226

Mr. BYRD proposed an amendment, subsequently modified, to the bill, S. 869, supra, as follows:

At the end of the bill insert the following:

Since the Secretary of the Interior James Watt in his recent remarks characterized the membership of the Commission on Fair Market Value Policy for Federal Coal Leasing in a manner which was insensitive and insulting to all Americans; Since the Secretary of the Interior James Watt has made public statements which question the patriotism of American citizens with whom the Secretary disagrees;

Since such remarks and statements are totally unbefitting a senior cabinet member of the United States government; Since these remarks and statements seriously impede his ability to function effectively in his dealings with the United States Congress and the public at large; and

Since Mr. Watt's policies and personal style have promoted a polarization in the Nation which has frustrated the achievement of consensus necessary to execute policies which both preserve our spectacular natural heritage and carefully develop our abundant natural resources.

Now, therefore, it is the sense of the Senate that the President should, without delay, request the resignation of Secretary James Watt.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, the Committee on Rules and Administration will hold a hearing on media and the regulation of campaign finance on Thursday, September 29, 1983. The hearing will begin at 9:30 a.m., in room 301 of the Russell Senate Office Building.

Senators and other interested individuals who wish to testify or to submit a statement for the record should contact committee staff at 224-3448.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. HEINZ. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, September 23, until 1 p.m., to consider Senate Joint Resolution 166, relating to the War Powers Act and the situation in Lebanon.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

EL SALVADOR: THE VIEW FROM WASHINGTON

● Mr. BOSCHWITZ. Mr. President, Elliott Abrams, the Assistant Secretary of State for Human Rights, recently appeared at the London School of Economics and delivered a significant speech entitled "El Salvador: The View from Washington."

Mr. Abrams traces the genesis of the Latin American conflict, along with the origins of the groups and individuals who now vie for power in El Salvador, and he explains the basis for our Government's policies toward the region.

Whatever one's view may be concerning those policies, I believe anyone with a keen interest in them will find it worthwhile to read Mr. Abrams' comments. Accordingly, I ask that they be printed in the RECORD.

The speech follows:

EL SALVADOR: THE VIEW FROM WASHINGTON

It is a pleasure and a privilege for me to be here this evening. As a student at the LSE nearly fifteen years ago, I often came here to use the library for research, and all too often sat staring out the window at the beauty of St. James Square. This is a hazard any visiting American must face, and one I fondly recall my failure to overcome.

More recently, in a lecture delivered here at Chatham House last spring, former Secretary of State Henry Kissinger drew attention to what he called an "ironic reversal" in European-American relations. In the past, he pointed out, we Americans have tended to believe that our lack of involvement in European power politics was a mark of superior moral virtue. Protected by two oceans which, in turn, were secured by the Royal Navy, we were in the happy position of being able to denounce our European friends for their preoccupation with power politics, their alleged indifferences to moral norms. But today, Secretary Kissinger continued, it is the United States that often stands accused by some of its European friends of being obsessed with power politics and indifferent to moral norms. This "march by each side toward the philosophical positions vacated by the other," Kissinger concluded, is especially pronounced on issues having anything to do with the so-called Third World.

Although former Secretary Kissinger did not, in his presentation here last year, offer any concrete examples to back up his "ironic reversal" thesis, the current controversy between the Reagan Administration and some of our European friends over American policy in El Salvador illustrates his argument rather nicely. As we see it, our purpose in El Salvador is twofold: to encourage the process of reconciliation through democracy and economic and political reform and to assist the army in fighting the guerrillas. For if one thing is certain in El Salvador, it is this: guerrillas armed and led by communists who are allied with Moscow, Havana, and Managua are not fighting for human rights. They are fighting for power, and we know from the models they seek to emulate that they mean power for themselves, power never to be shared with the people of El Salvador.

A substantial number of our European critics, however, don't see things this way. On the contrary, they accuse the United States of being dangerously "obsessed" by "East-West" issues, of being hopelessly wedded to an archaic and unjust status quo, and of being indifferent—if not actually hostile—to the cause of peace, social justice and reform in El Salvador. Today, I would like to address some of these charges. First, though, I think a general observation about Central America is in order.

James Reston of the New York Times once commented that some Americans seemed willing to do anything for Latin America except read about it and try to understand it. Much the same observation, I'm afraid, might be made of some Europeans. Too often, your image of the region is dominated by stereotypes. There is, for example, the stereotype of a Central America gov-

erned by mustachioed men on horseback who gallop in and out of the presidential palace with comic-opera regularity. Then there is the sterotype of the poor but happy peasant taking a siesta or dancing gaily in the streets. A more recent stereotype is that of a poor but unhappy peasant laying down his hoe and taking up his rifle on behalf of "the revolution." None of these stereotypes, of course, has much to do with reality. Like the rest of Latin America, Central America is characterized by an immense diversity. Perhaps the only generalization which applies to every state in the region is that all are caught up in a process of profound social change, and all are trying to devise institutional mechanisms to cope with that change.

Of all the states in Central America, perhaps El Salvador has been hardest hit by this process of change. Indeed, the people of El Salvador are today engaged in an effort of extraordinary difficulty. They are attempting to complete a thoroughgoing economic reform that has broken the power of the old oligarchy. Simultaneously, they have underway perhaps the most difficult transformation any society faces—the transformation from dictatorship to democracy. And most extraordinary of all, they are trying to do this in the midst of a bloody guerrilla war. To understand the nature of this guerrilla war, and also to understand where things stand today in El Salvador, we must examine where El Salvador has been and where it is going.

El Salvador is Central America's smallest and most densely populated nation. Since its independence in 1821, the country has experienced chronic political instability and repression, widespread poverty, and concentration of wealth and power in the hands of a few families. On January 22, 1932, a peasant uprising led by Augustin Farabundo Marti and his embryonic Communist Party turned into a ghastly massacre. Thousands die in a few days of bloody confrontation in which quarter was neither asked nor given. The savagery of 1932 was interpreted by the ruling groups to mean that only strong governments could maintain order. The president at the time of the uprising, General Maximiliano Hernandez Martinez, remained in power until 1944. The army became El Salvador's strongest institution, and military commanders dominated succeeding governments in concert with the landed wealthy.

During the 1950s and 1960s, political violence in El Salvador was rare. Economic growth averaged more than five percent a year, outstripping population growth, which averaged about 3.5 percent a year. Export-oriented agribusinesses and small manufacturing enterprises boomed. But there were no new lands to be developed, and most of the population lived at subsistence levels.

By the 1970s, El Salvador's situation began to worsen. Rising energy costs and unstable coffee prices exacerbated problems of unemployment and income maldistribution, and sharply reduced economic growth—but not population growth. One result was a mass emigration, in which hundreds of thousands of Salvadorans sought opportunity outside their country. By the early 1970s, a quarter to a half-million Salvadorans had arrived in the United States illegally. The legitimate grievances of the poor and landless, and the growing aspirations of the expanding middle class, met increasingly with repression. Traditional authority structures, already eroded by social changes and development problems, began to disintegrate under pressure from left and right wing terrorism.

It was in this atmosphere of increasing social polarization that a group of young, middle-grade army officers overthrew the government of General Carlos Romero on October 15, 1979 and expelled two-thirds of the officers over the rank of major from the armed forces. The Army's Revolutionary Proclamation denounced abuses of power by government officials, committed the new government to free elections, a democratic political system, fundamental economic and social reforms, peace with Honduras, and the taking of steps to end political killings by the security forces. Underlying the commitment by the new army leadership to this body of reforms was the conviction that the army's dominant role in Salvadoran politics between 1932 and 1979 had been bad for the country, bad for the Army, and bad for most of the officers. The new leadership believed that the alliance between the army and the landed oligarchy should be terminated, and that the army should become professionalized. In January 1980 the Christian Democratic Party, the traditional major left wing opposition party in El Salvador, entered into a tenuous partnership with the army, which had denied Napoleon Duarte his presidential electoral victory in 1972 and sent him into 7 years of exile in Venezuela. Together they formed the Revolutionary Governing Junta. Many believed this marriage would never last. Nevertheless it did and enacted a drastic and wide ranging set of economic and social reforms, including one of the most massive land redistribution programs in the history of Latin America, and led the country to free elections in March of 1982.

At the very moment that these reforms were being enacted, five Salvadoran Marxist-Leninist groups were coming together, with the help of Fidel Castro, to form the Farabundo Marti People's Liberation Front [FMLN], and to establish an international network of political supporters and military suppliers. The FMLN succeeded, somehow, in persuading a handful of prominent Salvadoran democrats, some of whom had been in the first revolutionary government with the army, to join the front, having in mind that their inclusion would promote the image of a responsible and moderate movement. The democrats, who wield no power whatsoever within the insurgency at home, have been dispatched to Latin America, Europe, and the United States to generate international support. The FMLN commands the guerillas, acquires arms, funds and training through its links with Havana, Moscow, Managua and the PLO, and is dedicated to establishing a revolutionary Marxist-Leninist state oriented toward the Soviet bloc. And let there be no illusions here: the FMLN's commanders are indeed Leninists. Shafik Handal is head of the Communist Party of El Salvador, and Cavetano Carpio, founder of the "Revolutionary Army of the Poor," is a former Communist Party chief who left the Party to protest its insufficient commitment to the use of violence.

The founding of the FMLN in May of 1980 can be taken as the start of the current strife in El Salvador. The FMLN, it must be emphasized, launched its war after the Revolutionary Governing Junta came to power, after the land reform began, and after the government committed itself to a democratic political system. And the principal factor behind the insurrection was surely the FMLN's recognition that the reforms being promulgated by the government threatened to make the far left completely irrelevant to the future of El Salvador.

The U.S. Agency for International Development, using United Nations statistics, reports that prior to 1979 the top 10 percent of the Salvadoran population owned about 78 percent of the land, while lowest 10 percent owned only 0.4 percent of the land. It is easy to see how the discontent produced by such a skewed distribution of land would provide the extreme left with popular support and a recruitment base. It is equally easy to see how an effective land reform program would deprive the extreme left of popular support and a recruitment base. Indeed, in societies like El Salvador, where the majority of the population is non-urban, a land-owning peasantry is perhaps the most effective barrier to a Communist takeover. And a land-owner peasantry is precisely what the new government of El Salvador set out to create. In the face of such a threat, is it any wonder that the five communist groups which constitute the FMLN felt compelled to bury their doctrinal differences and unite in order to overthrow the government before its programs were fully implemented?

The FMLN's motives for plunging El Salvador into a bitter war had nothing to do with the legitimate grievances of the Salvadoran people. They had everything to do with the desire of a handful of fanatics on the totalitarian left to gain absolute power, on the model of their backers in Cuba and the Soviet Union, and despite whatever amount of violence or economic damage might result.

The former American Ambassador to El Salvador, Robert White, an outspoken opponent to military aid for El Salvador, has several times described the FMLN guerrillas as Latin American Khmer Rouge. This is a chilling comparison—for surely Ambassador White was mindful when he made it of the twenty percent of the Cambodian population who perished at the hands of the Khmer Rouge. Even the Sandinistas have been heard to remark in private that the leadership of the FMLN is a bit too bloody-minded. But perhaps Ambassador White is overly pessimistic. As numerous students of communism have pointed out, not every communist government features slave labor, engineered famines, forced migrations, forced separation of families, massive executions, torture and all the other horrors which at one time or another have characterized the Soviet Union, Cambodia, Afghanistan and Vietnam. Not all have imprisoned tens of thousands of their own citizens, as did Stalin and Castro. But neither has a single communist regime ever evolved into a democracy; nor produced personal liberty or economic development; nor permitted a free press, free elections, free speech, or free trade unions. Not one.

Thus the US Government by 1981 was faced with a major policy decision: Should we or should we not provide military assistance to the Salvadoran government. Some of our friends in the Socialist International urged us not to "intervene" in Salvadoran politics. Let the Salvadoran people decide their future by themselves, we were told. Now, over a century ago John Stuart Mill pointed out that, "the doctrine of non-intervention, to be a legitimate principle of morality, must be accepted by all governments. The despots must consent to be governed by it as well as the free states. Unless they do, the profession of it by free countries comes but to this miserable issue, that the wrong side may help the wrong, but the right side

must not help the right." Because the Salvadoran people were not being allowed to decide their future by themselves; because Cuba, Nicaragua, the PLO, Ethiopia, North Korea, Libya, Vietnam, and the Soviet Union were all supporting the FMLN; and because the wrong side in the Salvadoran conflict was receiving massive amounts of military assistance, training, and logistical support, the United States recognized a moral obligation to help the right side—the new Salvadoran government. Nothing that has occurred since 1981 makes that moral obligation any less compelling. Indeed, the results of last year's election make it more compelling.

On March 28, 1982 the Salvadoran people went to the polls and experienced a historical event unique in their troubled and violent history. They participated in a free and honest election that brought them the government they collectively desired. Almost 1.5 million people voted, probably more than 80 percent of the eligible electorate.

The people frequently voted their tremendously difficult conditions. The Marxist leadership decided to conduct a concerted and bloody campaign to prevent the exercise of the popular will. Guerrillas blew up scores of buses during the two weeks before the election, sought to prevent distribution of gasoline to the eastern part of the country, and threatened to kill any bus or truck drivers who were so bold as to carry voters to the polls. The guerrillas attacked polling places and the Electoral Commission's headquarters and increased bombings of electrical power installations. Guerrilla radio stations ordered voters to stay home and threatened—through letters, printed propaganda, and wall slogans—to kill or mutilate any voter who exercised his rights on election day. Guerrillas controlled the streets of the departmental capital of Usulutan and prevented voting in that city. Still, despite all obstacles, the Salvadoran people went to the polls in numbers that surprised the experts. Because of guerrilla violence, voters often walked miles to safer polling places or waited in line under fire for the chance to make their choice for El Salvador's future.

This popular reaction constituted a rejection of the guerrilla attempt to prevent the election. Of the 1.5 million Salvadorans who voted, more than 88 percent cast their ballots for one of the six participating parties. Everyone now knows that the Christian Democratic Party received the largest single percentage—40 percent—of the vote, with the five parties to its right receiving the collective majority. As a result of agreement between El Salvador's political parties, a Government of National Unity was formed, and the Constituent Assembly chose as provisional president the independent and highly respected banking expert, Alvaro Magano. Three provisional vice presidents, representing the three largest parties, were also chosen. It is President Magano's freely elected government that must now face the threat of violent overthrow by well-armed, externally supported, Marxist-Lennist guerrillas.

The election has been attacked. Given the highly charged political atmosphere in El Salvador and persistent misperceptions about events in that country, criticism was to be expected. Such criticism as has arisen, however, including charges of massive fraud and inflated voting, has been entirely refuted by serious observers of the situation in El Salvador. Jose Napoleon Duarte, who lost his office as a result of the vote, has stated that these allegations are part of a campaign to denigrate the elections. International observers were invited to monitor the campaign and election. More than 200 observers from more than 40 countries were present and more than 700 journalists served as de facto observers as well. These observers found that the electoral process was orderly, fair, and, except for the guerrilla attacks, peaceful. While charges of government pressure have been made, Archbishop Rivera y Damas remarked of the voting that, "If there was any pressure, it was not from the government but from those who did not want the elections."

The elections have been further disparaged on the grounds that parties representing the FMLN were not on the ballot. In fact, both President Duarte and the head of the independent Central Elections Committee, Dr. Jorge Bustamante, repeatedly invited the communist-front Democratic National Union [UDN], and the Socialist International affiliate, the National Revolutionary Movement [MNR], and the guerrillas' political front, the FDR, to participate in the elections. Arguing, however, that conditions were not "appropriate" for the holding of elections, and expressing doubts about their personal security should they take part in the elections, even in the face of a government offer to negotiate adequate security guarantees, these groups refused the government's offer. It is clear, then, that what they most feared—and the election results dramatically justified their fears—was a public affirmation of the FMLN's unpopularity in El Salvador.

By refusing to heed the FMLN's warnings to stay away from the polls, by risking their lives, in fact, to vote in the March 28 elections, the Salvadoran people, in their vast majority, clearly demonstrated that they reject the violent alternatives offered by the Marxist-Leninist insurgents, and that they believe an elected government, and not a dictatorship run by a Communist elite, offers the best possible hope for the protection of their basic human rights.

And progress in human rights, though slow in coming, has been registered.

Cilvilian deaths attributable to political violence from all sides have fallen from roughly 800 a month in late 1980 to 200 a month in the last six months of 1982. Shortcomings in internal military discipline are slowly being countered by human rights training, improved communication, and command directives that emphasize respect for noncombatants. Representative institutions, created through universal adult suffrage, are guiding the drafting of a modern constitution and preparations for presidential elections later this year.

In fact, after a brief visit to that country last summer, I came home surprised, not that progress has been so slow, but that the Salvadorans have been able to make any progress at all.

El Salvador has always been desperately poor, and in the course of the two-year-old insurgency the gross national product has declined by a further 25 percent. Population growth is 3.5 percent per year in an already overpopulated land. Reform is frequently resisted in landowners, in part because they have received no compensation for their losses. Road travel is extremely hazardous. The judicial system, never strong, has broken down. Judges and legal officials are regularly suborned or intimidated. Very few of us would have the courage to stand up to the threats that criminals have made against the safety of judicial officials and their families.

Communications within the country are rudimentary. A typical National Guard post, for example, consists of 10–15 men, under the command of a poorly educated corporal or subsergeant, stationed in a small town. There is no telephone communication with national headquarters, sometimes even no radio contact with the commander of the department in which the men are stationed. If their sergeant is conscientious, he will have them patrol on foot, with no support from any other unit, and beyond any kind of control or regulation except that of their unit leader. If the sergeant is a decent man, perhaps his men will enjoy good relations with the people of the area they patrol. But in an atmosphere of guerrilla threats and violence, abuses occur. Adequate means of redress for the victims are virtually nonexistent, since the unit is effectively a power unto itself. This is the kind of situation that government and its Christian Democratic predecessor have been trying to change.

Yet it should be obvious that as long as the insurgency continues, progress will continue to be measured in inches rather than miles. The civil strife begun by the FMLN in May of 1980 has set off a chain reaction of violence and counterviolence which has engulfed the whole of Salvadoran society and has vastly increased the magnitude of human rights violations in El Salvador. If this chain reaction is to be brought under control, then the fighting must be brought under control.

Some of the Reagan Administration's critics have demanded that we force the government of El Salvador to enter into immediate negotiations with the FMLN to end the war. Never mind, they say, that the guerrillas started the killing. Never mind, they say, that the guerrillas tried to sabotage the elections. Never mind, they say, that the guerrillas do not command a substantial following in El Salvador. They have offered to negotiate, and if the Salvadoran government will only agree, the killing will stop.

But the recent history of Southeast Asia alone has taught us a bitter lesson about negotiations with Communists. If we were to force the Government of El Salvador to negotiate with the guerrillas as equals we would risk its collapse. And if the resulting anarchy were to culminate in a guerrilla victory, we know for a certainty that the fate of the Salvadoran people would be a life devoid of liberty, without the promise of a true respect for their human rights.

The guerillas are counting on the likelihood that the United States, under mounting pressure from our Western European friends, will eventually force the Government of El Salvador into negotiations. This is what the FMLN's strategy of guerra prolongada is all about. First, alarmed by the determination of the Government of El Salvador to launch a program of major reforms, they began a guerrilla war. Then, recognizing that the army of El Salvador had not yet become a fully professionalized military force, they tried, often successfully, to provoke the undisciplined security forces into grave military errors and continuing human rights violations. Then, as Western indignation over these human rights abuses mounted, the communists offered to negotiate. They are now persuaded that if only they keep up the military pressure "enlightened" Western public opinion—the deus ex machina of the extreme left—will eventually hand them the victory they could never dream of getting at the polls. And the guerrillas have encouraging models to follow: once victory is theirs, they know, the pas-

sionate Western interest in the human rights situation in El Salvador will flicker out. How interested, after all, is "enlightened" Western public opinion these days in the human rights situation in Cuba? In Vietnam? In Cambodia? Surely no thoughtful person could argue that guerrilla victories in these countries marked an end to slaughter.

But there is a way to end the killing in El Salvador. The directorate of the FMLN, which began the war in 1980, could end it just as easily in 1983. It could declare a ceasefire. It could agree to participate in the forthcoming elections. It could send its forces back to their bases and training camps in Nicaragua. It could accept the amnesty proposals which the recently appointed Salvadoran Peace Commission is preparing. It could give the government of El Salvador the chance to complete the reforms it has begun.

Do I think it likely that the FMLN will make such decisions? As long as "enlightened" Western public opinion continues to press the Reagan Administration to force the Government of El Salvador into negotiations, I do not. Under these circumstances, the FMLN has no incentive to end the guerra prolongada.

Which brings me back to the point with which I began my remarks, the "ironic reversal" of which Henry Kissinger spoke so astutely here last year. I am very much afraid that in judging current United States policy in El Salvador, many of our critics, even our friendly critics, have adopted a kind of selective morality. The United States and the Government of El Salvador are held to the most exacting set of human rights standards while the FMLN and its allies are excused from meeting any standards at all. The fact is that we in the United States actually believe that it is our duty to try to live up to such ideals—but we also think that standards must be applied indiscriminately. Indeed, as long as they are not, they remain arbitrary political choices dressed up in the guise of human rights.

A generation ago Stephen Spender came to the same realization while the tragic civil war raged in Spain. At first his sympathies lay entirely with the Republican side. Yet in the course of several trips to that country he recognized that atrocities were not a monopoly of one side only; they were all too common on both sides. And to his everlasting honor, he wrote: "It came to me that unless I cared about every murdered child indiscriminately, I didn't really care about children being murdered at all."

We do care about all the children. And we are trying to help build a democratic system in El Salvador in which they can live their lives in peace. There are all too many people with guns in El Salvador, but the guns of one side protect voting booths while the guns of the other side shoot at them. Can we really hesitate about which side we must be on?●

WE NEED SECRETARY WATT

● Mr. HATCH. Mr. President, I do not excuse and I do not condone the words so imprudently spoken by Secretary Watt. I know they were wrong. You know they were wrong and, more importantly, Secretary Watt knows they were wrong. Secretary Watt made a serious mistake.

In each of our lives there are things we have done and words we have spoken which we profoundly regret and wish with all our heart that we could erase from our lives and, more importantly, erase from the lives of those we may have hurt by our imprudent acts.

I am certain Secretary Watt profoundly and from the bottom of his heart wishes he could erase these words he spoke so imprudently. Not just for himself, but for the benefit of all who were hurt and offended by them.

But, Mr. President, we live in a world of imperfect men and we cannot let this mistake of the Secretary overshadow all the good done by Secretary Watt. The people of the State of Utah and this Nation are better off and will continue to be better off because Jim Watt is the Secretary of Interior.

I, and all the people of Utah I represent, urge that careful consideration be given to all the positive good things he has done for the people of this Nation before harsh judgment is passed.

I know Jim Watt. I know his poor choice of words do not reflect the true measure of the man. I urge that he be supported in the many, many contributions he has made and can make to this country.

I want to point out that before Secretary Watt became Secretary of the Interior, the people in the State of Utah practically were an armed camp in their disputes with the Department of the Interior. They were fighting the Bureau of Land Management. They were fighting the Park Service. They were fighting all the agencies. They were so distressed and angry that the sagebrush rebellion was born. Today I get letters like the one I received today directed to the BLM expressing appreciation from the commissioners of San Juan County for the cooperation and assistance they have received. Talk about the sagebrush rebellion has been silenced by the work and policies of James Watt as Secretary of the Interior.

Our parks are better managed. We have energy resources from our public lands. We are all much better off because of Secretary Watt.

I hear the hue and cry for his resignation or that he be fired. I will be deeply distressed and the citizens of this Nation will suffer and be distressed if we lose the services of this man who is so making such a great contribution to our country. The loss of the contribution of this great man is too high a price to pay for an imprudent remark.

I hope the President will continue to support Secretary Watt. We, in the public domain States need him. I believe the country needs him.

He is a moral, upright, and decent man. I hope we can forgive his mistakes and look to the good he has done.●

THIRTIETH ANNIVERSARY OF THE INTERCOLLEGIATE STUDIES INSTITUTE.

● Mr. JEPSEN. The Intercollegiate Studies Institute is celebrating its 30th anniversary this year. Founded in 1953 to spark thought in individuals and encourage intellectual exchange, the institute has been addressing scholarly issues of the conservative intellectual movement in the academic community, thus keeping scholarly debate interesting and varied.

I.S.I.'s activities include scholarships, summer schools, speaking tours, and such publications as the Political Science Reviewer, the Intercollegiate Review, and Modern Age.

As in most States, I.S.I. has had an impact in Iowa when officers of I.S.I. have visited many Iowa colleges and universities.

During the 1982–83 school year, these include Grandview College and Drake University in Des Moines; University of Dubuque, Loras College, and Clarke College in Dubuque; and Indian Hills Community College in Ottumwa. Also, in 1982–83, I.S.I. provided speakers at Dordt College in Sioux Center.

I.S.I. has faculty associates at the University of Northern Iowa in Cedar Falls and the University of Iowa in Iowa City and has lectures scheduled this year at Dordt College and the University of Iowa.

Congratulations, I.S.I. founders and members, on 30 years of outstanding service to the academic community and the conservative movement. Please continue your quality work at furthering the intellectual pursuits on our Nation's campuses.●

ORDER OF PROCEDURE

Mr. BAKER. I am told now that the distinguished Senator from Illinois (Mr. DIXON) wishes to speak on a special order which he had planned to do this morning and, pursuant to our request, postponed it until this afternoon.

Therefore, I make the following unanimous-consent request.

I ask unanimous consent that the Senator from Illinois be recognized on a special order of not to exceed 15 minutes. I further ask unanimous consent that, at the end of that speech, without any further business being transacted, the Chair then place the Senate in adjournment until the hour of 12 noon on Monday next.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RECOGNITION OF SENATOR DIXON

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DIXON. Mr. President, I thank the majority leader.

WAR POWERS ACT

Mr. DIXON. Mr. President, when I asked earlier today for a special order to make these remarks, I did not know that my warm friend and colleague, the distinguished senior Senator from Hawaii, would be speaking today on the same subject. But I am sure that many Members heard the excellent remarks by Senator Inouye concerning the question of the War Powers Act.

I rise again, Mr. President, to address that critical issue that has been before us for some weeks and on which, it appears, we may finally be asked to cast a vote in the near future.

Since August 29—nearly 4 weeks ago—U.S. military personnel have been involved in a state of hostility in Lebanon. There can be absolutely no doubt of that fact.

It follows, then, that there can be no doubt of the fact that the law passed by the Congress in 1973, known as the War Powers Act, has been in effect since that day when U.S. marines were killed.

As I have said before on this floor, it troubles me immensely that the President of the United States has thus far refused to acknowledge the validity of that law, and to send to the Congress the written report required by that law. Specifically, he has failed to tell us the circumstances which made it necessary to introduce the marines into Lebanon, the constitutional and legislative authority under which that introduction took place, and the estimated scope and duration of the hostilities or involvement.

Now, Mr. President, the Congress seems to be moving rather quickly in the direction of passing a resolution, Senate Joint Resolution 166, which legitimizes the President's refusal to honor the law of the land—the War Powers Act.

Senate Joint Resolution 166 is the product of negotiation and compromise between the White House and some leaders of Congress of both parties. Negotiation and compromise usually represent a reasonable approach to legislative questions.

In this case, however, the end product—Senate Joint Resolution 166—is a wholly inadequate and even dangerous piece of legislation. It is one which circumvents, rather than honors, the spirit and letter of the War Powers Act, and it is one about which I hold the gravest reservations.

The resolution gives the President congressional approval to keep our troops in Lebanon for 18 months. That is a long, long time.

It lets him do that without ever having complied with the requirements of the War Powers Act.

But, incredibly enough, the President, is not even being a very gracious recipient of this congressional generosity. He says he will sign Senate Joint Resolution 166 "reluctantly," as if he is doing us and the country a favor.

There are no favors being done here—only disservice.

I fear we have forgotten the extraordinary emotional experience of the Vietnam war that brought about the War Powers Act. Never have Americans and their Government undergone such a wrenching, introspective evaluation of their country's role in the world, as the one that produced the War Powers Act.

Have we learned nothing from that experience?

It is significant that on November 7, 1973, the House of Representatives overrode President Nixon's veto of the act by a vote of 284 to 135? Or that on that same day, the Senate overrode the veto by 75 to 18?

Those overrides were not entered into lightly. They put on the books a law designed to prevent any President from getting us into a war we did not think necessary.

It is almost, as Garry Wills wrote yesterday in the Chicago Sun Times, a redundant law. "It restates," Will writes, "as mere statute, what is clearly in the Constitution already,"—that Congress has the warmaking powers in this Nation.

Senate Joint Resolution 166 skirts this issue in the name of compromise. Well, I say today, as I said earlier this week—if every Chief Executive—Republican or Democrat—claims he is free to act without reference to the War Powers Act, then a very serious situation exists, indeed.

We are not talking only about the Middle East. We are taking about every world trouble spot, now and forever—Central America, Chad, you name it.

We must follow a careful, thoughtful course. Not a precipitous one. No matter how much time may have been spent working out the deal that produced Senate Joint Resolution 166, it is a piece of legislation that places us in far greater danger of a precipitous conflict than honoring the War Powers Act does.

I am certain that the Congress supports a U.S. presence in Lebanon. To this point, I would agree that the presence of the peacekeeping force has helped to limit the expansion of hostilities in this troubled area.

But, again, I say, Senate Joint Resolution 166 represents a grave and dangerous step for the conduct of future American foreign policy. It laughs at the law and it laughs at the Constitution.

Next week, Mr. President, when we debate this resolution on the floor, I intend to offer amendments to improve it, and to move us onto the course intended by law.

I hope my colleagues will give some thought to the concerns I have voiced. I want to share the concerns voiced by my friend and distinguished colleague, the Senator from Hawaii, Senator Inouye.

For their further consideration, I ask unanimous consent that the complete text of the Garry Wills article to which I referred be reprinted in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Sun-Times, Sept. 22, 1983]

REAGAN'S NOT OUR COMMANDER IN CHIEF

(By Garry Wills)

Conservative Americans like William Buckley refer to the president as their commander in chief. It is a grand-sounding title, one that General Haig used on William Ruckelshaus during the "Saturday Night Massacre."

But the president is not Ruckelshaus' commander in chief, nor is he Buckley's. He is not my commander in chief and he is not yours—unless you are in the armed services. Embracing that title reduces the citizen to the soldier, and makes obedience the highest republican virtue.

The title that sounds so grand now is actually quite humble in origin. It was given to one officer going into a theater where there might be a jumble of ranks, regular and militia, or where men of equal rank might have to join forces. The title gave field authority to one man, even if his rank was not higher than that of others on the scene, or who may not have been in a normal chain of command with auxiliary forces.

So, in 1775, the Continental Congress made General Washington commander in chief of the motley revolutionary armies. This gave him no political power at all, and less military power than many theater commanders would have in modern times.

When the Constitution made the president commander in chief of the armed forces, this military title had nothing to do with the political power to declare war—a right reserved to Congress. It was not, at the outset, thought that a large standing army would exist on a permanent basis. Only when Congress had declared war would the commander in chief's power come into play.

The early constitutional history is clear. Even to repulse pirate raids, Thomas Jefferson asked for congressional authorization. Andrew Jackson would not respond to Spanish provocations until he asked permission from Congress, since—as he put it—"Congress alone is constitutionally invested with the power of changing our condition from peace to war."

So those who talk about Congress encroaching on the president's constitutional power as commander in chief, in the Lebanon situation, are talking nonsense. The president is in charge of military conduct; but he has no right to commit our troops in the first place. The Constitution was designed specifically to prevent that, according to one of its principal designers, James Wilson: "This system will not hurry us into war; it is calculated to guard against it. It will not be in the power of a single man, or a single body of men, to involve us in such dis-

tress; for the important power of declaring war is vested in the legislature at large."

The real problem with the War Powers Act is not the one now being discussed, the idea of a "congressional veto" that may or may not be involved in a recall of troops. The real problem with that act is its redundancy. It restates, as mere statute, what is clearly in the Constitution already.

The act was passed in response to modern presidents' quibbles on the meaining of the word "war," beginning with Truman's etymological dance around the Korean "police action." But the proper response should have been a reassertion of the Constitution, not a mere statute.

If the president has power to put troops in a dangerous situation—exactly parallel to Jefferson's treatment of pirates, or Jackson's treatment of Spanish marauders—he has power to involve us in wars without ever declaring war, an unconstitutional procedure. Congress should cut off all funds to the Marines in Lebanon until the president begins to obey the document he swore to uphold. The military commander in chief is subordinate to the civil law of the land.

Mr. DIXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have discussed this with the minority leader. I inadvertently omitted the provision for one more piece of business to be dealt with by the two Senators from Rhode Island. I ask unanimous consent that they may now proceed for 2 minutes for the purpose of introducing a resolution and ask for its immediate consideration, notwithstanding the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I thank the majority leader. It is my fault for presenting it so late in the day, not his fault for omitting it.

WISHING GOOD LUCK TO THE "LIBERTY"

Mr. PELL. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A Senate Resolution (S. Res. 228) Wishing Good Luck To The Liberty.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. PELL. Mr. President, tomorrow is a very historic occasion to Rhode Island because the seventh race in America's Cup series is being sailed there. To the best of my knowledge, it has been many, many years, I believe in this century, since there was such a long series of races and the result was undecided. What this resolution does is say that it is the sense of the Senate that the Senate wishes the best of luck to the *Liberty*, its skipper and crew, in tomorrow's America's Cup Race.

On behalf of Senator CHAFEE and myself, I hope very much that my colleagues will approve this resolution.

Mr. CHAFEE. Mr. President, I just want to say I heartily join in this resolution. As the distinguished senior Senator from Rhode Island has said, never has this series gone this long. Each of the vessels—well-skippered, well-crewed, good boats, both of them—has won three races. Now comes the raceoff in Block Island Sound, R.I. The fleet out there watching this will be the largest fleet ever assembled since the invasion of Normandy in 1944. It will not have the firepower, but it will have plenty of fire water aboard all vessels, I am sure.

Mr. President, this is a crucial event. The Australians have conducted themselves in admirable fashion. We wish them good health, we wish them happiness with their families, but we do wish the *Liberty* wins this race tomorrow. Mr. President, I urge the passage of the resolution.

The PRESIDING OFFICER. Is there any further discussion? The Chair hears none.

The question is on agreeing to the resolution.

The resolution was agreed to, as follows:

S. RES. 228

Resolved, That it is the sense of the Senate that the Senate wishes the best of luck to the *Liberty*, its skipper and crew, in tomorrow's America's Cup Race.

Mr. BAKER. Mr. President, I commend the Senators from Rhode Island. I commend and wish our team well and good luck and our congratulations to the Australian team.

ADJOURNMENT UNTIL MONDAY, SEPTEMBER 26, 1983

Mr. BAKER. Mr. President, that completes the business of the Senate for today. I have already announced that there will be no further business transacted today. Therefore, I move, in accordance with the order previously entered, that the Senate stand in adjournment until 12 noon on Monday.

The motion was agreed to and, at 3:42 p.m., the Senate adjourned until Monday, September 26, 1983, at 12 noon.

EXTENSIONS OF REMARKS

H.R. 3231—WEST-WEST TRADE

HON. ED ZSCHAU

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. ZSCHAU. Mr. Speaker, one of the most important sections of the Export Administration Act reauthorization is the one that streamlines and focuses the control procedures for trade with our NATO allies and Japan. Although referred to as "West-West trade," it is restricted to our most trusted allies.

Section 106(b) of H.R. 3231 provides for the shipment of goods and technology to our NATO allies plus Japan without license except in those cases of shipments to end users who represent a risk of diversion. It does not permit any of the allies to reexport sensitive goods or technology without prior U.S. approval. And it specifically permits our Government to require exporters to give full and complete notice of all such shipments so that our Government will know where within NATO sensitive goods and technology are being shipped. This "paper trail" will allow U.S. law enforcement authorities to prosecute anyone who violates U.S. laws concerning such shipments.

Following is a series of the most commonly asked questions about decontrolling West-West trade and their answers:

Q. With all the talk I've heard about technology transfer and the loss of sensitive technology to the U.S.S.R. why should we remove any export licensing requirements?

A. That's a good question. To begin with, this section of the bill only reduces licensing requirements for export to countries that cooperatively maintain controls over the same goods and technologies that we do. These are the NATO countries (except Iceland) in COCOM plus Japan. Since we've all agreed to control export of the same goods to the same countries, we must ask why we should control the shipment of those same goods to each other. It makes no sense.

In fiscal year 1982, the Commerce Department reviewed 21,154 export licenses for shipments to our COCOM partners. Of this number, only 23 license applications were denied. That's less than one tenth of one percent! Clearly such controls of shipments to our allies are not justified.

Q. If this section becomes law, we would be the only Cocom member that did not require an export license for shipments to other Cocom countries. Wouldn't this cause serious problems within Cocom and hurt our efforts to harmonize licensing and enforcement procedures?

A. I do not see how placing additional trust in our allies can be considered harmful by them. There is no reason that elimination of intra-Cocom licenses could not be part of our harmonization efforts. They are probably as willing as we are to reduce the paperwork burden placed on government and industry. The section of the bill that reduces controls on West-West trade permits a system of notification to be worked out that would allow tracking of shipments for intelligence purposes.

Q. Doesn't the elimination of export licenses for these shipments destroy the "paper trail" necessary for effective enforcement and tracking down those who might try to divert technology to communist countries?

A. No it doesn't. A clear paper trail will still be available for exports to countries maintaining cooperative export controls with the U.S. Section 106(b) of H.R. 3231 says that the Secretary (of Commerce) may require by regulation a notification by the exporter of any exports made under the new procedures. The form and detail required in this notification will be left up to the Secretary to determine by regulation.

I've met with Justice and Commerce Department lawyers to discuss their needs to establish adequate paper trail and am convinced that the notification of shipment that the Secretary may require will satisfy their needs.

Q. I've heard that if this section becomes law, we will lose our right to control the reexport of sensitive goods and technology and will have to depend upon our Cocom partners to enforce re-export controls, some of whom are not as diligent in their enforcement and licensing efforts as we are. Is this true?

A. First, we currently do not control re-exports. Our Cocom partners do. Second, any re-exports of the most sensitive goods from our Cocom partners to a Communist bloc country must come before Cocom for evaluation and approval. Using this procedure, the United States would have the opportunity to block any sale of which we did not approve.

If the goods are not sensitive, yet are still controlled by Cocom and eligible to be exported at the individual members' discretion, the United States would know of any shipment since that country is required to report such shipments. Since we have agreed with our Cocom partners that such items pose so little threat to our national security that they can be exported without general Cocom approval, it really doesn't matter who issues the final export license—the United States or one of our allies.●

PUBLIC FORUM ON INF

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. MARKEY. Mr. Speaker, last week we held an important public forum on INF and the upcoming deployment of Pershing II and ground-launched cruise missiles in Europe. During this forum a distinguished group of European parliamentarians presented their views on the Euromissle question. These are Europeans who are deeply concerned about the planned U.S. deployment in Europe.

I commend to my colleagues the testimony of one of the European leaders who attended the forum, Mr. Egon Bahr, who is chairman of the Arms Control and Disarmament Parliamentary group of the Social Democratic Party of West Germany. Mr. Bahr has held a number of government positions including Minister of Economic Cooperation under Chancellor Helmut Schmidt.

STATEMENT OF EGON BAHR ON THE INF PUBLIC FORUM IN THE U.S. CONGRESS, September 15, 1983

The West German Social Democratic Party (SPD) decided to support NATO's dual-track decision at a Party Conference in Berlin, in December 1979. The heart of the dual-track decision is to reduce Soviet SS-20's and avoid the start of a new arms race which threatens the security of Central Europe. This was a few days before NATO officially adopted the decision at its meeting in Brussels. It re-affirmed this course of policy and its expectations about negotiations at the 1982 Party Conference in Munich and the 1983 Conference in Dortmund. This policy remains valid today.

A large majority of the SPD shared Helmut Schmidt's view that the SALT process, which limits intercontinental armaments must be supplemented by agreements which keep eurostrategic weapons under control. This operating principle also still prevails today.

We accepted the dual track decision of 1979 as an instrument to carry out this requisite extension of arms limitation and arms control.

Like Helmut Schmidt, I was in favour of the dual-track decision from the beginning because it provided an opportunity to bolster the acceptance of the SALT II Treaty; preventing an evasion of the provisions of the Treaty by shifting the atomic arms race to nuclear medium-range weapons; and inducing the U.S. to sit down at the negotiating table.

For me, the aim of the negotiations as formulated in the Brussels communiqué was acceptable. The objective consisted in ensuring that the Soviet Union would dismantle the additional eurostrategic nuclear weapons which had been targeted on Western Europe following the introduction of the SS-20's. There was no mention in the dual-track decision that a successful outcome of the negotiations involved the elimination of the entire medium-range Soviet armament built up since the Sixties. On the contrary, the Alliance's concern appropriately related to the build-up of these arms which had become apparent since 1977.

The SPD has voiced the demand since 1979—and still does today—that there must

be a radical reduction in the number of Soviet SS-20's with the goal of rendering the deployment of American missiles superfluous. That was our zero option. It did not call for any zero on the part of the Soviets; but it did insist upon a removal of the additional Soviet intermediate forces. The German Federal Government under Helmut Schmidt also interpreted the dual-track decision in this way and quite rightly designated the American formulation of the zero option (based on a zero-zero solution for both sides) as an extreme starting position. Clearly, agreement could only emerge in Geneva if the Soviet and American sides abandoned their initial stances and moved towards a compromise.

With a view to enhancing both sides' willingness to compromise, and as part of the dual-track decision, the SPD opposed from the very beginning automatic deployment. Helmut Schmidt as Chancellor also supported this position. We are keeping our decision open until the end of the negotiations in order to maintain pressure on both sides. In the meantime, the two sides have shown some movement and they have modified their position. The Soviet Union has offered to reduce its number of medium-range missiles to 162 if NATO, in turn, renounces the deployment of missiles. The USA has declared its willingness to deploy only as many missiles as the Soviet Union intends to maintain.

The central issue in Geneva lies in the existence of French and British nuclear weapons which can reach the Soviet Union and, indeed, which are targeted on that country. The SPD acknowledges that the United States cannot negotiate with the Soviet Union about French and British weapon systems. By the same token, it realizes the importance of these weapons for the balance between East and West.

For this reason, the SPD has advocated that ways should be found in the Geneva negotiations of ensuring that the existence of British and French nuclear weapons do not become an obstacle to a Soviet and American agreement.

We believe that a solution of this set of problems would prove easier if the INF negotiations were connected with the START negotiations on this point. This also accords with the dual-track decision which at that time stated that the limitation of American and Soviet LRTNF's should be bilaterally negotiated, step by step, within the framework of SALT III.

The final round of the Geneva negotiations for the current year has been in progress since September 6. The SPD supports the argument that the U.S. missiles should not be automatically deployed at the end of this round of negotiations if no agreement is reached. Certainly the linking of INF with START will require additional time. A rigid adherence to the time-schedule decided four years ago would not be justifiable since all the available opportunities have not been exhausted. They have not been exhausted because no sustained effort has been made to combine START and INF negotiations. Now is the time to make a full-scale effort. It would be imprudent to jeopardize a possible successful outcome by adopting an excessively formal and rigid time approach. Two years have already been lost for the negotiations. Therefore, it would be prudent to extend the period of negotiations to explore further opportunities for compromise.

When NATO took its decision in December 1979, it could assume that the problems of strategic arms would have meanwhile been resolved and that the problems of eurostrategic armaments only represented residual problems capable of resolution within a relatively short period of time. Today, the situation requires a successful negotiation of the Euro-missile issue. The increased relevance of this requires ample time for negotiation, particularly in the absence of a START agreement.

The revision of a position held for four years must not constitute a question of prestige: it must be a question of a rational security policy. The SPD has welcomed President Reagan's decision to revise the American negotiating positions in the START negotiations. What applies for START cannot, in principle, be ruled out for INF.

On the basis of the above, the SPD will advocate the following standpoints:

(a) At our special party conference in November, we shall decide about our attitude in the Geneva negotiations, i.e. a "yes" or a "no" to the deployment of missiles.

(b) We are convinced that it is technically possible to conclude an agreement by then if both sides show sufficient flexibility.

(c) We have no doubt at all that the Soviet Union would station new missiles with a shorter range (SS-22's) in the GDR (East Germany) and Czechoslovakia if the United States were to begin deploying their missiles. The SS-22's flying time of two-and-a-half minutes raises the question as to their first use, and sharpens the threat to Central Europe even more. Hence this would bring less security instead of more!

(d) It would be illusory to believe that the INF negotiations would become easier after the deployment of U.S. missiles had commenced. On the contray, they would become more difficult and probably only resume in the wake of new deployments in areas of the Warsaw Pact states, i.e. on a fresh basis and in the course of 1984. That is another reason why it would be worthwhile to concentrate on a successful conclusion to the present round of negotiations in Geneva-negotiations which must produce agreement on stopping the introduction of shorter-range missiles in East and West.

(e) If a successful outcome of the negotiations appears feasible or if the START and INF negotiations are merged together, the requisite time for negotiations during which no deployments should take place must be granted.●

TRIBUTE TO SAL IACCIO

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. BIAGGI. Mr. Speaker, I want to take this opportunity to pay a heartfelt tribute to Sal Iaccio, a champion of labor, fellow New Yorker, and good friend. Sal died on August 15 at the relatively young age of 61. Yet, while we are deeply saddened by that fact, those of us who knew Sal are also very grateful for his loyal friendship, his accomplishments, and for the inspiration his memory will serve to provide.

Mere words are never enough when it comes time to honor a man of Sal Iaccio's stature, but we can always hope they will help stir some fond memories for those who knew him, or maybe plant some fruitful seeds in those who did not have the pleasure.

The son of an Italian immigrant carpenter who settled in Manhattan and served 40 years in the Carpenters Union, Sal's early influences were to have a profound effect on his entire life. Like his father, Sal joined a trade union at a young age and he spent nearly his entire working life in the New York City area.

In 1946, Sal joined the International Association of Machinists and Aerospace Workers—IAM Local 556. Just 10 years later, he was elected to his first full-time union job, as representative for IAM District 15 in New York City. He quickly earned a reputation as a tough, yet fair, union leader and was appointed an IAM general vice president in the union's northeast territory on January 1, 1973. He was subsequently reelected in 1977, and to another 4-year term in 1981, which he was serving until the time of his death.

Sal's numerous other contributions to the labor movement included serving as president of the New York State Council of Machinists; vice president of the New York State AFL-CIO; delegate to the New York City Central Labor Council; vice president of the State Allied Printing Trades Council; member of the Board of Educational Vocational Training for the City of New York; trustee of the Empire State College of New York; member of the State Manpower Planning Council; board member of the Port Maritime Trades Council; and cochairman of the American Trade Union Council for Histadrut.

IAM President William Winpisinger recently remarked:

Sal Iaccio was a true leader of and for workers. He served workers inside the labor movement at the local, district, state and international levels, and outside the labor movement in all aspects of education, government and private endeavors. He was a tough, fair, rational leader who was respected and admired because of his vision and his effectiveness in moving toward accomplishment of that vision.

These are cherished words for a man who was greatly cherished, both inside and outside of the labor movement. No man has a right to be any more proud than Sal Iaccio—proud of how he lived, proud of what he accomplished, and proud of what he left behind; namely, his many friends, his lovely wife, Mary, and a fine son, John, with whom I have developed close personal and professional ties over the past several years.●

SERVING MANKIND AND THE COUNTRY

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. JEFFORDS. Mr. Speaker, today it is my pleasure to share with the Members of the House the words from two songs composed by Dr. Arwin G. Sexauer of East Montpelier, Vt.

The spirit of serving mankind and our country that is contained in "Our Congressmen Pray" is one that all of us must frequently consider. "One Last Coin for Brotherhood" is particularly poignant in light of the current situation in Lebanon.

Dr. Sexauer is a world-renowned composer. She founded the Music Mission in 1963 which, in her words, "has been a 20-year pilot project testing ecumenical hymnody and intergenerational spirit as a continuing contribution toward world peace and brotherhood through the universal art and language of poetry."

Her songs have received commendations from countless world leaders and are in archival deposits around the world. She has received over 170 international and American awards and honors, including three George Washington Honor Medals for writing and public speaking, the "Virgilio-Mantegna" medal for being 1 of 10 finalists in the 1982 International Lyricists Competition, a Richard Rodgers musical award, 14 ASCAP Annual Popular Panel Awards, and many, many more.

ONE LAST COIN FOR BROTHERHOOD

One last coin for brotherhood,
Will need the dove's goodwill—
When Islam and the Protestant,
The cup of love shall fill.

One last coin for brotherhood,
Will take the meeting minds—
When struggling Jew and Moslem,
Can live in peace that binds.

One last coin for brotherhood,
And the good time will come—
Though each hears a different drummer;
Each yielding up the sum.

"Cast your bread upon the waters"
The future reaps today.
For God within planetal peace
With your last coin—pray.

OUR CONGRESSMEN PRAY

Our Congressmen of manhood fine;
each fills a needed post,
With strength of heart and thoughts divine
erase the idle boast.

Their lips are closed in silent prayer,
hands clasped beneath the rod;
Two signs which note that Faith is there
when they give thanks to God.

They daily serve their Country's need,
the Flag within the Hall,
And scorn the narrow-minded Creed
with Peace of Love on all.

Their Unity not pride's display,
can make for Hope that's True
And bind the Brethren of this day
by what they say or do.

No matter what the Cause may be
in politics or clan—
Who goes to Chapel shows that he
will serve his Fellow Man.●

PRESIDENT REAGAN SHOULD SEEK WATT'S OUSTER

HON. DON SUNDQUIST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. SUNDQUIST. Mr. Speaker, I am sure I was not alone in my dismay this morning as I read Interior Secretary James Watt's characterization of a handicapped member of the embattled coal-leasing program as a "cripple."

Unfortunately, this comment can come as little shock to Americans who have watched with alarm as Watt has made embarrassing blunders which cast aspersions on his ability to be a leading advocate of America's environmental protection laws. As a conservative who appreciates Secretary Watt's views on a number of issues, it saddens me to call upon President Reagan to request Secretary Watt's resignation.

After hearing of Secretary Watt's distasteful remarks yesterday before the U.S. Chamber of Commerce, I have concluded that he is a liability to the administration. Although I do not question the Secretary's managerial abilities, I firmly believe that his inability to exercise restraint in his public comments has been detrimental. The American public no longer has faith in the Interior Department to be a trustworthy caretaker for public lands. Whether the basis for this feeling is right or wrong, the distrust is a reality.

President Reagan has proven that he can restore faith in environmental policy, as evidenced by his appointment of William Ruckelshaus as Director of the Environmental Protection Agency. The replacement of Anne Burford should serve as a reminder that personalities do make a significant difference in the public's perception of government.

Mr. Watt has shot himself in the foot one too many times. If we are to restore faith in our ability to properly care for our public lands, Mr. Watt must first be removed.●

HOME CARE—AN ALTERNATIVE TO THE NURSING HOME

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. BONKER. Mr. Speaker, I would like to bring to the attention of my colleagues a book written by Florine DuFresne, a longtime friend and constituent. Her book, entitled "Home Care—An Alternative to the Nursing Home," is an informational guide for those who want to meet the health care needs of their loved ones at home. The message of the book is that it is possible for families to provide excellent care for an aging or chronically ill loved one.

Many books on the delivery of home health care services have been written by and for professionals. Mrs. DuFresne's book is different. She learned, with the help of professionals, how to take care of her dying husband's needs at home. In her book she shares that information with the reader in a clear, straightforward manner.

A portion of the book is devoted to an intensely personal description by Mrs. DuFresne of her own care-giving experience which she calls an adventure in love. It reveals a quiet strength and courage derived from her deep faith in God and her love and devotion to her husband of 40 years that is truly inspirational.

To my knowledge, "Home Care" is the first book of its kind to be published for nationwide distribution. I think many of my colleagues in the House would benefit from reading it and informing their constituents of its availability. My staff on the Aging Committee's Subcommittee on Housing and Consumer Interests will be happy to let you know how copies of the book may be obtained.●

PERSONAL EXPLANATION

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. LEHMAN of California. Mr. Speaker, last Thursday, September 15, I was unable to cast my vote on the amendment to H.R. 3391, as offered by Congressman FRENZEL, rollcall No. 340. Had I been present, I would have voted "no" on this amendment.

At the time that the vote was taken I was attending a briefing at the Federal Deposit Insurance Corporation and was unable to return to the House floor in time to cast my vote.●

PREVENTING DRUG THEFTS FROM PHARMACIES

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. LUKEN. Mr. Speaker, I am introducing a bill to amend the Controlled Substances Act in order to close a serious loophole in Federal drug statutes. Under current law, it is

a Federal criminal offense to manufacture, distribute, dispense, or obtain narcotics or other controlled substances except through properly registered channels, or to obtain such substances by misrepresentation, fraud, forgery, deception, or subterfuge.

Under the current Federal law, however, it is not a criminal offense to obtain narcotics or controlled substances by robbing or burglarizing a pharmacy. Since 1973, more than 10,000 pharmacies have been robbed to obtain controlled substances, and more than 2,300 people have been killed or injured in such robberies. In addition, the rate of these robberies is increasing dramatically—up 113 percent between 1976 and 1981. Burglary and theft of controlled substances from pharmacies also increased significantly.

The bill I am introducing is a simple one, to close the loophole in the Federal Controlled Substances Act and make robbery and burglary of controlled substances from retail pharmacies a violation of the act.

The bill has been drafted to take into account suggestions made by the Department of Justice about similar proposals. The Department has indicated that it will support a bill that incorporates these suggestions about sentencing, coordination with State authorities, and reporting requirements.

First, the bill provides a maximum penalty of 20 years imprisonment and a $10,000 fine, as well as mandatory minimum imprisonment of 5 years or more for carrying or using a weapon in such a robbery, and mandatory imprisonment of 20 years if the robber or burglar kills or maims another person while committing the offense.

Second, the bill assures proper coordination with State law enforcement agencies by assuring that the Attorney General or an Assistant Attorney General approves such prosecutions. The Attorney General may also delegate such approval authority to selected U.S. attorneys where provision is made for coordination with State authorities.

Finally, reporting requirements for the Department are reduced to a bare minimum. The Department should simply include in its annual report to Congress statistics on indictments returned and convictions obtained under this section. The FBI should use statistics already gathered by the Drug Enforcement Administration in order to report robberies and burglaries of controlled substances in the "Uniform Crime Reports." It is not the intent of this bill to require the FBI to undertake its own collection of data about these offenses.●

THE FOURTH ANNIVERSARY OF THE GRAPEVINE

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. LIPINSKI. Mr. Speaker, when Chicago city officials hear the name Ray Hanania, they think of insightful, accurate and, often, no-holds-barred political reporting. Ray started with the Daily Southtown Economist newspaper in 1978 as a community reporter, but his extensive involvement with Chicago city government began in 1979 when he was sent to city hall to cover Chicago politics for the Economist.

In the fall of 1979, during Jane Byrne's term as mayor, Ray started the Grapevine a twice-weekly column that covers the politics of Chicago and suburbs. On September 20, Ray is celebrating 4 years of writing the Grapevine. The Grapevine sometimes deals with several topics, or treats one issue in depth. But the column always deals with people, examining the complex personalities that make up Chicago politics.

Ray attracted attention from local politicians as soon as the Grapevine made its appearence. Jane Byrne was particularly outspoken in her dislike of the column. In fact, the Grapevine once so angered Byrne that her husband threatened to punch Ray Hanania in the nose. Frequently, Byrne would not speak to reporters for days after items appeared in the Grapevine.

But as all reporters know, scorn by public officials is a good indication that they are doing their job right. Ray Hanania is certainly worthy of the praise that he has received in the 4 years that he has been writing the Grapevine. He has earned his reputation for thoughtful, direct reporting, and the readers of the Daily Southtown Economist are fortunate to have Ray Hanania telling them the "inside story" of Chicago politics. I congratulate Ray on 4 years of writing the Grapevine, and hope he continues with his column for years to come.●

DECLARATION OF THE INFRINGEMENT OF RELIGIOUS RIGHTS IN CZECHOSLOVAKIA

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. ZABLOCKI. Mr. Speaker, Czechoslovakia as a signatory to the Final Act of the Conference on Security and Cooperation in Europe at Helsinki pledged to respect human rights and fundamental freedoms, including freedom of thought, conscience, religion, or belief. Theoretically, at least, freedom of religious belief and freedom to practice religion are guaranteed by the Czechoslovak Constitution. In sharp contrast to these assurances is the reality of the condition of the Catholic Church in Czechoslovakia.

Mr. Speaker, on June 24, 1983, on the occasion of the dedication of the Czech National Chapel in the Shrine of the Immaculate Conception, a conference of Czech hierarchy, clergy, and laity published a declaration of the infringement of religious rights in Czechoslovakia which details that government's systematic violation of basic human rights involving religion. Mr. Speaker, given the importance we as a nation assign to such basic values and the requirements that other nations adhere to fundamental principles of human rights as well, I would like to share this important document in its entirety with our colleagues, as follows:

Declaration of the infringement of religious rights in Czechoslovakia at the conference of the Czech Catholic Hierarchy. Clergy and Laity abroad on the occasion of the dedication of the Czech National Chapel of our Lady of Hostyn in honor of St. John Neumann in the National Shrine, Washington, D.C. held on June 24, 1983, at the Washington Hilton Hotel, Washington, D.C.

As on the occasion of the Forty-first International Eucharistic Congress in Philadelphia in 1976 (August 1-8), when the Czechs in America and elsewhere endorsed a declaration entitled, "The Catholic Manifesto for Religious Freedom and its Restoration in Czechoslovakia," which was the first historical document as well as a contemporary evaluation of the life of the Church in our native country, so today, seven years later, we wish to address a situation of the Church and its life that is still very difficult and unresolved. We desire also to address ourselves to conditions in which human rights are being violated by the Communist regime in Czechoslovakia.

In this solemn moment when we, sons and daughters of the Czech nation, are gathered from all over the world in this Shrine dedicated to Mary, Mother of God, we cannot but think of our nation and the people of God within it who are being severely tested in these days.

It was through the Church that our nation received not only the happy news of Christ's Resurrection, but also the most basic form of culture, the writing on which every form of communication depends, brought to us by the co-patrons of contemporary Europe, Saints Cyril and Methodius. This Church has been condemned to annihilation in an unjustifiable decision by the regime which assumed power in 1948. Such is the official policy of the regime which today controls the fate of our nation. Those who hold power in the State have been acting according to this doctrine for many years.

For thirty-five years now, Christ's Church in our nation has been practically bereft of bishops, most of whom were interned or imprisoned. Those few who are free today are shackled with so many restrictions that they are unable to fulfill their sacred offices. For thirty-five long years the Church

has been totally deprived of the possibility of Religious Life, which is one of the most precious sources of its spiritual energy. In the course of one night, all the men and women of Religious Orders were rounded up and deported to concentration camps. Thus was Religious Life condemned to death by illegal governmental verdict!

At that time the Church, stripped of all its resources, became the paid employee of government, which asks her to carry out only one task—by her external facade, the Church should witness to the world that in this State all is in order, and all are enjoying religious liberty. In fact, the Church is being forced to cooperate in its own violation and gradual path to extinction. Under these conditions, the Church is for all practical purposes outside the authority of its rightful leaders, who have been effectively beaten and eliminated from consideration. The Church is now under the jurisdiction of the so-called "church secretaries", who are nothing but functionaries of the government. It is also controlled by the pseudo-church organization of Catholic Clergymen called Pacem in Terris. This group is supposedly "working for peace", while in reality it is slavishly conforming to the regime and helping in its efforts to destroy the Church.

During these same years, all Catholic seminaries were closed, with two exceptions: one for Bohemia and Moravia, and one for Slovakia. But even these are, in every sense of the word, institutions of the State, for the real Shepherds of the Church, the bishops, have nothing to say about how they are run. They have no authority to determine who and how many seminarians should be accepted (numerus clausus), nor what should be taught, nor who should teach it. All of this—content of curriculum, selection of faculty, and limitation on the number of students to be accepted—is determined by the Communist regime. The seminarians themselves are under extreme pressure from State police who attempt to plant their clandestine agents everywhere.

The situation of the priests in the parishes is no better, for they are without protection of the bishops. Over their heads at all times hangs the Sword of Damocles; state permission is required for them to be able to function in a pastoral capacity, and this can be taken from them at any moment. We must not forget that, in the Communist State, the priest is first of all an employee of the State. Sufficient reason for his permit to be withdrawn would exist if he appeared more energetic than most, or was more effective in infuencing the faithful, or, worst of all, was able to succeed with young people. One such success would be enough for him to be transferred elsewhere. When not even multiple transfers would dull his enthusiasm and effectiveness, State permission would simply be withdrawn from him and he would be sent away to take his turn at "building the industrial might" somewhere in the factories or collective farms.

The religious education of children has become almost completely impossible because of the administrative red tape and the tremendous pressure exerted upon their parents. Children who manage to attend religious education classes despite the pressures find that they are not able to continue their education; they are denied acceptance for higher education. Moreover, their parents lose their jobs or cannot get better ones. Any "secret" religious education is extremely risky, as a result of the State's "watch on religious activities." Any unauthorized activity is unlawful and subject to serve punishment. As has happened many times, people are arrested and imprisoned for such "subversive" activity.

The religious press has been drastically curtained in Czechoslovakia. Those few publications which are left have been subjected to severe State censorship. Evidence of this truth is the recently published letter by Cardinal Frantisek Tomasek, Archbishop of Prague, to Kotolicke Noviny. (In this letter the Cardinal objected that the newspaper should not call itself "Catholic" because it was not serving the goals of the Church; moreover, it has repeatedly refused to publish the Cardinal's own official communications as Archbishop of Prague. The contents of the letter became known only when it was published outside of Czechoslovakia). Publication of Christian philosophy, theology, or literary works remains completely outside the realm of possibility.

Public expression of faith in any form is cause for all manner of difficulties in obtaining work or in the pursuit of an education. Very often young persons, because of their faith, are completely excluded from opportunities for advanced education. They are not allowed to become teachers and are not even considered for the higher positions in society. Such persons are condemned to become and to remain "second-class" citizens.

Religious symbolism of any kind is systematically eliminated from public life. The thoroughness used in this attempt to rid the people's life of religious symbols borders on the ridiculous: even the cross worn around the neck of the TV anchor-women must be taken away. As a consequence, the regime attempts to replace the religious ceremonies with state ceremonies, so that religious signs of commitment would be eliminated, and eventually Christianity itself would disappear. The Christian sacraments are being replaced by civil ceremonies. Christianity must become invisible.

This obsessive animosity toward religion in general and the Catholic Church in particular goes to such lengths that they do not even stop short of rewriting national history and distorting that unique expression of national consciousness and conscience which is the national literature. How many great representatives of our national life have been erased from the textbooks, thrown out of the libraries, and prevented from entering the consciousness of young people! How many histocial events have been buried in silence, distorted, and even falsified by the ideologists of the regime!

And how could we forget the immense suffering which came in the wake of the so-called socio-political revolution: the expropriation of the whole nation's property, particularly that of the farmers; the hard labor camps, and "military" units for hard labor; the concentration camps, prisons and torture chambers; the staged public trials, with so many people beaten to death or unjustly executed! Foreign observers and reporters concur in the opinion that in the Soviet dominated areas, the persecution of religion, above all the Catholic Church, is currently most cruel in Czechoslovakia. There the Church is considered the most dangerous opponent of the atheistic concepts and plans of the regime. This attack on the Catholic Church is directed by Soviet advisors.

Present days are not rosy by comparison. The courageous defenders of human rights—those gathered in Charter '77 or outside of it—are subjected to all kinds of harassment and intimidation. Muggings, beatings, threats of automobile accidents, threats to parents warning of death to their children—these are the methods used by the "anonymous callers" whose purpose is to terrorize people into submission.

The founders of the "Committee for the Defense of Those Unjustly Persecuted" include the writer Vaclav Havel, mathematician Vaclav Benda, J. Dienstbier, Otka Benadrova, Petr Uhl. These real and courageous humanitarians, willing to defend their persecuted brethren, were themselves imprisoned for several years. Fr. Frantisek Lizna, Rudlef Smahel, Josef Adamek, Jan Krumpholc, and Josef Vlcek were found guilty and sentenced to prison terms of several years for no other crime than the printing and distribution of religious literature. That, after all, was the real reason for their imprisonment, not the crime of conducting business without a license, as is libelously stated in the court records.

Priests who, in spite of everything, were brave enough to celebrate Mass in youth camps were sent to prison. Fr. Jan Barta, who with such sacrifice and greatness was trying to renew religious life, was hounded to his death. Just weeks ago, some of his fellow Franciscans became the victims in a new wave of state arrests.

What can one say about Cardinal Trochta and Bishop Hlouch? These, too, were hounded to their deaths by the so-called "church secretaries." There is neither time nor space enough to list the names of all those persecuted or fallen into jeopardy because of the faith they profess. One last recognition must be recorded: that of Cardinal Beran. His bodily remains, buried in the Basilica of St. Peter in Rome, are even now in exile and cannot be laid to rest where they truly belong—in the Cathedral of Prague. Exiled from his homeland even after death! Eloquent symbol of an unnatural situation!

The Church does not ask for privileges. She wants only justice and liberty for all. She does not want freedom for vice and crime, but for virtue, compassion, love and all true values. Experienced in the understanding of humanity (esperta nell umanita), the Church knows that "no tree can grow into the heavens," and that "everything has its time; only God has eternity," as is expressed in the folk wisdom of the Czech people.

The Church knows too that the triumph of evil is complete only when one evil is opposed by another. That is why she preaches what she herself is trying to do: Do not live a lie. Be rooted in the Truth. Serve your neighbor. Defend the basic rights of every human being. Support the national culture (because one can become fully human only through the culture). Proclaim and strengthen the values necessary for a "civilization based on love," envisioned by Popes Paul VI and John Paul II.

The Church is not disturbed by the hurricane forces that rage about her because she knows that God permits the storm only to purify and make her stronger in love. At the same time she knows that these raging powers are caused by our sinfulness and will not pass away without our effective penance and action for good. That is why the Church is calling for reconciliation everywhere.

If we Czech Catholics are turning to people in the free world, we are doing so because by this Declaration we want to give voice to those who themselves cannot speak. We want to inform the citizens of the free world about a situation which cannot but

shake the conscience of all who are genuinely concerned with the fate of the human race as this second millenium comes to a close.

We are convinced that our nation, bearing the burden of this ordeal through which it is now passing, is maturing toward a new freedom—one which is the gift of God's Spirit. We are asking, therefore, of all people of good will: Do not forget your brothers and sisters who are struggling to gain their most basic human rights. Do not betray them by yourselves succumbing to materialism, isolationism, and selfishness; rather support them in their quest for true humanity. Help them by your own affirmation of human and spiritual values. Aid them to grow toward that truth which liberates, toward the truth of the Lord about which the Czech national motto proclaims: "Truth is victorious."

(Presiding: Bishop John L. Morkovsky, S.T.D. Bishop of Galveston-Houston. Bishop Jaroslav Skarvada, S.T.D., for Czechs abroad with residence in Rome.)

(Coordinating: Professor Peter Esterka.)

(Chairman: Professor Msgr. Ludvik Nemec, Chestnut Hill College, Philadelphia.)●

TRIBUTE TO MENACHEM BEGIN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. BIAGGI. Mr. Speaker, the August 28 announcement by Israeli Prime Minister Menachem Begin of his resignation signaled the end of a long and distinguished career. At that time the Israeli people lost a courageous and dedicated leader and the United States lost a loyal and valuable friend.

Just last year I had the memorable pleasure, along with my son, Mario, Jr., of meeting with Prime Minister Begin in Israel. It was one of several times I had the honor of meeting the Prime Minister. The visit took place during my trip to the Middle East to witness the PLO withdrawal from Lebanon, a particularly significant event during Prime Minister Begin's career. The visit was captured in a treasured photograph I have next to my desk. The visit convinced me more than ever of the wisdom and strength of Menachem Begin.

The saga of Menachem Begin began when, as a young Polish Jew, he witnessed and experienced the horrors of Nazi persecution. Begin's family, and most of his friends were murdered for no other reason than that they were Jewish. It was from this nightmare that Menachem Begin's dream of a sovereign Jewish State was born.

The young Menachem Begin led the courageous and daring struggle for a free and independent Jewish State. When his dream was realized by the creation of modern Israel in 1948, Begin continued his devotion for 35 years as a member of the freely elected Democratic Government of Israel.

Menachem Begin's belief that a Jewish State was the only way for survival of the Jewish people never wavered. For 29 years Begin remained in the background of Israeli politics holding fast to his beliefs and commitment to the State of Israel and the sovereignty of the Jewish people.

In 1977 Menachem Begin rose to power in the first non-labor government since 1948 when the State of Israel was formed. Begin then proceeded to make his indelible mark on Israeli and world history.

It is difficult to fully express the value of Menachem Begin for the 6 years he headed the Israeli Government; which is longer than any Prime Minister in Israeli history.

As a leader Begin demonstrated courage, devotion, and resolve. The courage of the Camp David accords is unprecedented and will undeniably be forever recorded as one of the most dramatic and thoughtful commitments to peace and stability in world history. This devotion to a peaceful life for the people of Israel, and the Middle East, won Begin the Noble Laureate for Peace in 1978.

In a time when the faces of those friendly to the United States changed quite often, Menachem Begin's Israel stood fast as a dependable and trusted ally. In a region where internal violence and political unrest are commonplace, Israel, under Begin, maintained the cornerstones of democracy: freedom, equality, justice, and stability. In an era when emotion and demagoguery oftentimes replace traditional values, Begin maintained his integrity and belief in God.

At age 70 Menachem Begin is ready to pass the torch of Israel on to a successor. However, the flame that Menachem Begin nurtured for most of his adult years will continue to burn bright. In its illumination the people of Israel will see their dream of freedom and peace and the United States will see a loyal friend in a new light.

I invite my colleagues to join with me in a tribute to a courageous freedom fighter and a champion of democracy, Menachem Begin.●

MAJORITY LEADER CONTRASTS CHINA AND TAIWAN AND DESCRIBES VALUABLE LESSONS FROM ASIA TRIP

HON. SHERWOOD L. BOEHLERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. BOEHLERT. Mr. Speaker, there are many observations one could make about an economic system based on Communist ideology, but perhaps one of the most pertinent is the fact that it simply does not work very well.

At least that has seemed to be the case in the People's Republic of China. Finally realizing that their rigid and inflexible economic system was strangling productivity, more pragmatic leaders in China have begun to experiment with incentives to reward individual effort and initiative. These reforms fall far short of introducing a free market economy, but the changes are nonetheless significant.

As one member of a bipartisan delegation to five countries in the Far East, I was privileged to spend a number of days last month in China. During the trip, the House majority leader JIM WRIGHT, wrote down his observations in a series of articles which appeared in Texas newspapers. I am inserting into the RECORD two of Mr. WRIGHT's articles—one contrasting Communist China with capitalist Taiwan. The second sums up some valuable lessons we can learn from Asia.

I commend Mr. WRIGHT's comments to our colleagues' serious attention.

The articles follow:

[From the Dallas Morning News, Aug. 27, 1983]

CHINA, TAIWAN: A CONTRAST

(By Representative Jim Wright)

TAIPEI, TAIWAN.—To walk through the streets of Shanghai on the China mainland and then through the streets of Taipei on Taiwan is to see the vivid contrast of two economic systems.

All the dull statistics like gross national product and average family income take on human form and parade before you.

In Shanghai at any time of day the broad streets teem from curb to curb with bicycles and foot traffic. There are few cars. To either side run narrow alleyways which disappear among low buildings that house small shops and crowded tenements.

Driven outdoors for breathing space, people sit shirtless on sidewalks in front of their six-to-a-room habitations and seek surcease from the sultry summer.

Shanghai is China's most prosperous city—also its most westernized. There in the last century the French and British established their "Paris of the East," bastion of Western capitalism.

After the communists took over in 1949, Maoist puritanism slowly rid the city of its crime, prostitution, drug addiction and other festering vices.

"Degrading dregs of Western colonialism," Chinese purists called them. Everyone was assigned a place to live, crammed with other families into already overcrowded quarters.

The government took over all commerce and industry. It was forbidden to own an automobile, and for a time, a radio. Everyone dressed alike. The regime tried to make everyone think alike. Outisde contact was forbidden. It was though a new wall of China had been erected.

Now, with the new opening to the West proclaimed by Deng Ziao-ping, there is a gradual liberization of domestic policy as well. Members of Congress who visited Shanghai three years ago see some encouraging differences.

Instead of the formless blue uniforms everyone wore during the Mao tse-Tung years, there is now some individuality in dress. Most men wear short-sleeved sport shirts today and dresses among women are as common as pants.

Little shops have opened, and sidewalk vendors spread their wares where two years ago they would have been prohibited. While the state still owns most retail outlets, lease arrangements now permit the operator to keep a part of the profit after an assigned quota has been paid to the state.

The new incentive approach is working in agriculture, communes had failed to get from the land its full potential. That meant continuing hunger in that sprawling country which must feed a billion mouths, four times the U.S. population, on only one-third the tillable land available to us.

Many communes have been broken into little plots doled out by family size. A six-member family may have one acre to itself. The result is intense cultivation—gardening, not farming.

En route by train to Suzbou, 77 miles, I saw scarcely an inch of idle land. Soil, hand-cultivated and irrigated up to the rail tracks themsleves, has yielded an impressive increase in China's food production.

Charles Freeman, chief counselor for our embassy, says, "Even the most dedicated communist ideologues are having to admit individual incentive works."

But there still is a long way to go for mainland China. An age separates people there from the spectacular success their expatriates have achieved on Taiwan.

At 7 o'clock in the morning the Taipei streets are already crowded. American-made cars predominate. Shops are opening to display their seductive merchandise.

On this island of 14,000 square miles, poor in resources, 20 million people enjoying an elected parliament and boasting an educated work force have achieved for two decades a steady economic growth rate of almost 10 percent each year.

In Taipei, most homes have telephones and one in two has access to an automobile. Young men ride motor scooters, nowhere seen in communist China.

In all the China mainland, Freeman tells me that for 1 billion Chinese there are probably no more than two million telephones, hardly more than in the Dallas-Fort Worth metropolitan area.

Nowhere are the failures of communism more apparent than here in the Orient. Just as in Korea, where people in the Western-oriented south enjoy annual incomes roughly four times those endured in the spartan communist north, the people on Taiwan live better by a factor of five or six than their kinsmen in communist China.

Communist regimes, embarrassed by these startling comparisons, have tried in such places as North Korea and East Germany to seal off their borders from traffic to avoid the comparisons. Internally, it makes matters worse. Progress languishes in air-tight compartments.

Chinese leaders, after three decades of self-imposed isolation, are trying to break out of that intellectual cocoon. The thaw in relations with the West can be a good thing for China, and for the rest of us as well.

In Malaysia, Foreign Minister Ghazali Shafie, a fierce anti-communist, told us we are doing the right thing in opening more avenues of understanding with mainland China.

"A desperate and poor China is dangerous to the future of Asia," he said. "A China concentrating upon its economic development and better relations instead of military conquests is much safer for all of us."

There are 12,000 Chinese from the mainland studying in U.S. schools this year. These come in contact with the 20,000 students from Taiwan who share their ancient culture.

From them they learn the truth. A free enterprise society can work, as well for Orientals as for Americans.

Freeman thinks it is a great opportunity for U.S. interests. "We are training the entire future elite of this enormous country, an opportunity that doesn't come often with a nation as important to the world as China."

The whole Chinese politburo has kids studying in the United States, according to Freeman. Obviously, he reasons, Chinese leaders intend their new relations with our country to last.

It is also evidence they are admitting to themselves, however guardedly, that communism just simply hasn't worked.

[From the Fort Worth Star-Telegram, Aug. 28, 1983]

Asia Offers Mysteries of Value to America

(By Jim Wright)

(Editor's Note: House Majority Leader Jim Wright returned on Aug. 18 from a five-nation Asian tour. He was invited by the Japanese Diet to visit that country, and in addition, represented the United States at the request of the U.S. State Department on a fact-finding and diplomatic mission. This article is an exclusive analysis of what he observed.)

There are at least 10,000 Japanese business representatives in the U.S. All speak English. American businesses have no more than 900 agents in Japan. Fewer than 100 speak Japanese.

These figures explain in part why we suffer a $21 billion trade deficit with Japan. More profoundly, they reflect the low priority we've assigned to our relations with the people of Asia.

In Singapore, Prime Minister Lee Kwan Yew is mystified that American diplomatic intelligence—in spite of warnings given by himself and others—could not foresee the explosion brewing in Iran among the native Moslem population in time to salvage things.

Of 60 American Embassy personnel in Tehran in 1978, only six had a minimal command of Farsi, the language of most Iranians.

"You're good with the chopsticks," the political chieftain of the Chinese city of Suzhou exaggerates politely as I struggle ineptly to grapple with a baked sparrow. "Most Americans won't even try," he adds with a wistful smile.

Acting Prime Minister Musa Hitam is proud of Malaysia's impressive educational advances. "Most Malaysian children can name the states and principal cities of America," he says. "They know about your form of government and even the principal products you produce." As he talked I wondered how many American students could name the capital of Malaysia or even locate the country on a map.

Since 1950, we have spent 112,000 American lives in two Asian wars. But we've invested too little time and effort to understand the region's potential, its peril and its promise.

Asia is many things. Depending on how you define it, it is home to more than half the world's people. Every fourth infant born on earth is Chinese.

Asia rapidly is becoming this country's most important market. Already we buy and sell more than we do in Europe.

But for most of Americans, Asia remains a mystery. In popular lore it is Shangri La and Madame Butterfly and rickshas. It is the Road to Mandalay where a Burmese girl sits waiting. It is kimono-clad Gieshas, or the King of Siam. It is steaming rice paddies and water buffaloes.

These are stereotypes which stunt our notions of Asia. They are the phantom figures, no doubt, which Malaysian Foreign Minister Ghazali Shafie had in mind when he faced U.S. congressmen in Kuala Lumpur.

"Your are the first congressional delegation to come here in four years," he said. "There is so much I've been saving up to tell you, and I hardly know where to start."

Maybe we must begin with three things. Until we comprehend these basic facts, our attempts to deal with complex Asian realities which are products of a convoluted history may be as awkward as a Sumo wrestler attempting a minuet.

The first thing for us to appreciate is the growing importance of Asia. Twenty-one nations proud of both their distinctive identities and their intertwining cultures probably hold the balance in the world power struggle.

The region's economy, with its diversity, is growing faster than that of Europe, Africa, Latin America or the United States. Last year we sold 32 percent of our total farm exports to East Asian nations, and China was our largest purchaser of wheat. The region buys well over half our exports of cotton, beef, citrus fruits, logs and lumber.

We depend on East Asia for astronomical quantities of raw materials, including tin, timber, plywood, bauxite—and 90 percent of our natural rubber. "I hope you thought of that when your plane landed smoothly on our runway," Ghazali said jokingly.

Five countries with parliamentary governments and a combined population close to our own—Indonesia, Malaysia, Thailand, Singapore and the Philippines—have formed an Association of South East Asian Nations (ASEAN) to defend their own freedom and form a bulwark against communist expansion.

China alone, if it ever attains a normal standard of living for its billion people, will be the world's most lucrative market for consumer goods of every type. Now Deng Xiaoping and pragmatic Chinese leaders are struggling to introduce elements of incentive and free enterprise into China's smothered economy.

In Shanghai, China's richest city, a typical state-owned "apartment" consists of one room and houses six people. Most have no plumbing. The average apartment has 660 watts of electric energy, hardly enough to operate a radio, a TV set or a hair dryer. Per capita income in China's wealthiest city comes to $900 a year.

But trade between our two countries is growing. There is a determined drive to double the nation's energy supplies. Offshore drilling activities could reach $20 billion in the next decade. Texas industry could benefit immensely. American engineering and construction firms could participate in China's drive to extend its telephone system and expand its road network.

Asia is, in short, what Marco Polo insisted it was to his incredulous 14-century listeners—a treasure house of unrealized opportunity.

The second thing we need to learn from Asia is the use and importance of patience. Not resignation, not complacent acceptance of the inevitable. We need to learn persever-

ence, persistence, how to set a long-term goal and pursue it.

"Americans always want everything in a hurry," mused Madame Sun-Yun-Hsuan, wife of Taiwan's premier. "You have instant coffee and instant news analysis. Your microwave ovens cook instantly. It is only natural that you'd want instant solutions. to world problems."

The unspoken sequel is that there is no such thing. Paticularly in Asia. A Chinese proverb, "Patience is power," probably speaks for the Oriental mind.

Leaders throughout Asia, I discovered, are eager for our friendship, but reluctant to depend on our staying power in a protracted common effort.

"Don't try to change the world overnight, nor think you can re-make others in your exact image," advised Singapore's Lee Kwan Yew. "Remember you governed the Philippines for 50 years. Yet your influence there is an thin as a coat of varnish."

While proud that our democracy has lasted 200 years, we need to reflect that in China one dynasty alone survived four times that long. In the shadow of a towering pagoda in Suzhou, you can look across the Grand Canal, realize that it's the world's longest inland waterway and was built 1,000 years before Columbus set sail. Suzhou itself was founded 500 years before Christ. Patience.

The ASEAN approach to freeing Cambodia from Vietnamese occupation relies on patience. It is one of slow, steady pressures on the invading force to make the military occupation more costly than the Vietnamese economy can afford.

The emergence of Singapore itself from a cobweb of poisonous ethnic hostilities to a united people with a common language is a lesson in patience.

With the coming of independence in 1965, large segments of the ethnically diverse population spoke Chinese, Malay and Tamil. Each group wanted its language as the official tongue.

Achieving by indirection what he could not have done by decree, Prime Minister Lee created one system of schools to teach Chinese and English, another to teach Malay and English, and yet a third to teach Tamil and English. Today Lee's dream is a reality: English is the de facto official language.

Our country must accept that some things can't be done overnight. We must learn to set long-term goals and pursue them, in spite of changing administrations and sporadic campaign rhetoric.

The third and final lesson is one of which Americans should not have to be reminded, for it is as indispensable to our society as water to a river. It is respect for diversity.

Americans too easily assume that everyone wants to be like us. Asian leaders whom we met in five very different countries this month echoed the plea that we be less eager to remake them into carbon copies of ourselves. While wanting very much to be our friends, they'd like us to respect their values.

Leaders in three countries expressed dismay at our efforts to impose upon them our highly refined formulas of civil rights and judicial restraint. In Signapore it is a prison offense to try to turn one ethnic group against another. In Malaysia and elsewhere, being caught with commercial quantities of illegal drugs invokes a mandatory death sentence.

Harsh? Yes. But strictly legal. And absolutely necessary, these countries are convinced, to the survival of a civil society. Such practices have been publicly criticized, to the chagrin of our Asian allies, by, official American human rights experts.

"You need to remember," one Asian jurist told me, "that even Abraham Lincoln abolished habeas corpus when the life of your country was threatened."

Too often Americans abroad engage in social incest, dealing with only the upper crust of local society. We avoid the people who have no shoes. We must be at greater pains to know them, for people change governments more often than governments change people.

We need training programs for all Americans, military and civilian, who go to live and work in foreign countries. They should be given insight into the land's religious beliefs, its governmental system, its dominating folk habits and cultural taboos.

In Islamic nations, with strong traditions against liquor, Americans drinking in public breed hostility. An American woman shopping in a tennis dress innocently flaunts her disregard for the traditions of some Asian countries.

Fifteen years ago, in Iran, I was with a group of Americans on a guided tour of the majestic blue Mosque of Isfahan. This was a place of worship. Here and there Iranians knelt silently on their prayer rugs. Obliviously, our guide strode through the sanctuary, pointing to historic art objects, describing the place to the group as though it were a tourist attraction.

One Moslem, his face and arms outstretched before him in the prone position of prayer, suddenly rose to a sitting position. His devotions interrupted, he turned his head and looked. Just for a second, I could see in his eyes the disgust he felt in our insensitivity.

What, then, is good Asian policy? Recognize that region's importance. Accept with patience the limits of our infallibility. Respect the values and sensitivities of those unlike ourselves. Perhaps, after all, it is no more nor less than the Golden Rule.●

KOREAN AIR LINES FLIGHT 007

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. FOGLIETTA. Mr. Speaker, there was no more outrage and disgust over the Soviet Union's shooting down of Korean Air Lines flight 007 than in Philadelphia's Korean Community.

I have received a letter signed by Mr. Mahn Suh Park, publisher of the Korea Guardian and chairman of the board of directors of the Korean-American Friendship Society, Mr. Oh Young Lee, president of the Korean-American Friendship Society, Mr. Chang Chae Im, president of the Korean Association of Greater Philadelphia, and Mr. Kyu Chong Cho, president of the Korean Businessmen's Association of Philadelphia, vividly outlining the Philadelphia Korean Community's reaction of the flight 007 tragedy.

Mr. Speaker, I think it is most appropriate to insert this letter into the CONGRESSIONAL RECORD.

SEPTEMBER 5, 1983.

We speak for all the Korean Community in Philadelphia, in protesting the brutal and barbaric action of the Soviet Union.

In shooting down the civilian airliner KAL Flgt. 007 the Soviet Union shows us yet another example of their inhumanity. Through this savage and atrocious act the Soviet Union again demonstrates their insincerity to the Free World.

Nothing the Soviet Union does now can save the lives of the 269 innocent civilian passengers on board flight 007. Nothing the Soviet Union does now could make amends for the atrocity perpetrated against those 269 men, women, and children. Nothing the Soviet Union does now can adequately compensate the family members of the 269 people lost forever. We can only pray that a tragedy like this never occurs in the future.

We, the Korean Community of Phila., demand that the Soviet Union take full responsibility for their action.

We demand full compensation for the families of those lost.

We demand guarantees from the Soviet Union that this will never happen again.●

AN INSOLENT ATTEMPT TO SENSATIONALLY PROMOTE THE ACCEPTANCE OF A LASCIVIOUS PUBLICATION IS REJECTED

HON. JOSEPH D. EARLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. EARLY. Mr. Speaker, I am greatly troubled and deeply distressed that my name, along with the names of all Members of Congress and other prominent public officials, has been inexplicably added to the mailing list of a magazine that may, at its very best, be described as grossly offensive. This, of course, has been done without my knowledge or permission and I have requested that the publisher of this contemptible and disgraceful magazine permanently remove my name from its mailing list.

Mr. Speaker, I am greatly offended as an individual and am left with a profound sense of sorrow, regret, and remorse that the U.S. Congress as a whole should be subjected to such pitiful attempts to garner publicity. This monumental example of the depths of immorality to which certain individuals would have this Nation reach is distasteful, despicable, and deplorable. I join with my colleagues in Congress to express our condemnation of this act and fervently hope that it will not be repeated in the future.●

ONE HUNDRED YEARS OF ACHIEVEMENT

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. HOYER. Mr. Speaker, more than 4,500 people will gather in Baltimore today for a 4-day meeting marking the 100th anniversary of the founding of the Maryland State Dental Association. This is an important event in Maryland and national history, for its marks the first attempts by the leaders of the dental profession in 1883 to weed out the charlatans, the barbers who offered "tooth extraction," as a sideline to a shave and a haircut, and the quacks, while lacking training and experience, viewed the dental profession as a lucrative calling and so practiced on innocent patients.

Maryland has long been in the forefront of American dentistry.

The first native-born educated American dentist of record was a Marylander, Benjamin Fendall, born in Charles County in 1753.

The first license to practice dentistry was issued to Horace H. Hayden of Baltimore, architect of the American system of dental education. He was licensed by the Medical and Chirurgical Faculty of the State of Maryland in 1810.

The first lectures in dentistry, on the physiology and pathology of teeth, were delivered to students of medicine by Dr. Horace H. Hayden, in Davidge Hall, University of Maryland at Baltimore, in 1819.

The first dental college in the world was established in Maryland. It was called the Baltimore College of Dental Surgery. Hayden was its first president, Chapin H. Harris its first dean. It was chartered in 1840.

The first national association of dentists, the American Society of Dental Surgeons, was organized by Hayden in Baltimore. Hayden served as its first president from 1840 to 1844.

The first dental graduate was a Baltimorean. Robert Arthur received the D.D.S. degree from the Baltimore College of Dental Surgery in 1841. He later went on to become the dean of the Pennsylvania College of Dental Surgery in 1856.

The first dental journal, called the American Journal of Dental Science was founded in 1839. The journal was edited and published in Baltimore by Chapin Harris until his death in 1860.

And finally, the Maryland Bridge, which was a vastly improved technique for the restoration of lost or damaged teeth, was developed and refined at the University of Maryland's Baltimore College of Dental Surgery.

As you can see, Maryland dentists, from the earliest times to the present, have made numerous contributions to the oral health of Maryland and of this country. This centennial meeting emphasizes the important historical contributions made by Maryland dentists. But it also provides a forum for current achievements and the projections for future success. A number of nationally recognized leaders in the dental profession will report on the technological advances and research being done within the State.

The Maryland State Dental Association is certainly to be commended for providing the framework for these achievements. It was organized and chartered in 1883 by Ferdinand J. S. Gorgas, and through its leadership has insured the safety and health of generations of Marylanders. Mr. Speaker, I commend the Maryland State Dental Association and offer my best wishes on their centennial celebration.●

BETTER HEALTH CARE ACCESS FOR THE RURAL ELDERLY

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. HARKIN. Mr. Speaker, individuals living in rural areas, particularly the elderly, face many challenges as they attempt to cope with rising health care costs and decreasing availability of health care services in their local communities. I am introducing legislation today which will help address these problems by changing Federal regulations to allow small rural hospitals to provide long term skilled nursing care—care which is currently difficult to obtain in rural areas.

In an effort to keep health care costs down we have seen an increasing emphasis on reviewing the records of patients to insure that they are receiving the level of care that they need. This practice is known as utilization review. It helps keep health care costs down by making sure that a patient who has recuperated sufficiently does not remain in the hospital. If continued recuperative care is needed, the patient must go to a facility that will provide the skilled nursing care necessary for long term recovery. This review process helps save money since hospital care is far more expensive than skilled nursing care.

Because of the increased emphasis on utilization review, the demand for skilled nursing beds has greatly increased. However, many patients are having trouble finding placement in skilled nursing facilities—particularly in rural areas where few exist. Therefore, many patients are having to travel long distances to find the appropriate level of care. This is taking its toll on both the patients and their families. The travel from the hospital to the skilled nursing facility is often traumatic for the patient, particularly the elderly. Furthermore, the families must either find accommodations in the area or travel long distances in order to be close by.

The lack of skilled nursing beds contributes to higher medical bills because often the patient is reluctant to make the shift to a skilled nursing bed far away, and therefore may choose to pay the higher cost of hospital care out of their own pocket. Or, more commonly, the patient may not be able to find a skilled bed to move to and therefore is forced to stay in the hospital until a bed can be found.

The families of patients confronted with this problem face a difficult choice. They must decide whether to move the patient home and risk the possibility that they will not receive the level of care they need, or see loved ones moved far away. The last possibility is to pay for the patient to stay in the hospital, thereby creating a major financial hardship on the patient and family.

This problem was first brought to my attention by the families of four patients in Cass County in my district. These patients were being required to transfer to skilled care beds. At the time the Cass County Hospital was only half full and was willing to care for the patients. But Federal regulations prohibited them from using the same hospital bed for skilled nursing care. One of the patients, a man terminally ill with brain cancer, had to travel over 50 miles to find a skilled nursing bed. Another patient facing this move was instead transferred to a nearby nursing home where she died the next day. The other two patients returned to their homes instead of traveling such a long distance, but their conditions worsened and within 2 weeks they were readmitted to the hospital.

When Congress passed the Omnibus Reconciliation Act of 1980, it included a provision for rural hospitals which allowed them to use the same beds for either acute or skilled care, depending upon need. This was referred to as the "swing bed" provision. The swing bed concept is excellent, with one major exception. Current regulations allow only small rural hospitals with less than 50 beds to participate. Because of this 50 bed limit only a few hospitals can participate. This ceiling was selected somewhat arbitrarily at the time, and it has become clear that it is just too low. The result of this low ceiling is that few hospitals can participate in the program, and therefore, this is the major reason why there are few skilled nursing beds in rural areas.

The only other way a hospital with more than 50 beds can provide skilled nursing care is to designate some of

their beds specifically for this purpose, and use them for nothing else. Because of this lack of flexibility and the current medicare reimbursement rate, most hospitals cannot afford to designate some of their beds as solely skilled nursing beds. However, if they could participate in the swing bed program, they could provide skilled nursing care.

The legislation which I am introducing today would raise the ceiling for rural hospitals from 50 to 125. This would allow more hospitals to participate in the swing bed program, thereby, helping to provide more skilled nursing beds at the local level where they are needed the most.

Rural hospitals provide a tremendous service to their communities. Their proximity to health care needs makes their continued service a priority. We all know of the problems that rural hospitals face. Many have an excess capacity of beds, and because of the current 50 bed ceiling for the swing bed program, these hospitals cannot provide this badly needed service by utilizing their empty beds for skilled nursing care. Clearly, it is urgent that Federal regulations be changed.

After discussing this problem with the health care community in my home State of Iowa we are convinced that this small change will have many benefits, and it has their wholehearted support. Rural Iowans, particularly the elderly, rely on rural hospitals to provide needed health care services. By raising the ceiling for eligibility for the swing bed program for small rural hospitals from 50 to 125 beds, we can help insure that patients are better served closer to home. At the same time, costs will be reduced by providing cost efficient skilled nursing care. Finally, rural hospitals will be aided in their continuing effort to provide access to the type of quality health care that local residents have come to expect, and indeed deserve.●

PUBLIC DEMANDS WE PUT OUR ECONOMIC HOUSE IN ORDER

HON. BUDDY MacKAY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. MACKAY. Mr. Speaker, during the August district work period I held town hall meetings in 20 cities and towns across my district in north central Florida. In virtually every one of those meetings, the message was the same—the need to get our economic house in order was the top priority—and that means reducing the staggering $200 billion deficits.

My constituents, and I have a very high percentage of retirees, indicated a willingness to share the burden of coping with the deficit—as long as that burden is applied fairly and across the board.

Several of my freshman colleagues and I are seriously concerned that with the diversions of Lebanon and Central America, no meaningful action on the deficits will occur in this session of the Congress. These international crises demand our attention, of course, but our domestic economic crisis is just as urgent.

Two positive approaches are available. I believe they will work well together.

First, I believe we should consider an across-the-board cut in allocations for discretionary programs, both defense and nondefense—the so-called 2-percent solution—coupled with the enactment of the revenue proposals currently being considered by the Ways and Means Committee. I am convenced that my constituents will accept such a program if applied across the board. Such a cut would yield significant deficit reductions and would result in a deficit smaller than under the President's budget.

Those deficits reductions will provide a sound point form which to begin a pay-as-you-go system such as the one proposed by our colleague from California, GEORGE MILLER.

Pay-as-you-go is based upon the fundamental principle that when the Congress creates new programs or expands existing ones, the final test is whether we have the courage to go to the American people and to ask them to pay the cost of these programs up front. Pay-as-you-go tells a President or a Member of Congress that when he proposes a new program, whether it is to fight the war on poverty or an expansion in defense spending, he must be willing to pay for the policy up front.

This is a new approach. In the past we have never had to set priorities because we were able to fund all of our priorities by spending the money, and passing the bill along to our children. What we are presently experiencing is a legacy of a failed economic policy written by both liberal and conservative spending.

I support this program as the framework for controlling spending and controlling the deficit. Pay-as-you-go is a budget process that all Americans can understand. Combined with the 2-percent solution, it will go a long way toward restoring our economy.●

IN A TOWN NEARBY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. MARKEY. Mr. Speaker, once again Secretary James Watt has told a joke that is not funny. Once again, Mr. Watt has demonstrated that his insensitivity and disrespect is not limited to the Nation's natural resources, but extends to his critics and his own colleagues alike. For Mr. Watt, intolerance and profound bigotry has no bounds.

Yesterday the Secretary insulted the respected members of his recently appointed Coal Commission by stating that its members included "a woman, a black, two Jews, and a cripple." With such a reckless statement, Mr. Watt has insulted and embarrassed all Americans.

This is the same Secretary that held a private Christmas party in the middle of Arlington National Cemetery. It is he who has questioned the patriotism of fishermen who want their fishing grounds to remain unpolluted. Mr. Watt has described American Indians as "failed Socialists." And he has divided people into two groups which he labeled "liberals and Americans."

With Secretary Watt in the Cabinet, it is no wonder that President Reagan has a minority gap, a gender gap, an environmental gap, and a credibility gap. Surely the time has come to create the Watt gap by arranging a temporary vacancy in the Office of the Secretary of the Interior to be filled by someone who is responsible and effective.

While the attention today is focused on Secretary Watt's most recent ill-considered remarks, I want to bring to the attention of my colleagues another statement Mr. Watt recently made which contained similar examples of intolerance and insensitivity.

On August 13, 1983, while the Congress was in recess, Secretary Watt made a speech to the General Council of the Assemblies of God in Anaheim, Calif. Although some of the speech was reported in various media stories, many Members were out of Washington in their districts and may have missed reading about this interesting oratory. Therefore, I am taking this opportunity to reprint the Secretary's speech in its entirety.

The speech follows:

"... IN A TOWN NEARBY"

Thank you for the prayer support you have given to my wife and me. We feel that support and are grateful for it. The President frequently requests the people of America to pray for the Nation's leaders because he, too, bears witness to the sustaining power that comes when the people of God pray. Thank you.

As Secretary of the Interior, I am responsible for the stewardship over one-third of America's land mass—750 million acres. The decisions we make are important for us now and for the generations yet to come. As we prepare for the 21st Century and beyond, we are deeply concerned about the environment and the management of our natural resources. We have made major changes in the way our natural resources are managed.

As a result, I am able to report that all the Federal lands are in better condition and better managed than they were when we inherited responsibility for them almost three years ago.

The natonal parks are now being restored—the national wildlife refuges are being improved and the coastal barriers, wetlands, forests, deserts and mountains are now under good stewardship.

As important as these responsibilities are, there is yet a more basic battle, a more important responsibility in which I am involved. The real struggle, the real fight, is over the form of government under which we will live and the form of government we will pass on to those of the 21st Century. Will it be a government that recognizes the dignity of the individual? Or will it be a government that elevates the institutions of a centralized authority above the rights of individual persons?

As we look through the pages of history, we will see that men and women have been engaged in a struggle that comes from their hearts. That struggle is a yearning for the right to live and associate and work as we want—to be free to govern ourselves and to protect our neighbors. It is a yearning that flows from the heart like a stream of life—a stream of life crying out for political liberty.

Out of the same pages of history, we see that it is excessive government that seeks to limit and destroy our political liberty—whether it is government by a dictator, a monarch, a warloard, a czar or the Gestapo.

Those same history books also tell us of another cry that comes from the heart—a cry that calls for the freedom to worship God, the freedom to assemble with those of like precious faith—the freedom to commit our lives to a doctrine and a belief in the one true God. This call for spiritual freedom also flows from the heart, like a stream of life.

Again, it is excessive government that seeks to oppress spiritual freedom, just as it oppresses political liberty.

These two streams of life—one calling for political liberty and one calling for spiritual freedom—have flowed through the ages. The history books are replete with the stories of successes and failures, but there is one glorious moment where these two streams have come together in the destiny that God provided. They have come together to form a mighty river called America. And, yet, here in America the same enemies of political liberty and spiritual freedom continue to use government in an effort to snuff out the flow of life from the hearts of men and women.

That is our battle today. It is a battle to enhance political liberty and spiritual freedom. It is a battle that will continue. It is a battle that will require us to be vigilant at all times. Freedom is not free.

One of the responsibilities I have as Secretary of the Interior is the privilege of caring for the Nation's memorials and monuments. In that capacity, I have become involved in the development of a United States Holocaust Living Memorial in Washington, D.C. In December 1982, I was asked to swear in new members to the U.S. Holocaust Memorial Council.

In preparing for the ceremony, I read the briefing books which alerted me to the fact that many of those to be present at the luncheon were survivors of the Nazi death camps. But nothing prepared me to meet one who has survived the atrocity of man against man. I struggled with my emotions. Words failed me, as I shook hands with Dr. Elie Wiesel, Chairman of the U.S. Holocaust Memorial Council, and also a survivor. To explain the impact, my wife and I shared with him this story told by a visitor to an underground church behind the Iron Curtain.

A Pastor was returning to his church after years of torture and deprivation in a Communist prison. When he entered the back of the room, the singing stopped. None would have questioned the silence, for his physical appearance was appalling—pitiful. With barely the strength to maneuver to the front, the Pastor turned to face the crowd; the silence deepened. No one moved. In suffering sentences, he greeted his flock and shared how Christ had strengthened him, had enabled him to endure. He thanked them for their prayers.

Exhausted, the Pastor concluded and painfully shuffled his way to the exit. The continued silence was embarrassing to the visitor. There had been no welcome. No sound. No applause. Yet all their faces were soaked with tears. At the appropriate time, the visitor asked why the congregation had not responded or even acknowledged the presence of the Pastor. With tears continuing to flow, the hushed answer came, ". . . what does one say in the presence of someone who has suffered so much?"

Dr. Wiesel nodded his understanding.

After the ceremony and the luncheon, Dr. Wiesel escorted us to the elevator. He was expressing his gratitude for the role the Department of the Interior was playing in providing a living memorial to the Holocaust. It seemed so little to do. In parting, I hesitated a moment longer as we shook hands and I admitted to Dr. Wiesel that I felt the impact of his survival deeply. Entering the elevator, I heard my wife say to him, "In the presence of one who has suffered so much, what can anyone say?" I turned to see the tears in my wife's voice meet those in his eyes.

I was but a child when the atrocities of Hitler raged through Europe. The meeting with Dr. Wiesel and the purpose of the U.S. Holocaust Memorial Council captured my interest. I started reading and thinking and reflecting on what was going on today in America and, in fact, the free world.

The story of the Holocaust is frightening. While is was historically and socially unique, the forces that created the Holocaust still exist. Other minority groups could be the subject of an attack on their spiritual freedom and political liberty.

The story does not start with the criminal torture, abuse, and destruction of a people. But, first with an attack on the moral and spiritual values of life. For religious rights are the basis for human rights.

The German people were conditioned to hate and be intolerant of the Jewish people before the methodic killing and destruction of human life began. Spiritual freedom and political liberty were not honored or protected. There was apathy toward evil and evil prevailed.

"Good people" lived in the towns nearby, but they did not get involved to stop Auschwitz. They did not concern themselves with Dachau or any of the other places of human destruction.

The apathy and noninvolvement of the "good people"—the church people—in the Nazi government activities of the 1930's made it easy not to smell the burning stench of human flesh in the 1940's.

Ignoring the educational process of discrimination in the 1930's allowed the minds of the "good people"—the church people—to be closed to the realities of torture, murder, and abuse of the 1940's. The surprise of the Hitler era was not that one man could be so evil, but that so many failed to do good.

How could the German people live with all the evidence that would point to the massacre of 6 million Jews? You wonder—how could it happen? How could people live in the town nearby smelling the stench and not do something about it? How could they see the thousands of peoples hauled by trains or marching through their towns never to return and not do something about it? How coud they live next door to people who worked in those installations of death without doing something about it?

And yet today, here in America, we see millions of Americans doing nothing about forces mounting in this land to deny us our life, our hopes, and our purpose. What is mankind without political liberty and spiritual freedom?

While it's easy to get indignant about the inhumane, the diabolical action of Hitler, we in America today are denying life to one and a half million aborted babies each year. Oh, there are a few people who protest—a few people who try to change the law, a few people who march and write letters—but where is the voice of the Christian church? Where is the Jewish community? What are the silent people doing while this destruction of human life is carried out? It is murder—let's call it murder.

Where is the social conscience of America? Where are the people who cherish and hold life so dear? In a historical perspective, we are the ones now living in the towns nearby just as those Germans were in the late 1930's and the early 1940's. We are blaming legislators, the Supreme Court, the hospitals. But it is we who have allowed the selfishness of America to demand the destruction of life for the convenience of the moment.

There are other issues in America where we see millions of silent people living in the towns nearby—not getting involved, not being committed, not standing for what is right. And, yet, as those issues continue their march, there is the erosion of our political liberty and spiritual freedom.

We should talk about schools and education. We all believe in education. It is critical to America. And, yet, the monopolistic public school systems have deteriorated year after year. Too many of our children are almost illiterate—boys and girls are graduating from high schools when they can't read sufficiently well to fill out an applicaton for a job. To many children have low moral values—school boards do not allow the teaching of right from wrong. We have allowed our classrooms to be taken over in some instances by secular humanists who believe that man and not God is at the center of all things and who do not share the fundamental commitments of America to assure political liberty and spiritual freedom.

What do most Americans do? Most Americans live in the town nearby and are too busy to be concerned with those political matters. We don't serve on the schoolboard, nor do we vote in the schoolboard elections. In too many instances, we simply surrender the right to run the schools to those activists who would seek to implement philosophies and programs that bring about the deterioration of our public school systems. Thus, our public schools become government schools weakening political liberty and spiritual freedom.

In the early days of the Republic, public schools were to be encouraged in America because we believed that all people were entitled to an education. The states carried out the responsibilities of seeing that all Americans had an opportunity for an education. And in that framework, we taught the values of America—we taught patriotism, we encouraged religious commitment. We started the day in many of our schools with the pledge of allegiance to the flag and a prayer to God.

And yet today, through actions of state legislatures, the United States Supreme Court, and the Congress of the United States, the right of the children to have organized voluntary prayer is denied. The fundamental values of religious teachings are denied. The teaching of patriotism that is critical to the survival of a national spirit and the continuation of a strong country is diminishing. And what do the parents of the children do? We live in a town nearby. We don't recognize the stench or the marching of the enemy.

Today, America is confronted with yet another controversy that threatens our very existence—the nuclear freeze movement.

The free people of the world do have an enemy—Communism. Many argue that the Communists don't seek to dominate and control the world—they argue that the Communist leaders want peace and can be reasoned with.

The facts are to the contrary. The atheistic forces of Communism proclaim that they will dominate and rule the world. Their relentless march of oppression hammers out their determination.

The spokesmen of the present nuclear freeze movement have failed to review history. In 1939, there was only one Communist country—Russia—accounting for about 7 percent of the earth's population. After the great victory in World War II, the Iron Curtain fell. Millions of people lost their freedom and liberty to a government of oppression. The hammering march took Albania, Bulgaria, Yugoslavia, Poland, Romania, Czechoslovakia, North Korea, Hungary, East Germany and Mainland China. All lost to the Communist forces in the late 1940's. Then came the loss of Tibet in 1951, North Vietnam in 1954, Cuba in 1960, Cambodia, Laos, and South Vietnem in 1975, and Afghanistan and Nicaragua in 1979. Add Mozambique, Angola, South Yemen, and Ethiopia to the list. As a result, the Communist governments now control more than a third of the world's population.

In spite of these historical facts, respected spokesmen call for a nuclear freeze that would give Communist forces throughout the world a clear advantage.

It is important that those of us who are evangelical and fundamental in our faith take a position on this moral issue and not surrender the political debate to the liberal spokesmen of the religious communities.

I do not intend to argue the merits. The proper conclusion, as seen from my perspective, is very clear. We must champion peace—and peace only comes with strength. We must never allow this great stronghold of spiritual freedom to agree to a freeze of its military capabilities at a level of inferiority.

In the last 50 years, the role of the government in our private lives has escalated in unprecedented dimensions. As the Government itself grows stronger, the citizen's participation in that Government grows weaker. With less involvement and a more dominating government, the threats to liberty and freedom are much greater.

It is time for renewal. It is time for recommitment. When I was a young boy, the common teaching was that, to be socially acceptable, you didn't speak about religion or politics. That is wrong on both counts. Unfortunately, that is still the way many in America are taught. As a consequence, we have a hurting Nation.

Let us come out of our silence. Let us be bold to stand. Let us dare to speak. We need to speak about the Judeo-Christian commitment of this country. We need to talk about our spiritual freedom and our political liberty. We need to get involved.

It is wrong for the Jews and the Christians of America to stay out of political issues. We must get involved if we are to fight for the fundamental freedoms, the fundamental principles and the fundamental commitments to faith. We must not abandon those principles which are based upon absolutes. There are absolutes in this world. And, to deny it is to deny God. Without God, this Nation cannot and will not survive, nor does it deserve to.

We must see to it that our people are active in community affairs. We can encourage their involvement by example, from the pulpit, with special committees, through education, with action groups or by other means. But we must be successful in involving moral people in politics and government activities. To live in America means every adult should be responsible for the course of our Nation.

We must see that the faithful are involved in the school system. We must see that the faithful are involved in private welfare and charity programs of this Nation. We must see to it that the faithful must be active in political activities—not as a church or synagogue, but as individuals who are aware of their spiritual freedom and their political liberty.

If the Christians and Jews are not also active in politics, they will lose that which is critically important to America. My challenge to the Cristians and Jews is to get involved—to be involved in politics—to make the decisions that count—and to do whatever is necessary to see to it that there is a balanced perspective as we seek to champion and defend those forces that would guarantee us our liberty and our freedom.

I am not indicating that there will, or should, be a monolithic voice. The strength of America is the pluralistic society that allows the several divisions in the Protestant Church, the Catholic Church and the Jewish community. We must even tolerate those who stand against all of the fundamental principles.

The same is true in the political world. Not every Christian will be committed to the same political resolution. But every Christian should be committed to a political resolution. In our democracy, the pluralistic society must be championed and protected. The worst option available to America is non-involvement by the spiritually inclined. For all legislation is based on moral values and moral values should be weighed by the fundamental teachings of the religious perspective.

To pretend that you may not mix religious and political activities is an hypocrisy that can no longer be afforded in this country.

The constitutional provisions were set up so that the state could not dictate the existence of a national church. Its purpose was to protect spiritual freedom and not put the force of government behind any one expression of religious activity. The objective was to protect a pluralistic society. It was never meant to exclude those who follow God. That constitutional principle has been prostituted severely by the enemies of spiritual freedom in an effort to curtail the expression of religious freedom. We must fight and resist in every possible way those forces which seek to limit our spiritual freedom.

My mind shifts back to January of this year, when my wife and I stood hand in hand in the Simon Wiesenthal Holocaust Memorial Center in Los Angeles. We studied the pictures on the walls of that memorial—pictures that portrayed the unfolding of the history of the hatred and discrimination that swept across Europe in the 1930's leading to the death and destruction of eleven million human beings—six million of them Jews. On one of the walls of the memorial is a picture of a survivor of a German death camp pointing with shame at pictures of the world political and religious leaders fo the 1930's and 1940's.

Below the picture of the survivor are the words which have been seared in my mind forever:

"Here is to the world that did not care. Those that had eyes but would not see; those that had ears but would not hear; those that had mouths but would not speak."

As I read those words, I renewed my life's commitment to the battle for spiritual freedom and political liberty.

Let it never be said of us that we would not see, or would not hear or would not speak. We must courageously defend those principles that are America. No price is too great.

Thank you.●

NO SELECTIVE EMBARGOES

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. EMERSON. Mr. Speaker, I am pleased today to offer a concurrent resolution stating it is the sense of the Congress that agricultural products should not be singled out to be embargoed by the United States. I have found this necessary due to the recent appearance of legislation that would, once again, place the entire economic burden of U.S. foreign policy decisions on our farmers.

Past selective embargoes have proven to be ineffective in the sense that they cause as many, probably more, hardships to ourselves as they do to the country being embargoed. In addition, the 1980 embargo did not make the Soviet Union any less belligerent anywhere in the world, especially Poland and Afghanistan.

By selling agricultural products to the Soviets we are, indeed, enhancing our own defense capabilities, because they are receiving perishable commodities and we are receiving hard currency from the Soviet economy that could, and probably would, otherwise be used to further strengthen their war-making capabilities.

Mr. Speaker, in a truly bipartisan nature, over 30 of my colleagues have joined with me to offer this resolution. We would certainly welcome any other Members who would like to join with us as cosponsors of this resolution.●

INTRODUCTION OF H.R. 3970, A BILL TO ESTABLISH A NATIONAL OFFSHORE OPERATORS SAFETY ADVISORY COMMITTEE

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. JONES of North Carolina. Mr. Speaker, I am today introducing, along with Mr. FORSYTHE, Mr. BREAUX, Mr. YOUNG of Alaska, and Mr. STUDDS, a bill to establish a National Offshore Operators Safety Advisory Committee to advise the Coast Guard on issues concerning safety in offshore oil and gas exploration and production activities. This bill is identical to a measure introduced in the 97th Congress by Mr. BREAUX (H.R. 6648).

Section 208 of the Outer Continental Shelf Lands Act Amendments assigned to the Coast Guard four separate responsibilities pertaining to the safety of oil and gas operations conducted on the Outer Continental Shelf (OCS). First, the Coast Guard, in conjunction with the Department of the Interior, is given a broad mandate to examine the safety regulations and technology available in the field of offshore energy development. Second, the Coast Guard must require the use of the safest practicable technology in the development of these energy resources. Third, it must regulate hazardous working conditions on the OCS. Finally, it is required, in consultation with the Department of Commerce and the National Institute of Occupational Safety and Health, to examine the safety of underwater diving techniques and equipment.

The Coast Guard's ability to fulfill these requirements depends on its ability to understand and work effectively with the offshore oil industry.

This legislation creates a forum through which the Coast Guard can meet with individuals who have expertise in offshore oil and gas development activities, to discuss safety issues. The Advisory Committee will be appointed by the Secretary of Transportation and will be composed of 13 members, selected according to the following criteria:

Two members will be from companies engaged in oil production;

Two members from offshore drilling companies;

Two members from offshore supply boat companies;

One member from an offshore rig construction company;

One member from a diving company;

One member from a company offering petroleum-related helicopter services;

One member from organized labor;

One member from an environmental organization; and

Two members from the general public.

This bill requires the Coast Guard to meet with the Committee at least once a year and to consult with the Committee before taking any significant actions affecting the safety of operations associated with offshore oil development.

The only Federal expenditures required by this legislation will be that needed for travel of Committee members and for clerical expenses.

The Coast Guard has worked well with advisory committees in other areas subject to its regulatory authority. The establishment of the advisory body recommended in this bill will cost the Coast Guard very little and will give that agency an opportunity to acquire on a regular basis the information it needs to carry out its legal responsibilities in the area of OCS safety. Accordingly, I hope that prompt and favorable action on the bill will be taken.●

H.R. 1234—A VITAL STEP FORWARD

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. GEPHARDT. Mr. Speaker, I believe this legislation is needed now to help preserve America's industrial base and to promote balance in international trade.

Some people wrongly admit that the conditions justifying this legislation no longer exist. They think that the recent rebound in auto sales and possible Japanese export restraint will take care of the problems that have prompted the bill. This bill is needed as much today as when comparable legislation was first introduced in December 1981.

Before the Congress convenes in 1985, the auto companies that dominate the U.S. market will make critical decisions about where they will locate parts production and assembly of new small cars. The consensus of industry experts indicates a rapidly increasing volume of imported small cars or their components. Thus, auto-related employment will continue to erode unless we take decisive action.

All auto companies with large volume sales here should be investing and creating jobs in the United States. Most Americans support local content according to recent polls by Lou Harris—57 percent favored, 39 percent did not—and by Garth/Penn Schoen—74 percent to 20 percent. Editorials by both Business Week and Automotive News have supported the concept of local-content legislation for the U.S. auto industry. Ichiro Shioji, president of the Japanese Auto Workers, has advocated for several years that Japanese auto companies make significant investments in countries where they have large markets, notably the United States.

Media attention focused upon increased auto sales and profits has led many to assume that employment in the industry is increasing significantly. But this is not correct. Increased imports threaten to continue to aggravate already high unemployment rates. Late last year the industry had only 506,000 production workers, as domestic vehicle sales plunged below 8 million. Between 1978 and 1982, auto sales dropped 39 percent and direct auto production jobs skidded 276,000, for a decline of 35 percent.

This year's sales recovery has restored only a quarter of the 1978–82 job loss. Sales in the first 8 months of 1983 amounted to an annual rate of 9.2 million, 29 percent below 1978. As a result, the latest employment figures—577,000 jobs in June—indicate employment still 26 percent below 1978.

Domestic vehicle sales are running almost 4 million units below 1978 due primarily to a weak economy—in earlier years, domestics' sales were also hurt by the failure of the U.S. companies to anticipate the rapid change in the auto market toward vehicles with higher gas milage. Domestic auto sales would now be running 1 million units higher, however, if imported vehicles had not increased their share of the market from 15 percent in 1978 to 24 percent this year. This increase has caused serious injury to the domestic auto industry.

Productivity increases will largely wipe out the potential for increased job opportunities with increased sales. In fact, over the last 2 years auto productivity has improved an average 4.3 percent. The imperative to improve competitiveness will insure that auto's traditionally high rates of productivity growth will continue. With sales growth and productivity increases each offsetting each other, auto-related employment will decrease with any further increases in import penetration.

Industry experts predict that imports of vehicles and parts will climb sharply in coming years. By 1990, the import share is predicted to be 35 to 40 percent by Commerce Department's auto analysts, 40 percent by Merrill Lynch Economics, 35.8 percent by Chase Econometrics, and as much as 65 percent under one scenario considered by a National Academy of Engineering panel. A General Motors

spokesman predicted last fall that the import share could reach 40 percent as soon as 1985—the year after GM expects to begin receiving small imported cars from Isuzu and Suzuki.

In the case of parts, the evidence points to a similar escalation. When the accounting firm Arthur Andersen surveyed management at auto companies this year, it found a consensus that the percentage of imported parts would rise to the range of 20 to 25 percent by 1990.

The provisions of H.R. 1234 are designed to assure a healthy and competitive domestic auto industry. The bill recognizes the critical power of a few giant manufacturers to decide where production will take place to supply the U.S. market. Under H.R. 1234, all companies with annual sales here of over 100,000 vehicles would be required to locate some production here, hire workers here, and buy auto parts here. After a 1-year grace period, the requirements would be phased in over the next 3 years. The content requirement would be based on a vehicle manufacturer's trade balance in automotive products. For example, a 90-percent content requirement would permit a company to have net automotive imports—imports minus exports—worth up to 10 percent of its wholesale auto sales here. A company's content requirement would be based on a smooth scale that starts at 100,000 vehicles, then rises until 900,000 where it levels off. From model year 1987 onward, the content percentage—up to a maximum of 90 percent—would be derived by dividing sales by 10,000. Thus, sales of 355,000 entail a 35.5-percent content requirement. A "safety net" provision prevents a company from reducing its content ratio by more than 10 percent below the 1983 model year. Thus, AMC/Renault which is currently about 80-percent domestic content could not fall below 70 percent.

By 1990, H.R. 1234 would create or preserve more than 1 million jobs, including 193,000 auto jobs, and 456,000 supplier jobs. At stake is whether the United States will continue substantial parts production and assembly of smaller vehicles. Our current policy of accepting 1-year-at-a-time commitments from Japan to limit exports to the United States cannot give us much assurance about the longer term. The auto companies are making decisions now that will determine the location of production several years from now. Plans being made by GM during the last 2 years of restraint do not bode well for our production in this growing segment of the market. According to GM's announced plans, its U.S. dealerships will soon sell annual imports of 90,000 Suzukis and 200,000 Isuzus, plus 200,000 U.S.-assembled cars with 50-percent imported value from Toyota. Ford is reported to be considering the assembly of subcompacts in Mexico with major parts from Toyo Kogyo in Japan and selling them here.

The number and significance of supplier jobs must be emphasized. The auto industry is among the major purchasers of steel (21 percent of U.S. production) malleable iron (50 percent), synthetic rubber (60 percent), zinc (34 percent), copper (13 percent), primary aluminum (12 percent), and high tech industrial robots (30 percent). Continued decline in the U.S. auto production base will cripple those industries as well.

U.S. automotive production currently amounts to about three-quarters of the value of new cars and trucks sold here. Imported vehicles and parts in excess of U.S. automotive exports account for the remaining quarter of our market. By requiring U.S. production and purchases by all companies with large sales here, this bill would stabilize the future ratio of U.S. production to sales at roughly three-quarters. By the end of the decade, in the absence of the local-content law, U.S. automotive production as a share of the market can be expected to fall to about one-half of U.S. auto sales. A fall in U.S. production from three-quarters to one-half of the auto market would eliminate the jobs of more than 193,000 auto workers—and at least 5.5 times that many outside the auto industry.

To stabilize U.S. auto production relative to the market, the bill addresses imports of both vehicles and parts. Instead of rising to their predicted 40-percent share of the market, many vehicles which would otherwise have been imported will instead be built or assembled here. The overall domestic value added of foreign companies would rise to roughly 50 percent of the value of their sales here, instead of remaining at about 15 percent. In addition, net foreign sourcing by the largest U.S. companies would be capped at 10 percent of their sales here, and prevented from rising to an otherwise probable 20 percent by 1990.

Stemming the tide of imported vehicles and parts will not cost this economy jobs as some have alleged. Some analysts have focused on particular jobs in trucking, at dealerships, and on the docks. Since the bill means that companies would be making more cars here and importing fewer, the total number of jobs in trucking parts and vehicles should increase. Employment at dealerships should not be affected by where the vehicles are built. The 7,000 auto-related jobs on the docks should be little changed since increased exports and imports of parts should largely offset the effect of lower vehicle imports.

Still other critics who have used economic models to estimate a net job loss have tended to assume: (1) that workers and capital equipment are always fully employed and infinitely flexible; and (2) that if one job is destroyed, another pops up to take its place. Under those conditions, anything the Government does will only make things worse. In the real world, however, 10.7 million people are looking for work—2.8 million more than in July 1981. Moreover, the auto import share is expected to soar while plans by the U.S. auto companies call for increased foreign outsourcing and reduced U.S. jobs. If the auto industrial base is allowed to continue spiraling downward, the job loss there cannot possibly be offset by additional exports in other industries.

Enactment of H.R. 1234 would have minimal adverse effect on prices and quality, and potentially a positive effect on quality of the vehicles available to the American consumer. Studies which project significant price increases have assumed a major reduction of market share by foreign companies. But evidence from other countries indicates that the auto companies use every effort to maintain market share. Thus, rather than walk away from this market, all the major auto companies would invest and purchase here in an attempt to maintain and increase their market shares. With such competition, prices will be kept in line.

The price of new cars has risen less than the overall consumer price index in each of the last 5 years. The auto industry can sustain lower than average price increases because of its remarkable productivity growth. Over the last 25 years, the industry has averaged productivity increases of 3.2 percent annually—well above the average for all of manufacturing. Indeed the industry's productivity has climbed an average 4.3 percent over the last 2 years.

Product quality is justifiably of utmost concern to consumers. The U.S. companies have been making great strides in improving what is known as the fits and finishes aspect of quality, and we sense a serious commitment by corporate management to continue progress in this area. If anything, that commitment would be strengthened after more foreign companies increased their investment here. At the same time, American-made vehicles have been and would continue to be the leaders in other aspects of quality such as durability and safety.

A domestic content law would also retain competition among the world's auto companies to provide the American consumer with a wide variety of innovative products built with the most efficient technologies available. The U.S. producers would continue to be pressured by the discipline of the design and engineering innovations of foreign-based manufacturers.

GM, Ford, and Chrysler have domestic content levels that now exceed the maximum 90-percent content level. In recent years, the big three have been making long-term commitments that will increase their foreign outsourcing in coming years. If they are free to continue to make such commitments, they will fall substantially below the 90 percent floor in the next several years.

As noted above, AMC/Renault has a domestic content level above that which would be required by the bill.

VW and Honda operate auto assembly plants in Pennsylvania and Ohio, respectively. Both can attain the requisite domestic content by assembling a sufficient number of vehicles with enough U.S.-made parts. VW already does that by operating two parts plants in Texas and West Virginia and purchasing many other parts here.

Nissan—maker of Datsun—has begun assembling trucks at a site in Tennessee which has room for expansion. Japanese press reports indicate that Nissan management is now seriously considering an additional car assembly plant next to the truck plant. Nissan and affiliated Fuji—maker of Subarus—will have to go beyond that to achieve the content percentage necessary to maintain its current sales level.

As the company that has made the least effort to build vehicles here, Toyota would be the most pressed by enactment of this bill. As early as 1978 in private meetings in Japan and public USTR statements in 1979, U.S. trade officials have made clear that Japanese auto companies should be investing here; 3 years ago, Toyota commissioned three investigations of the feasibility of investing in the United States and held meetings to discuss a joint venture with Ford. Toyota's recent agreement to assemble cars in a joint venture with GM inaugurates only the first of the requisite steps for Toyota to achieve the appropriate level of U.S. content in its cars.

Finally, Mitsubishi—selling through Chrysler's dealers and independently—and Toyo Kogyo—maker of Mazdas—also currently make more than 100,000 vehicles sold in the U.S. market each year. At their current sales volume, each could meet the content percentage by embarking on substantial parts procurement or production here.

The auto industry has been a centerpiece of the industrial strategy of most industrial countries. World trade in automotive products today bears no resemblance to the textbook world of free trade. In fact, H.R. 1234 seems quite moderate when compared to the measures imposed by the governments of all other major auto-producing nations, including Japan, Germany, Sweden, Britain, France, and Italy.

H.R. 1234 applies to a single industry in serious import jeopardy. Moreover, it phases in over a reasonable period. Perhaps most importantly, in this case the United States would not be firing the first shot but would be the last to raise a shield. Finally, it does not isolate the American economy from involvement with other nations, but integrates foreign companies into the U.S. economy.

Other than American companies, the few companies substantially affected by this bill are based in Japan. What is the likely response of those companies and the Japanese Government? In the first place, Japan has never brought a GATT complaint, much less retaliated, against the dozens of countries which restrict Japanese auto exports much more stringently than would H.R. 1234. Indeed, to achieve or maintain their market presence, Japanese auto companies have invested in many of those countries.

As a practical matter, Japan has a very limited capacity to take action against the United States even if it were to go to the GATT and prevail. The GATT procedures require that Japan first meet with the United States to try to iron out difficulties before a formal complaint is filed. If Japan were to file a formal complaint, the United States could file countercharges against the auto policies of Japan.

For many products, the United States is Japan's predominant supplier; and of those imports for which Japan does have alternative sources, those source countries have auto policies far more restrictive to Japanese auto imports than H.R. 1234. Australia, Argentina, Brazil, Indonesia for foodstuffs and raw materials; European countries for manufactured goods. Japan could retaliate against modest U.S. auto content legislation only by buying less from us and more from countries with auto policies which limit their exports even more severely than would H.R. 1234.

We strongly believe that heightened international economic tensions warrant our concern. The experience of the 1930's has important parallels and lessons. At that time the United States had extremely high real interest rates and the world economy was experiencing volatile exchange rates and general economic decline. These conditions were primarily responsible for shrinking trade then and are again today. Our international economic distress calls for an international commitment to reflation, repudiation of tight monetary policies, a more orderly exchange rate regime, and expanded credit to countries in balance-of-payments problems. These, not doctrinaire free trade, were both the policy prescriptions of Keynes after the debacle of the 1930's and the hallmarks of the post war boom in the international economy.

The United States must decide whether to leave the fate of its industrial structure to the policy decisions of foreign governments or to adopt its own policy. Trade with Japan poses the most serious challenge because of its size, aggressive exports, and ambitions in key industries.

Contrary to many reports in the American media, we do not have trade problems because the Japanese worker is somehow inherently superior to the American worker. With the proper equipment and working environment, the American worker can produce as well as or better than the competition.

The remarkable success of Japanese exports instead depends heavily on the dualism of the Japanese economy. On the one hand, the export sector has technological parity with its competitors in other advanced countries. On the other hand, most other sectors of the Japanese economy have very low productivity which brings down the pay scale of the entire country. In a wide open market, the Japanese industry will displace the counterpart U.S. industry by merely keeping pace with our technology. In other words, despite the best efforts of the U.S. industry, Japanese export industries have a critical edge due to the low productivity and concomitant lower pay of the Japanese economy as a whole.

The Japanese Government has used credit allocation, import restrictions, subsidies, corporate restructuring, et cetera, to assist civilian industries in achieving technological parity and large scale production. To one degree or another, the successful Japanese export industries—including auto—have benefitted from such targeting measures.

The Japanese export sector has also benefited from the key resources and skilled manpower that are more available to it in part because Japan devotes a much lower percentage of its economy to defense than does the United States.

The case of Japan flatly contradicts the thesis that potentially overwhelming import competition is the sine qua non for keeping an industry on its toes in technology and investment. Japan has maintained domestic competition while holding imports at bay.

The exchange rate of the Japanese yen is now undervalued for trade purposes due to capital flows out of Japan. Japan's protected low-interest capital market coupled with high U.S. interest rates accounts for this yen-depressing outflow. According to experts both here and in Japan, measures can and should be taken to raise the value of the yen by 20 percent or more. An appropriately valued yen would raise the landed cost of a $5,000 Japanese vehicle to $6,000 wiping out two-thirds of the often-claimed $1,500 Japanese advantage.

Enactment of H.R. 1234 would put Japanese economic policymakers on notice that they can no longer expect U.S. passivity when Japanese industry adds substantial capacity with the potential to displace hundreds of thousands of U.S. jobs.

We recognize that responsibility falls on labor and management in the industry to take resolute action. Progress is being made. Despite an enormous drop in revenues, the auto companies have been plowing $9 to $10 billion a year into new products and equipment. The companies are also improving product quality.

Unfortunately, these actions will not suffice to assure the stability and vitality of this industry. If the U.S. Government does not take action to stabilize the long-term employment in our auto industry that is threatened with continued disastrous erosion for the remainder of the decade.

The time has come for the U.S. Government to decide that it will maintain a competitive auto industry. That decision would bring the United States into conformity with the pattern of auto policies around the world. That policy is supported by a wide majority of the American people.

We believe this legislation is needed now to help preserve America's industrial base and to promote balance in international trade.●

HEALTH CARE FOR CERTAIN NOAA EMPLOYEES

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. JONES of North Carolina. Mr. Speaker, today I am introducing H.R. 3968, a bill to insure continued health care for eligible employees of the National Oceanic and Atmospheric Administration. The bill is cosponsored by the gentleman from New Hampshire (Mr. D'AMOURS) and the gentleman from New Jersey (Mr. FORSYTHE).

As a result of the phaseout of Public Health Service (PHS) hospitals (Public Law 97-35; 42 U.S.C. 248b) and related fiscal adjustments, the National Oceanic and Atmospheric Administration (NOAA) must obtain new administrative authority to insure that NOAA employees who are commissioned officers or work on NOAA ships, entitled to health care from the PHS, are able to continue to have this care provided on a contract basis. This bill will assure that eligible NOAA employees continue to receive necessary health care services by: One, authorizing NOAA to provide and budget for their care; and two authorizing this care to be provided in contract facilities.

Section 326 of the Public Health Service Act, as amended (42 U.S.C. section 253), and section 1 of Public Law 88-71 (42 U.S.C. section 253a), require the Public Health Service to provide medical and dental care to active duty and retired commissioned officers, ships' officers, and members of the crews of vessels of NOAA as well as to their dependents. Under the provisions of chapter 55 of title 10, United States Code, the Secretary of Health and Human Services is responsible for providing medical and dental care to active duty and retired members of the corps of NOAA—as successor to the Environmental Science Services Administration—as well as their dependents and survivors. This care has been provided in part through PHS hospital and clinics, and in part through PHS contract services.

In the past, the PHS budgeted for the cost of providing to NOAA personnel this health care. Subsequent to passage of Public Law 97-35, the Omnibus Budget Reconciliation Act of 1981, phasing out PHS hospitals and other facilities, the administration determined that fiscal accountability would be improved if NOAA and other affected agencies such as the Coast Guard each made provision in their budgets for health care services for that agency's personnel.

For fiscal year 1983, NOAA received an appropriation for these health care services as part of the joint resolution for further continuing appropriations for fiscal year 1983 (Public Law 97-377). Pursuant to the Federal Economy Act and a memorandum of understanding between NOAA and the PHS, the PHS is now providing health services to eligible NOAA personnel on a reimbursable basis.

Section 1 of my bill would provide permanent authority for the Secretary of Commerce to budget for dental and medical care to which NOAA personnel are entitled under titles 10 and 42, United States Code. The Secretary of Commerce could provide this care by contracting directly with private facilities or by reimbursing another agency—including PHS—qualified to provide care either directly or by contract with private facilities. Section 1 of the bill changes no basic entitlements and is virtually identical to authority given to the Coast Guard by the Coast Guard Authorization Act of 1982 (Public Law 97-322, title I, section 115(c); 14 U.S.C. 93) to meet the same need.

Section 2 of the bill contains technical amendments to clarify that NOAA personnel eligible for the dental, medical, and hospitalization care specified in 42 United States Code 253a are entitled to this care without regard to whether care is provided in PHS facilities or by contract with private hospitals and facilities.

Section 2 provides relief to approximately 165 career NOAA employees—or retired NOAA employees—and dependents whose hospitalization benefits were inadvertently terminated by closure of PHS facilities and by interpretations of 42 United States Code 243a that hospitalization at "facilities of the Public Health Service" does not include private facilities providing services to the PHS by contract.

Retired ships' officers and crewmembers, and eligible dependents of active duty and retired personnel have been entitled to medical and dental treatment and hospitalization at PHS facilities since 1939. On July 19, 1963, Public Law 88-71 (42 U.S.C. 253a) limited eligibility for these services to employees retired on or prior to that date or in continuous active service from July 19, 1963, until retirement—and their dependents. Retirement health care for persons employed after July 19, 1963, is provided through the Federal employees health benefits program.

The impact of loss of hospitalization therefore falls on a small group of older Federal employees who have been either retired or in continuous active service for at least 20 years. Because they relied upon the entitlements of 42 United States Code 253a, these personnel have foregone other health care options and they are now without feasible health care alternatives. As a group, they are not members of a "uniformed service" for the purpose of the health care entitlements of chapter 55 of title 10, United States Code; as Federal employees they are not eligible for social security medicare. Nor are they eligible to participate in the Federal employees health benefits program because of restrictions regarding participation prior to retirement (5 U.S.C. 8905); and private health care coverage is not financially feasible for persons of this age.

I do not believe that Congress intended to eliminate the entitlements of 42 United States Code 253a by passage of Public Law 97-35. By contrast, Congress specifically repealed health care entitlements at PHS facilities for private merchant seaman. Public Law 97-35, section 986. Under the circumstances, the Federal Government has an obligation to provide hospitalization and other specified services to these employees and their dependents.

To achieve this objective, the bill eliminated from 42 United States Code 243a references to "facilities" of the PHS, thereby enabling the PHS to provide hospitalization and other entitlements, by contract with private facilities. NOAA would reimburse the PHS for services provided, pursuant to the existing memorandum of understanding between the agencies regarding health care services for NOAA personnel. Because of the small number of personnel involved, NOAA does not anticipate a need for appropriations in addition to those requested in the

NOAA fiscal year 1984 budget submission in order to provide these health care services.

The legislation affects approximately 385 members of the commissioned corps on active duty and 130 retired officers—plus their dependents and survivors. In addition, approximately 600 to 650 wage marine employees—20 to 30 percent of whom are temporary employees—are entitled to health care while employed on active duty by NOAA.●

MARY PEREZ IS HONORED FOR 41 YEARS OF SERVICE TO SAVANNA SCHOOL DISTRICT

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. PATTERSON. Mr. Speaker, I invite my colleagues to join me in commending a constitutent of mine who has been a positive influence in the lives of many students in the Savanna School District.

Mary Perez is being honored on September 28, 1983, for her 41 years of continous service as a school custodian. The Mary Perez School was dedicated on November 29, 1967. This was the first school in California to be named for a classified employee.

Miss Perez has exemplified the spirit of the Savanna School District to both fellow workers and students. Mary Perez has always been a loyal, efficient, and conscientious employee. Her dedicated efforts have earned her the highest respect from all of those who have had the pleasure of working with her.

On behalf of both the students and fellow employees of Savanna School District, Mary Perez is to be highly commended. Mr. Speaker, it is with pride that I ask my colleagues to join me and my community in honoring Mary Perez for her 41 years of loyal service.●

DEFICITS, ONE-HANDED ECONOMISTS, AND CELESTIAL TOWERS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. LaFALCE. Mr. Speaker, recent Washington press has focused on another one of those all-too-common disputes between the Nation's chief administration policymakers. This time we learn that the President's top economic advisers—both men with admirable credentials for figuring out what our financial markets are up to—are quite publicly contradicting one another about the economic impact of record high budget deficits, particularly the impact of the deficit on interest rates.

Treasury Secretary Don Regan, who often jokes that he understands Harry Truman's wish for one-handed economists who would not be tempted to respond to questioning with "on the one hand" and "on the other hand" kind of advice, was caught in a classic case of "the right not knowing what the left is doing" when he announced last week that high deficits are not necessarily linked to high interest rates—an announcement that came on the same day that Marty Feldstein, Chairman of the Council of Economic Advisers, argued persuasively that "the reason for the very high level of long-term real interest rate is undoubtedly the unprecedented level of the budget deficits that are now predicted for the years ahead." For Mr. Regan, who has been contradicted by most professional economists and a barrage of would-be analysts, the dispute with Mr. Feldstein may be an embarrassment. For the country, it may be much worse because the disagreement reflects the kind of divisiveness in the administration that is resulting in a dangerous paralysis on the deficit issue.

Wthout going through the entire excercise of projecting budget deficits in the coming years, the scope of the problem is indicated by the fact that current projections for fiscal year 1984 show that we will be carrying a deficit of close to $200 billion and a public debt of $1.6 trillion, or nearly $6,000 for every man, woman and child in the country. Over the next 5 years, 53 percent of America's savings will be absorbed by the Government in financing the deficit. It does not take a professional economist to understand, as Mr. Feldstein has pointed out, that getting the public to finance the deficit by purchasing Government securities "requires a rise in interest rates and it is this rise that is reflected in the current high real interest rates."

Because we are to be plagued with high deficits in years to come, we are also risking the economic recovery now under way. Recovery traditionally results in increased credit demand from the private sector—businesses need money for expansion and capital equipment, and consumers borrow to finance those delayed purchases. If this recovery proceeds in a traditional manner, we can expect that at the minimum private financing requirements next year will clash with the needs of the Government in financing its debt, thus pushing interest rates up as the demand for credit goes up. We may see a worst-case scenario where Government demand for credit crowds out private borrowers who—unable to afford credit—reduce purchases, expansion, and capital investment. A hint of those problems has already been seen. The prime interest rate has risen from 10½ percent to 11 percent, retail sales dropped in July, and the housing boomlet has come to a halt. real interest rates—the rate of interest after adjustments for expected inflation—remain unacceptably high with little hope of a reduction without action on the deficit, says Mr. Feldstein, and it is real interest rates that determine activity in the credit makets.

Secretary Regan, who obviously disagrees with this assessment, said that "Economists who continue to claim that deficits make for high interest rates should climb down from their celestial observatories and acquaint themselves with terrestial fact." Even if one can admire the Star Wars imagery, it seems to me that terrestial fact should take into account the danger that both high deficits and high interest rates can pose to our economy. The Treasury Secretary's pooh-poohing of this potential harm is unhealthy in its simplicity, and it is unhealthy in its impact upon deliberations within the administration. If the Secretary of the Treasury buries his head in the sand, chances are that the President will do likewise.

President Reagan is in danger of abrogating his leadership on this important issue because he is not willing to discuss the possibilities. Digging his heels in on the defense spending issue, opposing revenue increases except for the politically unpopular standby tax proposal and avoiding further discussion of uncontrolled entitlement spending, the President has built for himself a celestial observatory that makes inaction almost a certainty.

In my view it is not the number of hands one finds on an economist, or the height of the tower they inhabit that counts. What does matter is that the President and his appointed officials do all that they can to assess dangers and opportunities in the land of reality.●

RECENT BOOK "CENTRAL AMERICA IN CRISIS"

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. LUJAN. Mr. Speaker, as each of us attempt to better understand the complex social, economic, and political issues which frame our relations with our neighbors in Central America, let me call to your attention a recent book, "Central America in Crisis," published by the Washington Institute for Values in Public Policy. It very usefully addresses this controversial subject and region, and serves as an excellent background reference to the current situation.●

WIN COTTRELL'S REMARKABLE ABILITY TO INSPIRE OTHERS

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mrs. BOXER. Mr. Speaker, on September 10, 1983, the San Francisco Gray Panthers held a luncheon in San Francisco, Calif., to honor one of the city's most committed social activists: Win Cottrell.

During the past several years, Win Cottrell's name has been closely connected with a wide spectrum of organizations and movements committed to achieving social and economic justice. Win has served on the board of directors of such groups as the San Francisco Gray Panthers and North of Market Planning Coalition, and has been an active participant and member of such groups as the Legislative Council on Older Americans, the Older Women's League, the Sierra Club and Options for Women Over 40.

What has made Win Cottrell special over the past several years is more than her activism; rather it is her ability to inspire others to become activists themselves. Hearing Win speak at a demonstration, at a legislative hearing or even a small Gray Panther committee meeting has a stirring effect on those present. People could sense the feelings of justice and anger in Win's voice, and became convinced that if this older woman could give her life for what she believed in, then they certainly could as well.

It would take volumes to detail all of the battles that Win Cottrell took part in over the past years in San Francisco. Her leadership in the Tenderloin community's battle to defeat the construction of three luxury hotels within its borders would surely be near the top of the list; so would her efforts to improve conditions in local nursing homes. The essence of Win's commitment, however, is that, to paraphrase Steinbeck's description of young Tom Joad: Wherever there is a battle for justice, Win is there. Wherever there is active resistance by the poor to abusive treatment by the rich, Win is there. And whenever the young and old unite in a struggle to preserve their homes and community, you can be sure of one thing: Win Cottrell will be there.●

TOM CARVER "MAN OF THE YEAR" BY SALVATION ARMY IRONBOUND BOYS AND GIRLS CLUBS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. RODINO. Mr. Speaker, it is a great privilege for me to recognize Mr. Tom D. Carver, who has been selected as 1983's "Man of the Year" by the Salvation Army Ironbound Boys' and Girls' Clubs in Newark.

Mr. Carver, an executive with the Port Authority of New York and New Jersey, is being honored for his distinguished service to the Ironbound community. He has been active in a number of civic activities for many years, and I am very pleased to see him being cited by such a fine organization for his outstanding work.

His long and distinguished career in airport services includes positions as assistant to the director of aviation, manager of the International Arrival Building at John F. Kennedy Airport, supervisor of aviation public services, and as a community representative with the port authority. He is presently manager of Airport Services Division at Newark International Airport. An attorney, Mr. Carver is a former president of the Ironbound Manufacturers' Association.

The Salvation Army Ironbound Boys' and Girls' Clubs and Senior Citizens will present Mr. Carver with the "Man of the Year" Award at a dinner on September 27 in Newark. I wish them the best of luck for a successful event, and send my congratulations to Mr. Carver on receiving this honor.●

BENIN, TOGO OFFER CONTRASTING PICTURES

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. AuCOIN. Mr. Speaker, this is the fourth in a series of six recently published articles on sub-Saharan Africa written by Nicholas D. Kristof, a Rhodes scholar from Yamhill, Ore.

(By Nicholas D. Kristof)

COTONOU, BENIN.—The only thing that flourishes here is poverty, and that abounds. Little children wander naked or half-clothed in the dirt streets, their stomachs bloated from malnutrition, and haggard old women sleep on the ground, their bare breasts withered from the incessant suckling of their many children.

Less than 100 miles away, in Lome, Togo, the children—adequately fed, clothed and scrubbed—file along the sidewalk and disappear inside their schools. People are still poor, but vigorous economic development has dulled the keenest edge of poverty.

The difference is striking: from wrenching destitution to getting by. The intriguing point is that this difference in quality of life mirrors a difference in economic systems. Benin is a Marxist state, sometimes called the "Cuba of West Africa." Togo is a remarkably competitive, capitalist state.

It might be tempting to chalk up a point for capitalism and assume that Togo prospered because it paid homage to Adam Smith rather than Karl Marx. There is some truth to that, but the picture is more complex and also reveals some warts on Togo's system—principally political repression.

If a political scientist or economist were looking for two countries with which to experiment, he could hardly do better than Togo and Benin. Both countries are narrow slivers running north from palm-lined beaches on the Atlantic Ocean, situated between Ghana and Nigeria. Both are former French colonies that received their independence in 1960 and then went through a succession of governments.

But Togo since 1967 and Benin (formerly Dahomey) since 1972 have had the same leaders, and they have followed diametrically different paths of development. It is as if an ecomomics faculty had designed the experiment: Take two very similar countries, allow them to develop in fundamentally different ways, and see what has happened 10 years later.

In Benin, not much has happened. Statistics here are more or less pulled from a hat, but the World Bank calculated that in the 1960s and 1970s, per capita income grew by only 0.6 percent per year. Life expectancy is thought to be about 46 years, and adult literacy is still only about 11 percent.

The economy has stagnated, foreign investors have shield away and agriculture has suffered so that less food is produced per inhabitant now than a decade ago. About the only thriving business in Benin is smuggling goods into Nigeria. Consumer goods arrive at Benin's port and then are smuggled through the long and porous border with Nigeria to avoid high customs duties.

Despite posters and banners covered with revolutionary rhetoric and avowals of commitment to Marxism-Leninism, Benin's pink hue seems to be fading. The government of Lt. Col. Mathieu Kerekou seems to want to warm its relations with the West and move more toward a free-market economy. A local French saying calls it "Eating on the right and thinking on the left." It may have something to do with the oil recently found offshore.

Togo doesn't have oil, but it nonetheless has emerged as one of West Africa's few success stories. Its economy has averaged nearly 5 percent annual growth in the last two decades, and tremendous strides have been made in health, education and the economy.

The key to Togo's success has been its reliance on a free-market system and its thriving private sector. The country has no significant export or import restrictions, and foreign investment is encouraged. A free port, industrial zones and tax incentives lure foreign business, and tourists have been sought for the magnificent beaches. The only drawback of the beaches is that they serve conspicuously as public toilets.

Ironically, Togo's boom has permitted massive expenditures for human development, so that even by the Marxist standards of Benin, Togo has done better. The number of inhabitants per physician has dropped from 35,000 to 17,000 since independence; in

Benin, the number increased from 23,000 to 26,000. Adult literacy in Togo has approximately doubled in the last 20 years; in Benin, the percentage of literate adults declined slightly.

Much of the government revenue—more than a quarter of the total national budget—has been reinvested in education in Togo. Togo has one of the highest primary school enrollment rates in Africa, while Benin's enrollment rate is below the average even for sub-Saharan Africa. At independence, in both Benin and Togo, 2 percent of the potential students attended high school; now the figure is 12 percent in Benin and 25 percent in Togo.

In short, Togo has been able to afford improvements in the standard of living, while Benin has been unable to provide such services even though it ostensibly is the government of the people.

But if Togo's economic system has achieved wonders, the progress has not seeped into the political system. Both Benin and Togo are essentially police states run by military dictators.

"Both countries are very much in the trappings of Hitler youth groups," said one diplomat with experience in both Lome and Cotonou, "but the personality cult is greater in Togo."

Togo's president, Maj. Gen. Etienne Gnassingbe Eyadama, is perhaps the only head of state to have been resurrected. It happened in 1974 when his plane crashed, killing four passengers but leaving him unscathed. Eyadama re-emerged seven days later in Lome, dressed in white. The date of his reappearance is a national holiday, and a shrine has been built around the wrecked plane, which now has been pulverized to make it appear that no one could possibly have survived the crash.

If Eyadama and his style of government are a blemish on Togo, the economy is a beauty mark. And while there are some differences between it and Benin—Togo's greater phosphate resources, for example—if ever it were fair to compare two countries, it is fair here.

Togo has moved ahead by every measure, and, like Africa's other success stories—Malawi and Ivory Coast, among others—it is ruthlessly capitalist. Maybe the best indications of its success are the signs that Benin's government wants to make a right turn and move closer to Togo's model.●

DIXBORO UNITED METHODIST CHURCH CELEBRATES 125TH ANNIVERSAY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. PURSELL. Mr. Speaker, on September 24 and 25, the Dixboro United Methodist Church in Dixboro, Mich., will celebrate its 125th anniversary.

The picturesque, New England-style church, completed in 1858 is listed in the National Registry of National Buildings and Places. Construction on the original church took 1 year and cost $2,241. Two more additions have been made to the church, representing the members' devotion. In 1951, members and friends donated over 6,000 hours to help build the first expansion.

Since World War II there has been a steady influx of new members from the nearby cities of Ann Arbor, Ypsilanti, Plymouth, and Canton. Today the church has over 377 members and can boast that at least 7 of its members have either entered or are currently pursuing studies toward ordination.

The church will celebrate its anniversary with a variety of ceremonies, including the recreation of a play depicting the first meeting of the church's board of trustees in 1857.

In closing, I would like to congratulate the Dixboro United Methodist Church and its members on this historic occassion, and wish them another 125 years of continued success.●

A NEW COURSE FOR AMERICAN EDUCATION

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. MAVROULES. Mr. Speaker, as more and more attention is focused on education and the Nation's public schools, I am becoming increasingly convinced that we as a nation are facing a serious crisis.

Teachers, parents, administrators, and students alike have expressed their disappointment with the growing decline in the quality of education presently offered in a majority of our country's public schools. We are embarking on an era that will undoubtedly confront us with a great many new and profound challenges. New technological and scientific developments are unfolding rapidly in an attempt to remedy some of our already existing social and economic problems. I feel, however, that in the near future, Americans will not have the capabilities to deal with this new technological age. More importantly, it is inevitable that we will not have the ability to make further strides in essential areas, because of the lack of education we are providing to the "America of Tomorrow."

Last April, the President's Commission on Excellence in Education presented their report to the President and the American public. What they found, and what many Americans are feeling today are mirror images of each other. There is no doubt in my mind, that we must address the current educational problems facing us. We need to act promptly to improve the quality of education that our children receive. While we were focusing on questions dealing with nuclear arms and a poor economy, the subject of education has slipped away from our grasp. It is now the time to deal with this crisis. If we ignore it any longer, our place as the leader of the free world, will surely be jeopardized.

I believe few things are more important than a good education. Because of education, this country has made great strides over the course of our 200 years. As a nation we are inarguably better than we were 100 years, 50 years ago, or even 10 years ago. However, as one education analyst so vividly stated:

> For the first time in the history of our country, the educational skills of one generation will not surpass, will not equal, will not even approach those of their parents.

The average graduate of our schools and colleges today is not as well educated as the average graduate 25 or 35 years ago. What makes this fact more important is that 25 or 35 years ago, a much smaller proportion of students completed high school and college.

Considering America's reputation for excellence in so many areas, these facts on education may seem hard to believe. The Commission's report, however, points out many important things. Of the 250 million people living in America today, 23 million adults, or one-tenth of the population, are functionally illiterate in reading, writing, and comprehension. This is supplemented by the fact that over the last 20 years the average combined SAT score had dropped 90 points. Although there was a slight increase in the scores last year, that increase will have to be repeated for more than a decade before we achieve the levels of the mid-sixties again.

If we examine the statistics further, we are hit by an alarming fact. The average achievement of high school students on most standardized tests is lower today than 26 years ago when Sputnik was launched. If we as a nation were concerned in 1957 with falling behind the Russians, we should be nothing less than alarmed with these figures today.

If we try to determine the source of the decline in our schools, we can find many reasons for the deterioration. Our children, in comparison to students in other countries, spend less time in school. Furthermore, American children spend less time learning than do their peers in foreign countries. In England and other industrialized nations, it is not unusual for academic high school students to spend 8 hours a day at school, 220 days per year. In the United States by contrast, the typical school day lasts for 6 hours and the school year is only 180 days.

While in school, fewer than 1 in 10 American students now study physics. Only 16 percent take 1 year of high school chemistry, while fewer than one-half of the Nation's public schools require more than a year of science and mathematics for graduation.

Japan, on the other hand, with a population only about half the size of ours, graduates from its universities more engineers than we do. In Japan, specialized study of mathematics, biology, and physics start in the sixth grade. In the U.S.S.R. Soviet students learn the basic concepts of algebra and geometry in elementary school; they get 4 additional years of mathematics in high school.

The next problem that we face is the quality of teachers that are in the Nation's classrooms. If we do not have top-notch teachers to educate our children, how can we expect them to learn? There are too many teachers who have been drawn from the bottom quarter of graduating high school and college classes. In addition, many teachers who instruct in specialized areas, are not qualified to teach that subject; and of those who are, many have been certified on an emergency basis.

The underlying reason for such mediocre teaching in the classroom is directly related to the salary we pay our teachers. The average wage after 12 years of experience is ony $17,000 and many teachers are required to supplement their income with part-time and summer employment. I honestly wonder how many of us, here in Congress, would run for office if our salary were only $17,000 to $20,000.

It is also imperative that schools start expecting students to perform at higher levels of excellence. Too many people feel that education means doing the minimum work necessary for the moment, and then coasting through life on knowledge acquired during the first 20 years. We must expect schools to have genuinely high standards rather than minimum ones; along with parental support to encourage their children to make the most of their talents and abilities.

Mr. Speaker, I maintain that we are facing a national dilemma. America must address their crisis. The Federal Government has a distinct responsibility to all students to insure that they receive a quality education, so that they may successfully take on the responsibility as the future leaders of this great Nation. The President feels that this can be achieved by "welcoming God back into our schools and setting an example for children by striving to abide by His Ten Commandments and the Golden Rule." However, as the wise gentleman from Texas (Mr. WRIGHT) said, "We can not just pray for better schools; we must be willing to pay for better schools."

The time has now come for those of us in Congress to face this problem and confront it head on. We have let it slip too far out of hand. The only way to overcome this disasterous decline in our educational system is to have a discussion or forum, on the national level, addressing this pressing issue. We need to give our undivided attention to finding a solution. The Congress has debated nuclear arms, Central America, and crime, but we have yet to devote time to the subject of education. It seems to me that if we want to continue being the great Nation that we are, now is the time to address this issue, and dispense with the mediocrity that plagues our Nation's classrooms.●

OVERSEAS AG CONSULTING GROWS DESPITE WEAK WORLD ECONOMY

HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. STENHOLM. Mr. Speaker, in a period when the importance of agricultural exports continue to assume tremendous importance to the American agricultural producer and virtually all segments of the American economy, the role of private agricultural consultants in expanding foreign commodity sales is often overlooked.

In recognition of the contributions made by members of the American Society of Agricultural Consultants, I submit for my colleagues' perusal the following article from that group's May 1983 newsletter:

OVERSEAS AG CONSULTING GROWS DESPITE WEAK WORLD ECONOMY

The leadership role of U.S. agricultural consultants in developing food production and distribution systems throughout the world has come into sharp focus in a survey recently conducted by the American Society of Agricultural Consultants (ASAC). Society members reported consulting assignments in forty-five countries around the world, covering 115 different development projects. U.S. exports could increase by as much as $420 million in goods and services necessary to support the projects underway with U.S. private agricultural consulting assistance.

The ability of U.S. agricultural consultants to successfully translate management and technology into efficient food supply systems was an important factor in the strong demand for their services, despite the continuing weakness of the world economy and intense competition from other nations' service industries. Six times as many respondents to the ASAC survey reported increases in overseas business in the past twelve months as reported decreases.

Although substantial gains were registered in foreign consulting assignments by the U.S. industry, ASAC members reported several obstacles to further increases in overseas projects. A number of potential U.S. consulting assignments were lost to government-backed competition from members of the European Community and eastern bloc nations. EC and eastern bloc nations provide a variety of government assistance in the form of subsidies or low cost financing to service industries competing for foreign business. A number of U.S. government agencies and the Congress have recently begun to investigate the effect on the U.S. economy of service business lost to U.S. firms by subsidized foreign competition.

The potential value of exports resulting from U.S. consulting assignments abroad rose by $1.6 million per consultant between 1982 and 1983 according to the ASAC survey. Each U.S. consultant was involved in development projects having an average annual potential of $10.2 million dollars in U.S. exports. This includes the actual business services provided, and the value of the construction, maintenance and supply equipment, as well as the breeding stock feed grains and other agricultural products needed to successfully operate modern food and fiber systems, which could be provided by other U.S. firms. The multiplier effect of agricultural consulting is often many times the value of the basic services provided, as foreign buyers generally turn to the country which conducted the feasibility studies for assistance with the construction, and maintenance of the project.

The 1983 ASAC survey also indicates the growing private sector role of foreign and U.S. agribusiness in world food development as government budgets are strained and nationally-financed projects are delayed or cancelled. In the past year, 60 percent of the consulting assignments reported were sponsored by private firms—39 percent by foreign businesses, and 21 percent by American firms. Reported U.S. government sponsorship of foreign assignments using private U.S. agricultural consultants rose to 12 percent of the total while foreign government sponsorship was 28 percent according to the survey.

Africa continues to be the leading market for U.S. agricultural consultants according to the survey, followed by Asia and the Far East, Europe, other North American countries, the Middle East, Latin America, the Caribbean and the South Pacific.

In addition to subsidized foreign competition, agricultural consultants often cited weak world economic conditions as a major factor in keeping business from growing faster. Many noted that currency devaluations around the world had affected their business, while others indicated that decreasing foreign government development budgets and lack of financing proved to be obstacles. However, many consultants told ASAC that the demand for agricultural development services remains strong. Declining oil prices and continuing need for foreign nations to learn how to turn U.S. agricultural technology into bottom line performance were often cited as signs of future increases in U.S. agricultural consulting overseas.●

NATURAL GAS PRICES: UP OR DOWN?

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. LAFALCE. Mr. Speaker, within the past 3 weeks western New Yorkers welcomed a natural gas price decrease and bemoaned projections of continued skyrocketing natural gas prices.

National Fuel of Buffalo, N.Y., announced a price reduction of 4.3 percent for our fall and winter gas bills. But 2 weeks later FERC Commissioner David Hughes, speaking at a workshop sponsored by the Niagara Frontier

Consumers Association, predicted that natural gas prices would increase as much as 40 percent.

Mr. Hughes added that his projections assumed that Congress would not act to protect consumers, and lower natural gas prices.

These mixed signals to western New Yorkers should send a clear signal to Congress: We are fast approaching the deadline for congressional action if we are going to help consumers in the 1982-83 heating season. The time to act is now.

Last year, western New Yorkers' gas bills increased 35 percent despite the unusually mild winter. We simply cannot tolerate additional price hikes in line with those projected by Mr. Hughes. Another 35 percent coupled with a normal western New York winter would be absolutely devastating.

At this point, I submit an article appearing in the Buffalo News detailing Mr. Hughes' address be printed in the RECORD.

The article follows:

[From the Buffalo News, Sept. 16, 1983]

ENERGY PANELIST PREDICTS HIKE OF 40 PERCENT IN PRICE OF NATURAL GAS

(By Michelle Williams)

A member of the Federal Energy Regulatory Commission said Thursday that skyrocketing natural-gas prices will take a toll on consumers for the second consecutive winter unless Congress provides assistance.

"It could be catastrophic," said David Hughes, who was in Buffalo to address a workshop at Buffalo State College sponsored by the Niagara Frontier Consumers Association and 20 other groups. "It could be disastrous."

Last winter, monthly gas bills leaped 30 to 40 percent throughout Western New York and the Northeast as a result of the controversial decontrol of natural-gas prices, and this winter should be no different, Mr. Hughes said.

Predicting a marked rise in gas prices, Mr. Hughes said, "The best evidence that I have seen is 35 to 40 percent," although they may be only 25 percent.

The Federal Energy Regulatory Commission oversees a number of energy-related issues including the decontrol of natural gas.

Mr. Hughes said consumers should urge lawmakers to assist in alleviating the strain that gas decontrol is causing. He also suggested the implementation of "social policies" that would aid consumers unable to meet the rising costs.

During an hourlong address before a group of 75 persons—including utility company representatives, consumer advocates and representatives from federal, state and local government agencies—Mr. Hughes discussed the role of federal regulatory policy making and its impact at the local level.

He said consumers are able to make an impact in policy-making matters and stressed the importance of consumers keeping informed and banding together.

"It is so important that you build coalitions," he said.

The address was followed by three workshops on rate setting and intervention, the divestiture of American Telephone & Telegraph Co. and energy-conservation education.●

BRING THE BREEDER TO A VOTE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. OTTINGER. Mr. Speaker, yesterday, within the short span of 8 hours, I and several of my colleagues collected the signatures of more than 120 Members of this body requesting the Rules Committee to allow a vote on the Clinch River Breeder Reactor project when the supplemental appropriations bill and the continuing resolution comes to the floor. These Members, some of whom have supported the Clinch River project in the past, recognize the importance of letting the House work its will on this complex and controversial issue.

This overwhelming show of support was found in a deep concern that proponents of the project plan to attach a new financing scheme to the supplemental or continuing appropriations bill in the Senate in an effort to avoid a vote in the House. This is totally unacceptable and circumvents the expressed will of the House to follow proper legislative procedures.

Last December, as part of the fiscal year 1983 continuing resolution, Congress directed the administration to develop a plan that "would reduce Federal budget requirements" for the Clinch River breeder reactor project. The requirement for a cost-sharing plan was part of a compromise which permitted Clinch River funding despite a vote in the House to terminate the project. In May of this year, the House voted 388 to 1 to prohibit further funding until an acceptable cost-sharing plan had been enacted.

The administration produced a plan, but it was hardly what Congess asked for. Recent analyses performed by the Congressional Budget Office, the General Accounting Office and the Congressional Research Service reveal that it is nothing more than a gold-plated, Government guaranteed, no-risk tax shelter.

Congress cannot allow this plan to be pushed through by some parliamentary sleight-of-hand. We must be allowed to vote so that we are not foreclosed in a late-night deal on the eve of the new fiscal year.

Mr. Speaker, I have attached a copy of the letter sent to the Rules Committee, with a list of the Members who signed the amendment, and an outline of the legislative strategy that appeared in a publication of the American Nuclear Society.

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 21, 1983.

Hon. CLAUDE PEPPER,
Chairman, Committee on Rules,
Washington, D.C.

DEAR MR. CHAIRMAN: We are writing to request that the Rules Committee make in order an amendment to the resolution for continuing appropriations for Fiscal Year 1984 and the supplement appropriations bill for Fiscal Year 1984 regarding the Clinch River Breeder Reactor. Specifically, the amendment would prohibit the expenditure of any funds for the continuation of the Clinch River Breeder Reactor Project or for the implementation of an alternative financing arrangement unless the Congress explicitly authorizes funds for that purpose.

The purpose of the amendment is to implement the intent of the Brown-Schneider language that was approved by the Committee on Science and Technology and overwhelmingly approved by the House during consideration of the DOE authorization bill (H.R. 2587) on May 12. The Brown-Schneider amendment was intended to bar further spending for the Clinch River Project until the authorizing committees had the opportunity to review an alternate financing proposal from the Department of Energy and until the House had the opportunity to debate and vote on the measure.

We are now nine days away from the end of this fiscal year and legislation has not yet been introduced on the financing plan, much less reported by the appropriate legislative committees. The proposal submitted to Congress on August 1 by Secretary of Energy Donald P. Hodel raises serious concerns and does not meet the requirement reached by conferees on FY 1983 continuing resolution that the project's impact on the Federal budget be reduced. In fact, a recent Congressional Budget Office analysis of the financing scheme states that the plan will cost the Treasury more over the life of the project than if the project were directly funded by the government.

Our request is made to you because of our concern that the financing scheme will be attached to the continuing or supplemental appropriations bill in the Senate. We call your attention to the article on legislative strategy for the financing plan that appeared in a recent copy of "Nuclear Report", a publication of the American Nuclear Society. In addition, in his letter to Speaker O'Neill proposing the plan, Secretary Hodel spoke of working to develop "appropriations language" to fund the project. We are concerned that the House will not have another opportunity to work its will if this strategy is followed.

We believe our amendment is consistent with the intent of the continuing resolution adopted last year and with the Brown-Schneider amendment adopted by the House this year.

Thank you for your consideration of our request.

Sincerely.

Tom Harkin, Richard Ottinger, Rick Boucher, Larry Coughlin, Howard Wolpe, Stan Lundine, George Brown, Claudine Schneider.

AMENDMENT TO H.J. RES. — (CONTINUING APPROPRIATIONS RESOLUTION) OFFERED BY MR. COUGHLIN

At the end of the bill, add the following new section:

SEC. 111. No part of any appropriation contained in this Act may be obligated or expended for the continuation of the Clinch River Breeder Reactor Project or, except to the extent specifically authorized in legislation hereafter enacted, for the implementation of an alternative financing arrangement with respect to such Project.

NUCLEAR REPORT, VOL. VI, NO. 7, AUGUST 4, 1983

Hodel sent the CRBR alternative financial proposal to Capitol Hill on August 1, in time for it to be available to all Members of Congress, giving them an opportunity to discuss it with their constituents during the summer congressional recess, which begins this week and ends after Labor Day. (See *NR* of July 6 for a more detailed discussion of the proposal). The current strategy is to have the plan before the Congress for a suitable period, with public hearings on it scheduled for the middle of September. The proposal's legislative vehicle will be the continuing resolution to be prepared by the appropriations committees and submitted during the last few days of this fiscal year (before October 1) to appropriate FY-1984 money for ongoing programs not covered by previously enacted appropriations bills. A full appropriation of about $1.4 billion to cover seven years of construction (to project completion) will be offered in the continuing resolution. The CRBR item, most probably, will first be voted up or down in the Senate, where a scant majority in favor of project completion is believed to exist. Such a maneuver could seek to avoid a vote in the House, where "closed" rules often preclude votes on individual items in continuing resolutions.●

SCHOOL FACILITIES CHILD CARE ACT

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mrs. SCHROEDER. Mr. Speaker, I am proud to introduce the School Facilities Child Care Act today in the House because it is an important women's issue, children's issue, and family issue.

Women work out of economic necessity. If women are married, their income substantially contributes to the economic well-being of the family. If they are a single parent, their paycheck is the economic well-being of the family. Adequate day care is a crucial support service for working women. Often overlooked are services for the 6 million children between the ages of 6 and 13 who take care of themselves when they return home from school—the "latchkey" children.

The bill I am introducing in the House and that was introduced in the Senate in June is a cost-effective, commonsense approach to this growing problem. Basically, the bill directs HHS to make grants to public agencies and private nonprofits for child care in public school facilities. The community decides on the program based on their needs.

There are many of these programs already existing. There are approximately 125 programs in 33 States. In Denver, we have had tremendous success with an afterschool program in Gilpin School, a public school. It is a self-supporting program with a high degree of parental involvement. Here in the Washington, D.C., area, Fairfax and Arlington counties have had an active aftercare program.

The money in this legislation, $15 million each year for 3 years, would go to those communities who wanted to start similar programs. It promotes grassroots activity instigated and administered by parent or community groups.

I am also proud to say that in this proposal no child would be turned away because he or she are too poor to participate. The legislation requires that each proposal include a sliding fee scale. This is extremely important for families who earn less than $10,000 per year. These are families who hardly have any child care options open to them. In fact, CBO estimated that only 7 percent of families in this category were able to take advantage of any of the child care tax credits in the law.

Working parents need more child care options. I think this bill goes a long way toward expanding these options.●

SALUTE TO DENISE GEORGES AND LITO VALLS

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. DE LUGO. Mr. Speaker, the most recent edition of the National Parks magazine features the U.S. Virgin Islands, where we are proud to have some of the most beautiful parks in the world. The magazine also features an article on two St. Johnians who are tremendous assets to the NPS and veritable experts on the history of the islands and the flora and fauna of the NPS land. A tour under their direction is an unforgetable experience that brings the park to life with their descriptions of the history, customs, and heritage of our islands. The NPS is rightly proud of their services, and I am pleased that Denise Georges and my very good friend Lito Valls have been singled out for this well-deserved recognition in the National Parks magazine.

I would like to share this article with my colleagues in the House.

CULTURAL AMBASSADORS IN VIRGIN ISLANDS NATIONAL PARK

(By Susan Vreeland)

It's not just the tropical flavor of the natural environment that makes Virgin Islands National Park so special. Its Caribbean culture reflects a vastly different history from that of the fifty states. The job of park ranger becomes more expansive here. Beyond sharing natural history and teaching respect for the environment, national park interpreters give visitors an insight into a history marked by slave revolts and plantation economy, a culture enriched by island Creole and carnival that seems exotic to most Americans.

It takes special people to transmit this cultural and linguistic heritage lightly, comfortably, and meaningfully. Virgin Islands National Park has two especially gifted people who do just that. Visitors come away having learned and grown, but without feeling that they've been to school.

Denise Georges is not so much a lecturing ranger as an island spirit, dancing her trail of visitors through the bush. As she picks her way through the extraordinary foliage, her speech skips back and forth between melodic island Creole and impeccable English. This bilingualism reflects her dual role: Georges the teacher, instructing visitors how to avoid dangers like the poisonous manchineel tree, jack spaniard wasps, and the stinging nettle; and Georges the island native, proudly sharing, Caribbean lore and the islanders' simple yet elegant solutions to the problems of survival.

She explains that at this remote end of the U.S. supply line, West Indians have had to be creative in using what they had available to them. For example, dried anthurium leaves make excellent scouring pads, and stinging nettles make a hair rinse. Strangler fig leaves used to be used as stationery for love letters, and its blossoms provide glue for caulking boats. Natural perfumes of bay rum, wild cinnamon, and hog plum abound in the park.

Drawing from her childhood, Georges tells how West Indian children tease each other with friction-heated scorcher beans from the prickly pod on the nicker tree and how they make flutes from papaya stems and maracas from gourds of the calabash tree. To a West Indian child, mango seeds are really doll's eyes.

Slipping into Creole, Georges tells of the island's herbal medicines: "When yoh have a little baby and say he belly gripin', den yoh use da soursop tea wit da natural vanilla essence for to sweeten it and den he sleep so quiet." Spontaneous and engaging in her relations with visitors, her use of Creole delights and her warmth eases the racial gap. She teases white visitors about the "tourist nose tree," which, she says, has bark that turns red and peels, "just like a tourist's nose." After a campfire talk, Georges is apt to say, "Before we gone, I want all a yoh to meet me mudda." She puts her arms around a middle-aged white woman, a dear friend and neighbor. Some visitors, both captivated and perplexed, sense the joke from the laughter of others.

Georges' duties take her on seashore walks where she leads visitors wading far out into a shallow bay to discover marine life. She also instructs snorkelers and often dives deep to bring a sea biscuit or sea urchin up to the surface. She takes visitors to places where they might see a moray eel fighting with its mortal enemy, the octopus.

At campfire talks Georges sometimes brings her nine-foot stilts, for she is a much admired moko jumbee dancer on the island. Like most Caribbean islands, St. John has a carnival, this one celebrating the emancipation of slaves on July 3, 1848. Capitalizing on U.S. Independence Day, at 4:30 a.m. on July 4, all St. Johnians come outside dressed in pajamas and diapers and other crazy attire for j'ouvert (from the French jour ouvert, opening or break of day). Everyone dances around town until sunrise, when the parade begins and moko jumbee dancers get a chance to show off their skill.

The tradition of stilt dancing, Georges says, comes from West Africa at the time of harvest, as a celebration to the gods. Dancers representing medicine men (moko) or spirits of natural elements and ghosts (jumbee) dressed in gala costumes, skip, hop, and do acrobatics—all high in the air. The stilts support only the arch of the foot, and toes and heels are unsupported. Only in 1978 did a few women start performing as moko jumbees. Now Georges is learning to "play the pans" (steel drums); she is the first to combine that with stilt dancing.

Although Georges' effortless blending of languages and culture may exemplify the island's modern times, Ranger Lito Valls gives it historical perspective. No one is better suited to do this, for Valls is known to St. Johnians as the island historian. He maintains a 3,000-volume library on natural and cultural Virgin Islands history at the national park's visitor center in Cruz Bay. Researching local and national archives, interviewing islanders, and exploring old ruins, he has added immensely to the store of Virgin Islands history.

Much information comes from periods long before the United States purchased the islands in 1917. "Danish records were excellent and thorough," Valls says. "On a plantation, if a child even fell down and broke his leg, it was recorded in the plantation log." A philosopher at heart, Valls' historical tales reflect on human follies and achievements that transcend cultural barriers.

On the park's popular historical tour, Ranger Valls takes visitors in an open-air safari bus to the seldom-visited eastern end of the island. En route, island history unrolls like a brightly colored cloth on which cultural patterns mingle. "The first sugar plantation slaves were white—exiles from Danish prisons—and the most wealthy planter was a man of color," he explains.

Valls points out the spot where the first slave insurrection started at Coral Bay in 1733. "The insurrection occurred," he explains, "not because of the drought in that year and the subsequent lack of food, not because of hurricanes, and not even because slavery was reprehensible, but because the slaves had been nobility in Africa and were used to having slaves themselves."

At the Moravian church he stops to share his personal appreciation of the humanitarian impulses of significant island figures. The Moravians—the first Protestants to consider that blacks had souls to save—sent two missionaries to St. John in 1732. One of the converts, Brother Cornelius, a slave, taught himself engineering, architecture, and masonry in order to build the Moravian church still being used today. His own language being Dutch Creole, Brother Cornelius learned English, Danish, Dutch, and German so he could preach in whatever language was necessary.

Slaves on the islands had free time on Saturday nights, Sunday afternoons, and moonlit nights. Brother Cornelius worked during these times to buy the freedom of his mother, his wife, and his eight children before he bought his own. He was instrumental in bringing about the translation of the New Testament into Dutch Creole as well as establishing, in 1782, a free public education system, the first in the New World. It was open first for blacks and only the following year for whites, who had other educational advantages. "They don't make them like Cornelius anymore!" Valls remarks.

Valls tells a story about another historical figure, one who started life as an "outside child"—the gentle Creole term for illegitimate child. This child's mother had been steered into marrying an older planter on St. Croix, who was later granted a divorce from her. However, she was not considered divorced and therefore could never remarry. But she did bear a child out of wedlock. At fourteen, her son was successfully managing two businesses; and when his financial aptitude was discovered, he was sent to New York for education. His name? Alexander Hamilton, our first Secretary of the Treasury.

One of Valls' major contributions is his island Creole dictionary, What a Pisturkle!—a title that, like many island phrases, needs the dictionary for explanation. "Pistarkle" means rampant confusion, and, to the first-time vistor, that might accurately describe the island dialect. But in ruraveling the origins of the language, we discover island attitudes and character.

Creole, Valls explains, comes from the Spanish criar, meaning "to bring up or to rear." The term was used especially in reference to children born in the New World, with the connotation that they were not quite authentic or pure. Later, Creole came to mean mixed blood.

"While English is the language of our heads, Creole is the language of our hearts," Valls explains. The dialect makes this park piquantly different from any other in the National Park System. Park staff use it. Menus use it. "Kribishee with jumbee parasols" is shrimp with mushrooms. Island fauna and flora reflect it. The "monkey-no-climb" is a tree with sharp thorns on its trunk; the "woman tongue" is a tree with dry pods that rattle incessantly.

"One one" or one by one and little by little, stateside visitors undergo a "mine tu'n"—a mind turn, or a change of mind—and drop their "alien talk" to pick up Creole phrases, but not without curious questions. At a campfire talk, when asked what language is spoken on St. John, Georges allowed a pregnant pause and then quietly said, "English"—cementing the link between islanders and continentals.

Both Georges and Valls are cultural ambassadors who serve with love for their visitors, their island's natural gifts, and their people's traditions. Together they make the Virgin Islands National Park experience instructive, respectful, and as warm as the tropic breeze that plays over the islands.●

FORMER NIH DIRECTOR OPPOSES H.R. 2350

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 22, 1983

● Mr. MADIGAN. Mr. Speaker, on September 14, 1983, my colleague RICHARD SHELBY of Alabama placed in the RECORD a substitute amendment which he will offer with JIM BROYHILL and myself when H.R. 2350 is considered by the House. The Shelby substitute reauthorizes for 3 fiscal years the expiring authorities of the National Institutes of Health (HIH), creates a new National Institute of Arthritis and Musculoskeletal Disease and 25 centers for research in disease prevention and health promotion. Funding levels in the substitute are exactly the same as those in H.R. 2350 and represent increases over the 1983 appropriations of 15 percent except for the cancer authority which would receive a 35-percent increase.

Unlike the Waxman bill, the Shelby substitute is free of the highly detailed and restrictive mandates, line item authorizations for research in specific disease areas, and significant changes to NIH's organizational structure and administrative framework. In offering this substitute we believe we are giving NIH the vote of confidence it justly deserves. The substitute provides a funding increase which insures the continued growth of our Nation's biomedical research endeavors while maintaining the flexibility dictated by the scientific environment.

Recently, I received a letter of opposition of H.R. 2350 from one scientist who knows directly the detrimental impact of this legislation. Dr. James Shannon, the Director of NIH from 1955 through 1968, expressed his concerns on this legislation most eloquently. I want to share this letter with my colleagues.

The letter follows:

PORTLAND, OREG.,
September 9, 1983.

Hon. EDWARD R. MADIGAN,
Subcommittee on Health and the Environment, Committee on Energy and Commerce, U.S. House of Representatives, Washington, D.C.

DEAR MR. MADIGAN: When in Washington this week at the invitation of the National Academy of Sciences' Institute of Medicine to discuss that organization's ongoing study on the structure of the NIH, former colleagues brought me up-to-date on the status of legislation related to the NIH. Specifically, I was able to review proposals now before the Congress and to read the debate that occurred in the House on July 25, 1983, as it appeared in the Congressional Record. When secretarial assistance—a luxury not regularly available to me these days—was offered, I decided to communicate my views on this matter to you.

Let me first of all assure you of my enormous respect for the Congress of the United States. During my thirteen years as Director, NIH, under Presidents Eisenhower, Kennedy, and Johnson, I invariably found the legislature warmly receptive and supportive. There was never a doubt in my mind that members of both sides of the aisle in both the House and Senate were deeply committed to the programs to which they had given such major impetus and which they had entrusted to the stewardship of the NIH. Members were thoroughly sympathetic and responsive to the problems that the NIH, from time to time, brought to their attention. The Congress as a whole deserves enormous credit for the very significant achievements of the NIH over the last 35 years.

Against this background, I regret that I must say that the revisions of the Public Health Service Act proposed in H.R. 2350, would be highly distressing to me if I were still the Director, NIH. Moreover, their justification on the basis of the present size and complexity of the operation is not persuasive.

The last appropriation request in whose development I participated before my retirement in the summer of 1968 was that for FY 1969; it resulted in an appropriation of about $1.1 billion. In terms of its purchasing power, the current year's appropriation of $4.004 billion is only about 30% larger than that for FY 1969. Compared to the 1150% increase in appropriations, corrected for inflation, that occurred between FYs 1956 to 1969, the additional growth of 30% over the following 15 years strikes me as relatively unimpressive, hardly warranting very major revisions in the statutory authorities that served so effectively during the period of rapid growth.

Despite the relative fiscal stability of the last fifteen years, it should be noted that biomedical science has advanced briskly along a very broad front. Understanding of biological phenomena has deepended significantly, opportunities—the leads and clues—for progress have increased many fold, and the complex nature of human disease has become increasingly apparent. This being the case, the effective use of federal funds would clearly seem to require that the most sophisticated, objective, and discerning scientific expertise be brought to bear upon funding allocation decisions and that federal managers be allowed to exercise broad judgment in the administration of programs.

In my opinion, the effect of H.R. 2350 would be quite contrary to the needs of the times. For expert technical decisions by the agency with the assistance of its advisory apparatus, the bill proposes highly specific Congressional mandates with respect to scientific priorities; and it limits, rather than encourages, administrative and managerial discretion.

In these times of rapid scientific advance, when significant developments are as likely as not to arise from completely unexpected quarters and when the discreteness of time-honored categories such as cancer and arthritis is becoming blunted, the most important role for the Congress, in my opinion, is to review—frequently, carefully, and minutely—the processes used by the NIH in setting its priorities, making its program decisions, and selecting its projects. If these processes are designed and operated so that the highest degree of competence, objectivity, and fairness is brought to bear upon the identification of targets and the allocation of funds, I am convinced that the rate of progress against disease will be maximized and that the scientific community of the country will be reasonably well satisfied. By contrast, when any categorical or subcategorical group gains special advantage as the result of a political process rather than solid scientific justification, scientists will become disillusioned and escalate unreasonable and self-serving demands.

I continue to believe that the statutory authorities under which the NIH operated from 1944 until passage of the National Cancer Act of 1971 are the most appropriate for a federally funded national research effort in biomedicine. As a corollary, I am convinced that changes subsequent to 1971 have not served the program well. Moreover, these have made the Congress much more vulnerable to special pleadings that it must find difficult both to evaluate and to ignore. In the long run, however, the accumulation of ad hoc responses to such pleadings, no matter how humanely motivated, will turn the nation's biomedical research enterprise into a shambles and thereby deny the American people the outcomes they so strongly want and deserve.

The views expressed in this letter are, I believe, entirely consistent with those I expressed in 1971 in a letter to Dr. Holly Smith that was later published in the Senate Hearing Record on the Conquest of Cancer Act, 1971. I would be happy to expand on them either in person or by letter, if such would be helpful.

I have sent the same letter to Representative Waxman.

Sincerely,

JAMES A. SHANNON.●
